

LilyPond

The music typesetter

Snippets

The LilyPond development team

This document shows a selected set of LilyPond snippets from the LilyPond Wiki (<https://wiki.lilypond.community>). It is in the public domain.

For more information about how this manual fits with the other documentation, or to read this manual in other formats, see Section “Manuals” in *General Information*.

If you are missing any manuals, the complete documentation can be found at <https://lilypond.org/>.

This document has been placed in the public domain.

For LilyPond version 2.27.0

Table of Contents

Preface	1
----------------------	----------

Musical notation

1 Pitches	5
Adding ambitus per voice	5
Adding an ottava marking to a single voice	5
Aiken head thin variant noteheads	6
Altering the length of beamed stems	6
Ambitus	7
Ambitus after key signature	7
Ambitus with multiple voices	8
Applying note head styles depending on the step of the scale	8
Automatically changing the stem direction of the middle note based on the melody	9
Changing ottava text	10
Changing the ambitus gap	10
Changing the interval of lines on the stave	11
Clefs can be transposed by arbitrary amounts	12
Coloring notes depending on their pitch	12
Creating a sequence of notes on various pitches	13
Creating custom key signatures	13
Direction of merged ‘fa’ shape note heads	14
Force a cancellation natural before accidentals	14
Forcing a clef symbol to be displayed	15
Generating random notes	15
Hiding accidentals on tied notes at the start of a new system	16
Keep change clefs full-sized	16
Makam example	16
Modifying the ottava spanner slope	17
Non-traditional key signatures	17
Numbers as easy note heads	18
Orchestra, choir and piano template	19
Preventing extra naturals from being automatically added	24
Preventing natural signs from being printed when the key signature changes	24
Quoting another voice with transposition	24
Separating key cancellations from key signature changes	25
Transposing pitches with minimum accidentals (“smart” transpose)	26
Turkish Makam example	27
Tweaking clef properties	28
Using \autoChange with more than one voice	29
2 Rhythms	31
Adding beams, slurs, ties, etc., when using tuplet and non-tuplet rhythms	31
Adding drum parts	31
Adjusting grace note spacing	32
Aligning bar numbers	32

Alternative breve notes	33
Appoggiatura or grace note before a bar line	34
Automatic beam subdivisions	34
Automatically change durations	35
Beam endings in Score context	36
Beam nibs	37
Beams across line breaks	38
Changing beam knee gap	39
Changing form of multi-measure rests	39
Changing the number of augmentation dots per note	39
Changing the tempo without a metronome mark	40
Changing the tuplet number	40
Changing time signatures inside a polymetric section using <code>\scaleDurations</code>	40
Chant or psalm notation	42
Complex time signatures	42
Conducting signs, measure grouping signs	42
Controlling tuplet bracket visibility	43
Cow and ride bell example	44
Creating metronome marks in markup mode	45
Engraving ties manually	45
Engraving tremolos with floating beams	46
Entering several tuplets using only one <code>\tuplet</code> command	47
Forcing rehearsal marks to start from a given letter or number	47
Generating custom flags	48
Guitar strum rhythms	49
Heavily customized polymetric time signatures	50
High and low woodblock example	51
Making an object invisible using <code>\hide</code>	51
Making slurs with complex dash structure	52
Manually controlling beam positions	53
Merging multi-measure rests in a polyphonic part	53
Modifying tuplet bracket length	53
Moving dotted notes in polyphony	54
Multi-measure rest length control	54
Multi-measure rest markup	55
Non-default tuplet numbers	55
Numbering single measure rests	56
Partcombine and <code>\autoBeamOff</code>	57
Percussion example	57
Permitting line breaks within beamed tuplets	59
Positioning grace note beams at the height of normal note beams	60
Positioning grace notes with floating space	60
Positioning multi-measure rests	61
Positioning opposing fermatas on a bar line	62
Preventing final mark from removing final tuplet	62
Printing bar numbers at regular intervals	63
Printing bar numbers for broken measures	63
Printing bar numbers inside boxes or circles	64
Printing bar numbers using <code>modulo-bar-number-visible</code>	65
Printing bar numbers with changing regular intervals	65
Printing metronome and rehearsal marks below the staff	66
Printing music with different time signatures	66

Printing the bar number for the first measure	68
Printing tuplet brackets on the note head side	69
Redefining grace note global defaults	69
Removing bar numbers from a score	70
Rest styles	70
Reverting default beam endings	72
Rhythmic slashes	72
Skips in lyric mode	72
Skips in lyric mode (2)	73
Stemlets	73
Strict beat beaming	74
Subdividing beams	74
Tam-tam example	75
Tambourine example	76
Three-sided box	76
Time signature in brackets	77
Time signature in parentheses	77
Time signature printing only the numerator as a number (instead of the fraction)	78
Tweaking grace layout within music	78
User-defined time signatures	79
Using alternative flag styles	79
Using grace note slashes with normal heads	81
Using ties with arpeggios	81
 3 Expressive marks	 82
Adding parentheses around an expressive mark or chordal note	82
Adding timing marks to long glissandi	82
Adjusting slur positions vertically	82
Adjusting the shape of falls and doits	83
Aligning the ends of hairpins to NoteColumn directions	84
Alternative breve notes	84
Asymmetric slurs	84
Breathing signs	85
Broken crescendo hairpin	86
Caesura (“railtracks”) with fermata	86
Center text below hairpin dynamics	87
Changing text and spanner styles for text dynamics	88
Changing the appearance of a slur from solid to dotted or dashed	89
Changing the breath mark symbol	89
Changing the number of augmentation dots per note	89
Combining dynamics with markup texts	90
Combining dynamics with markup texts (2)	90
Contemporary glissando	91
Controlling spanner visibility after a line break	91
Controlling the placement of chord fingerings	92
Controlling the vertical ordering of scripts	92
Creating a delayed turn	93
Creating arpeggios across notes in different voices	94
Creating cross-staff arpeggios in a piano staff	94
Creating cross-staff arpeggios in other contexts	94
Creating double-digit fingerings	95

Creating slurs across voices	96
Creating text spanners	96
Dynamics spanner with custom text	97
Glissandi can skip grobs	98
Hairpins with different line styles	98
Hiding the extender line for text dynamics	98
Horizontally aligning custom dynamics like “più f”	99
Inserting a caesura	102
Laissez vibrer ties	102
Line arrows	103
Making slurs with complex dash structure	103
Modifying default values for articulation shorthand notation	104
Moving slur positions vertically	104
Moving the ends of hairpins	105
Positioning arpeggios	106
Positioning text markups inside slurs	106
Printing hairpins in various styles	107
Printing hairpins using <code>al niente</code> notation	107
Printing metronome and rehearsal marks below the staff	107
Setting hairpin behavior at bar lines	108
Setting the minimum length of hairpins	108
Showing the same articulation above and below a note or chord	109
Slanted parentheses around dynamics	109
Snap pizzicato (“Bartok” pizzicato)	110
Using <code>\arpeggioBracket</code> to make divisi more visible	110
Using a bracket to clarify divisi	111
Using a tick as the breath mark symbol	112
Using double slurs for legato chords	112
Using the <code>whiteout</code> property	112
Vertical line as a baroque articulation mark	113
Vertically aligning dynamics across multiple notes	113
4 Repeats	114
Changing the default bar lines	114
Controlling the appearance of tremolo slashes	114
Cross-staff tremolos	116
Engraving tremolos with floating beams	116
Isolated percent repeats	117
Measure counters	117
Percent repeat count visibility	118
Percent repeat counter	119
Positioning segno and coda (with line break)	119
Setting the double repeat default for <i>volte</i>	120
Shortening volta brackets	120
Unfolding tremolo repeats	121
Volta below chords	121
Volta brackets in multiple staves	122
Volta text markup using <code>repeatCommands</code>	123

5	Simultaneous notes	124
	Additional voices to avoid collisions	124
	Changing <code>\partCombine</code> texts	124
	Changing a single note's size in a chord	125
	Clusters	125
	Combining two parts on the same staff	126
	Displaying complex chords	127
	Forcing horizontal shift of notes	127
	Making an object invisible using <code>\hide</code>	128
	Moving dotted notes in polyphony	129
	Suppressing warnings for clashing note columns	129
	Two <code>\partCombine</code> pairs on one staff	129
6	Staff notation	132
	Adding ambitus per voice	132
	Adding an extra staff	132
	Adding an extra staff at a line break	133
	Adding indicators to staves which get split after a break	134
	Adding orchestral cues to a vocal score	138
	Alternative bar numbering	140
	Ambitus after key signature	141
	Changing the default bar lines	142
	Changing the number of lines in a staff	142
	Changing the staff size	143
	Creating blank staves	143
	Creating custom key signatures	145
	Cross-staff stems	146
	Display bracket with only one staff in a system	147
	Displaying a whole <code>GrandStaff</code> system if only one of its staves is alive	147
	Extending a trill spanner	149
	Extending glissandi across repeats	150
	Flat ties	151
	Forcing measure width to adapt to a metronome mark's width	153
	Glissandi can skip grobs	154
	Harmonizing bar line thickness for staves with different sizes	154
	Incipit	157
	Inserting score fragments above a staff, as markups	161
	Let <code>TabStaff</code> print the topmost string at bottom	162
	Letter tablature formatting	163
	Making glissandi breakable	163
	Making some staff lines thicker than the others	165
	Measure counters	165
	Mensurstriche layout (bar lines between the staves)	166
	Modifying the ottava spanner slope	166
	Nesting staves	167
	Non-traditional key signatures	168
	Orchestra, choir and piano template	169
	Print chord names with same root and different bass as slash and bass note	173
	Putting lyrics inside the staff	175
	Quoting another voice	175
	Quoting another voice with transposition	177

Removing brace on first line of piano score	177
Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff	178
Removing the first empty line	179
Setting system separators	180
Shape individual ties in chords	181
Tick bar lines	184
Time signature in brackets	184
Time signature in parentheses	184
Tweaking clef properties	185
Two \partCombine pairs on one staff	186
Use square bracket at the start of a staff group	188
Using \autoChange with more than one voice	188
Using mark lines in a Frenched score	189
Vertically aligned StaffGroups without connecting SystemStartBar	192
Volta below chords	198
Volta brackets in multiple staves	199
 7 Editorial annotations	 200
Adding fingerings to a score	200
Adding links to objects	200
Adding markups in a tablature	202
Allowing fingerings to be printed inside the staff	202
Alternative bar numbering	203
Analysis brackets above the staff	204
Analysis brackets with labels	205
Applying note head styles depending on the step of the scale	206
Blanking staff lines using the \whiteout command	207
Changing a single note's size in a chord	207
Changing the appearance of a slur from solid to dotted or dashed	207
Coloring notes depending on their pitch	208
Controlling the placement of chord fingerings	209
Creating a delayed turn	209
Creating blank staves	210
Creating double-digit fingerings	212
Default direction of stems on the center line of the staff	212
Different font size settings for instrumentName and shortInstrumentName	213
Drawing boxes around grobs	214
Drawing circles around note heads	215
Drawing circles around various objects	215
Embedding native PostScript in a \markup block	216
Generate special note head shapes	216
Grid lines: changing their appearance	217
Grid lines: emphasizing rhythms and notes synchronization	218
Hammer-on and pull-off	219
Hammer-on and pull-off using chords	219
Hammer-on and pull-off using voices	219
Making some staff lines thicker than the others	220
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	220
Measure counters	221
Measure spanner	222
Positioning fingering indications precisely	223

Positioning text markups inside slurs	224
Printing text from right to left	224
String number extender lines	224
Using the whiteout property	225
8 Text	226
Adding markups in a tablature	226
Adding the current date to a score	226
Adjusting vertical spacing of lyrics	227
Aligning and centering instrument names	227
Aligning syllables with melisma	229
Aligning text marks to notes	229
Blanking staff lines using the \whiteout command	230
Center text below hairpin dynamics	230
Changing ottava text	232
Changing the default text font family	232
Combining dynamics with markup texts	233
Combining dynamics with markup texts (2)	234
Combining two parts on the same staff	234
Creating text spanners	235
Demonstrating all \header fields	236
Embedding native PostScript in a \markup block	237
Formatting lyrics syllables	238
How to put ties between syllables in lyrics	238
Lyrics alignment	238
Markup list	239
Multi-measure rest markup	240
Of the ubiquity of markup objects	241
Outputting the version number	242
Piano template with centered lyrics	242
Printing marks on every staff	243
Printing text from right to left	243
Putting lyrics inside the staff	244
Slanted parentheses around dynamics	244
Stand-alone two-column markup	245
String number extender lines	245
Three-sided box	246
UTF-8	247
Vocal ensemble template with lyrics aligned below and above the staves	248
Volta text markup using repeatCommands	250

Specialist notation

9 Vocal music	253
Adding ambitus per voice	253
Adding indicators to staves which get split after a break	253
Adding orchestral cues to a vocal score	257
Adjusting vertical spacing of lyrics	259
Aligning syllables with melisma	259

Ambitus	260
Ambitus after key signature	261
Ambitus with multiple voices	261
Ancient notation template – modern transcription of Gregorian music	262
Anglican psalm template	262
Arranging separate lyrics on a single line	265
Changing stanza fonts	266
Chant or psalm notation	267
Forcing hyphens to be shown	267
Formatting lyrics syllables	268
How to put ties between syllables in lyrics	268
Hymn template	268
Lyrics alignment	270
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	271
Orchestra, choir and piano template	272
Piano template with melody and lyrics	277
Putting lyrics inside the staff	278
SATB choir template – four staves	278
Single-staff template with notes, lyrics, and chords	280
Single-staff template with notes, lyrics, chords, and frets	281
Single-staff template with notes and lyrics	282
Skips in lyric mode	282
Skips in lyric mode (2)	283
Using <code>\arpeggioBracket</code> to make divisi more visible	283
Using a bracket to clarify divisi	284
Using tags to produce mensural and modern music from the same source	284
Vertically aligning ossias and lyrics	287
Vertically aligning stanza numbers of different staves	288
Vertically centered common lyrics	289
Vocal ensemble template	290
Vocal ensemble template with automatic piano reduction	292
Vocal ensemble template with lyrics aligned below and above the staves	294
Vocal ensemble template with verse and refrain	296
10 Keyboard and other multi-staff instruments	299
Accordion register symbols	299
Changing the text for sustain markings	300
Clusters	300
Controlling the placement of chord fingerings	300
Creating slurs across voices	301
Cross-staff chords – beaming problems workaround	302
Cross-staff tremolos	303
Fine-tuning pedal brackets	303
Indicating cross-staff chords with a bracket	304
Jazz combo template	304
Laissez vibrer ties	310
Piano template (simple)	311
Piano template with centered lyrics	311
Piano template with melody and lyrics	312
Removing brace on first line of piano score	313
Using <code>\autoChange</code> with more than one voice	314

Vocal ensemble template with automatic piano reduction	315
11 Unfretted string instruments	318
Creating slurs across voices	318
Dotted harmonics	318
Snap pizzicato (“Bartok” pizzicato)	319
String quartet template (simple)	319
String quartet template with separate parts	320
12 Fretted string instruments	324
Adding fingerings to a score	324
Adding fingerings to tablatures	324
Adding markups in a tablature	324
Allowing fingerings to be printed inside the staff	325
Automatic fretboards barré	326
Changing fret orientations	326
Chord changes for fretboards	327
Chord glissando in tablature	328
Chords with stretched fingering for FretBoards and TabVoice	329
Controlling the placement of chord fingerings	329
Customizing fretboard fret diagrams	330
Customizing markup fret diagrams	331
Fingerings, string indications, and right-hand fingerings	333
Flamenco notation	333
Fret diagrams explained and developed	337
Fretboards alternate tables	344
Fretted-string harmonics in tablature	346
Guitar slides	347
Guitar strum rhythms	348
Hammer-on and pull-off	349
Hammer-on and pull-off using chords	349
Hammer-on and pull-off using voices	350
How to change fret diagram position	350
Jazz combo template	351
Laissez vibrer ties	357
Let TabStaff print the topmost string at bottom	358
Letter tablature formatting	359
Open-string harmonics in tablature	359
Placement of right-hand fingerings	361
Polyphony in tablature	362
Setting up predefined fretboards for other instruments	363
Slides in tablature	365
Stem and beam behavior in tablature	366
String number extender lines	366
13 Percussion	368
Adding drum parts	368
Cow and ride bell example	369
Heavily customized polymetric time signatures	369
High and low woodblock example	370

Jazz combo template	371
Percussion beaters	376
Percussion example	379
Printing music with different time signatures	381
Tam-tam example	383
Tambourine example	383
14 Wind instruments	385
Changing the size of woodwind diagrams	385
Fingering symbols for wind instruments	385
Flute slap notation	386
Graphical and text woodwind diagrams	386
Recorder fingering chart	387
Woodwind diagrams key lists	388
Woodwind diagrams listing	389
15 Chord notation	391
Adding a figured bass above or below the notes	391
Adding bar lines to ChordNames context	391
Adjusting figured bass alteration glyphs	392
Changing a single note's size in a chord	392
Changing chord separator	392
Changing the positions of figured bass alterations	393
Chord name exceptions	393
Chord name major7	394
Chord names alternative	394
Chords with stretched fingering for FretBoards and TabVoice	404
Clusters	405
Controlling the placement of chord fingerings	405
Cross-staff chords – beaming problems workaround	406
Customizing the chord grid style	407
Customizing the no-chord symbol	407
Displaying complex chords	408
Manually break figured bass extenders for only some numbers	408
Print chord names with same root and different bass as slash and bass note	409
Showing chords at changes	411
Simple lead sheet	412
Single-staff template with notes, lyrics, and chords	412
Single-staff template with notes, lyrics, chords, and frets	413
Single-staff template with notes and chords	414
Vertically centering paired figured bass extenders	415
Volta below chords	415
16 Contemporary music	417
Beam nibs	417
Broken crescendo hairpin	418
Changing time signatures inside a polymetric section using \scaleDurations	418
Clusters	420
Contemporary glissando	420
Flat ties	421

Flute slap notation	423
Heavily customized polymetric time signatures	424
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	425
Non-traditional key signatures	425
Printing music with different time signatures	426
Screech and Boink	428
Stemlets	430
17 Ancient notation	431
Adding a figured bass above or below the notes	431
Ancient fonts	431
Ancient notation template – modern transcription of Gregorian music	434
Ancient time signatures	435
Chant or psalm notation	435
Custodes	435
Incipit	436
Mensurstriche layout (bar lines between the staves)	441
Rest styles	441
Using tags to produce mensural and modern music from the same source	443
Vertical line as a baroque articulation mark	445
18 World music	446
Arabic improvisation	446
Makam example	446
Printing text from right to left	446
Turkish Makam example	447
Other collections	
19 Automatic notation	451
Automatic beam subdivisions	451
Forcing rehearsal marks to start from a given letter or number	451
Generating whole scores (also book parts) in Scheme without using the parser	452
Preventing extra naturals from being automatically added	454
Preventing natural signs from being printed when the key signature changes	454
Vocal ensemble template with automatic piano reduction	455
20 Breaks	458
Adding an extra staff at a line break	458
Positioning segno and coda (with line break)	459
Removing the first empty line	459
21 Connecting notes	461
Adding beams, slurs, ties, etc., when using tuplet and non-tuplet rhythms	461
Automatic beam subdivisions	461

Preface

This document shows a selected set of LilyPond snippets from the LilyPond Wiki (<https://wiki.lilypond.community>), the successor of the LilyPond Snippet Repository (LSR).

We would like to address many thanks to Sebastiano Vigna for maintaining the LSR and Jean Abou Samra for maintaining the LilyPond Wiki!

Please note that this document is not an exact subset of the LilyPond Wiki: some snippets come from the Documentation/snippets/new/ LilyPond sources directory, and snippets from the Wiki are converted by `convert-ly`, as the LilyPond Wiki is (mainly) based on a stable LilyPond version, and this document is for version 2.27.0.

Snippets are grouped by LilyPond Wiki categories (<https://wiki.lilypond.community/wiki/Special:Categories>), using the same chapter order as the Notation Reference (if possible). Snippets may be tagged with several categories, which means that they may appear multiple times in this document. Not all Wiki categories may be present here, though.

For all snippets, the indentation of staves is set to zero.

In the HTML version of this document, you can click on the file name or figure for each example to see the corresponding input file.

Musical notation

1 Pitches

See also Section “Pitches” in *Notation Reference*.

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice transposes the position of notes in all voices for the duration of the ottava bracket. If the octavation is only intended to apply to one voice, the *Ottava_spanner_engraver* should be moved to Voice context.

```
\layout {
  \context {
    \Staff
    \remove Ottava_spanner_engraver
  }
  \context {
    \Voice
    \consists Ottava_spanner_engraver
  }
}

{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\\
  {
```

```

r2.
\ottava -1
<b,,, b,,>4 ~ |
q2
\ottava 0
<c e>2
}
>>
}

```

Aiken head thin variant noteheads

Aiken head white notes get harder to read at smaller staff sizes, especially with ledger lines. Losing interior white space makes them appear as quarter notes.

```

\score {
{
\aikenHeads
c''2 a' c' a

% Switch to thin-variant noteheads
\set shapeNoteStyles = ##(doThin reThin miThin
                        faThin sol laThin tiThin)
c'' a' c' a
}
}

```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the beamed-lengths property of the details of the Stem. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```

\relative c'' {
\override Stem.details.beamed-lengths = #'(2)
a8[ a] a16[ a] a32[ a]
\override Stem.details.beamed-lengths = #'(8 10 12)
a8[ a] a16[ a] a32[ a] r8 |
\override Stem.details.beamed-lengths = #'(8)
a8[ a]
\override Stem.details.beamed-lengths = #'(8.5)
a8[ a]
}

```

```
\revert Stem.details.beamed-lengths
a8[ a] a16[ a] a32[ a] r16 |
}
```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

```
\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}
```

```
<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>
```

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface`; see Graphical Object Interfaces (<https://lilypond.org/doc/v2.24/Documentation/internals/graphical-object-interfaces>) for a list of possible values for `grob-interface`.

A common use case is printing the ambitus between key signature and time signature.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Ambitus with multiple voices

Adding the `Ambitus_engraver` to the `Staff` context creates a single ambitus per staff, even in the case of staves with multiple voices.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}
<<
  \new Voice \relative c'' {
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Applying note head styles depending on the step of the scale

The `shapeNoteStyles` property can be used to define various note head styles for each step of the scale (as set by the key signature or the tonic property).

This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as `triangle`, `cross`, and `xcircle` are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as `\aikenHeads` or `\sacredHarpHeads`.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

```

fragment = {
  \key c \major
  c2 d
  e2 f
  g2 a
  b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                          #f la ti)

    \fragment
  }
}

\break

\relative c' {
  \set shapeNoteStyles = ##(cross triangle fa #f
                          mensural xcircle diamond)

  \fragment
}

```

Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the `Melody_engraver` to the `Voice` context.

The context property `suspendMelodyDecisions` may be used to turn off this behavior locally.

```

\relative c'' {
  \time 3/4
  a8 b g f b g |
  \set suspendMelodyDecisions = ##t
  a b g f b g |
  \unset suspendMelodyDecisions
  c b d c b c |
}

```

```

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
  }
}

```

```

\autoBeamOff
}
}

```

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```

{
  c'2
  \ottava 1
  \set Staff.ottavation = "8"
  c''2
  \ottava 0
  c'1
  \ottava 1
  \set Staff.ottavation = "Text"
  c''1
}

```

Changing the ambitus gap

It is possible to change the default gap between the ambitus noteheads and the line joining them.

```

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

```

```

\new Staff {
  \time 2/4
  % Default setting
  c'4 g''
}

```

```

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = 0
  c'4 g''
}

```

```

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = 1
  c'4 g'
}

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = 1.5
  c'4 g'
}

```

Changing the interval of lines on the staff

`staffLineLayoutFunction` is used to change the position of notes. This snippet shows setting its value to `ly:pitch-semitones` in order to produce a chromatic scale with the distance between each space and line of the staff equal to one semitone.

```

scale = \relative c' {
  a4 ais b c
  cis4 d dis e
  f4 fis g gis
  a1
}

\new Staff \with {
  \remove "Accidental_engraver"
  staffLineLayoutFunction = #ly:pitch-semitones
}
{
  <<
    \scale
    \context NoteNames {
      \set printOctaveNames = ##f
      \scale
    }
  >>
}

```

Clefs can be transposed by arbitrary amounts

Clefs can be transposed by arbitrary amounts, not just by octaves.

```
\relative c' {
  \clef treble
  c4 c c c
  \clef "treble_8"
  c4 c c c
  \clef "treble_5"
  c4 c c c
  \clef "treble^3"
  c4 c c c
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

% Association list of pitches to colors.

```
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))
```

% Compare pitch and alteration (not octave).

```
#(define (pitch-equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2))))
```

```

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
        (cdr color))))

#(define (color-notehead grob)
  (pitch-to-color
   (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}

```

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used.

This example creates the rhythm used throughout *Mars*, from Gustav Holst's *The Planets*.

```

rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}

```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor and D major with an extended range of shown flats.

```

\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))
}

```

```

\override Clef.stencil =
  #(\lambda (grob)
    (grob-interpret-markup grob
      #{ \markup\combine
        \musicglyph "clefs.C"
        \translate #'(-3 . -2)
        \musicglyph "clefs.F"
      })
    clefPosition = #3
    middleCPosition = #3
    middleCClefPosition = #3
  )
}

{
  \key d\minor f bes, f bes, |
  \key d\major fis b, fis b, |
}

```

Direction of merged ‘fa’ shape note heads

Using property `NoteCollision.fa-merge-direction`, the direction of “fa” shape note heads (“fa”, “faThin”, etc.) can be controlled independently of the stem direction if two voices with the same pitch and different stem directions are merged. If this property is not set, the “down” glyph variant is used.

```

{
  \clef bass

  << { \aikenHeads
    f2
    \override Staff.NoteCollision.fa-merge-direction = #UP
    f2 }
  \\ { \aikenHeads
    f2
    f2 }
  >>
}

```

Force a cancellation natural before accidentals

The following example shows how to force a natural sign before an accidental.

```
\relative c' {
  \key es \major
  bes c des
  \tweak Accidental.restore-first ##t
  eis
}
```

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the `\clef` command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command `\set Staff.forceClef = ##t`.

```
\relative c' {
  \clef treble
  c1
  \clef treble
  c1
  \set Staff.forceClef = ##t
  c1
  \clef treble
  c1
}
```

Generating random notes

This Scheme-based snippet generates random notes. Use as

```
\randomNotes n from to dur
```

to generate *n* random notes between pitches *from* and *to*, with duration *dur*.

```
randomNotes =
#(define-music-function (n from to dur)
  (integer? ly:pitch? ly:pitch? ly:duration?)
  (let ((from-step (ly:pitch-steps from))
        (to-step (ly:pitch-steps to)))
    (make-sequential-music
     (map (lambda (_)
            (let* ((step (+ from-step
                             (random (- to-step from-step))))
                  (pitch (ly:make-pitch 0 step 0)))

Hiding accidentals on tied notes at the start of a new system

This shows how to hide accidentals on tied notes at the start of a new system.

```
\relative c' {
  \override Accidental.hide-tied-accidental-after-break = ##t
  cis1~ cis~
  \break
  cis
}
```

Keep change clefs full-sized

When a clef changes, the clef sign displayed is smaller than the initial clef. This can be overridden by setting the context property `full-size-change` to `#t`.

```
\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
  c1
  \clef "treble"
  c1
}
```

Makam example

Makam is a type of melody from Turkey using 1/9-tone microtonal alterations.

Consult the initialization file `ly/makam.ly` for details of pitch names and alterations.

```
\include "makam.ly"

\relative c' {
  \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
  c4 cc db fk
  gbm4 gfc gfb efk
  fk4 db cc c
}
```

Modifying the ottava spanner slope

It is possible to change the slope of the ottava spanner.

```
\relative c' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
      (right . ((Y . 5.0) ; Change the number here
      (padding . 0)
      (attach-dir . ,RIGHT)
      (text . ,(make-draw-dashed-line-markup
        (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =
    #ly:horizontal-line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info =
    #ly:horizontal-line-spanner::calc-right-bound-info
  \ottava 1
  c1
  c'''1
}
```

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property, in the `Staff` context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

```
\set Staff.keyAlterations =
  #`(((octave . step) . alter) ((octave . step) . alter) ...)
```

where, for each element in the list, *octave* specifies the octave (0 being the octave from middle C to the B above), *step* specifies the note within the octave (0 means C and 6 means B), and *alter* is one of SHARP, FLAT, DOUBLE-SHARP, etc., preceded by a comma.

Alternatively, you can use the more concise format (*step . alter*) for each item in the list if the same alterations are used in all octaves.

For microtonal scales where a “sharp” is not 100 cents, *alter* refers to the alteration as a proportion of a 200-cent whole tone.

```
\include "arabic.ly"
```

```
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))

  % \set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dodsd do do |
}
```

Numbers as easy note heads

Easy notation note heads use the *note-names* property of the *NoteHead* object to determine what appears inside the note head. By overriding this property, it is possible to print numbers representing the scale-degree.

A simple engraver can be created to do this for every note head object it sees.

```
#(define Ez_numbers_engraver
  (make-engraver
    (acknowledgers
      ((note-head-interface engraver grob source-engraver)
        (let* ((context (ly:translator-context engraver))
              (tonic-pitch (ly:context-property context 'tonic))
              (tonic-name (ly:pitch-notename tonic-pitch))
              (grob-pitch
                (ly:event-property (event-cause grob) 'pitch))
              (grob-name (ly:pitch-notename grob-pitch))
              (delta (modulo (- grob-name tonic-name) 7))
              (note-names
                (make-vector 7 (number->string (1+ delta))))))
          (ly:grob-set-property! grob 'note-names note-names))))))

Preventing extra naturals from being automatically added

In accordance with traditional typesetting rules, a natural sign is printed before a sharp or flat if a previous double sharp or flat on the same note is canceled. To change this behavior to contemporary practice, set the `extraNatural` property to `#f` in the `Staff` context.

```
\relative c' {
  aeses4 aes ais a
  \set Staff.extraNatural = ##f
  aeses4 aes ais a
}
```

Preventing natural signs from being printed when the key signature changes

When the key signature changes, natural signs are automatically printed to cancel any accidentals from previous key signatures. This may be prevented by setting the `printKeyCancellation` property to `#f` in the `Staff` context.

```
\relative c' {
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
  \set Staff.printKeyCancellation = ##f
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
}
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle c; the target is an instrument in f. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
  \transpose bes
  \*8 { d'16 d' d'8 }
}

\addQuote sax {
  \transpose es'
  \*16 a8
}
```

```
quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_"up a tone" >>
}
```

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `break-align-orders` property of the `BreakAlignment` grob.

If you look up the definition of the `break-alignment-interface` in LilyPond's Internals Reference (https://lilypond.org/doc/v2.24/Documentation/internals/break_002dalignment_002dinterface), you get the following list of available break-align symbols:

```
ambitus
breathing-sign
clef
cue-clef
cue-end-clef
custos
key-cancellation
key-signature
left-edge
signum-repetitionis
staff-bar
staff-ellipsis
time-signature
```

From this list, we find that we want to move `key-cancellation` so that it comes before `staff-bar`. This is accomplished with the `\breakAlignInsert` function.

```
music = { \key es \major d'1 \bar "||"
          \key a \major d'1 }
```

```
{ <>^\markup "default"
  \music }
```

```
{ <>~\markup "cancellation first"
  \breakAlignInsert key-cancellation before staff-bar
  \music }
```

Transposing pitches with minimum accidentals (“smart” transpose)

This example uses some Scheme code to enforce enharmonic modifications for notes in order to have the minimum number of accidentals. In this case, the following rules apply:

- double accidentals should be removed
- b sharp → c
- e sharp → f
- c flat → b
- f flat → e

In this manner, the most natural enharmonic notes are chosen.

```
#(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))
        ;; `ly:pitch-alteration` returns quarter tone steps.
        (a (* 4 (ly:pitch-alteration p)))
        (n (ly:pitch-notename p)))
    (cond
      ((and (> a 1)
            (or (eqv? n 6) (eqv? n 2))))
      ((set! a (- a 2))
       (set! n (+ n 1)))
      ((and (< a -1)
            (or (eqv? n 0) (eqv? n 3))))
      ((set! a (+ a 2))
       (set! n (- n 1)))
      ((cond
          ((> a 2)
           (set! a (- a 4))
           (set! n (+ n 1)))
          ((< a -2)
           (set! a (+ a 4))
           (set! n (- n 1))))
       (when (< n 0)
         (set! o (- o 1))
         (set! n (+ n 7)))
       (when (> n 6)
         (set! o (+ o 1))
         (set! n (- n 7)))
```

This template uses the start of a well-known Turkish *Saz Semai* that is familiar in the repertoire in order to illustrate some of the elements of Turkish music notation.

```
\include "turkish-makam.ly"

Tweaking clef properties

Changing the clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines, `middleCClefPosition` must also be specified, with positive or negative values moving “middle C” up or down respectively, relative to the staff’s center line.

For example, `\clef "treble_8"` is equivalent to setting the context properties `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition`, and `clefTransposition`. Note that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```

{
  % The default treble clef.
  \key f \major
  c'1
  % The standard bass clef
  \set Staff.clefGlyph = "clefs.F"
  \set Staff.clefPosition = 2
  \set Staff.middleCPosition = 6
  \set Staff.middleCClefPosition = 6
  \key g \major
  c'1
  % The baritone clef.
  \set Staff.clefGlyph = "clefs.C"
  \set Staff.clefPosition = 4
  \set Staff.middleCPosition = 4
}

```

```

\set Staff.middleCClefPosition = 4
\key f \major
c'1
% The standard choral tenor clef.
\set Staff.clefGlyph = "clefs.G"
\set Staff.clefPosition = -2
\set Staff.clefTransposition = -7
\set Staff.middleCPosition = 1
\set Staff.middleCClefPosition = 1
\key f \major
c'1
% A non-standard clef.
\set Staff.clefPosition = 0
\set Staff.clefTransposition = 0
\set Staff.middleCPosition = -4
\set Staff.middleCClefPosition = -4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs.
\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
c'1
\set Staff.clefTransposition = 7
c'1
\set Staff.clefTransposition = 0
\set Staff.clefPosition = 0
c'1

% Return to the normal clef.
\set Staff.middleCPosition = 0
c'1
}

```

Using \autoChange with more than one voice

Here is a demonstration of how to use \autoChange with more than one voice.

```

\score {
  \new PianoStaff
  <<
    \new Staff = "up" {
      <<
        \set Timing.beamExceptions = #'()
        \set Timing.beatStructure = #'(4)
        \new Voice {
          \voiceOne
          \autoChange
          \relative c' {
            g8 a b c d e f g
            g,,8 a b c d e f g
          }
        }

        \new Voice {
          \voiceTwo
          \autoChange
          \relative c' {
            g8 a b c d e f g
            g,,8 a b c d e f g
          }
        }
      >>
    }

    \new Staff = "down" {
      \clef bass
    }
  >>
}

```

2 Rhythms

See also Section “Rhythms” in *Notation Reference*.

Adding beams, slurs, ties, etc., when using tuplet and non-tuplet rhythms

LilyPond primarily uses postfix syntax for inputting parentheses, brackets, etc., which might feel unintuitive for novices.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties, and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8] }
  g16( a \tuplet 3/2 { b d' e' } )
  g8[( a \tuplet 3/2 { b d' ) e']\ ( ~ }
  \time 2/4
  \tuplet 5/4 { e'32 a b d' e' } a'4.\)
}
```

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```
drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
  \new DrumStaff \with {
    instrumentName = "timbales"
    drumStyleTable = #timbales-style
```

```

\override StaffSymbol.line-count = #2
\override BarLine.bar-extent = #'(-1 . 1)
}
<<
\timb
>>
\new DrumStaff \with { instrumentName = "drums" }
<<
\new DrumVoice { \stemUp \drh }
\new DrumVoice { \stemDown \drl }
>>
>>
\layout { }
\midi { \tempo 4 = 120 }
}

```

Adjusting grace note spacing

The space given to grace notes can be adjusted using the spacing-increment property of `Score.GraceSpacing`.

```

graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c'' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}

```

Aligning bar numbers

The default alignment of bar numbers depends on its position: at the beginning of a staff, bar numbers are right-aligned; at all other positions, they are left-aligned. Using Scheme function `break-alignment-list`, this can be changed; the three arguments of this function are the alignment for end-of-line, middle-of-line, and start-of-line position (in this order).

```

\relative c' {
  \set Score.currentBarNumber = 111
  \override Score.BarNumber.break-visibility = #all-visible
  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = 2
  % Print a bar number every second measure
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)

  c1 | c1 | c1 | \break
  c1 | c1 | c1 | \break

  \override Score.BarNumber.self-alignment-X =
    #(break-alignment-list CENTER RIGHT CENTER)
  c1 | c1 | c1 | \break
  c1 | c1 | c1 |

}

\paper {
  line-width = 70\mm
}

```

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

```

\relative c' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}

```

Appoggiatura or grace note before a bar line

By default, appoggiaturas and grace notes that occur on the first beat of a measure are printed after the bar line. A possible solution for single staves to print it before the bar line is to add an invisible bar line and then the visible one.

In multi-staff systems, however, adding an invisible bar line distorts the positioning of full-bar rests in other staves; they are no longer centered but slightly shifted to the left. A better solution for such situations is to use the `\afterGrace` command with setting `afterGraceFraction` appropriately.

```
<<
{
  \appoggiatura d''8 c''4 r2. |
  \appoggiatura { \bar "" d''8 \bar "|" } |
  c''4 r2.
}
{ R1 | R1 }
>>
```

`afterGraceFraction = 15/16`

```
<<
{
  \appoggiatura d''8 c''4 \afterGrace r2. d''8( |
  c''4) r2.
}
{ R1 | R1 }
>>
```

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided whenever possible. The intervals and depth of subdivision can be limited with properties `beamMinimumSubdivision` and `beamMaximumSubdivision`, respectively.

```

\new Staff {
  \relative c'' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32["subdivide beams" a g f c' b a g
      b32 a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
    }
  }
  >>
  \oneVoice
  \once \set beamMinimumSubdivision = #1/8
  b32^\markup \center-column { "beamMinimum-"
    "Subdivision 1/8" } [ a g f c' b a g]
  \once \set beamMaximumSubdivision = #1/16
  b32^\markup \center-column { "beamMaximum-"
    "Subdivision 1/16" } [ a g f c' b a g]
}
}

```

Automatically change durations

`shiftDurations` can be used to change the note lengths of a piece of music.

It takes two arguments – the scaling factor as a power of two, and the number of dots to be added as a positive integer.

```
music = \relative c'' { a1 b2 c4 d8 r }
```

```

{
  \time 4/2
  \music
  \time 4/4
  \shiftDurations 1 0 \music
  \time 2/4
  \shiftDurations 2 0 \music
  \time 4/1
  \shiftDurations -1 0 \music
  \time 8/1
  \shiftDurations -2 0 \music
  \time 6/2
  \shiftDurations 0 1 \music
}

```

```
\time 7/2
\shiftDurations 0 2 \music
}
```

Beam endings in Score context

Beam-ending rules specified in the Score context apply to all staves, but can be modified at both Staff and Voice levels:

```
\relative c'' {
  \time 5/4
  % Set default beaming for all staves
  \set Score.beatBase = #1/8
  \set Score.beatStructure = 3,4,3
  <<
    \new Staff {
      c8 c c c c c c c c c
    }
    \new Staff {
      % Modify beaming for just this staff
      \set Staff.beatStructure = 6,4
      c8 c c c c c c c c c
    }
    \new Staff {
      % Inherit beaming from Score context
      <<
        {
          \voiceOne
          c8 c c c c c c c c c
        }
        % Modify beaming for this voice only
        \new Voice {
          \voiceTwo
          \set Voice.beatStructure = 6,4
          a8 a a a a a a a a a
        }
      >>
    }
  >>
}
```

Beam nibs

Beam nibs at the start and end of beams together with beams attached to solitary notes that look like flat flags are possible with a combination of `stemLeftBeamCount`, `stemRightBeamCount`, and paired `[]` beam indicators.

For imitating right-pointing flat flags on lone notes, use paired `[]` beam indicators and set `stemLeftBeamCount` to zero. For imitating left-pointing flat flags on lone notes, set `stemRightBeamCount` to zero instead (line one).

For right-pointing nibs at the end of a run of beamed notes, set `stemRightBeamCount` to a positive value. For left-pointing nibs at the start of a run of beamed notes, set `stemLeftBeamCount` instead (line two).

Sometimes it may make sense for a lone note surrounded by rests to carry both a left- and right-pointing nib. Do this with paired `[]` beam indicators alone (line three).

Note that `\set stemLeftBeamCount` is always equivalent to `\once \set`. In other words, the beam count settings are not “sticky”, so the pair of nibs attached to the lone 16th note in the last example has nothing to do with the `\set` command for the beam before.

```
\score {
  <<
    \new RhythmicStaff {
      \set stemLeftBeamCount = 0
      c16[] r8.
      r8.
      \set stemRightBeamCount = 0
      16[]
    }
    \new RhythmicStaff {
      16 16
      \set stemRightBeamCount = 2
      16 r r
      \set stemLeftBeamCount = 2
      16 16 16
    }
    \new RhythmicStaff {
      16 16
      \set stemRightBeamCount = 2
      16 r16
      16[] r16
      \set stemLeftBeamCount = 2
      16 16
    }
  }
}
```

Beams across line breaks

Normally, LilyPond refuses to automatically break a line at places where a beam crosses a bar line. This behavior can be changed by setting the `Beam.breakable` property to `#t`.

This property does not affect manual breaks inserted with commands like `\break`.

```
music = {
  \*8 c8
  c8 \*7 { c[ c] } c
  \*8 c8
}

\relative c'' {
  <>\markup { \typewriter Beam.breakable set to \typewriter "#t" }
  \override Beam.breakable = ##t
  \music
}

\relative c'' {
  <>\markup { \typewriter Beam.breakable not set }
  \music
}

\paper {
  line-width = 100\mm
}
```

Changing beam knee gap

Kneaded beams are inserted automatically when a large gap is detected between the note heads. This behavior can be tuned through the `auto-knee-gap` property. A kneaded beam is drawn if the gap is larger than the value of `auto-knee-gap` plus the width of the beam object (which depends on the duration of the notes and the slope of the beam). By default, `auto-knee-gap` is set to 5.5 staff spaces.

```
{
  f8 f''8 f8 f''8
  \override Beam.auto-knee-gap = #6
  f8 f''8 f8 f''8
}
```

Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” – church rests) is printed within the staff; otherwise a long, thick horizontal line is shown. This default value of ten may be changed by overriding the `expand-limit` property.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = 3
    R1*2 | R1*5 | R1*9
  }
}
```

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be overridden by setting the `dot-count` property of the `Dots` grob.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = 4
  c4.. a16 r2 |
  \override Dots.dot-count = 0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}
```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}
```

Changing the tuplet number

By default, only the numerator of the tuplet number is printed over the tuplet bracket, i.e., the numerator of the argument to the `\tuplet` command.

Alternatively, *num:den* of the tuplet number may be printed, or the tuplet number may be suppressed altogether.

```
\relative c' {
  \tuplet 3/2 { c8 c c }
  \tuplet 3/2 { c8 c c }
  \override TupletNumber.text = #tuplet-number::calc-fraction-text
  \tuplet 3/2 { c8 c c }
  \omit TupletNumber
  \tuplet 3/2 { c8 c c }
}
```

Changing time signatures inside a polymeric section using `\scaleDurations`

Flexible polymeric with unaligned measures

To support explicit creation of independently measured contexts, remove the `Timing_translator` from `Score` context and define a `TimingStaffGroup` context that has `Timing_translator`. This makes `Timing` an alias for `TimingStaffGroup`, targeting `\time` commands to the enclosing `TimingStaffGroup`.

Unlike LilyPond's built-in `\enablePerStaffTiming` command, this approach requires the explicit creation of `TimingStaffGroup` contexts; in exchange, it allows creating multiple `Staff` contexts that jointly follow the measure defined in their enclosing `TimingStaffGroup`.

Locally scaled time signatures

Use the unscalable `\time` command to establish a measure of the desired length in `Timing`, a.k.a. `TimingStaffGroup`. In this snippet, all staves below `TimingStaffGroup` use a scaled time signature, so any time signature with the desired measure length is as good as any other. If there were an enclosed context that did not use a scaled time signature, the choice of time signature to set in `Timing` would matter in that context.

Use the `\polymetric \time` command to set scalable metric properties in contexts below `Timing`, and use the `\scaleDurations` command to scale both the local meter and the notes to fit the measure.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \accepts TimingStaffGroup
  }
  \context {
    \StaffGroup
    \name TimingStaffGroup
    \alias StaffGroup
    \consists "Timing_translator"
  }
}

<<
\new TimingStaffGroup <<
  \new Staff {
    \scaleDurations 8/5 {
      \time 6/5 % to set measure length in Timing
      \context Staff \polymetric \time 6/8
      b8 b b b b b
      \time 4/5 % to set measure length in Timing
      \context Staff \polymetric \time 2/4
      b4 b
    }
  }
>>
\new TimingStaffGroup <<
  \new Staff {
    \clef bass
    \time 2/4
    c2 d e f
  }
>>
>>
```

Chant or psalm notation

This form of notation is used for psalm chant, where verses are not always of the same length.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \section
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \section
    \stemOff a'\breve^\markup { \italic flexe }
    \stemOn g'2 \fine
  }
}
```

Complex time signatures

Odd time signatures (such as “5/8”) can often be played as complex time signatures (e.g. “3/8 + 2/8”), which combine two or more inequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the time signatures and adapting the automatic beaming behavior.

```
\relative c' {
  \time #'((2 . 8) (3 . 8))
  c8 d e fis gis
  c8 fis, gis e d
  c8 d e4 gis8
}
```

Conducting signs, measure grouping signs

Context properties control the grouping of beats within a measure: `beatStructure` lists the length of each beat in units of `beatBase`. Default values are established in

scm/time-signature-settings.scm. These properties may be changed particularly with `\set`.

Alternatively, `\time` optionally accepts a beat structure to use instead of the default. `\time` applies to the Timing context, so it does not reset values of properties that are set in lower-level contexts such as *Voice*.

If the `Measure_grouping_engraver` is included in one of the display contexts, measure grouping signs will be created. Such signs ease reading rhythmically complex modern music. In the example, the 9/8 measure is grouped in two different patterns using the two different methods, while the 5/8 measure is grouped according to the default setting in `scm/time-signature-settings.scm`. For the 4/4 measure you have to explicitly set `beatBase` to eighths so that the bar's irregular pattern gets displayed.

```

\score {
  \new Voice \relative c'' {
    \time 9/8
    g8 g d d g g a( bes g) |
    \set Timing.beatStructure = 2,2,2,3
    g8 g d d g g a( bes g) |
    \time 4,5 9/8
    g8 g d d g g a( bes g) |
    \time 5/8
    a4. g4 |
    \time 3,3,2 4/4
    \set Timing.beatBase = #1/8
    f4 d8 f4 d8 g4
  }
  \layout {
    \context {
      \Staff
      \consists "Measure_grouping_engraver"
    }
  }
}

```

Controlling tuple bracket visibility

The default behavior of tuple-bracket visibility is to print a bracket unless there is a beam of the same length as the tuple.

To control the visibility of tuple brackets, set the property `bracket-visibility` to either `#t` (always print a bracket), `if-no-beam` (only print a bracket if there is no beam) or `#f` (never print a bracket). The latter is in fact equivalent to omitting the `TupletBracket` object altogether from the printed output.

```

music = \relative c'' {
  \tuplet 3/2 { c16[ d e ] f8]
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

\new Voice {
  \relative c' {
    \override Score.TextMark.non-musical = ##f
    \textMark "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam
    \textMark \markup \typewriter "'if-no-beam" \music
    \override TupletBracket.bracket-visibility = ##t
    \textMark \markup \typewriter "#t" \music
    \override TupletBracket.bracket-visibility = ##f
    \textMark \markup \typewriter "#f" \music
    \omit TupletBracket
    \textMark \markup \typewriter "omit" \music
  }
}

```

Cow and ride bell example

Two different bells, entered with 'cb' (cow bell) and 'rb' (ride bell).

```

#(define mydrums '((ridebell default #f 3)
  (cowbell default #f -2)))

\new DrumStaff \with { instrumentName = #"Different Bells" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \set DrumStaff.clefPosition = 0.5
  \override DrumStaff.StaffSymbol.line-positions = #'(-2 3)
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)

  \time 2/4
  rb8 8 cb8 16 rb16-> ~ |
  16 8 16 cb8 8 |
}

```

Creating metronome marks in markup mode

New metronome marks can be created in markup mode, but they will not change the tempo in MIDI output.

```
\relative c' {
  \tempo \markup {
    \concat {
      (
        \smaller \general-align #Y #DOWN \note { 16. } #UP
        " = "
        \smaller \general-align #Y #DOWN \note { 8 } #UP
      )
    }
  }
  c1
  c4 c' c,2
}
```

Engraving ties manually

A single tie may be engraved manually by changing the `staff-position` property (an offset) of the `Tie` grob; if there are multiple ties at the same musical moment, they can be adjusted manually by changing the `tie-configuration` property (a list of offset/direction pairs) of the `TieColumn` object.

The offset indicates the distance from the center of the staff in half-staff spaces, the direction can be either 1 (up) or -1 (down).

Note that LilyPond makes a distinction between exact and inexact values for the offset. If using an exact value (i.e., either an integer or a fraction like $(/ 4 5)$), the value serves as a rough vertical position that gets further tuned by LilyPond to make the tie avoid staff lines. If using an inexact value like a floating point number, it is taken as the precise vertical position without further adjustments.

```
\relative c' {
  <>^"default"
  g'1 ^~ g

  <>^"0"
  \once \override Tie.staff-position = 0
  g1 ^~ g

  <>^"0.0"
  \once \override Tie.staff-position = 0.0
  g1 ^~ g

  <>^"reset"
  \revert Tie.staff-position
  g1 ^~ g
}
```

```

\relative c' {
  \override TextScript.outside-staff-priority = ##f
  \override TextScript.padding = 0

  <>^"default"
  <c e g>1~ <c e g>

  <>^"0, -2, -4"
  \override TieColumn.tie-configuration =
    #'((0 . 1) (-2 . 1) (-4 . 1))
  <c e g>1~ <c e g>

  <>^"0.0, -2.0, -4.0"
  \override TieColumn.tie-configuration =
    #'((0.0 . 1) (-2.0 . 1) (-4.0 . 1))
  <c e g>1~ <c e g>

  <>^"reset"
  \override TieColumn.tie-configuration = ##f
  <c e g>1~ <c e g>
}

```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half note, or between a half note and a whole note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the `gap-count` property of the `Beam` object, and the size of the gaps between beams and stems is set with the `gap` property.

```

\relative c' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #1
}

```

```

\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.67
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.33
\repeat tremolo 8 { a32 f }
}

```

Entering several tuplets using only one `\tuplet` command

The property `tupletSpannerDuration` sets how long each of the tuplets contained within the brackets after `\tuplet` should last. Many consecutive tuplets can then be placed within a single `\tuplet` expression, thus saving typing.

There are ways to set `tupletSpannerDuration` besides using a `\set` command. The command `\tupletSpan` sets it to a given duration, or clears it when instead of a duration `\default` is specified. Another way is to use an optional argument with `\tuplet`.

```

\relative c' {
  \time 2/4
  \tupletSpan 4
  \tuplet 3/2 { c8~"\tupletSpan 4" c c c c c }
  \tupletSpan \default
  \tuplet 3/2 { c8~"\tupletSpan \default" c c c c c }
  \tuplet 3/2 4 { c8~"\tuplet 3/2 4 {...}" c c c c c }
}

```

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```

\relative c' {
  \override Score.RehearsalMark.Y-offset = #3.5

  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1 \mark #14
  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1
}

```

Generating custom flags

The stencil property of the Flag grob can be set to a custom Scheme function to generate the glyph for the flag.

```
#(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (log (- (ly:grob-property stem-grob 'duration-log) 2))
         (is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
         (yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8))))
         (flag-stencil (make-filled-box-stencil '(-0.4 . 0.4) yext))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stroke-stencil (if (equal? stroke-style "grace")
                              (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
                              empty-stencil)))
    (ly:stencil-add flag-stencil stroke-stencil)))

% Create a flag stencil by looking up the glyph from the font
#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
         (flag (retrieve-glyph-flag "" dir "" grob))
         (line-thickness (ly:staff-symbol-line-thickness grob))
         (stem-thickness (ly:grob-property stem-grob 'thickness))
         (stem-width (* line-thickness stem-thickness))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stencil (if (null? stroke-style)
                      flag
                      (add-stroke-glyph flag stem-grob dir stroke-style "")))
         (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0)))
    (ly:stencil-translate rotated-flag (cons (- (/ stem-width 2)) 0))))

Guitar strum rhythms

For guitar music it is possible to show strum rhythms, along with melody notes, chord names, and fret diagrams.

```

\include "predefined-guitar-fretboards.ly"

<<
\new ChordNames \chordmode {
  c1 | f | g | c
}
\new FretBoards \chordmode {
  c1 | f | g | c
}
\new Voice \with {
  \consists "Pitch_squash_engraver"
} \relative c'' {
  \improvisationOn
  c4 c8 c c4 c8 c
  f4 f8 f f4 f8 f
  g4 g8 g g4 g8 g
  c4 c8 c c4 c8 c
}
\new Voice = "melody" \relative c'' {
  c2 e4 e4
  f2. r4
  g2. a4
  e4 c2.
}
\new Lyrics \lyricsto "melody" {
  This is my song.
  I like to sing.
}
>>

```

The image shows a musical score for a song. The top staff is a guitar part with four measures, each featuring a different chord: C, F, G, and C. The chords are indicated by letter names and fingerings (e.g., 3 2 1 for C, 1 3 4 2 1 1 for F, 2 1 3 for G, and 3 2 1 for C). The bottom staff is a vocal melody in C major, with lyrics 'This is my song. I like to sing.' The time signature is a complex polymeric signature: 3, 2, 2, 3, 2, 2, 2, 2, 3, 2, 2.

Heavily customized polymeric time signatures

Though the polymeric time signature shown is not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song, by the way).

```
melody = \relative c'' {
  \key g \major
  \time #'((3 . 8) (2 . 8) (2 . 8) (3 . 8) (2 . 8) (2 . 8)
           (2 . 8) (2 . 8) (3 . 8) (2 . 8) (2 . 8))
  \set Timing.beamExceptions = #'()
  \set Timing.beatStructure = 3,2,2,3,2,2,2,2,3,2,2
  c8 c c d4 c8 c b c b a4 g fis8 e d c b' c d e4-^ fis8 g \break
  c,4. d4 c4 d4. c4 d c2 d4. e4-^ d4
  c4. d4 c4 d4. c4 d c2 d4. e4-^ d4 \break
}

drum = \new DrumStaff \drummode {
  \repeat volta 2 {
    bd4.^{\markup { Drums }} sn4 bd \bar {"}
    sn4. bd4 sn \bar {"}
    bd sn bd4. sn4 bd
  }
}

\new Staff {
  \melody
  \drum
}
```

The image shows a musical score for a piece with a complex polymeric time signature. The top staff is a melody in G major, with a time signature of 3, 2, 2, 3, 2, 2, 2, 2, 3, 2, 2. The bottom staff is a drum part, with a time signature of 2. The melody is written in a treble clef, and the drum part is written in a bass clef.

High and low woodblock example

Two Woodblocks, entered with ‘wbh’ (high woodblock) and ‘wbl’ (low woodblock). The length of the bar line has been altered with an `\override` command, otherwise it would be too short. The positions of the two staff lines also have to be explicitly defined.

```
% These lines define the position of the woodblocks in the stave;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
```

```
#(define mydrums '((hiwoodblock default #f 3)
                    (lowwoodblock default #f -2)))
```

```
woodstaff = {
  % This defines a staff with only two lines.
  % It also defines the positions of the two lines.
  \override Staff.StaffSymbol.line-positions = #'(-2 3)

  % This is necessary; if not entered,
  % the barline would be too short!
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)
  % small correction for the clef:
  \set DrumStaff.clefPosition = 0.5
}
```

```
\new DrumStaff {
  % with this you load your new drum style table
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

  \woodstaff

  \drummode {
    \time 2/4
    wbh8 16 16 8-> 8 |
    wbl8 16 16-> ~ 16 16 r8 |
  }
}
```

Making an object invisible using `\hide`

Applying `\hide` to a grob causes objects of this type to be printed with “invisible ink”. They are not printed, but all of their other behavior is retained:

- the objects still take up space,
- they take part in collision resolution, and

- slurs, ties, and beams can be attached to them as usual.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\\
  {
    b8 g g e
  }
  >>
}
```

```
\paper {
  line-width = 40\mm
  ragged-right = ##f
}
```

Making slurs with complex dash structure

Slurs can be composed of complex dash patterns by setting the `dash-definition` property, which is a list of slur segments, which in turn are lists of parameters setting up the dash behavior of the given segment.

Slur segments are defined in terms of the Bézier parameter t , which ranges from 0 at the left end of the slur to 1 at the right end of the slur. A slur segment has the form $(start-t\ stop-t\ dash-fraction\ dash-period)$. In the segment spanning the range $start-t$ to $stop-t$, the dash pattern is defined by the values of $dash-fraction$ and $dash-period$. $dash-fraction$ specifies how much of a dash period is black; if set to 1 you get a solid slur segment. The unit for $dash-period$ is staff spaces.

```
\relative c' {
  \once \override
    Slur.dash-definition = #'(( 0 0.3 0.1 0.75)
                              (0.3 0.6 1 1 )
                              (0.65 1.0 0.4 0.75))

  c4( d e f)
  \once \override
    Slur.dash-definition = #'((0 0.25 1 1 )
                              (0.3 0.7 0.4 0.75))
}
```

```

                                (0.75 1.0   1   1   ))
c4( d e f)
}

```

Manually controlling beam positions

Beam positions may be controlled manually by setting the `positions` property of the `Beam` grob.

```

\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}

```

Merging multi-measure rests in a polyphonic part

Multi-measure rests in a polyphonic staff are placed differently depending on the voice they belong to. They can be printed on the same staff line using the setting below. If you omit the `\once` keyword, the change affects all rests in that follow in the given voice.

```
normalPos = \once \revert MultiMeasureRest.direction
```

```

<<
  { c''1 R c'' \normalPos R c'' R } \\
  { c'1 R c' \normalPos R c' R }
>>

```

Modifying tuplet bracket length

Tuplet brackets can be made to extend horizontally to prefatory matter or the next note. By default, tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

```

\new RhythmicStaff {
  % Defaults.
  \time 2/4 \tuplet 3/2 { c4 4 4 }
  \time 4/4 \tuplet 5/4 { 4 1 }
  \time 3/4 2.
}

\new RhythmicStaff {
  % Set tuplets to be extendable...
  \set tupletFullLength = ##t
  % ...to cover all items up to the next note
  \set tupletFullLengthNote = ##t
  \time 2/4 \tuplet 3/2 { c4 4 4 }
  % ...or to cover just whitespace.
  \set tupletFullLengthNote = ##f
  \time 4/4 \tuplet 5/4 { 4 1 }
  \time 3/4 2.
}

```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be changed setting the `prefer-dotted-right` property of the `NoteCollision` grob.

```

\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>

```

Multi-measure rest length control

Multi-measure rests have a length according to their total duration, which is under the control of the `space-increment` property of the `MultiMeasureRest` grob; its default value is 2.

```

\relative c' {
  \omit Staff.TimeSignature
  \compressEmptyMeasures

  R1*2 R1*4 R1*64 R1*16 \break
  \override MultiMeasureRest.space-increment = 4
  R1*2 R1*4 R1*64 R1*16
}

\layout {
  ragged-right = ##t
}

```

Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest. Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

```

\relative c' {
  \compressMMRests {
    \textLengthOn
    <>^\markup { [MAJOR GENERAL] }
    R1*19
    <>_\markup { \italic { Cue: ... it is yours } }
    <>^\markup { A }
    R1*30^\markup { [MABEL] }
    \textLengthOff
    c4^\markup { CHORUS } d f c
  }
}

```

Non-default tuplet numbers

LilyPond also provides formatting functions to print tuplet numbers different than the actual fraction, as well as to append a note value to the tuplet number or tuplet fraction.

```

\relative c' {
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-denominator-text 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-fraction-text 12 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      (tuplet-number::non-default-tuplet-fraction-text 12 7)
      (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-denominator-text
      (ly:make-duration 2 0))
  \tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-fraction-text
      (ly:make-duration 2 0))
  \tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    #(tuplet-number::fraction-with-notes
      (ly:make-duration 2 1) (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-fraction-with-notes 12
      (ly:make-duration 3 0) 4 (ly:make-duration 2 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
}

```

Numbering single measure rests

Multi-measure rests show their length by a number except for single measures. This can be changed by setting `restNumberThreshold`.

```

{
  \compressEmptyMeasures
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 0
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 10
  R1 R1*10 R1*11
}

```

Partcombine and \autoBeamOff

The function of `\autoBeamOff` when used with `\partCombine` can be difficult to understand. It may be preferable to use

```
\set Staff.autoBeaming = ##f
```

instead to ensure that auto-beaming is turned off for the entire staff. Use this at a spot in your score where no beam generated by the auto-beamer is still active.

Internally, `\partCombine` works with four voices – up-stem single, down-stem single, combined, and solo. In order to use `\autoBeamOff` to stop all auto-beaming when used with `\partCombine`, it is necessary to use *four* calls to `\autoBeamOff`.

```
{
  % \set Staff.autoBeaming = ##f % turns off all auto-beaming

  \partCombine {
    \autoBeamOff % applies to split up-stems
    \*4 a'16
    % \autoBeamOff % applies to combined stems
    \*4 a'8
    \*4 a'16
    % \autoBeamOff % applies to solo
    \*4 a'16
    r4
  } {
    % \autoBeamOff % applies to split down-stems
    \*4 f'8
    \*8 f'16 |
    r4
    \*4 a'16
  }
}
```

Percussion example

A short example taken from Stravinsky's *L'histoire du Soldat*.

```
#(define mydrums '((bassdrum default #f 4)
                   (snare default #f -4)
                   (tambourine default #f 0)))
```

```
U = \stemUp
D = \stemDown
```

```
global = {
  \time 3/8 s4.
```

```

\time 2/4 s2*2
\time 3/8 s4.
\time 2/4 s2

Permitting line breaks within beamed tuplets

These artificial examples show how both manual and automatic line breaks may be permitted within beamed tuplets that can't be rhythmically split in an exact way.

This feature only works with manually beamed tuplets.

```
\layout {
  \context {
    \Voice
    % Permit automatic line breaks within tuplets.
    \remove "Forbid_line_break_engraver"
    % Allow beams to be broken at line breaks.
    \override Beam.breakable = ##t
  }
}
```

```
\relative c' {
  <>^"manually forced line break"
  a8
  \*5 { \tuplet 3/2 { c8[ b g16 a] } }
  \tuplet 3/2 { c8[ b \break g16 a] }
  \*5 { \tuplet 3/2 { c8[ b g16 a] } }
  c8 \bar "||"
}
```

```
\relative c' {
  <>^"automatic line break"
  \*28 a16
  \tuplet 11/8 { a16[ b c d e f e d c b a] }
  \*28 a16 \bar "||"
}
```

manually forced line break

automatic line break

3

```

\override SpacingSpanner.strict-grace-spacing = ##t
}
}

```

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, multi-measure rests in odd-numbered and even-numbered voices are vertically separated in polyphonic music.

This snippet shows how positioning of multi-measure rests can be controlled.

```

\relative c' {
  % Multi-measure rests by default are set under the fourth line.
  R1
  % They can be moved using an override or tweak.
  \tweak staff-position -2 R1
  \tweak staff-position 0 R1
  \tweak staff-position 2 R1
  \override MultiMeasureRest.staff-position = 3 R1
  \override MultiMeasureRest.staff-position = 6 R1
  \revert MultiMeasureRest.staff-position
  \break

  % Odd-numbered voices are under the top line.
  << { R1 } \ { a1 } >>
  % Even-numbered voices are under the bottom line.
  << { a1 } \ { R1 } >>
  % Multi-measure rests in both voices remain separate.
  << { R1 } \ { R1 } >>

  % Separating multi-measure rests in more than two voices
  % requires an override or tweak.
  << { R1 } \ { R1 } \ { \tweak staff-position -2 R1 } >>

  % Using compressed bars in multiple voices requires another override
  % in all voices to avoid multiple instances being printed.
  \compressMMRests
  <<
    \revert MultiMeasureRest.direction
    { R1*3 } \
    \revert MultiMeasureRest.direction
    { R1*3 }
  >>
}

```

Positioning opposing fermatas on a bar line

This snippet demonstrates a command that prints fermatas both above and below a bar line. If there would not otherwise be a bar line, it adds a double bar line. Semantically, the command codes a longer-than-normal caesura, which might be considered misuse depending on the situation.

```
\twoWayFermata = {
  \once \set Staff.caesuraType = #'((underlying-bar-line . "||"))
  \once \set Staff.caesuraTypeTransform = ##f
  \caesura ^\fermata _\fermata
}

music = {
  f'1 \twoWayFermata
  R1
  f'2 \twoWayFermata f'2
  R1
  b'1 \twoWayFermata \fine
}

\new GrandStaff <<
  \new Staff \music
  \new Staff \music
>>
```

Preventing final mark from removing final tuplet

Due to Issue #2362 (<https://gitlab.com/lilypond/lilypond/-/issues/2362>) the addition of a final mark can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket.full-length-to-extent` to `#f`.

```
\new Staff {
  \set tupletFullLength = ##t
  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}
```

```

\new Staff {
  \set tupletFullLength = ##t
  \override TupletBracket.full-length-to-extent = ##f

  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}

```

Printing bar numbers at regular intervals

By setting the `barNumberVisibility` property, bar numbers can be printed at regular intervals. Here the bar numbers are printed every two measures except at the end of the line.

```

\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.currentBarNumber = 11
  % Print a bar number every second measure
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
  c1 | c | c | c | c |
  \break
  c1 | c | c | c | c |
}

```

Printing bar numbers for broken measures

By default, a bar number of a broken measure is not repeated at the beginning of the new line. Use `first-bar-number-invisible-save-broken-bars` for `barNumberVisibility` to get a parenthesized BarNumber there.

```

\layout {
  \context {
    \Score
    barNumberVisibility = #first-bar-number-invisible-save-broken-bars
    \override BarNumber.break-visibility = ##(#f #t #t)
  }
}

```

```

\relative c' {
  c1 | d | e | f2 \break
  fis2 | g1 | e2 \break
  <>~"reenabled default"
  % back to default -
  % \unset Score.barNumberVisibility would do so as well
  \set Score.barNumberVisibility =
    #first-bar-number-invisible-and-no-parenthesized-bar-numbers
  es2 | d1 | c
}

```

Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

```

\relative c' {
  % Center bar numbers except at the beginning of a staff.
  \override Score.BarNumber.self-alignment-X =
    #(break-alignment-list CENTER CENTER 0.3)

  % Prevent bar numbers at the end of a line and permit them elsewhere.
  \override Score.BarNumber.break-visibility = #end-of-line-invisible

  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  % Increase the size of the bar number by 2.
  \override Score.BarNumber.font-size = 2

  % Draw a circle round the following bar number(s).
  \override Score.BarNumber.stencil
    = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
  \*7 c1 \break

  % Draw a box round the following bar number(s).
  \override Score.BarNumber.stencil
    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \*7 c1 \bar "|"
}

```

Printing bar numbers using modulo-bar-number-visible

If the remainder of the division of the current bar number by the first argument of `modulo-bar-number-visible` equals its second argument, print a bar number.

This is useful to print the bar number at certain distances. Some examples:

- `(modulo-bar-number-visible 3 2)` → prints 2, 5, 8, ...
- `(modulo-bar-number-visible 4 2)` → prints 2, 6, 10, ...
- `(modulo-bar-number-visible 2 1)` → prints 3, 5, 7, ...
- `(modulo-bar-number-visible 5 0)` → prints 5, 10, 15, ...

```
\layout {
  \context {
    \Score
    \override BarNumber.break-visibility = ##(#f #t #t)
    barNumberVisibility = #(modulo-bar-number-visible 5 0)
  }
}
```

```
\relative c' {
  c1 | d | e | f \break
  g1 | e | d | c
}
```

Printing bar numbers with changing regular intervals

Using the `set-bar-number-visibility` context function, bar number intervals can be changed.

```
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context Score \applyContext #(set-bar-number-visibility 4)
  \*10 c'1
  \context Score \applyContext #(set-bar-number-visibility 2)
  \*10 c
}
```

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the `direction` property of `MetronomeMark` or `RehearsalMark` appropriately.

```
\layout {
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}
```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the `Score` level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
global = {
  \time 3/4 s2.*3 \break
  s2.*3
}

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Bar_number_engraver"
    \override SpacingSpanner.uniform-stretching = ##t
    \override SpacingSpanner.strict-note-spacing = ##t
    proportionalNotationDuration = #1/64
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
}
```

```

}
\context {
  \Voice
  \remove "Forbid_line_break_engraver"
  tupletFullLength = ##t
}
}

Bassklarinette = \new Staff \with {
  \consists "Bar_number_engraver"
  barNumberVisibility = #(every-nth-bar-number-visible 2)
  \override BarNumber.break-visibility = #end-of-line-invisible
} <<

  <<
    \Bassklarinette
    \Perkussion
  >>
}
```

The musical score consists of three systems. Each system has a treble clef staff and a bass clef staff. The first system starts with a treble clef staff in 3/8 time, followed by a 2/4 time signature, and then a 3/8 time signature. The bass clef staff is in 3/4 time. The second system is marked with a (4) and shows a treble clef staff in 3/8 time, followed by a 2/4 time signature, and then a 3/8 time signature. The bass clef staff is in 3/4 time. The third system is marked with an 8 and shows a treble clef staff in 3/4 time, followed by a 3/4 time signature, and then a 3/4 time signature. The bass clef staff is in 3/4 time.

Printing the bar number for the first measure

By default, the first bar number in a score is suppressed if it is less than or equal to 1. This can be changed by setting the `barNumberVisibility` context property to value `all-bar-numbers-visible`.

```
\paper {
  line-width = 50\mm
}
```

```
\relative c' {
  \set Score.barNumberVisibility = #all-bar-numbers-visible
  c1 | d | e | f \break
}
```

```
g1 | e | d | c
}
```

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```
music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e ] f8]
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \override TextScript.staff-padding = #2.5

    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    <>^\markup "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam
    <>^\markup \typewriter "if-no-beam" \music
  }
}
```

Redefining grace note global defaults

The global defaults for grace notes are stored in the following identifiers.

```
startGraceMusic
stopGraceMusic
startAcciaccaturaMusic
stopAcciaccaturaMusic
startAppoggiaturaMusic
stopAppoggiaturaMusic
```

They are defined in file `ly/grace-init.ly`. By redefining them other effects may be obtained.

```

startAcciaccaturaMusic = {
  <>(
    \override Flag.stroke-style = "grace"
    \slurDashed
  )
}

stopAcciaccaturaMusic = {
  \revert Flag.stroke-style
  \slurSolid
  <>
}

\relative c'' {
  \acciaccatura d8 c1
}

```

Removing bar numbers from a score

Bar numbers can be removed entirely by removing the `Bar_number_engraver` from the `Score` context.

```

\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    % \remove "Bar_number_engraver"
  }
}

```

```

\relative c'' {
  c4 c c c \break
  c4 c c c
}

```

Rest styles

Rests may be used in various styles.

```

restsA = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 s32
  s64 s128 s256 s512 s1024 s1024
}
restsB = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 r32
  r64 r128 r256 r512 r1024 s1024
}

\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  <>\markup \typewriter { mensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'neomensural
  <>\markup \typewriter { neomensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'classical
  <>\markup \typewriter { classical } \restsB \bar "" \break

  \override Staff.Rest.style = #'z
  <>\markup \typewriter { z-style } \restsB \bar "" \break

  \override Staff.Rest.style = #'default
  <>\markup \typewriter { default } \restsB \bar "" \break
}

```

Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

```
\relative c' ' {
  \time 12/8

  % Default beaming
  a8 a a a a a a a a a a

  % Set new values for beam endings
  \set Score.beatStructure = 3,4,3,2
  a8 a a a a a a a a a a
}
```

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written. Instead, only “rhythmic patterns” and chords above the measures are notated to represent the structure of a song. Such a feature can be useful while creating or transcribing the structure of a song, or when sharing lead sheets with guitarists or jazz musicians.

```
startPat = {
  \improvisationOn
  \omit Stem
}
stopPat = {
  \improvisationOff
  \undo \omit Stem
}

\new Voice \with {
  \consists Pitch_squash_engraver
} {
  c'4 d' e' f' |
  \startPat
  4 4 4 4 |
  \stopPat
  f'4 e' d' c'
}
```

Skips in lyric mode

The ‘s’ syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the \skip command is recommended.

```
<<
\relative c'' { a1 | a }
\new Lyrics \lyricmode { \skip1 bla1 }
>>
```

Skips in lyric mode (2)

Although ‘s’ skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (“”) or underscores () are available.

```
<<
\relative c'' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Stemlets

In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop ‘stemlets’ to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the `stemlet-length` property of `Stem`, and rests are hidden by using `\hide`.

Some `\markup` elements are included in the source to highlight the different notations.

```
\paper {
  ragged-right = ##f
}

{
  c'16^\markup { traditional } d' r f'
  g'16[^\markup \column { "beams" "over rests" } f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[^\markup \column { "stemlets" "over rests" } d' r f']
  g'16[^\markup \column { "stemlets" "and no rests" } f'
  \once \hide Rest
  r16 d']
}
```

Strict beat beaming

Beamlets can be set to point in the direction of the beat to which they belong. The first beam avoids sticking out flags (the default); the second beam strictly follows the beat.

```
\relative c' {
  \time 6/8
  a8. a16 a a
  \set strictBeatBeaming = ##t
  a8. a16 a a
}
```

Subdividing beams

The beams of consecutive 16th (or shorter) notes are, by default, not subdivided. That is, the beams of more than two stems stretch over the entire group of notes without a break. This behavior can be modified to subdivide the beams into sub-groups by setting the property `subdivideBeams` to `#t`. When set, beams are subdivided at (rhythmic) intervals to match the metric value of the subdivision.

Using the properties `beamMinimumSubdivision` and `beamMaximumSubdivision` it is possible to configure the limits of automatic beam subdivision, namely the minimum and maximum rhythmic lengths at which beamlets are removed. The default values are 0 for the former and `+inf.0` for the latter, making LilyPond subdivide beams as much as possible.

There are two special cases to consider.

- If the numerator of `beamMaximumSubdivision` is not a power of 2, the rhythmic lengths considered for subdivision are `beamMaximumSubdivision` divided by powers of 2 that stay greater than or equal to `beamMinimumSubdivision`.
- If `beamMaximumSubdivision` is smaller than `beamMinimumSubdivision`, the depth of beam subdivisions is limited by `beamMaximumSubdivision`, but not the frequency and rhythmic intervals, therefore possibly deviating from the correct, expected metric value.

If `respectIncompleteBeams` is set to `#t`, incomplete subdivisions with more than two stems are treated as an ‘extension’ of the previous subdivision group, i.e., the length of the previous subdivision group gets extended to also cover the incomplete subdivision. If set to `#f` (which is the default), a new subdivision group gets started instead.

```
\relative c' {
  \time 1/4

  <>~"default"
  c32 c c c c c c c

  <>~"with subdivision"
  \set subdivideBeams = ##t

  % The trick with the scaled duration and the shorter rest
  % is necessary for the correct ending of the trill-span!
  tamb2.*5/6 \startTrillSpan s8 \stopTrillSpan |
}
```

Tambourine 

Three-sided box

This example shows how to add a markup command to get a three-sided box around some text (or other markup).

```
% New command to add a three-sided box, with sides north, west, and south.
% Based on the `box-stencil` command defined in `scm/stencil.scm`.
% Note that ";;" is used to comment a line in Scheme.
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
        (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
        (x-rule (make-filled-box-stencil
                  (interval-widen x-ext thickness) (cons 0 thickness))))
```

```

;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
(set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
(set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
(set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
stencil))

% The corresponding markup command, based on the `box` command defined
% in `scm/define-markup-commands.scm`.
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round ARG.

Look at THICKNESS, BOX-PADDING, and FONT-SIZE properties to determine
line thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))

```

```

\relative c' {
  c1~\markup { \NWS-box ABCD }
  c1~\markup { \NWS-box \note {4} #1.0 }
}

```

Time signature in brackets

The time signature can be enclosed within brackets.

```

\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}

```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```

\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}

```

Time signature printing only the numerator as a number
(instead of the fraction)

Sometimes, a time signature should not print the whole fraction (for example, 7/4), but only the numerator (digit 7 in this case). This can be easily done by using `\override Staff.TimeSignature.style = #'single-number` to change the style permanently. By using `\revert Staff.TimeSignature.style`, this setting can be reversed. To apply the single-number style to only one time signature, use `\tweak`.

```
\relative c'' {
  \time 3/4
  c4 c c
  % Change the style permanently
  \override Staff.TimeSignature.style = #'single-number
  \time 2/4
  c4 c
  \time 3/4
  c4 c c
  % Revert to default style:
  \revert Staff.TimeSignature.style
  \time 2/4
  c4 c
  % single-number style only for the next time signature
  \tweak style #'single-number \time 5/4
  c4 c c c c
  \time 2/4
  c4 c
}
```

Tweaking grace layout within music

The appearance of grace expressions can be changed by using the functions `add-grace-property` and `remove-grace-property`.

The following example undefines the direction property of Stem grobs for this grace so that stems do not always point up, and changes the default note heads to crosses.

```

\relative c'' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}

```

}

User-defined time signatures

New time signature styles can be defined. The time signature in the second measure is printed upside down in both staves.

```
#(add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction))))
```

```
<<
\new Staff {
  \time 3/4 f'2.
  \override Score.TimeSignature.style = #'topsy-turvy
  \time 3/4 R2. \bar "|."
}
\new Staff {
  R2. e''
}
>>
```

Using alternative flag styles

Alternative shapes for flags on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. LilyPond provides the following functions: `modern-straight-flag`, `old-straight-flag`, and `flat-flag`. Use `\revert` to restore the default shape.

To get stacked (i.e., vertically more compact) flags, call the command `\flagStyleStacked`, which can be reset with `\flagStyleDefault`.

Overriding the Flag stencil does not change how flag elements are positioned vertically. This is especially noticeable for flat flags: LilyPond doesn't dynamically adjust the vertical gaps between flag elements in the same way as it does for beams. A possible solution to harmonize the appearance is to replace flat flags with half beams, as shown in the second staff; however, this can't be done automatically. In the code of this snippet, such half beams are entered with @ as a prefix, for example @c8.

Be aware that half beams are *not* Flag grobs. This means in particular that modifying Flag properties won't have any effect on them (you have to use Beam properties instead), and properties for their associated Stem grob will also behave beam-like.

```

"@ =
#(define-music-function (music) (ly:music?)
  #{ \set stemLeftBeamCount = 0 $music [] #})

testnotes = {
  \autoBeamOff
  c8 d16 e''32 f64 \acciaccatura { g,,,8 } a128 b
}

\relative c' {
  \override TextScript.staff-padding = 6
  \time 1/4
  <>^"default" \testnotes
  \override Flag.stencil = #modern-straight-flag
  <>_"modern straight" \testnotes
  \override Flag.stencil = #old-straight-flag
  <>^"old straight" \testnotes
  \override Flag.stencil = #flat-flag
  <>_"flat" \testnotes
  \revert Flag.stencil

  \flagStyleStacked
  <>^"stacked" \testnotes
  \flagStyleDefault
  <>_"default" \testnotes
}

\relative c' {
  \time 3/4
  \override Flag.stencil = #flat-flag

  <>^"flat" c8 c[ c] d16 d[ d] e''32 e[ e] f64 f[ f]
  \acciaccatura { g,,,8 } a128 a[ a a a a]
  <>^"beam-like" @c8 c[ c] @d16 d[ d] @e''32 e[ e] @f64 f[ f]
  \acciaccatura { g,,,8 } @a128 a[ a a a a]
}

\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}

```

Using grace note slashes with normal heads

The slash through the stem found in acciaccaturas can be applied in other situations.

```
\relative c' {
  \override Flag.stroke-style = "grace"
  c8( d2) e8( f4)
}
```

Using ties with arpeggios

Ties are sometimes used to write out arpeggios. In this case, two tied notes need not be consecutive. This can be achieved by setting the `tieWaitForNote` property to `#t`. The same feature is also useful, for example, to tie a tremolo to a chord, but in principle, it can also be used for ordinary consecutive notes.

```
\relative c' {
  \set tieWaitForNote = ##t
  \grace { c16[ ~ e ~ g] ~ } <c, e g>2
  \repeat tremolo 8 { c32 ~ c' ~ } <c c,>1
  e8 ~ c ~ a ~ f ~ <e' c a f>2
  \tieUp
  c8 ~ a
  \tieDown
  \tieDotted
  g8 ~ c g2
}
```

3 Expressive marks

See also Section “Expressive marks” in *Notation Reference*.

Adding parentheses around an expressive mark or chordal note

The `\parenthesize` function is a special tweak that encloses objects in parentheses. The associated grob is `Parentheses`.

```
\relative c' {
  c2-\parenthesize ->
  \override Parentheses.padding = #0.1
  \override Parentheses.font-size = #-4
  <d \parenthesize f a>2
}
```

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}
```

```
glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}
```

```
\relative c' ' {
  r8 f8\glissando \glissandoSkipOn f4 g a |
  a8\noBeam \glissandoSkipOff a8
  r8 f8\glissando \glissandoSkipOn g4 a8 \glissandoSkipOff a8 |
  r4 f\glissando\< \glissandoSkipOn a4\!f> \glissandoSkipOff b8\! r |
}
```

Adjusting slur positions vertically

Using `\override Slur.positions` it is possible to set the vertical position of the start and end points of a slur to absolute values (or rather, forcing LilyPond's slur algorithm to consider these values as desired). In many cases, this means a lot of trial and error until good values are found.

You probably have tried the `\offset` command next just to find out that it doesn't work for slurs, emitting a warning instead.

The code in this snippet allows you to tweak the vertical start and end positions by specifying *relative* changes, similar to `\offset`.

Syntax: `\offsetPositions #'(dy1 . dy2)`

```
offsetPositions =
#(define-music-function (offsets) (number-pair?)
  #{
    \once \override Slur.control-points =
      #(\lambda (grob)
        (match-let (((_ . y1) _ _ (_ . y2))
                    (ly:slur::calc-control-points grob))
          ((off1 . off2) offsets))
        (set! (ly:grob-property grob 'positions)
              (cons (+ y1 off1) (+ y2 off2)))
          (ly:slur::calc-control-points grob)))
      #})

\relative c' {
  c4(^"default" c, d2)
  \offsetPositions #'(0 . 1)
  c'4(^"(0 . 1)" c, d2)
  \offsetPositions #'(0 . 2)
  c'4(^"(0 . 2)" c, d2)
  \bar "||"
  g4(^"default" a d'2)
  \offsetPositions #'(1 . 0)
  g,,4(^"(1 . 0)" a d'2)
  \offsetPositions #'(2 . 0)
  g,,4(^"(2 . 0)" a d'2)
}
```

Adjusting the shape of falls and doits

The shortest-duration-space property may be tweaked to adjust the shape of *falls* and *doits*.

```
\relative c' {
  \override Score.SpacingSpanner.shortest-duration-space = 4.0
  c2-\bendAfter 5
  c2-\bendAfter -4.75
  c2-\bendAfter 8.5
  c2-\bendAfter -6
}
```

Aligning the ends of hairpins to NoteColumn directions

The ends of hairpins may be aligned to the LEFT, CENTER, or RIGHT of NoteColumn grobs by overriding the property `endpoint-alignments`, which is a pair of numbers representing the left and right ends of the hairpin. `endpoint-alignments` are expected to be directions (either -1, 0 or 1). Other values will be transformed with a warning. The right end of a hairpin terminating at a rest is not affected, always ending at the left edge of the rest.

```
{
  c'2\< <c' d'>\! |
  \override Hairpin.endpoint-alignments = #'(1 . -1)
  c'2\< <c' d'>\! |
  \override Hairpin.endpoint-alignments = #'(,LEFT . ,CENTER)
  c'2\< <c' d'>\! |
}
```

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

```
\relative c' ' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}
```

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```
\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}
```

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

```
\new Staff \relative c'' {
  \key es \major
  \time 3/4
  % this bar contains no \breathe
  << { g4 as g } \ { es4 bes es } >> |
  % Modern notation:
  % by default, \breathe uses the rcomma, just as if saying:
  % \override BreathingSign.text =
  %   #(make-musicglyph-markup "scripts.rcomma")
  << { g4 as g } \ { es4 \breathe bes es } >> |

  % rvarcomma and lvarcomma are variations of the default rcomma
  % and lcomma
  % N.B.: must use Staff context here, since we start a Voice below
  \override Staff.BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  << { g4 as g } \ { es4 \breathe bes es } >> |

  % raltcomma and laltcomma are alternative variations of the
  % default rcomma and lcomma
  \override Staff.BreathingSign.text =
    \markup { \musicglyph "scripts.raltcomma" }
  << { g4 as g } \ { es4 \breathe bes es } >> |

  % vee
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.uupbow" }
  es8[ d es f g] \breathe f |

  % caesura
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.caesura.curved" }
  es8[ d] \breathe es[ f g f] |
  es2 r4 \bar "||"
}
```

Broken crescendo hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as a text markup.

The markup command `with-dimensions` tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property `staff-padding` prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```
\relative c' {
  <<
  {
    \dynamicUp
    r2 r16 c'8.\pp r4
  }
  \\\
  {
    \override DynamicLineSpanner.layer = #0
    des,2\mf\< ~
    \override TextScript.layer = #2
    \once\override TextScript.staff-padding = #6
    \once\override TextScript.vertical-skylines = #'()
    des16_\markup \with-dimensions #'(2 . 7) #'(0 . 0)
      \with-color #white
      \filled-box #'(2 . 7) #'(0 . 2) #0
    r8. des4 ~ des16->\sff r8.
  }
  >>
}
```

Caesura (“railtracks”) with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {

  % set the breath mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}

```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to a DynamicText grob.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))
              (par-y (ly:grob-parent grob Y))
              (dir (ly:grob-property par-y 'direction))
              (staff-line-thickness
                (ly:output-def-lookup (ly:grob-layout grob)
                                      'line-thickness)))
          (new-stencil
            (ly:stencil-aligned-to
              (ly:stencil-combine-at-edge
                (ly:stencil-aligned-to stencil X CENTER)
                Y dir
                (ly:stencil-aligned-to
                  (grob-interpret-markup
                    grob
                    (make-fontsize-markup
                      (magnification->font-size
                        (+ (ly:staff-symbol-staff-space grob)
                          (/ staff-line-thickness 2))))
                    text))
                  X CENTER))
                X LEFT))
            (staff-space (ly:output-def-lookup
                          (ly:grob-layout grob) 'staff-space))
            (par-x (ly:grob-parent grob X))
            (dyn-text (grob::has-interface par-x
                          'dynamic-text-interface))
            (dyn-text-stencil-x-length

```

```

        (if dyn-text
          (interval-length
            (ly:stencil-extent
              (ly:grob-property par-x 'stencil) X))
            0))
      (x-shift
        (if dyn-text (- (+ staff-space dyn-text-stencil-x-length)
                          (* 0.5 staff-line-thickness))
          0)))
      (ly:grob-set-property! grob 'Y-offset 0)
      (ly:grob-set-property! grob
        'stencil (ly:stencil-translate-axis
          new-stencil
            x-shift X))))
    #})

hairpinMolto = \hairpinWithCenteredText \markup { \italic molto }
hairpinMore = \hairpinWithCenteredText \markup { \larger moltissimo }

\relative c' {
  \hairpinMolto c2\< c\f
  \hairpinMore c2\ppppp\< c\f
  \break
  \hairpinMolto c2^\< c\f
  \hairpinMore c2\ppppp\< c\f
}

```

Changing text and spanner styles for text dynamics

The text used for *crescendos* and *decrescendos* can be changed by modifying the context properties `crescendoText` and `decrescendoText`.

The style of the spanner line can be changed by modifying the style property of `DynamicTextSpanner`. The default value is `dashed-line`, and other possible values include `line`, `dotted-line`, and `none`.

```

\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
}

```

```

a2 a
a2 a\mf
}

```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```

\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}

```

Changing the breath mark symbol

The glyph of the breath mark can be tuned by overriding the text property of the BreathingSign layout object with any markup text.

```

\relative c' {
  c2
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  \breathe
  d2
}

```

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be overridden by setting the dot-count property of the Dots grob.

```

\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = 4
  c4.. a16 r2 |
  \override Dots.dot-count = 0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}

```

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “*più f*” or “*p subito*”). These can be produced using a `\markup` block; the resulting object behaves like a `TextScript` grob.

See also “Combining dynamics with markup texts (2)”.

```

piuF = \markup { \italic più \dynamic f }

```

```

\score {
  \relative c'' {
    c2\f c-\piuF
  }
}

```

Combining dynamics with markup texts (2)

Some dynamics may involve text indications (such as “*più f*” or “*p subito*”). These can be produced using the `make-dynamic-script` Scheme function; the resulting object behaves like a `DynamicText` grob.

See also “Combining dynamics with markup texts”.

```

piuF = #(make-dynamic-script
  #{ \markup { \normal-text \italic più \dynamic f } #})

```

```

\score {
  \relative c'' {
    c2\f c\piuF
  }
}

```

Contemporary glissando

A contemporary glissando without a final note can be typeset using a hidden note and cadenza timing.

```
\relative c' ' {
  \time 3/4
  \override Glissando.style = #'zigzag
  c4 c
  \cadenzaOn
  c4\glissando
  \hideNotes
  c,,4
  \unHideNotes
  \cadenzaOff
  \bar " | "
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper {
  line-width = 50\mm
}

\relative c' ' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
  % show glissando
  \override Glissando.after-line-breaking = ##t
  f2\glissando
  \break
  f,1\!\stopTextSpan
}
```

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely by using the property `fingeringOrientation`. For fingering orientation to apply, the fingering command must be used within a chord construct (`<...>`), even for single notes. Orientation for string numbers and right-hand fingerings may be controlled in a similar way by using the properties `stringNumberOrientation` and `strokeFingerOrientation`, respectively.

These properties can be set to a list of one to three values. They control whether fingerings may be placed above (if `up` appears in the list), below (if `down` appears), to the left (if `left` appears), or to the right (if `right` appears). Conversely, if a location is not listed, no fingering is placed there. LilyPond takes these constraints and works out the best placement for the fingering of the notes of the following chords. Note that `left` and `right` are mutually exclusive – fingerings may be placed only on one side or the other, not both.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}
```

Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the `script-priority` property. The lower this number, the closer it will be put to the note. In this example, the `TextScript` (the *sharp* symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the *prall trill* (the `Script`) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

Note that for `Fingering`, `StringNumber`, and `StrokeFinger` grobs, if used within a chord, the vertical order is also determined by the vertical position of the associated note head, which

is added to (or, depending on the direction, subtracted from) the grob's `script-priority` value. This ensures that for fingerings above a chord the lower note is associated with the lower fingering (and vice versa for the other direction); it doesn't matter whether you input the notes in the chord from top to bottom or from bottom to top.

By default, the least technical scripts are positioned closest to the note head; the rough order is articulation, flageolet, fingering, right-hand fingering, string number, fermata, bowing, and text script.

```
\relative c' {} {
  \once \override TextScript.script-priority = -100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = -100
  a2^\prall^\markup { \sharp }

  \set fingeringOrientations = #'(up)
  <c-2 a-1>2
  <a-1 c>\tweak script-priority -100 -2>2
}
```

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The `outside-staff-priority` property must be set to `#f`, as otherwise this would take precedence over the `avoid-slur` property. Changing the first argument of `\after` (which is a duration) adjusts the horizontal position.

```
\relative c' {} {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
    cis8\turn \noBeam
  }
  d4.( e8)
}
```

Creating arpeggios across notes in different voices

An *arpeggio* can be drawn across notes in different voices on the same staff if the `Span_arpeggio_engraver` is added to the `Staff` context.

```
\new Staff \with {
  \consists "Span_arpeggio_engraver"
}
\relative c' {
  \set Staff.connectArpeggios = ##t
  <<
    { <e' g>4\arpeggio <d f> <d f>2 }
    \\\
    { <d, f>2\arpeggio <g b>2 }
  >>
}
```

Creating cross-staff arpeggios in a piano staff

In a `PianoStaff` it is possible to let an *arpeggio* cross between the staves by setting the property `PianoStaff.connectArpeggios`.

```
\new PianoStaff \relative c'' <<
  \set PianoStaff.connectArpeggios = ##t
  \new Staff {
    <c e g c>4\arpeggio
    <g c e g>4\arpeggio
    <e g c e>4\arpeggio
    <c e g c>4\arpeggio
  }
  \new Staff {
    \clef bass
    \*4 <c,, e g c>4\arpeggio
  }
>>
```

Creating cross-staff arpeggios in other contexts

Cross-staff *arpeggios* can be created in contexts other than `GrandStaff` and its derived siblings (`PianoStaff`, `ChoirStaff`, and `StaffGroup`) if the `Span_arpeggio_engraver` is included in the `Score` context.

```

<<
\new PianoStaff <<
  \new Voice \relative c' {
    <c e>2\arpeggio <d f>2\arpeggio
    <c e>1\arpeggio
  }
  \new Voice \relative c {
    \clef bass
    <c g'>2\arpeggio <b g'>2\arpeggio
    <c g'>1\arpeggio
  }
>>

\new Staff \relative c {
  \set Score.connectArpeggios = ##t
  \clef bass
  c2\arpeggio g\arpeggio
  c1\arpeggio
}
>>

\layout {
  \context {
    \Score
    \consists "Span_arpeggio_engraver"
  }
}

```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```

\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}

```

Creating slurs across voices

In some situations it is necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's second partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}
```

```

\override TextSpanner.style = #'dashed-line
\override TextSpanner.bound-details.left.text =
  \markup { \draw-line #'(0 . 1) }
\override TextSpanner.bound-details.right.text =
  \markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2
a4 \startTextSpan
b4 c
a4 \stopTextSpan

\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

Dynamics spanner with custom text

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use `-\mycresc`, otherwise the spanner start will rather be assigned to the next note.

```

% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.

```

```

mycresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

mydecresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

```

```

\relative c' {
  c4-\mycresc "custom cresc" c4 c4 c4 |
  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4 c4 c4 |
  c4 c4\! c4 c4
}

```

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```
\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}
```

Hairpins with different line styles

Hairpins can take any style from line-interface: dashed-line, dotted-line, line, trill, or zigzag.

```
\relative c' {
  c2\< c\!
  \override Hairpin.style = #'dashed-line
  c2\< c\!
  \override Hairpin.style = #'dotted-line
  c2\< c\!
  \override Hairpin.style = #'line
  c2\< c\!
  \override Hairpin.style = #'trill
  c2\< c\!
  \override Hairpin.style = #'zigzag
  c2\< c\!
  \revert Hairpin.style
  c2\< c\!
}
```

Hiding the extender line for text dynamics

Text-style dynamic changes (such as *cresc.* and *dim.*) are printed with a dashed line showing their extent. This line can be suppressed as follows.

```
\relative c' ' {
  \override DynamicTextSpanner.style = #'none
  \crescTextCresc
  c1\< | d | b | c\!
}
```

Horizontally aligning custom dynamics like “più f”

Some dynamic expressions involve additional text, like “sempre **pp**”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre **pp**” horizontally so that it is aligned as if it were only the `\pp`, there are several approaches:

- Simply use `\once \override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script `\once \overrideX-offset =` Drawback: `\once \override` is needed for every invocation!
- Set the dimensions of the additional text to 0 (using `#:with-dimensions '(0 . 0) '(0 . 0)`). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.
- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets `X-offset`! Drawback: One needs to set `DynamicText.X-offset`, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of `\pp`.

```
\paper {
  ragged-right = ##f
  indent = 5\cm
}
```

```
% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }
```

```
% Solution 2: Using a dynamic script & shifting with
%           \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
```

```

(markup #:line
  (#:normal-text
    #:italic "sempre"
    #:dynamic "pp"))))

% Solution 3: Padding the dynamic script so the center-alignment
%           puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
sempT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
sempM =
#(make-dynamic-script
  (markup #:line
    (#:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

% Solution 5: Dynamic with explicit shifting inside the scheme function
sempG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
sempMII =
#(make-dynamic-script
  (markup #:line (#:right-align
    #:normal-text
    #:italic "sempre"
    #:dynamic "pp"))))

Inserting a caesura

Caesura marks can be created by overriding the text property of the BreathingSign object.

A curved caesura mark is also available.

```
\relative c' ' {
  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.straight"
  }
  c8 e4. \breathe g8. e16 c4

  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.curved"
  }
  g8 e'4. \breathe g8. e16 c4
}
```

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their positioning can be tuned using the tie-configuration property.

See also snippet “Longer laissez vibrer ties”.

```

\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #`((-7 . ,DOWN)
          (-5 . ,DOWN)
          (-3 . ,UP)
          (-1 . ,UP))
  <c d e f>4\laissezVibrer r
}

```

Line arrows

Arrows can be applied to text spanners and line spanners (such as glissandi).

```

\relative c' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6

  \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

  \override Glissando.bound-details.right.arrow = ##t
  \override Glissando.arrow-length = #0.5
  \override Glissando.arrow-width = #0.25

  a8\startTextSpan gis a4 b\glissando b,
  g'4 c\stopTextSpan c2
}

```

Making slurs with complex dash structure

Slurs can be composed of complex dash patterns by setting the dash-definition property, which is a list of slur segments, which in turn are lists of parameters setting up the dash behavior of the given segment.

Slur segments are defined in terms of the Bézier parameter t , which ranges from 0 at the left end of the slur to 1 at the right end of the slur. A slur segment has the form $(start-t\ stop-t\ dash-fraction\ dash-period)$. In the segment spanning the range $start-t$ to $stop-t$, the dash pattern is defined by the values of $dash-fraction$ and $dash-period$. $dash-fraction$ specifies how

much of a dash period is black; if set to 1 you get a solid slur segment. The unit for *dash-period* is staff spaces.

```
\relative c' {
  \once \override
    Slur.dash-definition = #'(( 0 0.3 0.1 0.75)
                               (0.3 0.6 1 1 )
                               (0.65 1.0 0.4 0.75))

  c4( d e f)
  \once \override
    Slur.dash-definition = #'((0 0.25 1 1 )
                               (0.3 0.7 0.4 0.75)
                               (0.75 1.0 1 1 ))

  c4( d e f)
}
```

Modifying default values for articulation shorthand notation

The shorthands are defined in `ly/script-init.ly`, where the variables `dashHat`, `dashPlus`, `dashDash`, `dashBang`, `dashLarger`, `dashDot`, and `dashUnderscore` are assigned default values. The default values for the shorthands can be modified. For example, to associate the `-+` (`dashPlus`) shorthand with the *trill* symbol instead of the default “+” symbol, assign the value `\trill` to the variable `dashPlus`:

```
\relative c' { c1-+ }

dashPlus = \trill

\relative c' { c1-+ }
```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur – instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

See also snippet “Adjusting slur positions vertically”.

```

\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
  \override Slur.positions = #'(2 . 2)
  e4( a)
  \override Slur.positions = #'(3 . 3)
  e4( a)
  \override Slur.positions = #'(4 . 4)
  e4( a)
  \override Slur.positions = #'(5 . 5)
  e4( a)
  \override Slur.positions = #'(0 . 5)
  e4( a)
  \override Slur.positions = #'(5 . 0)
  e4( a)
  \stemUp
  \override Slur.positions = #'(-5 . -5)
  e4( a)
  \stemDown
  \revert Slur.positions
  e4( a)
}

```

Moving the ends of hairpins

The ends of hairpins may be offset by setting the `shorten-pair` property of the `Hairpin` object. Positive values move endpoints to the right, negative to the left. Unlike the `minimum-length` property, this property only affects the appearance of the hairpin; it does not adjust horizontal spacing (including the position of bounding dynamics). This method is thus suitable for fine-tuning a hairpin within its allotted space.

```
{
  c'1~\<
  c'2~ c'\!
  \once \override Hairpin.shorten-pair = #'(2 . 2)
  c'1~\<
  c'2~ c'\!
  \once \override Hairpin.shorten-pair = #'(-2 . -2)
  c'1~\<
  c'2~ c'\!
  c'1~\p-\tweak shorten-pair #'(2 . 0)\<
  c'2~ c'\ffff
}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Positioning text markups inside slurs

Text markups need to have the outside-staff-priority property set to #f in order to be printed inside slurs.

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(~\markup { \halign #-10 \natural } d4.) c8
}
```

Printing hairpins in various styles

Hairpin dynamics may be created in a variety of styles.

```
\relative c'' {
  \override Hairpin.stencil = #flared-hairpin
  a4\< a a a\f
  a4\p\< a a a\ff
  a4\s fz\< a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4\< a a a\f
  a4\p\< a a a\ff
  a4\s fz\< a a a\!
  \override Hairpin.stencil = #flared-hairpin
  a4\> a a a\f
  a4\p\> a a a\ff
  a4\s fz\> a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4\> a a a\f
  a4\p\> a a a\ff
  a4\s fz\> a a a\!
}
```

Printing hairpins using al niente notation

Hairpin dynamics may be printed with a circled tip (“al niente” notation) by setting the circled-tip property of the Hairpin object to #t.

```
\relative c'' {
  \override Hairpin.circled-tip = ##t
  c2\< c\!
  c4\> c\< c2\!
}
```

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of MetronomeMark or RehearsalMark appropriately.

```

\layout {
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}

```

Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the `to-barline` property.

```

\relative c'' {
  e4\< e2.
  e1\!
  \override Hairpin.to-barline = ##f
  e4\< e2.
  e1\!
}

```

Setting the minimum length of hairpins

If hairpins are too short, they can be lengthened by modifying the `minimum-length` property of the Hairpin object.

```

<<
{
  \after 4 \< \after 2 \> \after 2. \! f'1
  \override Hairpin.minimum-length = 8
  \after 4 \< \after 2 \> \after 2. \! f'1
}
{
  \*8 c'4
}
>>

```

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, `add-stem-support` would be required.

The solution is thus to write the note as a chord and add the articulations inside of `<...>`, using the direction modifiers `^` and `_` as appropriate.

```
\relative c' {
  <>^"Wrong"
  c2_\fermata^\fermata % The second fermata is ignored!
  <e d'>2^\flageolet_\flageolet

  \stopStaff s1 \startStaff

  <>^"Works if written inside a chord"
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet^\flageolet>2
  <e_\fermata^\fermata>2
}
```

Slanted parentheses around dynamics

The easiest way to parenthesize dynamics is to use the normal `\parenthesize` command and adjust the font size, e.g., `{ c'4\tweak Parentheses.font-size 2 \parenthesize \f }`. However, this results in upright parentheses, while dynamic marks are normally slanted. This snippet gives a method to make the parentheses slanted as well.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
    }
  )
)
```

```
}
#})))
```

```
\relative c' ' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Snap pizzicato (“Bartok” pizzicato)

A snap pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' ' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4^\snappizzicato
  <c, e g>4_\snappizzicato
}
```

Using \arpeggioBracket to make divisi more visible

The `\arpeggioBracket` command can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

```
\include "english.ly"
```

```
\score {
  \relative c' ' {
    \key a \major
    \time 2/2
    <<
    \new Voice = "upper"
    <<
    { \voiceOne \arpeggioBracket
      a2( b2
      <b d>1\arpeggio)
      <cs e>\arpeggio ~
      <cs e>4
    }
    \addlyrics { \lyricmode { A -- men. } }
    >>
    \new Voice = "lower"
```

```

    { \voiceTwo
      a1 ~
      a
      a ~
      a4 \bar "|"
    }
  >>
}

```

Using a bracket to clarify divisi

The `\nonArpeggiato` command can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

```
\include "english.ly"
```

```

\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
    \new Voice = "upper" <<
    {
      \voiceOne
      a2( b2
      <b d>1\nonArpeggiato)
      <cs e>\nonArpeggiato ~
      <cs e>4
      \fine
    }
    \addlyrics { \lyricmode { A -- men. } }
    >>
    \new Voice = "lower" {
      \voiceTwo
      a1 ~
      a
      a ~
      a4
      \fine
    }
  }
  >>
}

```

Using a tick as the breath mark symbol

Vocal and wind music frequently uses a tick mark as a breathing sign. This indicates a breath that subtracts a little time from the previous note rather than causing a short pause, which is indicated by the comma breath mark. The mark can be moved up a little to take it away from the stave.

```
\relative c' ' {
  c2
  \breathe
  d2
  \override BreathingSign.Y-offset = #2.6
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.tickmark" }
  c2
  \breathe
  d2
}
```

Using double slurs for legato chords

Some composers write two *slurs* when they want legato chords. This can be achieved by setting `doubleSlurs` context property.

```
\relative c' {
  \set doubleSlurs = ##t
  <c e>4( <d f> <c e> <d f>)
}
```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the `layer` property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature, setting the `whiteout` property of `TimeSignature`. To do this, `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

```
{
  \override Score.StaffSymbol.layer = 4
  \override Staff.TimeSignature.layer = 3
  b'2 b'~
  \once \override Staff.TimeSignature.whiteout = ##t
  \time 3/4
  b' r4
}
```

}

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
\tweak stencil
  #(\lambda (grob)
    (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
  \stopped

\relative c' {
  a'4^\upline a( c d')_\upline
}
```

Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the `staff-padding` property of the `DynamicLineSpanner` object.

```
\relative c' {
  \override DynamicLineSpanner.staff-padding = #4
  c2\p f\mf
  g2\< b4\> c\!
}
```

4 Repeats

See also Section “Repeats” in *Notation Reference*.

Changing the default bar lines

Default bar lines can be changed when re-defined in a Score context.

```
\layout {
  \context {
    \Score
    % Changing the defaults from engraver-init.ly
    measureBarType = "!"
    startRepeatBarType = "[|:"
    endRepeatBarType = ":|]"
    doubleRepeatBarType = ":||[|:"
  }
}

{
  c'1
  \repeat volta 2 { c' c' }
  \repeat volta 2 { c' c' \alternative { \volta 1 { c' }
                                         \volta 2 { c' } } }
  \bar "|."
}
```

Controlling the appearance of tremolo slashes

Using various properties of the StemTremolo grob it is possible to control the appearance of tremolo slashes.

- Property `slope` sets the slope for tremolo slashes.
- Property `shape` determines whether tremolo slashes look like rectangles (value `rectangle`) or like very small beams (value `beam-like`).
- Property `style` sets both the slope and the shape depending on whether the note has flags, beams, or only a plain stem. This is in contrast to the previous two properties, which change the slope and shape unconditionally. There are two styles defined.
 - `default`: slashes for down-stem flags are longer and more sloped than slashes for up-stem flags; slashes on beamed notes have a rectangular shape and are parallel to the beam.
 - `constant`: all slashes are beam-like and have the same slope except for down-stem flags.

```

music = {
  a''4:32 a':
  e''8: \noBeam e':
  a'':[ a':]
  f':[ g':]
  d':[ d':]
}

\new Staff {
  <>\markup "default"
  \music
}

\new Staff {
  <>\markup \typewriter "style = #'constant"
  \override StemTremolo.style = #'constant
  \music
}

\new Staff {
  <>\markup \typewriter "shape = #'rectangle"
  \override StemTremolo.shape = #'rectangle
  \music
}

\new Staff {
  <>\markup \typewriter "shape = #'beam-like"
  \override StemTremolo.shape = #'beam-like
  \music
}

\new Staff {
  <>\markup \typewriter "slope = -0.2"
  \override StemTremolo.slope = -0.2
  \music
}

```

Cross-staff tremolos

Since `\repeat tremolo` expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its `\change Staff` command.

```
\new PianoStaff <<
  \new Staff = "up" \relative c'' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c'' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
}
>>
```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half note, or between a half note and a whole note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the `gap-count` property of the `Beam` object, and the size of the gaps between beams and stems is set with the `gap` property.

```

\relative c' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.67
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.33
  \repeat tremolo 8 { a32 f }
}

```

Isolated percent repeats

Isolated percents can also be printed.

```

makePercent =
#(define-music-function (note) (ly:music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
    'length (ly:music-length note)))

```

```

\relative c' {
  \makePercent s1
}

```

Measure counters

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \*7 { c'4 d' e' f' }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \*5 { g'4 f' e' d' }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \*7 { g'4 f' e' d' }
  \stopMeasureCount
}

```

Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```

\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \%10 c1 \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \%6 { c1 d1 }
}

```

Percent repeat counter

Measure repeats of more than two repeats are printed with a counter if the `countPercentRepeats` context property is set.

```
\relative c' ' {
  \set countPercentRepeats = ##t
  \%4 c1
}
```

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
\relative c' ' {
  c4 c c c | c c c c |
  \repeat segno 2 {
    c4 c c c | c c c c |
    \alternative {
      \volta 1 {
        c4 c c c | c c c c |
        % If you don't use \break at Coda, use \noBreak here
        % and after \bar "" below.
        \noBreak
        \section % double bar line
        \cadenzaOn % pause bar count
        \stopStaff % remove staff lines
        % Increasing the unfold counter will expand the staff-free space
        \repeat unfold 4 {
          s1
          \bar ""
        }
        % Place JumpScript where the staff would normally be.
        \once \override Score.JumpScript.outside-staff-priority = ##f
        \once \override Score.JumpScript.Y-offset = 0
        \startStaff % resume bar count
        \cadenzaOff % show staff lines again
      }
    }
  }
}
\sectionLabel "Coda"
% Show Coda on a new line
\break
\*6 { c4 c c c }
\fine
}
```

Setting the double repeat default for volte

There are different double repeat styles for volte that can be selected using the context property `doubleRepeatBarType`.

```
\relative c' {
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = ":\dots:"
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = ":\|.|\|:"
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = ":\|.|\|:"
  \repeat volta 2 { c1 }
}
```

Shortening volta brackets

By default, volta brackets are drawn over all of the alternative music, but it is possible to shorten them by overriding `VoltaBracket.musical-length`. In the next example, the bracket only spans one measure, which has a duration of 3/4.

```
\fixed c' {
  \time 3/4
  c4 c c
  \repeat volta 5 {
    d4 d d
    \alternative {
      \volta 1,2,3,4 {
        \once \override Score.VoltaBracket.musical-length =
          \musicLength 2.
        e4 e e
        f4 f f
      }
      \volta 5 {
        g4 g g } } }
  }
}
```

Unfolding tremolo repeats

Currently, `note:duration`, which is more or less a shortcut for `\repeat tremolo`, is not unfolded by `\unfoldRepeats` (this is tracked in Issue #6145 (<https://gitlab.com/lilypond/lilypond/-/issues/6145>)). The function given in this snippet provides a workaround.

```
fixTremolos =
#(define-music-function (music) (ly:music?)
  (music-map
    (lambda (m)
      (let ((event (any (lambda (a)
                          (and (music-is-of-type? a 'tremolo-event)
                              a))
                        (ly:music-property m 'articulations)))))
        (if event
          (let* ((total-tremolo-duration (ly:music-property m
                                                             'duration))
                 (tremolo-type (ly:music-property event
                                                    'tremolo-type))
                 (one-tremolo-note-duration
                  (ly:make-duration (ly:intlog2 tremolo-type)))
                 (tremolo-note-count
                  (/ tremolo-type (expt 2 (ly:duration-log
                                           total-tremolo-duration)))))
            (set! (ly:music-property m 'duration)
                  one-tremolo-note-duration)
            (set! (ly:music-property m 'articulations)
                  (delete! event (ly:music-property m 'articulations)))
            (make-music 'TremoloRepeatedMusic
                        'repeat-count tremolo-note-count
                        'element m))
          m)))
  music))

unfoldRepeats = \unfoldRepeats #'() \fixTremolos \etc

music = { \repeat tremolo 8 c'16 c'2:16 }

{
  \music
  \unfoldRepeats \music
}
```

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volte can be put below chords.

```

\score {
  <<
    \chords { c1 c1 }
    \new Staff \with { \consists "Volta_engraver" }
    {
      \repeat volta 2 { c'1 \alternative { c' } }
    }
  >>
  \layout {
    \context {
      \Score
      \remove "Volta_engraver"
    }
  }
}

```

Volta brackets in multiple staves

By adding the `Volta_engraver` to the relevant staff, volte can be put over staves other than the topmost one in a score.

`\repeat` and related commands should be present in all staves.

```

voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
    \alternative {
      \volta 1 { d1 }
      \volta 2 { e1 }
    }
  }
}

<<
\new StaffGroup <<
  \new Staff \voltaMusic
  \new Staff \voltaMusic
>>
\new StaffGroup <<
  \new Staff \with { \consists "Volta_engraver" }
    \voltaMusic
  \new Staff \voltaMusic
>>
>>

```

Volta text markup using repeatCommands

Though voltes are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#`((volta ,textIdentifier) ...)` (note the use of the backtick after `#` and the comma before *textIdentifier*). Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { \volta-number { 1. 2. 3... } \italic { ad lib. } }
```

```
\relative c' {
  c1
  \set Score.repeatCommands = #`((volta ,voltaAdLib) start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

5 Simultaneous notes

See also Section “Simultaneous notes” in *Notation Reference*.

Additional voices to avoid collisions

In some instances of complex polyphonic music, additional voices are necessary to prevent collisions between notes. If more than four parallel voices are needed, additional voices can be added by defining a variable using the Scheme function `context-spec-music`.

```
voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)
```

```
\relative c' ' {
  \time 3/4
  \key d \minor
  \partial 2
  <<
    \new Voice {
      \voiceOne
      a4. a8
      e'4 e4. e8
      f4 d4. c8
    }
    \new Voice {
      \voiceTwo
      d,2
      d4 cis2
      d4 bes2
    }
    \new Voice {
      \voiceThree
      f'2
      bes4 a2
      a4 s2
    }
    \new Voice {
      \voiceFive
      s2
      g4 g2
      f4 f2
    }
  >>
}
```

Changing \partCombine texts

When using the automatic part combining feature, the printed text for the solo and unison sections may be changed.

```

\new Staff <<
  \set Staff.soloText = "girl"
  \set Staff.soloIIText = "boy"
  \set Staff.aDueText = "together"
  \partCombine
    \relative c'' {
      g4 g r r
      a2 g
    }
    \relative c'' {
      r4 r a( b)
      a2 g
    }
  }
>>

```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```

\relative c' {
  <\tweak font-size #-2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e }_~\markup { A big c }
}

```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```

fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>

```

Combining two parts on the same staff

The part combiner tool (i.e., the `\partCombine` command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property `printPartCombineTexts` to `#f`.

For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use them if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, `\partCombine` without texts, and `\partCombine` with texts.

```
musicUp = \relative c'' {
  \time 4/4
  a4 c4.( g8) a4 |
  g4 e' g,( a8 b) |
  c b a2.
}

musicDown = \relative c'' {
  g4 e4.( d8) c4 |
  r2 g'4( f8 e) |
  d2 \stemDown a
}

\score {
  <<
    \new Staff \with {
      instrumentName = "standard polyphony"
    } << \musicUp \\\musicDown >>

    \new Staff \with {
      instrumentName =
        \markup { \typewriter "\\partCombine" without text}
      printPartCombineTexts = ##f
    } \partCombine \musicUp \musicDown

    \new Staff \with {
      instrumentName =
        \markup { \typewriter "\\partCombine" with text}
    } \partCombine \musicUp \musicDown
  >>

  \layout {
    indent = 6.0\cm
    \context {
```

```

\Score
% Setting this to a large value avoids a bar line at the
% beginning that would connect the three staves otherwise.
\override SystemStartBar.collapse-height = 30
}
}
}

```

standard polyphony	
\partCombine without text	
\partCombine with text	

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```

fixA = {
  \once \override Stem.length = #12
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ { \voiceThree \fixB dis } >> s
}

```

Forcing horizontal shift of notes

When the typesetting engine cannot cope, the following syntax can be used to override typesetting decisions. The units of measure used here are staff spaces.

```

\relative c' <<
{
  <d g>2 <d g>
}
\\
{
  <b f'>2
  \once \override NoteColumn.force-hshift = 1.7
  <b f'>2
}
>>

```

Making an object invisible using \hide

Applying `\hide` to a grob causes objects of this type to be printed with “invisible ink”. They are not printed, but all of their other behavior is retained:

- the objects still take up space,
- they take part in collision resolution, and
- slurs, ties, and beams can be attached to them as usual.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
  >>
}

\paper {
  line-width = 40\mm
  ragged-right = ##f
}

```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be changed setting the `prefer-dotted-right` property of the `NoteCollision` grob.

```
\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>
```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message “warning: ignoring too many clashing note columns” appears when compiling the LilyPond file. This message can be suppressed by setting the `ignore-collision` property of the `NoteColumn` object to `#t`. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t

\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}
```

Two \partCombine pairs on one staff

The `\partCombine` function takes two music expressions, each containing a part, and distributes them among four `Voice` contexts named “one”, “two”, “solo”, and “shared”, depending on when and how the parts are merged into a common voice.

Variants of `\partCombine` are `\partCombineUp` and `\partCombineDown` to produce up-stem and down-stem merging of two voices, respectively. Combining them to squeeze four parts into a single staff, however, need some special setup, which this snippet defines accordingly.

```
customPartCombineUp =
#(define-music-function (part1 part2) (ly:music? ly:music?)
  "Make an up-stem `VoiceBox` context that combines PART1 and PART2.
```

The context is called 'Up'; internally, the function calls

```
`\partCombineUp`."
#{
  \new VoiceBox = "Up" <<
    \context Voice = "one" { \voiceOne }
    \context Voice = "two" { \voiceThree }
    \context Voice = "shared" { \voiceOne }
    \context Voice = "solo" { \voiceOne }
    \context NullVoice = "null" {}
    \partCombine #part1 #part2
  >>
#})
```

```
customPartCombineDown =
#(define-music-function (part3 part4) (ly:music? ly:music?)
  "Make a down-stem `VoiceBox` context that combines PART3 and PART4.
```

The context is called 'Down'; internally, the function calls

```
`\partCombineDown`."
#{
  \new VoiceBox = "Down" <<
    \set VoiceBox.soloText = #"Solo III"
    \set VoiceBox.soloIIText = #"Solo IV"
    \context Voice = "one" { \voiceFour }
    \context Voice = "two" { \voiceTwo }
    \context Voice = "shared" { \voiceFour }
    \context Voice = "solo" { \voiceFour }
    \context NullVoice = "null" {}
    \partCombine #part3 #part4
  >>
#})
```

```
soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }
```

```
\new Staff <<
  \key b\minor

  \transpose b b' \customPartCombineUp \soprano \alto
  \customPartCombineDown \tenor \bass
>>
```

[illegible]

6 Staff notation

See also Section “Staff notation” in *Notation Reference*.

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```
\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {
        c1 | c
      } <<
        { c1 | d }
      \new Staff {
        \once \omit Staff.TimeSignature
        c1 | b
      }
    } >>
  } >>
  c1
}
```

}

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which is never printed anyway). The workaround is to set the `explicitKeySignatureVisibility` property of the `Staff` grob as is shown in the example.

```
\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility =
      #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
  >>
}
```

Adding indicators to staves which get split after a break

This snippet defines the commands `\splitStaffBarLine`, `\convUpStaffBarLine`, and `\convDownStaffBarLine`. These add arrows at a bar line to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

Note that the implementation in this snippet draws dimensionless arrows into the right margin. For normal printing, this doesn't cause problems. However, it is necessary to increase the bounding box horizontally if you render the code as an image to avoid cropping, as demonstrated below.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* ((PI-OVER-180 (/ (atan 1 1) 34))
        (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
        (angle-rad (degrees->radians angle-deg))
        (target-x (* length (cos angle-rad)))
        (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0)
        #:concat (#:draw-line (cons length 0)
          #:arrow-head X RIGHT fill))))))

splitStaffBarLineMarkup = \markup \with-dimensions #'(0 . 0) #'(0 . 0) {
  \combine
  \arrow-at-angle #45 #(sqrt 8) ##t
  \arrow-at-angle #-45 #(sqrt 8) ##t
}

splitStaffBarLine = {
  \once \override Staff.BarLine.stencil =
  #(lambda (grob)
    (ly:stencil-combine-at-edge
      (ly:bar-line::print grob)
      X RIGHT
```

```

        (grob-interpret-markup grob splitStaffBarLineMarkup)
    0))
\break
}

convDownStaffBarLine = {
  \once \override Staff.BarLine.stencil =
  #(lambda (grob)

The image displays three musical systems, each with a vocal staff and a piano accompaniment staff. The first system shows Soprano (S A) and Tenor Bass (T B) parts with lyrics 'a b c d'. The second system shows Soprano I (SI SII) and Alto I (AI AII) parts with lyrics 'e f g h'. The third system shows Soprano (S A) and Tenor Bass (T B) parts with lyrics 'i j k l'. The piano accompaniment consists of single notes in the bass clef.

Adding orchestral cues to a vocal score

This snippet shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `\cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `\addQuote`, the name to be inserted before the cue notes, then either UP or DOWN to specify either `\voiceOne` with the name above the staff or `\voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

```
cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
```

```

        <>-\markup { \tiny #name }
    $music
}
#})

flute = \relative c'' {

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface`; see Graphical Object Interfaces (<https://lilypond.org/doc/v2.24/Documentation/internals/graphical-object-interfaces>) for a list of possible values for *grob-interface*.

A common use case is printing the ambitus between key signature and time signature.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Changing the default bar lines

Default bar lines can be changed when re-defined in a Score context.

```
\layout {
  \context {
    \Score
    % Changing the defaults from engraver-init.ly
    measureBarType = "!"
    startRepeatBarType = "[|:"
    endRepeatBarType = ":|]"
    doubleRepeatBarType = ":||][|:"
  }
}

{
  c'1
  \repeat volta 2 { c' c' }
  \repeat volta 2 { c' c' \alternative { \volta 1 { c' }
                                         \volta 2 { c' } } }
  \bar "|."
}
```

Changing the number of lines in a staff

The number of lines in a staff may be changed by overriding the StaffSymbol property line-count.

```
upper = \relative c'' {
  c4 d e f
}

lower = \relative c {
  \clef bass
  c4 b a g
}

\score {
  \context PianoStaff <<
```

```

\new Staff {
  \upper
}
\new Staff {
  \override Staff.StaffSymbol.line-count = #4
  \lower
}
>>
}

```

Changing the staff size

The simplest way to resize staves is to use

```

#(set-global-staff-size size)

```

To resize an individual staff's size, you can use the properties `staff-space` and `fontSize`.

```

<<
\new Staff \relative c'' {
  \dynamicDown c8\ff c c c c c c c
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} \relative c {
  \clef bass c8 c c c c\ff c c c
}
>>

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 10) % for the documentation
% #(set-global-staff-size 20) % for letter and A4

```

```

\book {
  \score {
    { \*12 { s1 \break } }
  }
}

```

```

\layout {
  indent = 0
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

% for the documentation
\paper {
  #(set-paper-size "a6")
  ragged-last-bottom = ##f
  line-width = 90\mm
  left-margin = 7.5\mm
  bottom-margin = 5\mm
  top-margin = 5\mm
  tagline = ##f
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
  tagline = ##f
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180\mm
  left-margin = 15\mm
  bottom-margin = 10\mm
  top-margin = 10\mm
  tagline = ##f
}
%}

```

}

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor and D major with an extended range of shown flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil =
    #(lambda (grob)
      (grob-interpret-markup grob
        #{ \markup\combine
          \musicglyph "clefs.C"
          \translate #'(-3 . -2)
          \musicglyph "clefs.F"
        #}))
      clefPosition = #3
```

```

    middleCPosition = #3
    middleCClefPosition = #3
}

{
  \key d\minor f bes, f bes, |
  \key d\major fis b, fis b, |
}

```

Cross-staff stems

This snippet shows how to use `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem lengths need not be specified, as the variable distance between noteheads and staves is calculated automatically. However, it is important that `\crossStaff` is applied to the correct voice or staff (i.e., on the opposite side of where a beam is or would be positioned) to get the desired effect.

```

\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

\new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16\> e'8. g8 r\! |
    e'8 f' g'4
    \voiceTwo
    % Down to lower staff
    \crossStaff { e'8 e'8 } e'4 |
  }

  \new Staff {
    \clef bass
    \voiceOne
    % Up to upper staff
    \crossStaff { <e g>4 e, g16 a8. c8 } d |
    g8 f g4 \voiceTwo g8 g g4 |
  }
>>

```

Display bracket with only one staff in a system

If there is only one staff in a `ChoirStaff` or `StaffGroup` context, the bracket and the starting bar line will not be displayed by default. This can be changed by setting the `collapse-height` property to a value less than the number of staff lines in the staff.

Note that in contexts such as `PianoStaff` and `GrandStaff` where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

```
\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  >>
}
\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  >>
}
```

Displaying a whole GrandStaff system if only one of its staves is alive

In many orchestral scores it is custom to not show staves for instruments that are silent for a while; this is called a ‘Frenched’ score. LilyPond provides this functionality via the `\RemoveEmptyStaves` command.

When they play again it is often preferred to show the staves of *all instruments of such a group*. This can be done by adding the `Keep_alive_together_engraver` to the grouping context (e.g., `GrandStaff` or `StaffGroup`).

In the example below the violins are silent in the second system. Only the first violin plays the last measure in the third system but the staff of the second violin is also displayed.

```

\score {
  <<
    \new Staff = "Staff_flute" \with {
      instrumentName = "Flute"
      shortInstrumentName = "Fl"
    } \relative c' {
      \*3 { c'4 c c c | c c c c | c c c c | \break }
    }

    \new StaffGroup = "StaffGroup_Strings" <<
      \new GrandStaff = "GrandStaff_violins" <<
        \new Staff = "StaffViolinI" \with {
          instrumentName = "Violin I"
          shortInstrumentName = "Vi I"
        } \relative c'' {
          a1 | R1*7 | \*12 a16 a4 |
        }
        \new Staff = "StaffViolinII" \with {
          instrumentName = "Violin II"
          shortInstrumentName = "Vi II"
        } \relative c' {
          e1 | R1*8 |
        }
      >>

      \new Staff = "Staff_cello" \with {
        instrumentName = "Cello"
        shortInstrumentName = "Ce"
      } \relative c {
        \clef bass \*9 c1 |
      }
    >>
  >>
}

\layout {
  indent = 3.0\cm
  short-indent = 1.5\cm

  \context {
    \GrandStaff
    \consists Keep_alive_together_engraver
  }
  \context {
    \Staff
    \RemoveEmptyStaves
  }
}

```

The image displays three musical staves, each with four parts: Flute, Violin I, Violin II, and Cello. The first staff shows a continuous melody for the Flute. The second and third staves show a trill for Violin I, which is extended across multiple measures. The Cello part is a simple bass line.

Extending a trill spanner

For `TrillSpanner` grobs, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```
\relative c' {
  \key c\minor
  \time 2/4
  c16( as') c,-. des-.
  \once\override TrillSpanner.minimum-length = #15
  \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4\startTrillSpan { d16[(\stopTrillSpan es)] }
  c( c' g es c g' es d
  c8)
}
```

Extending glissandi across repeats

A glissando that extends into several `\alternative` blocks can be simulated by adding a hidden grace note with a glissando at the start of each `\alternative` block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function that takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = 3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {
  \new StaffGroup <<
    \new Staff <<
      \new Voice { \clef "G_8" \music }
    >>
  >>
}
```

```

\new TabStaff <<
  \new TabVoice { \clef "moderntab" \music }
>>
>>
}

```

Flat ties

This snippet provides a function `flared-tie` to draw a tie that consist of straight lines. It is intended as a replacement for the default tie-drawing function (i.e., a replacement argument for the `stencil` property of the `Tie` grob).

The argument of `flared-tie` is a list of coordinate pairs that specify additional points between the first and last point to span up the tie's lines. The first and last point are identical to the original tie's start and end point, respectively. The X and Y coordinate values are multiples of the bounding box length and height of the original tie (also taking care of the tie's direction); consequently, the first point has coordinates (0,0), and the last point (1,0).

The function `flare-tie` defines a shorthand for a flat tie. Further tweaking of the shape is possible by overriding `Tie.details.height-limit` or with `\shape`. It is also possible to change the custom definition on the fly.

```

#(define ((flared-tie coords) grob)
  (define (pair-to-list pair)
    (list (car pair) (cdr pair)))

  (define (normalize-coords goods x y dir)
    (map
      (lambda (coord)
        (cons (* x (car coord)) (* y dir (cdr coord))))
      goods))

  (define (my-c-p-s points thick)
    (make-connected-path-stencil points thick 1.0 1.0 #f #f))

  ;; Calling `ly:tie::print` and assigning its return value to a
  ;; variable in this outer `let` triggers LilyPond to position the
  ;; tie, allowing us to extract its extents. We only proceed,
  ;; however, if the tie doesn't get discarded (for whatever reason).
  (let ((sten (ly:tie::print grob)))
    (if (grob::is-live? grob)
      (let* ((layout (ly:grob-layout grob))

```

```

        (line-thickness (ly:output-def-lookup layout
                                'line-thickness))
        (thickness (ly:grob-property grob 'thickness 0.1))
        (used-thick (* line-thickness thickness))
        (dir (ly:grob-property grob 'direction))
        (xex (ly:stencil-extent sten X))
        (yex (ly:stencil-extent sten Y))
        (lenx (interval-length xex))
        (leny (interval-length yex))
        (xtrans (car xex))
        (ytrans (if (> dir 0)(car yex) (cdr yex)))
        ;; Add last point.
        (coord-list (append coords '((1.0 . 0.0))))
        (uplist
         (map pair-to-list
              (normalize-coords coord-list lenx (* leny 2) dir))))
    (ly:stencil-translate
     (my-c-p-s uplist used-thick)
     (cons xtrans ytrans)))
'()))

% Define a default tie shape consisting of three straight lines.
#(define flare-tie
  (flared-tie '((0.1 . 0.3) (0.9 . 0.3))))

\relative c' {
  a4~ a
  \once \override Tie.stencil = #flare-tie
  a4~ a \break

  <a c e a c e a c e>~ q
  \once \override Tie.stencil = #flare-tie
  q~ q\break

  <>~\markup \small \typewriter "height-limit = 14"
  \override Tie.details.height-limit = 14

  \revert Tie.details.height-limit

  <>~\markup \small \typewriter
    "\\shape #'((0 . 0) (0 . -1) (0 . -1) (0 . 0))"
  \shape #'((0 . 0) (0 . -1) (0 . -1) (0 . 0)) Tie
  a4~ a

```

```

\once \override Tie.stencil = #flare-tie
\shape #'((0 . 0) (0 . -1) (0 . -1) (0 . 0)) Tie
a4~ a \break

<>^\markup \small \typewriter
      "#(flared-tie '((0.2 . 2) (0.5 . -3) (0.8 . 1)))"
\once \override Tie.stencil =
      #(flared-tie '((0.2 . 2) (0.5 . -3) (0.8 . 1)))
a4~ a
<>_^\markup \small \typewriter
      "#(flared-tie '((0.5 . 2)))"
\once \override Tie.stencil = #(flared-tie '((0.5 . 2)))
a'4~ a
}

```

The image displays six musical staves, each illustrating a different tie style. The staves are numbered 1 through 6 on the left. Staff 1 shows a standard tie. Staff 2 shows a flared tie with the annotation `height-limit = 14`. Staff 3 shows a flared tie with the annotation `height-limit = 0.5`. Staff 4 shows a flared tie with the annotation `height-limit = 0.5`. Staff 5 shows a flared tie with the annotation `height-limit = 0.5`. Staff 6 shows a flared tie with the annotation `height-limit = 0.5`.

Forcing measure width to adapt to a metronome mark's width

By default, metronome marks do not influence horizontal spacing. This can be solved through a simple override, as shown in the second half of the example.

```

example = {
  R1
  \tempo "Allegro molto" R1*6
  \tempo "poco rit." R1*2
  \tempo "a tempo" R1*8 \break
}

{
  \compressMMRests {
    \example
    \override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)
    \example
  }
}

\layout {
  ragged-right = ##t
}

```

The image shows two musical staves. The first staff begins with a common time signature 'c' followed by a whole rest. Above the staff, the tempo markings 'Allegro molto', 'poco rit.', and 'a tempo' are positioned over rests of 6, 2, and 8 measures respectively. The second staff begins with a measure number '18' followed by a whole rest. It also features the same tempo markings and rest durations (6, 2, and 8 measures) for 'Allegro molto', 'poco rit.', and 'a tempo' respectively.

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```

\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}

```

The image shows a musical staff with a treble clef and a common time signature 'c'. It contains a whole note 'a', followed by a glissando line (a diagonal line with a wavy top) that connects to a quarter note 'f''4' and a quarter note 'd,'.

Harmonizing bar line thickness for staves with different sizes

When using `\magnifyStaff` only for some staves in a `StaffGroup`, `BarLine` grobs do not align any more due to its changed properties `thick-thickness`, `hair-thickness`, and `kern`.

To fix this, multiple workarounds are available, as demonstrated below.

```

\markuplist {
% First row.
\fill-line {
  \score {
    \new StaffGroup <<
      \new Staff \with { \magnifyStaff #1/2 } {
        \textMark \markup \tiny "default"
        b1 b \bar "|."
      }
      \new Staff { b b }
    >>
  }
  \score {
    \new StaffGroup <<
      \new Staff \with { \magnifyStaff #1/2 } {
        \textMark \markup \tiny \column { "reverting only the"
          "final bar line" }

        b1 b
        \revert Staff.BarLine.thick-thickness
        \revert Staff.BarLine.hair-thickness
        \revert Staff.BarLine.kern
        \bar "|."
      }
      \new Staff { b b }
    >>
  }
  \score {
    \new StaffGroup <<
      \new Staff \with { \magnifyStaff #1/2
        #(revert-props 'magnifyStaff 0
          '((BarLine thick-thickness)
            (BarLine hair-thickness)
            (BarLine kern))) } {
        \textMark \markup \tiny \column { "cancelling"
          \typewriter "\\magnifyStaff"
          "only for bar lines" }

        b1 b \bar "|."
      }
      \new Staff { b b }
    >>
  }
}

\vspace #2

% Second row.
\fill-line {
  \score {
    \new StaffGroup <<
      \new Staff \with { \magnifyStaff #1/2 } {
        \textMark \markup \tiny \column { "mimicking"
          \typewriter "\\magnifyStaff"

```

```

                                "on the other staves" }

    b1 b \bar "|" }
    \new Staff \with { #(scale-props 'magnifyStaff 1/2 #t
                                ((BarLine thick-thickness)

                                (BarLine kern))) } {

        \textMark \markup \tiny \column { "applying an"
                                "intermediate"
                                "value to all staves" }

    b1 b \bar "|" }
    \new Staff \with { #(scale-props 'magnifyStaff 3/4 #t
                                ((BarLine thick-thickness)
                                (BarLine hair-thickness)
                                (BarLine kern))) } {

    b b }
    >>
}
""
}
}

```

Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. While today musicians are used to bar lines in order to faster recognize rhythmic patterns, bar lines were not yet invented during the period of mensural music; in fact, the meter often changed after every few notes. As a compromise, bar lines are often printed between the staves rather than on the staves.

% A short excerpt from the Jubilate Deo by Orlande de Lassus

Inserting score fragments above a staff, as markups

The `\markup` command is quite versatile. In this snippet, it contains a `\score` block instead of texts or marks.

```
tuning = \markup \score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \clef bass
    <c, g, d g>1
  }
  \layout {
    indent = 0\cm
  }
}

\header {
  title = "Solo Cello Suites"
  subtitle = "Suite IV"
  subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning }
  tagline = ###
}
```

```

\layout {
  ragged-right = ##f
}

\relative c' {
  \time 4/8
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  g8 a g a
  g8 a g a
}

```

Solo Cello Suites

Suite IV

Originalstimmung: 

Let TabStaff print the topmost string at bottom

In tablatures, the first string is usually printed topmost. If you want to have it at the bottom, set the `stringOneTopmost` context property to `##f`. For a context-wide setting this could be done in the `\layout` block as well.

```

%\layout {
% \context {
%   \Score
%   stringOneTopmost = ##f
% }
% \context {
%   \TabStaff
%   tablatureFormat = #fret-letter-tablature-format
% }
%}

```

```

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}

```

```

<<
  \new Staff {
    \clef "G_8"
    <>_"default" \m
    <>_"italian (historic)"\m
  }
  \new TabStaff
  {

```

```

\m
\set Score.stringOneTopmost = ##f
\set TabStaff.tablatureFormat = #fret-letter-tablature-format
\m
}
>>

```

The image shows a musical score with two systems. The first system is labeled 'default' and the second is labeled 'italian (historic)'. Both systems have a treble clef staff with a key signature of one sharp (F#) and a common time signature (C). The first system shows a melody on the treble staff and a corresponding guitar tablature on the bottom staff. The second system shows the same melody and tablature, but the tablature is formatted using letters (a, c, b, a) instead of numbers (0, 2, 2, 1, 0, 0).

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```

music = \relative c {
  c4 d e f
  g4 a b c
  d4 e f g
}

<<
\new Staff {
  \clef "G_8"
  \music
}
\new TabStaff \with {
  tablatureFormat = #fret-letter-tablature-format
} {
  \music
}
>>

```

The image shows a musical score with a treble clef staff and a guitar tablature staff. The tablature is formatted using letters (a, b, c, d) instead of numbers. The score is divided into three measures. The first measure has a melody on the treble staff and a corresponding guitar tablature on the bottom staff. The second and third measures show the continuation of the melody and tablature.

Making glissandi breakable

Normally, LilyPond refuses to automatically break a line at places where a glissando crosses a bar line. This behavior can be changed by setting the `Glissando.breakable` property to `#t`. Also setting the `after-line-breaking` property to `#t` makes the glissando line continue after the break.

The `breakable` property does not affect manual breaks inserted with commands like `\break`.

```

glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

music = {
  \*16 f8 |
  f1\glissando |
  a4 r2. |
  \*16 f8 |
  f1\glissando \once\glissandoSkipOn |
  a2 a4 r4 |
  \*16 f8
}

\relative c'' {
  <>\markup { \typewriter Glissando.breakable
              set to \typewriter "#t" }
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  \music
}

\relative c'' {
  <>\markup { \typewriter Glissando.breakable not set }
  \music
}

\paper {
  line-width = 100\mm
}

```

Glissando.breakable set to #t

Glissando.breakable not set

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Measure counters

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \*7 { c'4 d' e' f' }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \*5 { g'4 f' e' d' }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \*7 { g'4 f' e' d' }
```

```
\stopMeasureCount
}
```

Mensurstriche layout (bar lines between the staves)

Mensurstriche, bar lines between but not through staves, can be printed by setting `measureBarType` to `"-span|"` and using a grouping context that allows span bars, such as `StaffGroup`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}
```

```
music = \fixed c'' {
  c1
  d2 \section e2
  f1 \fine
}
```

```
\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>
```

Modifying the ottava spanner slope

It is possible to change the slope of the ottava spanner.

```

\relative c' ' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
      (right . ((Y . 5.0) ; Change the number here
        (padding . 0)
        (attach-dir . ,RIGHT)
        (text . ,(make-draw-dashed-line-markup
          (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =
    #ly:horizontal-line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info =
    #ly:horizontal-line-spanner::calc-right-bound-info
  \ottava 1
  c1
  c'''1
}

```

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The `systemStartDelimiterHierarchy` property of the `StaffGroup` context takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```

\new StaffGroup
\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = 4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare
      (SystemStartBrace
        (SystemStartBracket a
          (SystemStartSquare b))
        c)
      d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }

```

>>

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property, in the `Staff` context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

```
\set Staff.keyAlterations =
  #`(((octave . step) . alter) ((octave . step) . alter) ...)
```

where, for each element in the list, *octave* specifies the octave (0 being the octave from middle C to the B above), *step* specifies the note within the octave (0 means C and 6 means B), and *alter* is one of SHARP, FLAT, DOUBLE-SHARP, etc., preceded by a comma.

Alternatively, you can use the more concise format (*step . alter*) for each item in the list if the same alterations are used in all octaves.

For microtonal scales where a “sharp” is not 100 cents, *alter* refers to the alteration as a proportion of a 200-cent whole tone.

```
\include "arabic.ly"
```

```
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))

  % \set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dods do do |
}
```

Orchestra, choir and piano template

This template demonstrates the use of nested `StaffGroup` and `GrandStaff` contexts to subgroup instruments of the same type together, and a way to use `\transpose` so that variables hold music for transposing instruments at concert pitch.

```

Print chord names with same root and different bass as slash and bass note

To print subsequent chord names only differing in their bass note as slash and bass note without a root symbol, use the Scheme engraver defined in this snippet. The behaviour is controlled by the `chordChanges` context property.

```
#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "Drop root for follow-up chord names that differ only in bass."
```

In other words, the chord name sequence 'D D/C D/B' gets actually printed as 'D /C /B'.

Set the ``chordChanges`` context property to ``#t`` to activate this feature."

```
(let ((chord-pitches '())
      (last-chord-pitches '())
      (bass-pitch #f))
(make-engraver
((initialize this-engraver)
 (let ((chord-note-namer (ly:context-property ctx
                                              'chordNoteNamer)))
   ;; Set `chordNoteNamer`, respecting user setting if already
   ;; done.

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)`, and there are similar commands to move the extenders and hyphens. A good value for *dy* must be found by trial and error.

```

<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }
>>

```

Quoting another voice

The `quotedEventTypes` context property determines which music event types should be quoted. The default value is (note-event rest-event tie-event beam-event tuplet-span-event),

which means that only notes, rests, ties, beams, and tuplets of a quoted voice appear in the `\quoteDuring` expression.

In the following example, a 16th rest is not quoted since `rest-event` is not in the redefined value of `quotedEventTypes`.

For a list of event types, consult the “Music classes” section of the Internals Reference.

```
quoteMe = \relative c' {
  fis4 r16 a8.-> b4\ff c
}
\addQuote quoteMe \quoteMe

original = \relative c'' {

  \new Staff \with { instrumentName = "orig" }
  \original

  \new Staff \with {
    instrumentName = "orig+quote"
    quotedEventTypes = #'(note-event articulation-event)
  }
  \relative c''
  <<
    \original
    \new Voice {
      s4
      \set fontSize = #-4
      \override Stem.length-fraction = #(magstep -4)
      \quoteDuring "quoteMe" { \skip 2. }
    }
  >>
>>
>>
```

The image displays three musical staves. The top staff, labeled 'quoteMe', shows a quote of the original staff. It contains a quarter note F#4, a 16th rest, an eighth note A4, and a quarter note B4, followed by a double bar line and a quarter note C5. The middle staff, labeled 'orig', shows the original music: a quarter note C4, a quarter note D4, a half rest, and a quarter note E5. The bottom staff, labeled 'orig+quote', shows the original music and the quoted music together. It contains a quarter note C4, a quarter note D4, a half rest, a quarter note E5, a quarter note F#4, a quarter note G#4, and a quarter note A4. The 16th rest in the original is not quoted, as indicated by the 'quoteMe' staff.

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle c; the target is an instrument in f. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
  \transposition bes
  \*8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \*16 a8
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_"up a tone" >>
}
```

Removing brace on first line of piano score

This snippet removes the first brace from a PianoStaff or a GrandStaff, together with the clefs. It may be useful when cutting and pasting the engraved image into existing music.

The code uses `\alterBroken` to hide the brace delimiter at the beginning.

```
someMusic = {
  \once \omit Staff.Clef
  \once \omit Staff.TimeSignature
  \*3 c1 \break
  \*5 c1 \break
  \*5 c1
}

\score {
  \new PianoStaff
```

```

<<
  \new Staff = "right" \relative c' { \someMusic
  \new Staff = "left" \relative c' { \clef F \someMusic }
>>
\layout {
  indent=75\mm
  \context {
    \PianoStaff
    \alterBroken transparent #'(#t) SystemStartBrace
  }
}

```

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff contexts are connected between the staves, i.e., a span bar is printed. This behaviour can be overridden on a staff-by-staff basis.

```

\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
    \new Staff {
      a1 | a | a | a | a
    }
  }
}

```

```
>>
}
```

Removing the first empty line

To remove the first empty staff from a score, set the `remove-first` property of the `VerticalAxisGroup` grob to `#t`. This can be done globally inside the `\layout` block or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (`Staff` applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
}
>>
```

```
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
}
```

>>

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
#(set-default-paper-size "a5")

\paper {
  system-separator-markup = \slashSeparator
  tagline = ##f
}

notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}

\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

Shape individual ties in chords

To shape individual ties in chords use the method demonstrated below.

```
{
  \textMark "Chords can be tied note by note."
  <c'~ e'~ g'~ c''~>2 q
}

{
  \textMark \markup \override #'(baseline-skip . 3) \wordwrap {
    Modifying those ties with \typewriter "\\shape" does not succeed,
    because \typewriter TieColumn positions them on its own behalf,
    ignoring \typewriter "\\shape" input more or less. You may
    circumvent this by setting \typewriter positioning-done to
    \typewriter "#t" -- alas, \typewriter positioning-done is an
    internal property, and setting it to \typewriter "#t" means: all
    positioning is done, don't do anything further. The next example
    demonstrates a case where the positioning is not finished: all tie
    directions are down, and the thickness is not accurate.
  }
  <c'~ e'~ g'~ c''~>2
  \once \override TieColumn.positioning-done = ##t
  q
}

{
  \textMark "To fix that, enter ties with explicit direction modifiers."
  <c'_~ e'_~ g'_~ c''^~>2
  \once \override TieColumn.positioning-done = ##t
}
```

```

q
}

{
  \textMark \markup {
    Now you can use \typewriter "\\shape" for each tie as usual. }
  <c'-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
  e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~
  g'-\shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
  c''-\shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
  >2
  \once \override TieColumn.positioning-done = ##t
  q
}

{
  \textMark "This also works at line breaks."
  <c'-\shape #'(((0 . 0) (0 . -10) (0 . -10) (0 . 0))
    ((0 . 0) (0 . -10) (0 . -10) (0 . 0))) _~
  e'-\shape #'(((0 . 0) (0 . -5) (0 . -5) (0 . 0))
    ((0 . 0) (0 . -5) (0 . -5) (0 . 0))) _~
  g'-\shape #'(((0 . 0) (0 . -2) (0 . -2) (0 . 0))
    ((0 . 0) (0 . -2) (0 . -2) (0 . 0))) _~
  c''-\shape #'(((0 . 0) (0 . 5) (0 . 5) (0 . 0))
    ((0 . 0) (0 . 5) (0 . 5) (0 . 0))) ^~
  >2
  \break
  \once \override TieColumn.positioning-done = ##t
  q
}

{
  \textMark \markup {
    It also works with the \typewriter tieWaitForNote property. }
  \set tieWaitForNote = ##t
  c'4-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
  e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~
  g'-\shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
  c''-\shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
  \once \override TieColumn.positioning-done = ##t
  <c' e' g' c''>1
}

\layout {
  indent = 0
  \context {
    \Score
    \override TextMark.padding = #4
    \override TextMark.break-align-symbols = #'(left-edge)
  }
}

```

```
\paper {
  score-system-spacing.padding = 3
}
```

Chords can be tied note by note.

Modifying those ties with `\shape` does not succeed, because `TieColumn` positions them on its own behalf, ignoring `\shape` input more or less. You may circumvent this by setting `positioning-done` to `#t` – alas, `positioning-done` is an internal property, and setting it to `#t` means: all positioning is done, don't do anything further. The next example demonstrates a case where the positioning is not finished: all tie directions are down, and the thickness is not accurate.

To fix that, enter ties with explicit direction modifiers.

Now you can use `\shape` for each tie as usual.

This also works at line breaks.

It also works with the `tieWaitForNote` property.

Tick bar lines

‘Tick’ bar lines are often used in music where the bar line is used only for coordination and is not meant to imply any rhythmic stress.

```
\relative c' {
  \set Score.measureBarType = #"'"
  c4 d e f
  g4 f e d
  c4 d e f
  g4 f e d
  \bar "|."
}
```

Time signature in brackets

The time signature can be enclosed within brackets.

```
\relative c' ' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c' ' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Tweaking clef properties

Changing the clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines, `middleCClefPosition` must also be specified, with positive or negative values moving “middle C” up or down respectively, relative to the staff’s center line.

For example, `\clef "treble_8"` is equivalent to setting the context properties `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition`, and `clefTransposition`. Note that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```
{
  % The default treble clef.
  \key f \major
  c'1
  % The standard bass clef
  \set Staff.clefGlyph = "clefs.F"
  \set Staff.clefPosition = 2
  \set Staff.middleCPosition = 6
  \set Staff.middleCClefPosition = 6
  \key g \major
  c'1
  % The baritone clef.
  \set Staff.clefGlyph = "clefs.C"
  \set Staff.clefPosition = 4
  \set Staff.middleCPosition = 4
  \set Staff.middleCClefPosition = 4
  \key f \major
  c'1
  % The standard choral tenor clef.
  \set Staff.clefGlyph = "clefs.G"
  \set Staff.clefPosition = -2
  \set Staff.clefTransposition = -7
  \set Staff.middleCPosition = 1
  \set Staff.middleCClefPosition = 1
  \key f \major
  c'1
  % A non-standard clef.
  \set Staff.clefPosition = 0
  \set Staff.clefTransposition = 0
  \set Staff.middleCPosition = -4
  \set Staff.middleCClefPosition = -4
  \key g \major
  c'1 \break

  % The following clef changes do not preserve
  % the normal relationship between notes, key signatures
  % and clefs.
  \set Staff.clefGlyph = "clefs.F"
  \set Staff.clefPosition = 2
```

```

c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
c'1
\set Staff.clefTransposition = 7
c'1
\set Staff.clefTransposition = 0
\set Staff.clefPosition = 0
c'1

% Return to the normal clef.
\set Staff.middleCPosition = 0
c'1
}

```

Two \partCombine pairs on one staff

The `\partCombine` function takes two music expressions, each containing a part, and distributes them among four Voice contexts named “one”, “two”, “solo”, and “shared”, depending on when and how the parts are merged into a common voice.

Variants of `\partCombine` are `\partCombineUp` and `\partCombineDown` to produce up-stem and down-stem merging of two voices, respectively. Combining them to squeeze four parts into a single staff, however, need some special setup, which this snippet defines accordingly.

```

customPartCombineUp =
#(define-music-function (part1 part2) (ly:music? ly:music?)
  "Make an up-stem `VoiceBox` context that combines PART1 and PART2.

```

The context is called 'Up'; internally, the function calls `\partCombineUp`.`

```

#{
  \new VoiceBox = "Up" <<
    \context Voice = "one" { \voiceOne }
    \context Voice = "two" { \voiceThree }
    \context Voice = "shared" { \voiceOne }
    \context Voice = "solo" { \voiceOne }
    \context NullVoice = "null" {}
    \partCombine #part1 #part2
  >>
#})

```

```

customPartCombineDown =
#(define-music-function (part3 part4) (ly:music? ly:music?)
  "Make a down-stem `VoiceBox` context that combines PART3 and PART4.

```

The context is called 'Down'; internally, the function calls `\\partCombineDown`.`

```
#{
  \new VoiceBox = "Down" <<
    \set VoiceBox.soloText = #"Solo III"
    \set VoiceBox.soloIIIText = #"Solo IV"
    \context Voice = "one" { \voiceFour }
    \context Voice = "two" { \voiceTwo }
    \context Voice = "shared" { \voiceFour }
    \context Voice = "solo" { \voiceFour }
    \context NullVoice = "null" {}
    \partCombine #part3 #part4
  >>
#})

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

\new Staff <<
  \key b\minor
  \clef alto
  \partial 4
  \transpose b b' \customPartCombineUp \soprano \alto
  \customPartCombineDown \tenor \bass
>>

\layout {
  \context {

    \accepts "Voice"
    \accepts "NullVoice"
  }
}
```

Use square bracket at the start of a staff group

The system start delimiter `SystemStartSquare` can be used by setting it explicitly in a `StaffGroup` or `ChoirStaff` context.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```

Using `\autoChange` with more than one voice

Here is a demonstration of how to use `\autoChange` with more than one voice.

```
\score {
  \new PianoStaff
  <<
    \new Staff = "up" {
      <<
        \set Timing.beamExceptions = #'()
        \set Timing.beatStructure = #'(4)
        \new Voice {
          \voiceOne
          \autoChange
          \relative c' {
            g8 a b c d e f g
            g,.8 a b c d e f g
          }
        }
      >>
    }

    \new Voice {
      \voiceTwo
      \autoChange
      \relative c' {
        g8 a b c d e f g
        g,,.8 a b c d e f g
      }
    }
  >>
}

\new Staff = "down" {
  \clef bass
}
```

```
>>
}
```

Using mark lines in a Frenched score

Using `MarkLine` contexts (such as in “Placing rehearsal marks other than above the top staff”) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```
bars = {
  \tempo Allegro 4=120
  s1*2
  \*5 { \mark \default s1*2 }
  \bar "||"
  \tempo Adagio 4=40
  s1*2
  \*8 { \mark \default s1*2 }
  \bar "|."
}

winds = \*120 c''4
trumpet = {
  \*8 g'2
  R1*16
  \*4 g'2
  R1*8
}

trombone = {
  \*4 c'1
  R1*8
  d'1
  R1*17
}

strings = \*240 c''8

#(set-global-staff-size 16)
\paper {

```

The musical score is divided into four systems, each with four staves: Winds, Trumpet, Trombone, and Strings. The tempo is marked **Allegro** (♩ = 120) for the first system and **Adagio** (♩ = 40) for the second and third systems. The score includes section labels A, B, C, D, E, F, G, and H.

System 1 (Measures 1-5): Winds, Trumpet, and Trombone play a melody. Strings play a rhythmic pattern. Section labels A and B are present.

System 2 (Measures 6-10): Winds and Strings play a melody. Section labels C and D are present.

System 3 (Measures 11-15): Winds, Trombone, and Strings play a melody. Section labels E, F, and Adagio (♩ = 40) are present.

System 4 (Measures 16-20): Winds and Strings play a melody. Section labels G and H are present.

Vertically aligned StaffGroups without connecting SystemStartBar

This snippet shows how to achieve vertically aligned StaffGroups with a SystemStartBar for each StaffGroup, but without connecting them.

Note that this only works properly for music that can be printed as a single system.

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

Wer nur den lie - ben Gott läßt wal - ten und hof-fet auf ihn al - le Zeit

Pupil: Here's my version!

Wer nur den lie - ben Gott läßt wal - ten und hof-fet auf ihn al - le Zeit

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

Wer nur den lie - ben Gott läßt wal - ten und hof-fet auf ihn al - le Zeit

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volte can be put below chords.

```

\score {
  <<
    \chords { c1 c1 }
    \new Staff \with { \consists "Volta_engraver" }
    {
      \repeat volta 2 { c'1 \alternative { c' } }
    }
  >>
  \layout {
    \context {
      \Score
      \remove "Volta_engraver"
    }
  }
}

```

Volta brackets in multiple staves

By adding the `Volta_engraver` to the relevant staff, volte can be put over staves other than the topmost one in a score.

`\repeat` and related commands should be present in all staves.

```

voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
    \alternative {
      \volta 1 { d1 }
      \volta 2 { e1 }
    }
  }
}

7 Editorial annotations

See also Section “Editorial annotations” in *Notation Reference*.

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' ' {
  c4-1 d-2 f-4 e-3
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: point-and-click is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```
#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (let* ((x-ext (ly:stencil-extent stil X))
                 (y-ext (ly:stencil-extent stil Y))
                 (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
                 (new-stil
                  (ly:stencil-add
                   (ly:make-stencil url-expr x-ext y-ext)
                   stil)))
            (ly:grob-set-property! grob 'stencil new-stil))))))
```

```

Adding markups in a tablature

By default, markups are not displayed in a tablature.

To make them appear, revert the stencil property of the TextScript grob in the TabStaff context.

```
high = { r4 r8 <g c'> q r8 r4 }
low = { c4 r4 c8 r8 g,8 b, }
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \*2 << \high \ \ \low \ \ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #1/8
    }
  }
}
```

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

```

\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##t
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = #only-if-beamed
  a[-1 b]-2 g-0 r
}

```

Alternative bar numbering

Setting the `alternativeNumberingStyle` context property, two additional methods are available for enumerating bar numbers in repeats.

```

music = \relative c' {
  \repeat volta 3 {
    c4 d e f |
    \alternative {
      \volta 1 { c4 d e f | c2 d \break }
      \volta 2 { f4 g a b | f4 g a b | f2 a | \break }
      \volta 3 { c4 d e f | c2 d } } }
  c1 \bar "|"
}

{
  \textMark \markup \large "default"
  \music
}

{
  \textMark \markup \large \typewriter "numbers"
  \set Score.alternativeNumberingStyle = #'numbers
  \music
}

{
  \textMark \markup \large \typewriter "numbers-with-letters"
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \music
}

\layout {
  \context {
    \Score

```

```
\override TextMark.Y-offset = #5
}
```

default

numbers

numbers-with-letters

Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}

```

Analysis brackets with labels

Text markup may be added to analysis brackets using the `text` property of the `HorizontalBracketText` grob. Adding different texts to brackets beginning at the same time requires the `\tweak` command.

Bracket text gets parenthesized after a line break. The vertical order of nested brackets can be controlled with the `outside-staff-priority` property.

```

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e''\startGroup d''\stopGroup |
  c''-\tweak outside-staff-priority #801
    \tweak HorizontalBracketText.text
      \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
  d''\stopGroup
  e''-\tweak HorizontalBracketText.text "a'" \startGroup
  d''\stopGroup\stopGroup |
  c''-\tweak HorizontalBracketText.text foo \startGroup
  d'' e'' f'' | \break
  g'' a'' b'' c'''\stopGroup
}

```

Applying note head styles depending on the step of the scale

The `shapeNoteStyles` property can be used to define various note head styles for each step of the scale (as set by the key signature or the tonic property).

This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as `triangle`, `cross`, and `xcircle` are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as `\aikenHeads` or `\sacredHarpHeads`.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

```
fragment = {
  \key c \major
  c2 d
  e2 f
  g2 a
  b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                          #f la ti)

    \fragment
  }

  \break

  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                          mensural xcircle diamond)

    \fragment
  }
}
```

Blanking staff lines using the `\whiteout` command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e } _\markup { A big c }
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
}
```

```
c4( d e c)
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

% Association list of pitches to colors.

```
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))

% Compare pitch and alteration (not octave).
#(define (pitch-equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))

}
}%
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Default direction of stems on the center line of the staff

The default direction of stems on the center line of the staff is set by the Stem property `neutral-direction`.

```
\relative c' ' {
  a4 b c b
  \override Stem.neutral-direction = #up
  a4 b c b
  \override Stem.neutral-direction = #down
  a4 b c b
}
```

Different font size settings for `instrumentName` and `shortInstrumentName`

Choose different font sizes for `instrumentName` and `shortInstrumentName` as a context override.

```
InstrumentNameFontSize =
#(define-music-function (font-size-pair) (pair?)
  "Set the font size of `InstrumentName` grobs.
```

The first value of `FONT-SIZE-PAIR` sets the font size of the initial ``instrumentName`` property, the second value sets the font size of ``shortInstrumentName``.

```
;; This code could be changed or extended to set different values
;; for each occurrence of `shortInstrumentName'.
#{
  \override InstrumentName.after-line-breaking =

  \new Staff \with {
    instrumentName = "Violin"
    shortInstrumentName = "Vl." } {
    c'1 \break c'' \break c''' }
>>

```

Drawing boxes around grobs

The stencil property can be overridden to draw a box around arbitrary grobs, either using `\override` or `\tweak`.

```

\relative c' {
  \once \override TextScript.stencil =
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
  c'4^"foo"

  \tweak Stem.stencil
    #(make-stencil-boxer 0.05 0.25 ly:stem::print)
  b8

  c4.^"bar" c4

  \override Score.RehearsalMark.stencil =
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
  \mark \default
  c1
}

```

Drawing circles around note heads

A circle can be drawn around a note head by providing a custom Scheme function to temporarily override the stencil property.

```
circle = \tweak NoteHead.stencil
  #(\lambda (grob)
    (let* ((note (ly:note-head::print grob))
      (combo-stencil (ly:stencil-add
        note
        (circle-stencil note 0.1 0.8))))
      (ly:make-stencil (ly:stencil-expr combo-stencil)
        (ly:stencil-extent note X)
        (ly:stencil-extent note Y))))
  \etc
```

```
{ a' b' \circle c'' d'' }
```

Drawing circles around various objects

The `\circle` command draws circles around `\markup` objects. For other objects, specific tweaks may be required, as demonstrated for rehearsal marks and measure numbers.

```
\relative c' {
  c1
  \set Score.rehearsalMarkFormatter =
    #(\lambda (mark context)
      (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d^\markup {
    \override #'(thickness . 3) {
      \circle foo
    }
  }
  \override Score.BarNumber.break-visibility = #all-visible
  \override Score.BarNumber.stencil =
    #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Embedding native PostScript in a `\markup` block

PostScript code can be directly inserted inside a `\markup` block.

In general it is recommended to use LilyPond's native graphical markup commands like `\polygon` instead, which can be used with all LilyPond backends.

```
\relative c' ' {
  a2-\markup \postscript "0 3 moveto
                        5 2 rlineto
                        stroke"
  -\markup \postscript "[1 1] 0 setdash
                        0 0 moveto
                        5 2 rlineto
                        stroke"
  b2-\markup \postscript "1 1 moveto
                        0 0 1 2 8 4 10 2 rcurveto
                        stroke"
  a'1
}
```

Generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, a drawing specification for `ly:make-stencil` can be used to generate the shape. This snippet gives an example for a parallelogram-shaped note head.

Unfortunately, the available commands in a drawing specification are currently not documented (this is tracked in Issue #6874 (<https://gitlab.com/lilypond/lilypond/-/issues/6874>)); in any case, the used path sub-command has the following signature, quite similar to the `make-path-stencil` Scheme function.

```
(path thickness command-list line-cap-style line-join-style fill)
```

The commands in *command-list* resemble PostScript drawing commands but with arguments after the command name.

```
parallelogram =
  #(ly:make-stencil
    '(path 0.1
      (rmoveto 0 0.25
        lineto 1.2 0.75
        lineto 1.2 -0.25
        lineto 0 -0.75
        lineto 0 0.25)
      round
      round
      #t)
    (cons -0.05 1.25)
    (cons -.75 .75))
```

```
myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil
```

```
\relative c'' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}
```

Grid lines: changing their appearance

The appearance of grid lines can be changed by overriding some of their properties.

```
\new ChoirStaff <<
  \new Staff {
    \relative c'' {
      \stemUp
      c'4. d8 e8 f g4
    }
  }
  \new Staff {
    \relative c {
      % this moves them up one staff space from the default position
      \override Score.GridLine.extra-offset = #'(0.0 . 1.0)
      \stemDown
      \clef bass
      \once \override Score.GridLine.thickness = 5.0
      c4
      \once \override Score.GridLine.thickness = 1.0
      g'4
      \once \override Score.GridLine.thickness = 3.0
      f4
      \once \override Score.GridLine.thickness = 5.0
      e4
    }
  }
}
>>

\layout {
  \context {
    \Staff
    % set up grids
    \consists "Grid_point_engraver"
    % set the grid interval to one quarter note
    gridInterval = #1/4
  }
  \context {
    \Score
    \consists "Grid_line_span_engraver"
    % this moves them to the right half a staff space
    \override NoteColumn.X-offset = -0.5
  }
}
```

```
}
}
```

Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second staff invisible, and make the lines shorter like in this snippet.

```
\new ChoirStaff {
  \relative c'' <<
  \new Staff {
    \time 12/8
    \stemUp
    c4. d8 e8 f g4 f8 e8. d16 c8
  }
  \new Staff {
    % hides staff and notes so that only the grid lines are visible
    \hideNotes
    \hide Staff.BarLine
    \override Staff.StaffSymbol.line-count = #0
    \hide Staff.TimeSignature
    \hide Staff.Clef

    % dummy notes to force regular note spacing
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
  }
}
>>
}
```

```
\layout {
  \context {
    \Score
    \consists "Grid_line_span_engraver"
    % center grid lines horizontally below note heads
    \override NoteColumn.X-offset = #-0.5
  }
}
```

```

\context {
  \Staff
  \consists "Grid_point_engraver"
  gridInterval = #1/8
  % set line length and positioning:
  % two staff spaces above center line on hidden staff
  % to four spaces below center line on visible staff
  \override GridPoint.Y-extent = #'(2 . -4)
}
}

```

Hammer-on and pull-off

Hammer-on and pull-off can be obtained using slurs.

```

\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}

```

Hammer-on and pull-off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However “double arcs” are possible by setting the `doubleSlurs` property to `#t`.

```

\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}

```

Hammer-on and pull-off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the command `\speakOn` and end it with `\speakOff`.

```
speakOn = \override Stem.stencil =
  #(lambda (grob)
    (let* ((x-parent (ly:grob-parent grob X))
      (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
      (if is-rest?
        empty-stencil
        (ly:stencil-combine-at-edge
          (ly:stem::print grob)
          Y
          (- (ly:grob-property grob 'direction))
          (grob-interpret-markup
            grob
            (markup #:center-align #:fontsize -4
              #:musicglyph "noteheads.s2cross")))
          -1.7))))
```

```
speakOff = \revert Stem.stencil
```

```
\new Staff {
  \relative c' {
```

```

a4 b a c
\speakOn
g4 f r g8 a
b4 r r8 d e4
\speakOff
c4 a g f
}
}

```

Measure counters

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \*7 { c'4 d' e' f' }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \*5 { g'4 f' e' d' }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \*7 { g'4 f' e' d' }
  \stopMeasureCount
}

```

Measure spanner

Measure spanners are an alternate way to print annotated brackets. As opposed to horizontal brackets, they extend between two bar lines rather than two notes. The text is displayed in the center of the bracket.

```
\layout {
  \context {
    \Staff
    \consists Measure_spanner_engraver
  }
}

<<
\new Staff \relative c'' {
  \key d \minor
  R1*2
  \tweak text "Answer"
  \startMeasureSpanner
  \tuplet 3/2 8 {
    a16[ b c] d[ c b] c[ d e] f[ e d]
  }
  e8 a gis g
  fis f e d~ d c b e
  \stopMeasureSpanner
}
\new Staff \relative c' {
  \key d \minor
  \tweak text "Subject"
  \tweak direction #DOWN
  \startMeasureSpanner
  \tuplet 3/2 8 {
    d16[ e f] g[ f e] f[ g a] bes[ a g]
  }
  a8 d cis c
  b bes a g~ g f e a
  \stopMeasureSpanner
  \tweak text "Counter-subject"
  \tweak direction #DOWN
  \startMeasureSpanner
  f8 e a r r16 b, c d e fis g e
  a gis a b c fis, b a gis e a4 g8
  \stopMeasureSpanner
}
>>
```

Counter-subject

Positioning fingering indications precisely

The semi-automatic positioning of fingering within a chords works fine in most situations. If one of the indications needs to be positioned more precisely the following, tweaks as shown in this snippet may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```
\score {
  \relative c' {
    \set fingeringOrientations = #'(left)
    <c-1 d-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>

    \set fingeringOrientations = #'(down)
    <c-1 d-2 a'-5>
    <c-\tweak extra-offset #'(0 . -1.1)-1
    d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5> |

    \set fingeringOrientations = #'(down right up)
    <c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>

    \set fingeringOrientations = #'(up)
    <c-1 d-\tweak extra-offset #'(0 . 1.1)-2
    a'-\tweak extra-offset #'(0 . 1)-5>
    <c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
    a'-\tweak extra-offset #'(0 . 1.4)-5> |
  }
}
```

Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to `#f` in order to be printed inside slurs.

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(^\markup { \halign #-10 \natural } d4.) c8
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})

\relative c {
  \clef "treble_8"
  \textSpannerDown
  \stringNumberSpanner "5" a8\startTextSpan b c d
  e f\stopTextSpan \stringNumberSpanner "4" g\startTextSpan a |
  bes4 a g2\stopTextSpan
}
```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the layer property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature, setting the whiteout property of TimeSignature. To do this, TimeSignature is moved to a layer above Tie, which is left in the default layer 1, and StaffSymbol is moved to a layer above TimeSignature so it is not masked.

```
{
  \override Score.StaffSymbol.layer = 4
  \override Staff.TimeSignature.layer = 3
  b'2 b'~
  \once \override Staff.TimeSignature.whiteout = ##t
  \time 3/4
  b' r4
}
```

8 Text

See also Section “Text” in *Notation Reference*.

Adding markups in a tablature

By default, markups are not displayed in a tablature.

To make them appear, revert the `stencil` property of the `TextScript` grob in the `TabStaff` context.

```
high = { r4 r8 <g c'> q r8 r4 }
low = { c4 r4 c8 r8 g,8 b, }
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }
```

```
\score {
  \new TabStaff {
    \*2 << \high \\\ \low \\\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #1/8
    }
  }
}
```

	1	&	2	&	3	&	4	&	1	&	2	&	3	&	4	&
T			1	-	1				1	-	1					
A			0	-	0				0	-	0					
B	3				3		2		3			3		2		
						3							3			

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
\paper { tagline = ##f }
```

```
% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))
```

```
% use it in the title block:
```

```
\header {
  title = "Including the date!"
  subtitle = \date
}
```

```
\score {
  \relative c'' {
    c4 c c c
  }
}
% and use it in a \markup block:
\markup {
  \date
}
```

Including the date!

25-04-2026

25-04-2026

Adjusting vertical spacing of lyrics

This snippet shows how to bring the lyrics line closer to the staff.

```
music = \relative c' { c4 d e f | g4 f e d | c1 }
text = \lyricmode { aa aa aa aa aa aa aa aa }
```

```
<<
  \new Staff \new Voice = melody \music
  % Default layout:
  \new Lyrics \lyricsto melody \text

  \new Staff \new Voice = melody \music
  % Reducing the minimum space below the staff and above the lyrics.
  \new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
      #'((basic-distance . 1))
  } \lyricsto melody \text
>>
```

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `self-alignment-X` property of the `InstrumentName` grob (usually in the `Staff` context). The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```

\paper {
  left-margin = 3\cm
}

\new StaffGroup <<
  \new Staff \with {
    \override InstrumentName.self-alignment-X = #LEFT
    instrumentName = \markup \left-column { "Left aligned"
                                             "instrument name" }

    shortInstrumentName = "Left"
  } {
    c''1 \break c''1
  }

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #CENTER
    instrumentName = \markup \center-column { Centered
                                             "instrument name" }

    shortInstrumentName = "Centered"
  } {
    g'1 g'1
  }

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #RIGHT
    instrumentName = \markup \right-column { "Right aligned"
                                             "instrument name" }

    shortInstrumentName = "Right"
  } {
    e'1 e'1
  }
>>

\layout {
  indent = 4\cm
  short-indent = 2\cm
  line-width = 6.5\cm
}

```

Left aligned
instrument name

Centered
instrument name

Right aligned
instrument name

The image shows three staves of musical notation, each with a treble clef and a common time signature 'C'. The first staff has a whole note 'c' on the first line. The second staff has a whole note 'c' on the first line. The third staff has a whole note 'c' on the first line. The staves are grouped by a large left brace. To the left of the staves, the text 'Left aligned instrument name', 'Centered instrument name', and 'Right aligned instrument name' are aligned with the first, second, and third staves respectively.

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left-aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
<<
\new Staff {
  \new Voice = "vocal" \relative c'' {
    \override TextScript.staff-padding = #2
    c d~\markup default d e
    c d~\markup "right aligned" d e
    c d~\markup "center aligned" d e
    c d~\markup "reset to default" d e
  }
}
\new Lyrics \lyricsto "vocal" {
  word word word
  \set lyricMelismaAlignment = #RIGHT
  word word word
  \set lyricMelismaAlignment = #CENTER
  word word word
  \unset lyricMelismaAlignment
  word word word
}
>>
```

```
\layout {
  ragged-right = ##f
}
```

Aligning text marks to notes

By default, `TextMark` objects are aligned to so-called `NonMusicalPaperColumn` grobs, like the left edge of the staff or a bar line. They can be aligned to a note instead by setting the `non-musical` property to `#f`.

```
\layout {
  line-length = 80\mm
}

{
  \textMark "mark a" c'1 |
  \textMark "mark b" c'1 |
  \break
  \override Score.TextMark.non-musical = ##f
  \textMark "mark c" c'1 |
  \textMark "mark d" c'1 |
}
```

Blanking staff lines using the `\whiteout` command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to a `DynamicText` grob.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))
```

```

(par-y (ly:grob-parent grob Y))
(dir (ly:grob-property par-y 'direction))
(staff-line-thickness
  (ly:output-def-lookup (ly:grob-layout grob)
    'line-thickness))
(new-stencil
  (ly:stencil-aligned-to
    (ly:stencil-combine-at-edge
      (ly:stencil-aligned-to stencil X CENTER)
      Y dir
      (ly:stencil-aligned-to
        (grob-interpret-markup
          grob
          (make-fontsize-markup
            (magnification->font-size
              (+ (ly:staff-symbol-staff-space grob)
                (/ staff-line-thickness 2))))
            text))
        X CENTER))
      X LEFT))
  (staff-space (ly:output-def-lookup
    (ly:grob-layout grob) 'staff-space))
  (par-x (ly:grob-parent grob X))
  (dyn-text (grob::has-interface par-x
    'dynamic-text-interface))
  (dyn-text-stencil-x-length
    (if dyn-text
      (interval-length
        (ly:stencil-extent
          (ly:grob-property par-x 'stencil) X))
      0))
  (x-shift
    (if dyn-text (- (+ staff-space dyn-text-stencil-x-length)
      (* 0.5 staff-line-thickness))
    0)))
(ly:grob-set-property! grob 'Y-offset 0)
(ly:grob-set-property! grob
  'stencil (ly:stencil-translate-axis
    new-stencil
    x-shift X))))
#})

hairpinMolto = \hairpinWithCenteredText \markup { \italic molto }
hairpinMore = \hairpinWithCenteredText \markup { \larger moltissimo }

\relative c' {
  \hairpinMolto c2\< c\f
  \hairpinMore c2\ppppp\< c\f
  \break
  \hairpinMolto c2^\< c\f
  \hairpinMore c2\ppppp\< c\f
}

```

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```
{
  c'2
  \ottava 1
  \set Staff.ottavation = "8"
  c''2
  \ottava 0
  c'1
  \ottava 1
  \set Staff.ottavation = "Text"
  c''1
}
```

Changing the default text font family

The default font families for text can be overridden.

```
%{
You may have to install additional fonts.
```

```
Red Hat Fedora: dejavu-fonts-all
```

```
Debian GNU/Linux, Ubuntu: fonts-dejavu-core
                             fonts-dejavu-extra
```

```
%}
```

```
\paper {
  %{
    run
      lilypond -dshow-available-fonts
      to show all fonts available in the process log.
  }
  property-defaults.fonts.serif = "DejaVu Serif"
```

```

property-defaults.fonts.sans = "DejaVu Sans"
property-defaults.fonts.typewriter = "DejaVu Sans Mono"
}

{
g'''4^\markup {
  DejaVu Serif: \bold bold
                \italic italic
                \italic \bold { bold italic }
}
g4_\markup {
  \override #'(font-family . sans) {
    DejaVu Sans: \bold bold
                  \italic italic
                  \italic \bold { bold italic }
  }
}
g''2^\markup {
  \override #'(font-family . typewriter) {
    DejaVu Sans Mono: \bold bold
                      \italic italic
                      \italic \bold { bold italic }
  }
}
}
}

```

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “*più f*” or “*p subito*”). These can be produced using a `\markup` block; the resulting object behaves like a `TextScript` grob.

See also “Combining dynamics with markup texts (2)”.

```

piuF = \markup { \italic più \dynamic f }

```

```

\score {
  \relative c'' {
    c2\f c-\piuF
  }
}

```

Combining dynamics with markup texts (2)

Some dynamics may involve text indications (such as “*più f*” or “*p subito*”). These can be produced using the `make-dynamic-script` Scheme function; the resulting object behaves like a `DynamicText` grob.

See also “Combining dynamics with markup texts”.

```
piuF = #(make-dynamic-script
        #{ \markup { \normal-text \italic più \dynamic f } #})

\score {
  \relative c'' {
    c2\f c\piuF
  }
}
```

Combining two parts on the same staff

The part combiner tool (i.e., the `\partCombine` command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property `printPartCombineTexts` to `#f`.

For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use them if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, `\partCombine` without texts, and `\partCombine` with texts.

```
musicUp = \relative c'' {
  \time 4/4
  a4 c4.( g8) a4 |
  g4 e' g,( a8 b) |
  c b a2.
}

musicDown = \relative c'' {
  g4 e4.( d8) c4 |
  r2 g'4( f8 e) |
  d2 \stemDown a
}

\score {
  <<
    \new Staff \with {
      instrumentName = "standard polyphony"
    } << \musicUp \\\musicDown >>

    \new Staff \with {
      instrumentName =
        \markup { \typewriter "\\partCombine" without text}
    }
  >>
}
```

```

    printPartCombineTexts = ##f
  } \partCombine \musicUp \musicDown

  \new Staff \with {
    instrumentName =
      \markup { \typewriter "\\partCombine" with text}
  } \partCombine \musicUp \musicDown
>>

\layout {
  indent = 6.0\cm
  \context {
    \Score
    % Setting this to a large value avoids a bar line at the
    % beginning that would connect the three staves otherwise.
    \override SystemStartBar.collapse-height = 30
  }
}

```

standard polyphony	
\partCombine without text	
\partCombine with text	

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```

\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}

```

```

\override TextSpanner.style = #'dashed-line
\override TextSpanner.bound-details.left.text =
  \markup { \draw-line #'(0 . 1) }
\override TextSpanner.bound-details.right.text =
  \markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2
a4 \startTextSpan
b4 c
a4 \stopTextSpan

\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

Demonstrating all \header fields

A demonstration of all header fields that LilyPond defines by default. Thanks to setting `print-all-headers` to `#t`, much more fields as usual are displayed, indicating the hierarchy of `\header` blocks.

```

\paper {
  #(set-paper-size "a6" 'landscape)
  print-all-headers = ##t
}

\book {
  \header {
    title = "title"
    subtitle = "subtitle"
    composer = "composer"
    arranger = "arranger"
    instrument = "instrument"
    meter = "meter"
    opus = "opus"
    piece = "piece"
    poet = "poet"
    copyright = "copyright"
    tagline = "tagline"
  }

  \bookpart {
    \score {
      \relative c'' { c1 | c | c | c }
    }
  }
}

```

```

\header {
  title = "localtitle"
  subtitle = "localsubtitle"
  composer = "localcomposer"
  arranger = "localarranger"
  instrument = "localinstrument"
  meter = "localmeter"
  opus = "localopus"
  piece = "localpiece"
  poet = "localpoet"
  copyright = "localcopyright"
  tagline = "localtagline"
}
}
}
}

```

	title	
	subtitle	
poet	instrument	composer
meter		arranger
	localtitle	
	localsubtitle	
localpoet	localinstrument	localcomposer
localmeter		localarranger
localpiece		localopus
		
	copyright	
	tagline	

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

In general it is recommended to use LilyPond's native graphical markup commands like \polygon instead, which can be used with all LilyPond backends.

```

\relative c' ' {
  a2-\markup \postscript "0 3 moveto
                        5 2 rlineto
                        stroke"
  -\markup \postscript "[1 1] 0 setdash
                        0 0 moveto
                        5 2 rlineto
                        stroke"
  b2-\markup \postscript "1 1 moveto
                        0 0 1 2 8 4 10 2 rcurveto

```

```

                                stroke"
a'1
}

```

Formatting lyrics syllables

The `\markup` command can be used in `\lyricmode` blocks to format individual syllables in lyrics.

```

mel = \relative c'' { c4 c c c c1 }
lyr = \lyricmode {
  Your lyrics \markup { \italic can }
  \markup { \with-color #red contain }
  \markup { \fontsize #8 \bold Markup! }
}

```

```

<<
  \new Voice = "melody" \mel
  \new Lyrics \lyricsto "melody" \lyr
>>

```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```

\lyrics {
  wa~o~a
}

```

waoa

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the `self-alignment-X` property of the `LyricText` object. Value `-1` means left-aligned, `0` centered, and `1` right-aligned. Alternatively, you can use the Scheme values `LEFT`, `CENTER`, and `RIGHT` instead of numbers. Other numeric values are possible, too – don't forget to add the `'#` Scheme prefix for negative numbers!

```

\layout {
  ragged-right = ##f
}

```

```

\relative c'' {
  c1 c c c
}

```

```

\addlyrics {

```

```

\once \override LyricText.self-alignment-X = #LEFT
"left-aligned"
\once \override LyricText.self-alignment-X = #CENTER
"centered"
\once \override LyricText.self-alignment-X = 1
"right-aligned"
\once \override LyricText.self-alignment-X = #-1.5
"overly left-aligned"
}

```

Markup list

Text that can spread over pages is entered with the `\markuplist` command. The `\paragraph` markup command defined in the snippet indents its argument before calling `\justified-lines`.

```

#(set-default-paper-size "a6" 'landscape)

```

```

\paper {
  line-width = 11\cm
  tagline = ##f
}

```

```

#(define-markup-list-command (paragraph layout props args) (markup-list?)
  (interpret-markup-list layout props
    (make-justified-lines-markup-list (cons (make-hspace-markup 2) args))))

```

```

\book { % for correct rendering in the PDF documentation

Il y avait en Westphalie, dans le château de M. le baron de Thunder-ten-tronckh, un jeune garçon à qui la nature avait donné les mœurs les plus douces. Sa physionomie annonçait son âme. Il avait le jugement assez droit, avec l'esprit le plus simple; c'est, je crois, pour cette raison qu'on le nommait Candide. Les anciens domestiques de la maison soupçonnaient qu'il était fils de la sœur de monsieur le baron et d'un bon et honnête gentilhomme du voisinage, que cette demoiselle ne voulut jamais épouser parce qu'il n'avait pu prouver que soixante et onze quartiers, et que le reste de son arbre généalogique avait été perdu par l'injure du temps.

Monsieur le baron était un des plus puissants seigneurs de la Westphalie, car son château avait une porte et des fenêtres. Sa grande salle même était ornée d'une tapisserie. Tous les chiens de ses basses-cours composaient une meute dans le besoin; ses palefreniers étaient ses piqueurs; le vicaire du village était son grand-aumônier. Ils l'appelaient tous monseigneur, et ils riaient quand il faisait des contes.

Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest. Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

```

\relative c' {
  \compressMMRests {
    \textLengthOn
    <>^\markup { [MAJOR GENERAL] }
    R1*19
    <>_\markup { \italic { Cue: ... it is yours } }
    <>^\markup { A }
    R1*30^\markup { [MABEL] }
    \textLengthOff
    c4^\markup { CHORUS } d f c
  }
}

```

Of the ubiquity of markup objects

Text objects are entered either as simple strings between double quotes or as `\markup` blocks that can accept a variety of advanced text formatting and graphical enhancements.

As such, markup blocks may be used:

- in any `TextScript` object (attached to notes with `-`, `^` or `_`),
- in any `TextMark` introduced with the `\textMark` keyword, or `\textEndMark` command, or other similar objects such as `MetronomeMark` introduced with `\tempo`,
- as standalone markup blocks, entered at the top level outside of any `\score` block,
- in any definition inside the `\header` block (e.g., title, subtitle, composer) or in some variables defined inside the `\paper` block such as `evenHeaderMarkup` for page numbers.

`\markup` may additionally be used for lyrics, in chord names, and as dynamics. In fact, it is possible to use `\markup` to customize the appearance of virtually any object, as demonstrated in this example using various methods.

```
\paper {
  paper-width = 8\cm
  paper-height = 8\cm
}

\header {
  title = \markup "Title"
  tagline = \markup "(tagline)"
}

\markup "Top-level markup"

dyn = #(make-dynamic-script #{ \markup \serif "DynamicText" #})

<<
  \new ChordNames \with {
    majorSevenSymbol = \markup "majorSevenSymbol"
  } \chordmode { c1:maj7 }
  \new Staff {
    \tempo \markup "MetronomeMark"
    \textMark \markup "TextMark"

    \once \override TupletNumber.text = \markup "TupletNumber"
    \tuplet 3/2 {
      \once \override NoteHead.stencil = #ly:text-interface::print
      \once \override NoteHead.text = \markup \lower #0.5 "NoteHead"
      c' '8^\markup "TextScript"

      \once \override Rest.stencil = #(lambda (grob)
        (grob-interpret-markup grob #{ \markup "Rest" #}))
    }
  }
}
```

```

    }
  }
  \new Lyrics \lyricmode { \markup "LyricText" 1 }
  \new Dynamics { s1\dyn }
>>

```

Title

Top-level markup

MetronomeMark
TextMark
 $\text{C}_{\text{majorSevenSymbol}}$
TextScript

 NoteHead Rest
TupletNumber
LyricText
DynamicText

Outputting the version number

It is possible to print the version number of LilyPond in markup.

```
\markup { Processed with LilyPond version #(lilypond-version) }
```

Processed with LilyPond version 2.27.0

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

```

```

  a4 b c d
}

```

```
lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

```

```

  a2 c
}

```

```

text = \lyricmode {
  Aaa Bee Cee Dee
}

```

```

\score {
  \new PianoStaff <<

```

```

\new Staff = upper { \new Voice = "singer" \upper }
\new Lyrics \lyricsto "singer" \text
\new Staff = lower { \lower }
>>
\layout { }
\midi { }
}

```

Printing marks on every staff

Although rehearsal and text marks are normally only printed above the topmost staff, they may also be printed on every staff.

```

\score {
  <<
    \new Staff { \mark \default c''1 \textMark "molto" c'' }
    \new Staff { \mark \default c'1 \textMark "molto" c' }
  >>
  \layout {
    \context {
      \Score
      \remove Mark_engraver
      \remove Text_mark_engraver
      \remove Staff_collecting_engraver
    }
    \context {
      \Staff
      \consists Mark_engraver
      \consists Text_mark_engraver
      \consists Staff_collecting_engraver
    }
  }
}

```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)`, and there are similar commands to move the extenders and hyphens. A good value for *dy* must be found by trial and error.

```
<<
  \new Staff <<
    \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
  >>
  \new Lyrics \with {
    \override LyricText.extra-offset = #'(0 . 8.6)
    \override LyricExtender.extra-offset = #'(0 . 8.6)
    \override LyricHyphen.extra-offset = #'(0 . 8.6)
  } \lyricsto "voc" { La la -- la _ _ la }
>>
```

Slanted parentheses around dynamics

The easiest way to parenthesize dynamics is to use the normal `\parenthesize` command and adjust the font size, e.g., `{ c'4\tweak Parentheses.font-size 2 \parenthesize \f }`. However, this results in upright parentheses, while dynamic marks are normally slanted. This snippet gives a method to make the parentheses slanted as well.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
      }
    }
  #})))
```

```
\relative c' ' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Stand-alone two-column markup

Stand-alone text may be arranged in several columns using `\markup` commands.

```
\markup {
  \fill-line {
    \hspace #1
    \column {
      \line { 0 sacrum convivium }
      \line { in quo Christus sumitur, }
      \line { recolitur memoria passionis ejus, }
      \line { mens impletur gratia, }
      \line { futurae gloriae nobis pignus datur. }
      \line { Amen. }
    }
    \hspace #2
    \column \italic {
      \line { 0 sacred feast }
      \line { in which Christ is received, }
      \line { the memory of His Passion is renewed, }
      \line { the mind is filled with grace, }
      \line { and a pledge of future glory is given to us. }
      \line { Amen. }
    }
  }
  \hspace #1
}
```

O sacrum convivium
in quo Christus sumitur,
recolitur memoria passionis ejus,
mens impletur gratia,
futurae gloriae nobis pignus datur.
Amen.

*O sacred feast
in which Christ is received,
the memory of His Passion is renewed,
the mind is filled with grace,
and a pledge of future glory is given to us.
Amen.*

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})

\relative c {
  \clef "treble_8"
  \textSpannerDown
  \stringNumberSpanner "5" a8\startTextSpan b c d
    e f\stopTextSpan \stringNumberSpanner "4" g\startTextSpan a |
  bes4 a g2\stopTextSpan
}
```

Three-sided box

This example shows how to add a markup command to get a three-sided box around some text (or other markup).

```
% New command to add a three-sided box, with sides north, west, and south.
% Based on the `box-stencil` command defined in `scm/stencil.scm`.
% Note that ";;" is used to comment a line in Scheme.
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
        (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
        (x-rule (make-filled-box-stencil
                  (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the `\\box` command defined
% in `scm/define-markup-commands.scm`.
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round ARG.
```

Look at THICKNESS, BOX-PADDING, and FONT-SIZE properties to determine line thickness and padding around the markup."

```
(let ((pad (* (magstep font-size) box-padding))
```

```
(m (interpret-markup layout props arg)))
(NWS-box-stencil m thickness pad)))
```

```
\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note {4} #1.0 }
}
```

UTF-8

Various scripts may be used for texts (like titles and lyrics) by entering them in UTF-8 encoding, and using a Pango based backend. Depending on the fonts installed, this fragment will render Bulgarian (Cyrillic), Hebrew, Japanese and Portuguese.

```
%{
  You may have to install additional fonts.

  Red Hat Fedora: linux-libertine-fonts (Latin, Cyrillic, Hebrew)
                  google-noto-serif-jp-fonts (Japanese)

  Debian GNU/Linux, Ubuntu: fonts-linuxlibertine (Latin, Cyrillic, Hebrew)
                             fonts-noto-cjk (Japanese)
}%

% 'Linux Libertine' fonts also contain Cyrillic and Hebrew glyphs.

```

Volta text markup using repeatCommands

Though voltes are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#'((volta ,textIdentifier) ...)` (note the use of the backtick after `#` and the comma before `textIdentifier`). Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { \volta-number { 1. 2. 3... } \italic { ad lib. } }
```

```
\relative c' ' {
  c1
  \set Score.repeatCommands = #'((volta ,voltaAdLib) start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

Specialist notation

9 Vocal music

See also Section “Vocal music” in *Notation Reference*.

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding indicators to staves which get split after a break

This snippet defines the commands `\splitStaffBarLine`, `\convUpStaffBarLine`, and `\convDownStaffBarLine`. These add arrows at a bar line to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

Note that the implementation in this snippet draws dimensionless arrows into the right margin. For normal printing, this doesn't cause problems. However, it is necessary to increase the bounding box horizontally if you render the code as an image to avoid cropping, as demonstrated below.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* ((PI-OVER-180 (/ (atan 1 1) 34))
        (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
        (angle-rad (degrees->radians angle-deg))
        (target-x (* length (cos angle-rad)))
        (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0))
```

```

      #:concat (:#draw-line (cons length 0)
        #:arrow-head X RIGHT fill))))))

splitStaffBarLineMarkup = \markup \with-dimensions #'(0 . 0) #'(0 . 0) {

```

The image displays three musical systems, each with a vocal part and a piano accompaniment part. The first system shows Soprano (S A) and Tenor/Bass (T B) parts with lyrics 'a b c d'. The second system shows Soprano I (SI SII) and Alto I (AI AII) parts with lyrics 'e f g h'. The third system shows Soprano (S A) and Tenor/Bass (T B) parts with lyrics 'i j k l'. The piano accompaniment parts are written in bass clef and feature chords corresponding to the vocal lines.

Adding orchestral cues to a vocal score

This snippet shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `\cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `\addQuote`, the name to be inserted before the cue notes, then either UP or DOWN to specify either `\voiceOne` with the name above the staff or `\voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

```
cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
```

```

        <>-\markup { \tiny #name }
        $music
    }
    #})

flute = \relative c'' {
    \transposition c'
    s4 s4 e g
}
\addQuote "flute" { \flute }

clarinet = \relative c' {
    \transposition bes
    fis4 d d c
}
\addQuote "clarinet" { \clarinet }

singer = \relative c'' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c'' {
    \transposition c'
    \cueWhile "clarinet" "Clar." #DOWN { c4. g8 }
    \cueWhile "flute" "Flute" #UP { g4 bes4 }
}
pianoLH = \relative c { c4 <c' e> e, <g c> }

\score {
  <<
    \new Staff {
      \new Voice = "singer" {
        \singer
      }
    }

```

Adjusting vertical spacing of lyrics

This snippet shows how to bring the lyrics line closer to the staff.

```
music = \relative c' { c4 d e f | g4 f e d | c1 }
text = \lyricmode { aa aa aa aa aa aa aa aa }
```

```
<<
\new Staff \new Voice = melody \music
% Default layout:
\new Lyrics \lyricsto melody \text

\new Staff \new Voice = melody \music
% Reducing the minimum space below the staff and above the lyrics.
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
} \lyricsto melody \text
>>
```

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left-aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
<<
\new Staff {
  \new Voice = "vocal" \relative c' {
    \override TextScript.staff-padding = #2
    c d~\markup default d e
    c d~\markup "right aligned" d e
    c d~\markup "center aligned" d e
    c d~\markup "reset to default" d e
  }
}
```

```

\new Lyrics \lyricsto "vocal" {
  word word word
  \set lyricMelismaAlignment = #RIGHT
  word word word
  \set lyricMelismaAlignment = #CENTER
  word word word
  \unset lyricMelismaAlignment
  word word word
}
>>

```

```

\layout {
  ragged-right = ##f
}

```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. AmbitusNoteHead grobs also have ledger lines.

```

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

```

```

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>

```

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface`; see Graphical Object Interfaces (<https://lilypond.org/doc/v2.24/Documentation/internals/graphical-object-interfaces>) for a list of possible values for *grob-interface*.

A common use case is printing the ambitus between key signature and time signature.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Ambitus with multiple voices

Adding the `Ambitus_engraver` to the `Staff` context creates a single ambitus per staff, even in the case of staves with multiple voices.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}
<<
  \new Voice \relative c' {
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Ancient notation template – modern transcription of Gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g f) a2 \finalis \break

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how it can be done with adjusting the `nonstaff-nonstaff-spacing` property of the `VerticalAxisGroup` grob.

```
\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup
      .nonstaff-nonstaff-spacing
      .minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break
    % ...

    \voiceOne
    s2 a'8^\aliceSings a' b'4 |
    \oneVoice
    g'1
  }
  \new Voice = "eve" {
    s1 |
    a'2^\eveSings g' |
    s1 |
    a'2^\eveSings g'
    % ...

    \voiceTwo
    f'4^\eveSings a'8 g' f'4 e' |
    \oneVoice
    s1
  }
}
>>

\new Lyrics \lyricsto "alice" {
  may -- be
  sec -- ond
  % ...
  Shut up, you fool!
}
```

```

\new Lyrics \lyricsto "eve" {

  words are
  % ...
  ...and then I was like--
}
>>

```

ALICE EVE ALICE EVE

may - be that the sec - ond words are

5 EVE ALICE

...and then I was Shut up, you like-- fool!

Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

```

%{
  You may have to install additional fonts.

  Red Hat Fedora: dejavu-fonts-all

  Debian GNU/Linux, Ubuntu: fonts-dejavu-core
                             fonts-dejavu-extra
}%

\relative c' ' {
  \time 3/4
  g2 e4
  a2 f4
  g2.
}
\addlyrics {
  \stanza "1. "
  Hi, my name is Bert.
}
\addlyrics {
  \override StanzaNumber.fonts.serif = "DejaVu Sans"
  \stanza "2. "
  \override LyricText.font-family = #'typewriter
  Oh, ché -- ri, je t'aime
}

```

1. Hi, my name is Bert.
2. Oh, ché-ri, jet'aime

Chant or psalm notation

This form of notation is used for psalm chant, where verses are not always of the same length.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff

\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \section
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \section
    \stemOff a'\breve^{\markup { \italic flexe }}
    \stemOn g'2 \fine
  }
}
```

Forcing hyphens to be shown

If LilyPond does not think there is space for a hyphen, it will be omitted. This behaviour can be overridden with the minimum-distance property of LyricHyphen.

```
\relative c'' {
  c32 c c c
  c32 c c c
  c32 c c c
  c32 c c c
}

\addlyrics {
  syl -- lab word word
  \override LyricHyphen.minimum-distance = #1.0
  syl -- lab word word
  \override LyricHyphen.minimum-distance = #2.0
  syl -- lab word word
  \revert LyricHyphen.minimum-distance
  syl -- lab word word
}
```

Formatting lyrics syllables

The `\markup` command can be used in `\lyricmode` blocks to format individual syllables in lyrics.

```
mel = \relative c'' { c4 c c c c1 }
lyr = \lyricmode {
  Your lyrics \markup { \italic can }
  \markup { \with-color #red contain }
  \markup { \fontsize #8 \bold Markup! }
}
```

```
<<
  \new Voice = "melody" \mel
  \new Lyrics \lyricsto "melody" \lyr
>>
```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
  wa~o~a
}
```

wa o a

Hymn template

This code shows one way of setting out a hymn tune where each line starts and ends with a partial measure. It also shows how to add the verses as stand-alone text under the music.

```
Timeline = {
  \time 4/4
  \tempo 4=96

} % End paper block

```

This is line one of the first verse
 This is line two of the same

And here's line one of the second verse
 And the next line of the same

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the `self-alignment-X` property of the `LyricText` object. Value `-1` means left-aligned, `0` centered, and `1` right-aligned. Alternatively, you can use the Scheme values `LEFT`, `CENTER`, and `RIGHT` instead of numbers. Other numeric values are possible, too – don't forget to add the `'#` Scheme prefix for negative numbers!

```

\layout {
  ragged-right = ##f
}

\relative c'' {
  c1 c c c
}

\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "left-aligned"
  \once \override LyricText.self-alignment-X = #CENTER
  "centered"
  \once \override LyricText.self-alignment-X = 1
  "right-aligned"
  \once \override LyricText.self-alignment-X = #-1.5
  "overly left-aligned"
}

```

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the command `\speakOn` and end it with `\speakOff`.

```

speakOn = \override Stem.stencil =
  #(lambda (grob)
    (let* ((x-parent (ly:grob-parent grob X))
      (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
      (if is-rest?
        empty-stencil
        (ly:stencil-combine-at-edge
          (ly:stem::print grob)
          Y
          (- (ly:grob-property grob 'direction))
          (grob-interpret-markup
            grob
            (markup #:center-align #:fontsize -4
              #:musicglyph "noteheads.s2cross"))
          -1.7))))

```

```
speakOff = \revert Stem.stencil
```

```

\new Staff {
  \relative c'' {
    a4 b a c
    \speakOn
    g4 f r g8 a
  }
}

```

```

    b4 r r8 d e4
    \speakOff
    c4 a g f
  }
}

```

Orchestra, choir and piano template

This template demonstrates the use of nested `StaffGroup` and `GrandStaff` contexts to subgroup instruments of the same type together, and a way to use `\transpose` so that variables hold music for transposing instruments at concert pitch.

```

#(set-global-staff-size 17)

```

```

\paper {
  indent = 3.0\cm % add space for instrumentName
  short-indent = 1.5\cm % add less space for shortInstrumentName

Detailed description: This is a page from a musical score, page 276, titled 'Chapter 9: Vocal music'. It shows measures 8 and 9 of a piece. The score is for a large ensemble. The instruments listed on the left are: Flute, Clarinet in B-flat, Horn in F, Trumpet in C, Percussion, Piano, Soprano, Alto I, Alto II, Tenor, Violin I, Violin II, Viola, Cello, and Double Bass. The key signature is one sharp (F#), and the time signature is common time (C). The Soprano part has lyrics 'Lyr - ics' in measure 8 and 'Lyr - ics' in measure 9. The Alto I part has lyrics 'Lyr - ics' in measure 8 and 'Lyr - ics' in measure 9. The Alto II part has lyrics 'Ah - ah' in measure 8 and 'Ah - ah' in measure 9. The Tenor part has lyrics 'Lyr - ics' in measure 8 and 'Lyr - ics' in measure 9. The Piano part has a melody in measure 8 and a sustained chord in measure 9. The Percussion part has a single note in measure 8 and a sustained chord in measure 9. The other instruments (Flute, Clarinet, Horn, Trumpet, Violin I, Violin II, Viola, Cello, Double Bass) have sustained chords in measure 8 and measure 9. The page number 276 is in the top right corner. The chapter title 'Chapter 9: Vocal music' is in the top left corner.

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```
melody = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  <<
    \new Voice = "mel" { \autoBeamOff \melody }
    \new Lyrics \lyricsto mel \text
    \new PianoStaff <<
      \new Staff = "upper" \upper
      \new Staff = "lower" \lower
    >>
  >>
  \layout {
    \context { \Staff \RemoveEmptyStaves }
  }
  \midi { }
}
```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)`, and there are similar commands to move the extenders and hyphens. A good value for *dy* must be found by trial and error.

```
<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ la }
>>
```

SATB choir template – four staves

This is a template for a SATB choir on four staves.

```
global = {
  \key c \major
  \time 4/4
  \dynamicUp
}
sopranonotes = \relative c'' {
  c2 \p \< d c d \f
}

    >>
    \new Staff <<
      \new Voice = "bass" <<
        \global
        \bassnotes
      >>
      \new Lyrics \lyricsto "bass" \basswords
    >>
  >>
}

```

Single-staff template with notes, lyrics, and chords

This template allows the preparation of a song with melody, words, and chords.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

harmonies = \chordmode {
  a2 c
}

\score {
  <<
    \new ChordNames {
      \set chordChanges = ##t
      \harmonies
    }
    \new Voice = "one" { \autoBeamOff \melody }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

Single-staff template with notes, lyrics, chords, and frets

Here is a simple lead sheet template with melody, lyrics, chords, and fret diagrams.

```

verseI = \lyricmode {
  \stanza "1."
  This is the first verse
}

verseII = \lyricmode {
  \stanza "2."
  This is the second verse.
}

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
  c4 d8 e f4 g
  \bar "|"
}

\score {
  <<
    \context ChordNames { \theChords }
    \context FretBoards { \theChords }
    \new Staff {
      \context Voice = "voiceMelody" { \staffMelody }
    }
    \new Lyrics = "lyricsI" {
      \lyricsto "voiceMelody" \verseI
    }
    \new Lyrics = "lyricsII" {
      \lyricsto "voiceMelody" \verseII
    }
  >>
  \layout { }
  \midi { }
}

```

1. This is the first verse
2. This is the second verse.

Single-staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
    \new Voice = "one" {
      \autoBeamOff
      \melody
    }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

Skips in lyric mode

The 's' syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
\relative c'' { a1 | a }
\new Lyrics \lyricmode { \skip1 bla1 }
>>
```

Skips in lyric mode (2)

Although 's' skips cannot be used in `\lyricmode` (it is taken to be a literal "s", not a space), double quotes (") or underscores () are available.

```
<<
\relative c'' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Using `\arpeggioBracket` to make divisi more visible

The `\arpeggioBracket` command can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

```
\include "english.ly"
```

```
\score {
\relative c'' {
\key a \major
\time 2/2
<<
\new Voice = "upper"
<<
{ \voiceOne \arpeggioBracket
a2( b2
<b d>1\arpeggio)
<cs e>\arpeggio ~
<cs e>4
}
\addlyrics { \lyricmode { A -- men. } }
>>
\new Voice = "lower"
{ \voiceTwo
a1 ~
a
a ~
a4 \bar "|"
}
>>
```

Using a bracket to clarify divisi

The `\nonArpeggiato` command can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

`\include "english.ly"`

```
\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
      \new Voice = "upper" <<
        {
          \voiceOne
          a2( b2
          <b d>1\nonArpeggiato)
          <cs e>\nonArpeggiato ~
          <cs e>4
          \fine
        }
      \addlyrics { \lyricmode { A -- men. } }
    >>
    \new Voice = "lower" {
      \voiceTwo
      a1 ~
      a
      a ~
      a4
      \fine
    }
  }
  >>
}
```

Using tags to produce mensural and modern music from the same source

Using tags it is possible to produce both mensural and modern notation from the same music. In this snippet, a function `\menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position.

Tags can also be used where other differences are needed: for example using “whole measure rests” (R1, R\breve, etc.) in modern music, but normal rests (r1, r\breve, etc.) in the mensural version. Converting mensural music to its modern equivalent is usually referred to as *transcription*.

The call `c4.\Be c8 c\Am` is the same as `c4.[c8 c]`. However, it suppresses warnings if it starts on a note that can’t hold a beam but needs it anyway due to the use of `Completion_heads_engraver`.

[Note that the custos sticks out into the right margin and might be cut off if the LilyPond output gets cropped tightly. The use of `\with-true-dimensions` below avoids this.]

```
\layout {
  line-width = 150\mm
}

menrest = #(define-music-function (note) (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  })
Be = \tag #'mod
  #(begin
    (ly:expect-warning (G_ "stem does not fit in beam"))
    (ly:expect-warning (G_ "beam was started here"))
    (make-span-event 'BeamEvent START))
Am = \tag #'mod ]

MenStyle = {
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
  \omit Slur
  \omit Beam
}

finalis = \section

Music = \relative c'' {
  \key f \major

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties `alignBelowContext` and `alignAboveContext` to control the positioning of lyrics and ossias.

```
\relative c' <<
  \new Staff = "1" { c4 c c c }
  \new Staff = "2" { d4 d d d }
  \new Staff = "3" { e4 e e e }

  { \skip 2
    <<
      \lyrics {
        \set alignBelowContext = "1"
        lyrics4 below
      }
      \new Staff \with {
        alignAboveContext = "3"
        fontSize = -2
        \override StaffSymbol.staff-space = #(magstep -2)
        \remove "Time_signature_engraver"
        \override VerticalAxisGroup.staff-staff-spacing =
          #'((minimum-distance . 0)
             (basic-distance . 0)
             (padding . 1))
      } {
        \tuplet 6/4 {
          \override TextScript.padding = 2
          c8[~"ossia above" d e d e f]
        }
      }
    >>
  }
>>
```

Vertically aligning stanza numbers of different staves

It can happen that stanza numbers don't align vertically if the verses are attached to different staves. To fix that, override the `self-alignment-X` property of the `LyricText` grob.

```
\markup { default behavior }
```

```
<<
  \new Staff { b b b b }
  \lyrics {
    \stanza "3."
    a a a a
  }
```

```

  \new Staff { b b b b }
  \lyrics {
    \stanza "1."
    aaaaaaaaaa a a a
  }
  \lyrics {
    \stanza "2."
    a a a a
  }
>>
```

```
\markup \vspace #1
```

```
\markup {
  using \typewriter "self-alignment-X = #LEFT" }
```

```
<<
  \new Staff { b b b b }
  \new Lyrics \lyricmode {
    \stanza "3."
    a a a a
  }
```

```

  \new Staff { b b b b }
  \new Lyrics \lyricmode {
    \stanza "1."
    \once \override LyricText.self-alignment-X = #LEFT
    aaaaaaaaaa a a a
  }
  \new Lyrics \lyricmode {
    \stanza "2."
    a a a a
  }
>>
```

default behavior

using self-alignment-X = #LEFT

Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:

```
dropLyrics = {
  \override LyricText.extra-offset = #'(0 . -4.5)
  \override LyricHyphen.extra-offset = #'(0 . -4.5)
  \override LyricExtender.extra-offset = #'(0 . -4.5)
  \override StanzaNumber.extra-offset = #'(0 . -4.5)
}
```

```
raiseLyrics = {

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn template”, the four voices are regrouped on only two staves.

```

\paper {

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in snippet “Vocal ensemble template”. It demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes also apply to the piano reduction.

```

```

The image shows a musical score for a vocal ensemble. It consists of three systems of staves. The first system has two staves: a soprano staff (treble clef) and an alto/bass staff (bass clef). The second system has two staves: a tenor staff (treble clef) and a bass staff (bass clef). The third system has two staves: a piano staff (treble and bass clefs) and a bass staff (bass clef). The lyrics are aligned above and below the staves. The lyrics are: hi hi hi hi, ha ha ha ha, hu hu hu hu, ho ho ho ho.

Vocal ensemble template with lyrics aligned below and above the staves

This template is basically the same as the simple “Vocal ensemble template”, with the exception that here all the lyrics lines are placed using `alignAboveContext` and `alignBelowContext`.

```

global = {
  \key c \major
  \time 4/4
}

sopMusic = \relative c'' {
  c4 c c8[( b)] c4
}
sopWords = \lyricmode {
  hi hi hi hi
}

altoMusic = \relative c' {
  e4 f d e
}

```

```

altoWords = \lyricmode {
  ha ha ha ha
}

tenorMusic = \relative c' {
  g4 a f g
}
tenorWords = \lyricmode {
  hu hu hu hu
}

bassMusic = \relative c {
  c4 c g c
}
bassWords = \lyricmode {
  ho ho ho ho
}

\score {

}

```

Vocal ensemble template with verse and refrain

This template creates a score that starts with a solo verse and continues into a refrain for two voices. It also demonstrates the use of spacer rests within the `\global` variable to define meter changes (and other elements common to all parts) throughout the entire score.

```

global = {
  \key g \major

  % verse
  \time 3/4
  s2.*2
  \break

  % refrain
  \time 2/4
  s2*2
  \bar "|"
}

    >>
  >>

  \layout {
    ragged-right = ##t
    \context { \Staff
      % these lines prevent empty staves from being printed
      \RemoveEmptyStaves
      \override VerticalAxisGroup.remove-first = ##t
    }
  }
}

```

One two three four five six

la la la la

dum dum dum dum

The image shows two musical staves. The first staff is a single treble clef in 3/4 time with a key signature of one sharp (F#). It contains six quarter notes: D4, E4, F#4, G4, A4, and B4. Below the staff are the lyrics 'One two three four five six'. The second staff is a grand staff (treble and bass clefs) in 2/4 time with a key signature of one sharp (F#). The treble staff has a triplet of four quarter notes: D4, E4, F#4, and G4, with the lyrics 'la la la la' below. The bass staff has four quarter notes: D3, E3, F#3, and G3, with the lyrics 'dum dum dum dum' below. A brace on the left groups the two staves.

10 Keyboard and other multi-staff instruments

See also Section “Keyboard and other multi-staff instruments” in *Notation Reference*.

Accordion register symbols

Accordion register symbols are available as \markup as well as as standalone music events (as register changes tend to occur between actual music events). Bass registers are not overly standardized. The available commands can be found in ‘Discant symbols’ in the Notation Reference (<https://lilypond.org/doc/v2.24/Documentation/notation/accordion#discant-symbols>).

```
#(use-modules (lily accreg))
```

```
\new PianoStaff <<
  \new Staff \relative {
    \clef treble
    \discant "10"
    r8 s32 f'[ bes f] s e[ a e] s d[ g d] s16 e32[ a]
    <<
      { r16 <f bes> r <e a> r <d g> }
      \\
      { d r a r bes r }
    >> |
    <cis e a>1
  }

  \new Staff \relative {
    \clef treble
    \freeBass "1"
    r8 d'32 s16. c32 s16. bes32 s16. a32[ cis] s16
    \clef bass \stdBass "Master"
    <<
      { r16 <f, bes d>^~"b" r <e a c>^~"am" r <d g bes>^~"gm" |
        <e a cis>1^~"a" }
      \\
      { d8_"D" c_"C" bes_"B" | a1_"A" }
    >>
  }
>>
```

The image shows a musical score for a piano and an accordion. The piano part is written on two staves (treble and bass), and the accordion part is written on a single staff. The score is in common time (C) and features a sequence of chords and notes. The accordion part uses discant symbols (b, am, gm, a) to indicate specific register changes. The piano part's bass line is labeled with chord names D, C, B, and A, corresponding to the notes in the bass staff.

Changing the text for sustain markings

With the `pedalSustainStrings` context property it is possible to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs – the values shown in this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }
```

```
\relative c' {
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("P" "P-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("d" "de" "e")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("M" "M-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
  \sustainNotes
}

\layout {
  ragged-right = ##f
}
```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}
```

```
<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely by using the property `fingeringOrientation`. For fingering orientation to apply, the fingering command must

be used within a chord construct (`<...>`), even for single notes. Orientation for string numbers and right-hand fingerings may be controlled in a similar way by using the properties `stringNumberOrientation` and `strokeFingerOrientation`, respectively.

These properties can be set to a list of one to three values. They control whether fingerings may be placed above (if `up` appears in the list), below (if `down` appears), to the left (if `left` appears), or to the right (if `right` appears). Conversely, if a location is not listed, no fingering is placed there. LilyPond takes these constraints and works out the best placement for the fingering of the notes of the following chords. Note that `left` and `right` are mutually exclusive – fingerings may be placed only on one side or the other, not both.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}
```

Creating slurs across voices

In some situations it is necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's second partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
```

```

\hideNotes a)
\unHideNotes fis](
\hideNotes a)
\unHideNotes g[(
\hideNotes a)
\unHideNotes gis](
\hideNotes a)
}
>>
}

```

Cross-staff chords – beaming problems workaround

Sometimes it is better to use stems from the ‘other’ staff for creating cross-staff chords to trick LilyPond’s beam collision detector. In the following snippet, if the stems from the lower staff were used instead, it would be necessary to explicitly use

```
\override Staff.Beam.collision-voice-only = ##t
```

so that LilyPond doesn’t move the beams.

```

\new PianoStaff <<
\new Staff = up \relative c' <<
{ r4
  \override Stem.cross-staff = ##t
  \override Stem.length = #19 % this is in half-spaces,
    % so it makes stems 9.5 staffspaces long
  \override Stem.Y-offset = #-6 % stems are normally lengthened
    % upwards, so here we must lower the stem by the amount
    % equal to the lengthening - in this case (19 - 7) / 2
    % (7 is default stem length)
  e e e }
{ s4
  \change Staff = "bottom"
  \override NoteColumn.ignore-collision = ##t
  c, c c
}
>>

\new Staff = bottom \relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}
>>

```

Cross-staff tremolos

Since `\repeat tremolo` expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its `\change Staff` command.

```
\new PianoStaff <<
  \new Staff = "up" \relative c'' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c'' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
>>
```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```
\paper {
  ragged-right = ##f
}

\relative c'' {
  c2\sostenutoOn c
  c2\sostenutoOff c
  c2\tweak shorten-pair #'(-7 . -2) \sostenutoOn c
  c2\sostenutoOff c
}
```

```
c2\tweak edge-height #'(0 . 3) \sostenutoOn c
c2\sostenutoOff c
}
```

Indicating cross-staff chords with a bracket

A non-arpeggiato bracket can indicate that notes on two different staves are to be played with the same hand. In order to do this, the PianoStaff must be set to accept cross-staff brackets.

The following example typesets measure 65 of Debussy's prelude *Les collines d'Anacapri*.

```
\new PianoStaff <<
  \once \set PianoStaff.connectChordBrackets = ##t

  \new Staff \relative c' {
    \key b \major
    \time 6/8
    b8-.(\nonArpeggiato fis'-.> cis-.
      e-. gis-. b-.)\!\fermata^\laissezVibrer
    \section
  }

  \new Staff \relative c' {
    \clef bass
    \key b \major
    << { <a e cis>2.\nonArpeggiato } \
      { <a, e a,>2. } >>
    \section
  }
>>
```

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments use `\key c \major`. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a `\transpose` section.

```

\header {
  title = "Song"
  subtitle = "(tune)"
  composer = "Me"
  meter = "moderato"
  piece = "Swing"
  tagline = \markup \column {

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their positioning can be tuned using the tie-configuration property.

See also snippet “Longer laissez vibrer ties”.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #`((-7 . ,DOWN)
```

```

        (-5 . ,DOWN)
        (-3 . ,UP)
        (-1 . ,UP))
    <c d e f>4\laissezVibrer r
}

```

Piano template (simple)

Here is a simple piano staff with some notes.

```

upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  \new PianoStaff \with { instrumentName = "Piano" }
  <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}

```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```

upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
  \layout { }
  \midi { }
}

```

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```

melody = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

```

```

upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  <<
    \new Voice = "mel" { \autoBeamOff \melody }
    \new Lyrics \lyricsto mel \text
    \new PianoStaff <<
      \new Staff = "upper" \upper
      \new Staff = "lower" \lower
    >>
  >>
  \layout {
    \context { \Staff \RemoveEmptyStaves }
  }
  \midi { }
}

```

Removing brace on first line of piano score

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`, together with the clefs. It may be useful when cutting and pasting the engraved image into existing music.

The code uses `\alterBroken` to hide the brace delimiter at the beginning.

```

someMusic = {
  \once \omit Staff.Clef
  \once \omit Staff.TimeSignature
  \*3 c1 \break
  \*5 c1 \break
  \*5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' { \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
    indent=75\mm
    \context {
      \PianoStaff
      \alterBroken transparent #'(#t) SystemStartBrace
    }
  }
}

```

Using \autoChange with more than one voice

Here is a demonstration of how to use \autoChange with more than one voice.

```

\score {
  \new PianoStaff
  <<
    \new Staff = "up" {
      <<
        \set Timing.beamExceptions = #'()
        \set Timing.beatStructure = #'(4)

```

```

\new Voice {
  \voiceOne
  \autoChange
  \relative c' {
    g8 a b c d e f g
    g,8 a b c d e f g
  }
}

\new Voice {
  \voiceTwo
  \autoChange
  \relative c' {
    g8 a b c d e f g
    g,,8 a b c d e f g
  }
}
>>
}

\new Staff = "down" {
  \clef bass
}
>>
}

```

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in snippet “Vocal ensemble template”. It demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes also apply to the piano reduction.

```

\paper {
  top-system-spacing.basic-distance = 10
  score-system-spacing.basic-distance = 20
  system-system-spacing.basic-distance = 20
  last-bottom-spacing.basic-distance = 10
}

global = {
  \key c \major
  \time 4/4

11 Unfretted string instruments

See also Section “Unfretted string instruments” in *Notation Reference*.

Creating slurs across voices

In some situations it is necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach’s second partita for solo violin, BWV 1004.

```
\relative c' {
  <<
    {
      d16( a') s a s a[ s a] s a[ s a]
    }
    \\\
    {
      \slurUp
      bes,16[ s e](
      \hideNotes a)
      \unHideNotes f[(
      \hideNotes a)
      \unHideNotes fis](
      \hideNotes a)
      \unHideNotes g[(
      \hideNotes a)
      \unHideNotes gis](
      \hideNotes a)
    }
  >>
}
```

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```
\relative c' '' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}
```

Snap pizzicato (“Bartok” pizzicato)

A snap pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4^\snappizzicato
  <c, e g>4_\snappizzicato
}
```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a `\global` section for time and key signatures.

See also snippet “String quartet template with separate parts”.

```
global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c'' {
  c2 d
  e1
  \bar "|."
}

violinTwo = \new Voice \relative c'' {
  g2 f
  e1
  \bar "|."
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|."
}
```

```

cello = \new Voice \relative c' {
  \clef bass
  c2 b
  a1
  \bar "|."
}

\score {
  \new StaffGroup <<
    \new Staff \with { instrumentName = "Violin 1" }
    << \global \violinOne >>
    \new Staff \with { instrumentName = "Violin 2" }
    << \global \violinTwo >>
    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}

```

String quartet template with separate parts

The “String quartet template (simple)” snippet produces a nice string quartet, but what if you need to print parts? This new template demonstrates how to use the `\tag` feature to easily split a piece into individual parts.

For technical reasons, multiple output files cannot be shown here for a single snippet, which means that the template below unifies the code for separate files. The file names are contained in comments at the beginning of each file.

`piece.ly` contains all the music definitions. The other files – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly`, and `vlc.ly` – produce the full score and the four parts.

Do not forget to remove specified comments when using separate files!

```

% piece.ly
% (This is the global definitions file.)

global= {
  \time 4/4
  \key c \major
}

Violinone = \new Voice \relative c' {
  c2 d e1
  \bar "|."
}

Violintwo = \new Voice \relative c' {
  g2 g e1
  \bar "|."
}

Viola = \new Voice \relative c' {
  \clef alto
  e2 d c1
  \bar "|."
}

Cello = \new Voice \relative c' {
  \clef bass
  c2 b a1
  \bar "|."
}

music = <<
  \tag #'score \tag #'vn1
  \new Staff \with { instrumentName = "Violin 1" }
    << \global \Violinone >>

  \tag #'score \tag #'vn2
  \new Staff \with { instrumentName = "Violin 2" }
    << \global \Violintwo >>

  \tag #'score \tag #'vla
  \new Staff \with { instrumentName = "Viola" }
    << \global \Viola >>

Violin 1

Violin 2

Viola

Cello

The image shows a musical score for four string instruments: Violin 1, Violin 2, Viola, and Cello. The score is written in common time (C) and consists of two measures. The Violin 1 part starts on a whole note G4, followed by a half note A4, and a whole note B4. The Violin 2 part starts on a whole note E4, followed by a half note F4, and a whole note G4. The Viola part starts on a whole note C3, followed by a half note D3, and a whole note E3. The Cello part starts on a whole note C2, followed by a half note D2, and a whole note E2. The score is enclosed in a large brace on the left side.

12 Fretted string instruments

See also Section “Fretted string instruments” in *Notation Reference*.

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' ' {
  c4-1 d-2 f-4 e-3
}
```

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of `\markup` and `\finger`.

```
one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 2
  }
}

\score {
  \new TabStaff {
    \tabFullNotation
    \stemUp
    e8\4~\one b\2 <g\3 e'\1>~>[ b\2 e\4]
    <a\3 fis'\1>~>~\threeTwo[ b\2 e\4]
  }
}
```

Adding markups in a tablature

By default, markups are not displayed in a tablature.

To make them appear, revert the `stencil` property of the `TextScript` grob in the `TabStaff` context.

```

high = { r4 r8 <g c'> q r8 r4 }
low = { c4 r4 c8 r8 g,8 b, }
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \*2 << \high \\\ \low \\\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      \proportionalNotationDuration = #1/8
    }
  }
}

```

	1 & 2 & 3 & 4 &					1 & 2 & 3 & 4 &			
T	1-1					1-1			
A	0-0					0-0			
B	3		3		2	3		3	2
			3					3	

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

[illegible]

When automatic fretboards are used, barré indicators are drawn whenever one finger is responsible for multiple strings.

```
\new FretBoards {
  <f,-1 c-3 f-4 a-2 c'-1 f'-1>1
  <f, c f a c' f'>1
}
```

Fret diagrams can be oriented in three ways. By default the top string or fret in the different orientations will be aligned.

```
<<
  \chords {
    c1
    c1
    c1
  }
  \new FretBoards \chordmode {
    c1
    \override FretBoard.fret-diagram-details.orientation =
      #'landscape
    c1
    \override FretBoard.fret-diagram-details.orientation =
```

```

      #'opposing-landscape
      c1
    }
    \new Voice {
      c'1
      c'1
      c'
    }
  >>

```

Chord changes for fretboards

Fretboards can be set to display only when the chord changes, or at the beginning of a new line.

```
\include "predefined-guitar-fretboards.ly"
```

```

myChords = \chordmode {
  c1 c1 \break
  \set chordChanges = ##t
  c1 c1 \break
  c1 c1
}

```

```

<<
  \new ChordNames { \myChords }
  \new FretBoards { \myChords }
  \new Staff { \myChords }
>>

```

Chord glissando in tablature

Slides for chords are indicated by default in both `Staff` and `TabStaff`.

String numbers may be necessary for `TabStaff` because automatic string calculations are different for chords and for single notes.

```
myMusic = \relative c' {
  <c e g>1 \glissando <f a c>
  <cis, eis gis>1 \glissando <f a c>
  <cis eis gis>1 \glissando <f a c\3>
}
```

```
\score {
  <<
    \new Staff {
      \clef "treble_8"
      \omit StringNumber
      \myMusic
    }
    \new TabStaff \myMusic
  >>
}
```

```
\score {
  <<
    \new Staff {
      \clef "treble_8"
      \omit StringNumber
      \myMusic
    }
    \new TabStaff \with { \override Glissando.style = #'none } {
      \myMusic
    }
  >>
}
```

The musical notation shows a series of chords in common time. The fretboard diagram below shows the following fret numbers for the strings (Treble, Alto, Bass):

3	8		1		
5	10		2		
5	10		3		
			4		

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context property `maximumFretStretch` is set to value 4, though, resulting in a warning about “No string for pitch ...”, and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string numbers to all notes of a chord to fix that.

```
% The code below prints two warnings for the second chord,
% which may be omitted by uncommenting the following line.
%
% #(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))
```

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}
```

```
<<
  \new FretBoards \mus
  \new TabVoice \mus
>>
```

The fretboard diagrams show the placement of notes on the fretboard. The table below shows the fret numbers for each string (Treble, Alto, Bass):

6	1	6	6
5		1	1

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely by using the property `fingeringOrientation`. For fingering orientation to apply, the fingering command must be used within a chord construct (`<...>`), even for single notes. Orientation for string numbers and right-hand fingerings may be controlled in a similar way by using the properties `stringNumberOrientation` and `strokeFingerOrientation`, respectively.

These properties can be set to a list of one to three values. They control whether fingerings may be placed above (if up appears in the list), below (if down appears), to the left (if left appears), or to the right (if right appears). Conversely, if a location is not listed, no fingering is placed there. LilyPond takes these constraints and works out the best placement for the fingering of the notes of the following chords. Note that left and right are mutually exclusive – fingerings may be placed only on one side or the other, not both.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}

```

Customizing fretboard fret diagrams

Fret diagram properties can be modified by setting the `fret-diagram-details` property. For `FretBoard` fret diagrams, overrides are applied to the `FretBoards.FretBoard` object. Like `Voice`, `FretBoards` is a bottom-level context, and therefore can be omitted in property overrides.

```
\include "predefined-guitar-fretboards.ly"
```

```

\storePredefinedDiagram #default-fret-table \chordmode { c' }
  #guitar-tuning
  "x;1-1-(;3-2;3-3;3-4;1-1-);"

```

```
% shorthand
```

```

oo = #(define-music-function
  (grob-path value)
  (list? scheme?)
  #{ \once \override $grob-path = #value #})

```

```
<<
```

```

\new ChordNames {
  \chordmode { c1 | c | c | d | bes }
}
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = 1.2
  \override FretBoard.fret-diagram-details.finger-code = #'in-dot
  \override FretBoard.fret-diagram-details.dot-color = #'white
}

```

```

\chordmode {

Customizing markup fret diagrams

Fret diagram properties can be modified by setting the `fret-diagram-details` property. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

```

<<
\chords { c1 | c | c | d }

\new Voice = "mel" {
  \textLengthOn
  % Set global properties of fret diagram

```

```

\override TextScript.size = 1.2
\override TextScript.fret-diagram-details.finger-code = #'in-dot
\override TextScript.fret-diagram-details.dot-color = #'white

%% C major for guitar, no barre, using defaults
% terse style
c'1~\markup { \fret-diagram-terse "x;3-3;2-2;o;1-1;o;" }

%% C major for guitar, barred on third fret
% verbose style
% size 1.0
% roman fret label, finger labels below string, straight barre
c'1~\markup {
% standard size
\override #'(size . 1.0) {
  \override #'(fret-diagram-details . (
    (number-type . roman-lower)
    (finger-code . in-dot)
    (barre-type . straight))) {
    \fret-diagram-verbose #'((mute 6)
      (place-fret 5 3 1)
      (place-fret 4 5 2)
      (place-fret 3 5 3)
      (place-fret 2 5 4)
      (place-fret 1 3 1)
      (barre 5 1 3))
  }
}
}

%% C major for guitar, barred on third fret
% verbose style
% landscape orientation, arabic numbers, M for mute string
% no barre, fret label down or left, small mute label font
c'1~\markup {
\override #'(fret-diagram-details . (
  (finger-code . below-string)
  (number-type . arabic)
  (label-dir . -1)
  (mute-string . "M")
  (orientation . landscape)
  (barre-type . none)
  (xo-font-magnification . 0.4)
  (xo-padding . 0.3))) {
  \fret-diagram-verbose #'((mute 6)
    (place-fret 5 3 1)
    (place-fret 4 5 2)
    (place-fret 3 5 3)
    (place-fret 2 5 4)
    (place-fret 1 3 1)
    (barre 5 1 3))
  }
}

```

```

}

%% simple D chord
% terse style
% larger dots, centered dots, fewer frets

    \fret-diagram-terse "x;x;o;2-1;3-2;2-3;"
  }
}
}
}
>>

```

Fingerings, string indications, and right-hand fingerings

This example combines left-hand fingering, string indications, and right-hand fingering.

```
#(define RH rightHandFinger)
```

```

\relative c {
  \clef "treble_8"
  <c-3\5\RH 1 >4
  <e-2\4\RH 2 >4
  <g-0\3\RH 3 >4
  <c-1\2\RH 4 >4
}

```

Flamenco notation

For flamenco guitar, some special notation is used.

- A *golpe* symbol indicates a slap on the guitar body with the nail of the ring finger.
- An arrow indicates (the direction of) strokes.
- Different letters for fingering are used (“p”: thumb, “i”: index finger, “m”: middle finger, “a”: ring finger and “x”: little finger).
- Marking 3- and 4-finger *rasgueados*: stroke upwards with all fingers, ending with an up-and down using the index finger.

- *Abanicos* are strokes (in tuples) with thumb (down), little and index finger (both up). There's also an *abanico 2* where middle and ring finger are used instead of the little finger.
- *Alza pua* indicates fast playing with the thumb.

Most figures use arrows in combination with fingering; with *abanicos* and *rasgueados*, note heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as `flamenco.ly` and included in source files.

```

The image displays two musical staves with fret diagrams for guitar. The top staff is in G major (one sharp) and 4/4 time, featuring chords and techniques like Rasgueado (Ras.) and Abanico. The bottom staff is in G major and 4/4 time, featuring chords and techniques like Alzapua and Abanico. Both staves include fingerings (0, 2, 3) and articulation marks (up/down arrows, squares).

Fret diagrams explained and developed

This snippet shows many possibilities for obtaining and tweaking fret diagrams.

The image displays musical notation for three systems, each containing five measures. Above the notes are fretboard diagrams for chords A, C, and D. The diagrams show fingerings (numbers 1-3) and string muting (x). The first system shows two A chords. The second system shows three C chords and two D chords. The third system shows three C chords and two D chords. The notation includes treble clefs, a common time signature (C), and various note values (half notes, quarter notes, eighth notes). The fretboard diagrams are placed above the notes, showing the specific frets and strings used for each chord.

Fretboards alternate tables

Alternate fretboard tables can be created. These would be used in order to have alternate fretboards for a given chord. In order to use an alternate fretboard table, the table must first be created. Fretboards are then added to the table.

The created fretboard table can be blank, or it can be copied from an existing table. The table to be used in displaying predefined fretboards is selected by the property `\predefinedDiagramTable`.

```
\include "predefined-guitar-fretboards.ly"
```

```
% Make a blank new fretboard table.
```

```
#(define custom-fretboard-table-one
  (make-fretboard-table))
```

```
% Make a new fretboard table as a copy of `default-fret-table`.
```

```
#(define custom-fretboard-table-two
  (make-fretboard-table default-fret-table))
```

```

% Add a chord to `custom-fretboard-table-one`.
\storePredefinedDiagram #custom-fretboard-table-one
    \chordmode {c}
    #guitar-tuning
    "3-(;3;5;5;5;3-);"

% Add a chord to `custom-fretboard-table-two`.
\storePredefinedDiagram #custom-fretboard-table-two
    \chordmode {c}
    #guitar-tuning
    "x;3;5;5;5;o;"

<<

Fretted-string harmonics in tablature

The following demonstrates fretted-string harmonics in a tablature.

```
pinchedHarmonics = {
  \textSpannerDown
  \override TextSpanner.bound-details.left.text =
    \markup { \halign #-0.5 \teeny "PH" }
  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.dash-period = 0.6
  \override TextSpanner.bound-details.right.attach-dir = 1
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.padding = -0.5
}

harmonics = {
  % artificial harmonics (AH)
  \textLengthOn
  <\parenthesize b b'\harmonic>4_\markup { \teeny "AH 16" }
  <\parenthesize g g'\harmonic>4_\markup { \teeny "AH 17" }
  <\parenthesize d' d''\harmonic>2_\markup { \teeny "AH 19" }

  % pinched harmonics (PH)
  \pinchedHarmonics
  <a'\harmonic>2\startTextSpan
  <d''\harmonic>4
  <e'\harmonic>4\stopTextSpan

  % tapped harmonics (TH)
  <\parenthesize g\4 g'\harmonic>4_\markup { \teeny "TH 17" }
  <\parenthesize a\4 a'\harmonic>4_\markup { \teeny "TH 19" }
  <\parenthesize c'\3 c''\harmonic>2_\markup { \teeny "TH 17" }

  % touch harmonics (TCH)
  a4( <e''\harmonic>2. )_\markup { \teeny "TCH" }
}

frettedStrings = {
  % artificial harmonics (AH)
  \harmonicByFret 4 g4\3
  \harmonicByFret 5 d4\4
  \harmonicByFret 7 g2\3
}
```

```

% pinched harmonics (PH)
\harmonicByFret 7 d2\4
\harmonicByFret 5 d4\4
\harmonicByFret 7 a4\5

% tapped harmonics (TH)

}

\score {
  <<
    \new Staff
    \with { \omit StringNumber } {
      \new Voice {
        \clef "treble_8"
        \harmonics
      }
    }
    \new TabStaff {
      \new TabVoice {
        \frettedStrings
      }
    }
  >>
}

```

The image displays musical notation for guitar harmonics. The top staff is a treble clef with a common time signature. It shows notes for AH 16, AH 17, AH 19, PH (pinched harmonics), TH 17, TH 19, TH 17, and TCH (touch harmonics). The bottom staff is a guitar tablature with three staves (Treble, Alto, Bass). It shows fret numbers in parentheses: (4), (5), (7), (7), (5), (7), (5), 2, (9).

Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

```

% Hide fret number: useful to draw slide into/from a casual point of
% the fretboard.

```

```

hideFretNumber = {
  \once \hide TabNoteHead
  \once \hide NoteHead
  \once \omit Stem
}

```

```

\once \omit Flag
\once \override NoteHead.no-ledgers = ##t
\once \override Glissando.bound-details.left.padding = #0.3
}

music= \relative c' {
  \grace { \hideFretNumber d8\2 \glissando s2 } g2\2
  \grace { \hideFretNumber g8\2 \glissando s2 } d2 |

  \grace { \hideFretNumber c,8 \glissando s }
    f4\5~\markup \tiny { Slide into }
  \grace { \hideFretNumber f8 \glissando s } a4\4
  \grace { \hideFretNumber e'8\3 \glissando s }
    b4\3~\markup \tiny { Slide from }
  \grace { \hideFretNumber b'8 \glissando s2 } g4 |
}

\score {
  <<
    \new Staff {
      \clef "G_8"
      \music
    }
    \new TabStaff {
      \music
    }
  >>
}

```

Guitar strum rhythms

For guitar music it is possible to show strum rhythms, along with melody notes, chord names, and fret diagrams.

```
\include "predefined-guitar-fretboards.ly"
```

```

<<
  \new ChordNames \chordmode {
    c1 | f | g | c
  }
  \new FretBoards \chordmode {
    c1 | f | g | c
  }
  \new Voice \with {
    \consists "Pitch_squash_engraver"
  }

```

```

} \relative c' {
  \improvisationOn
  c4 c8 c c4 c8 c
  f4 f8 f f4 f8 f
  g4 g8 g g4 g8 g
  c4 c8 c c4 c8 c
}
\new Voice = "melody" \relative c' {
  c2 e4 e4
  f2. r4
  g2. a4
  e4 c2.
}
\new Lyrics \lyricsto "melody" {
  This is my song.
  I like to sing.
}
>>

```

The image shows a musical score for guitar and voice. The guitar part is in standard notation with four chords: C, F, G, and C. The voice part is in standard notation with the lyrics 'This is my song. I like to sing.'

Hammer-on and pull-off

Hammer-on and pull-off can be obtained using slurs.

```

\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}

```

The image shows a musical notation for a hammer-on and pull-off. The notation shows a slur over the notes 3, 5, 5, 3, indicating a hammer-on from 3 to 5 and a pull-off from 5 to 3.

Hammer-on and pull-off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However “double arcs” are possible by setting the `doubleSlurs` property to `#t`.

```
\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}
```

Hammer-on and pull-off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities.

- 1) Modify the value of the padding or extra-offset property (as shown in the first line).
- 2) You can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second line).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```
harmonies = \chordmode
{
  a8:13
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s4. |
  s2 b2:13
}

\score {
  <<
  \new ChordNames \harmonies
  \new Staff {
    % Method 1.
```

```

a8~\markup \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;"
\once \override TextScript.extra-offset = #'(10 . 0)
b4.~\markup \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;"
  b4. a8 | \break

% Method 2.
<<
  { a8 b4.~ b4. a8 }
  { s2 s2~\markup \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" }
>> |
}
>>
}

```

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments use `\key c \major`. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a `\transpose` section.

```

\header {
  title = "Song"
  subtitle = "(tune)"
  composer = "Me"
  meter = "moderato"
  piece = "Swing"
  tagline = \markup \column {

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their positioning can be tuned using the tie-configuration property.

See also snippet “Longer laissez vibrer ties”.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #`((-7 . ,DOWN)
```

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
music = \relative c {
  c4 d e f
  g4 a b c
  d4 e f g
}

<<
\new Staff {
  \clef "G_8"
  \music
}
\new TabStaff \with {
  tablatureFormat = #fret-letter-tablature-format
} {
  \music
}
>>
```

Open-string harmonics in tablature

This snippet demonstrates open-string harmonics.

```
openStringHarmonics = {
  \textSpannerDown
  \override TextSpanner.staff-padding = 3
  \override TextSpanner.dash-fraction = 0.3
  \override TextSpanner.dash-period = 1

  % first harmonic
  \override TextSpanner.bound-details.left.text =

        \clef "treble_8"
        \openStringHarmonics
      }
    }
    \new TabStaff {
      \new TabVoice {
        \openStringHarmonics
      }
    }
  >>
}

```

The image displays a musical score for the first eight harmonics of the E string. The score is organized into three systems, each with a treble staff and a tablature staff. The treble staff uses a treble clef with an octave 8, and the tablature staff uses a standard guitar-style clef. The first system shows the 1st, 2nd, and 3rd harmonics. The 1st harmonic is at the 12th fret, the 2nd at the 7th, and the 3rd at the 19th. The second system shows the 4th and 5th harmonics. The 4th is at the 4th fret, and the 5th is at the 9th. The third system shows the 6th, 7th, and 8th harmonics. The 6th is at the 2.7th fret, the 7th at the 2.3rd, and the 8th at the 2nd. The tablature staff uses parentheses to indicate the fret numbers.

Harmonic	Fret	Tablature
1st	12	(12)
2nd	7	(7)
3rd	19	(19)
4th	4	(4)
5th	9	(9)
6th	2.7	(2.7)
7th	2.3	(2.3)
8th	2	(2)

Placement of right-hand fingerings

It is possible to exercise greater control over the placement of right-hand fingerings by setting a specific property, as demonstrated in the following example.

```

#(define RH rightHandFinger)

\relative c {
  \clef "treble_8"

  \set strokeFingerOrientations = #'(up down)
  <c\RH 1 e\RH 2 g\RH 3 c\RH 4 >4

  \set strokeFingerOrientations = #'(up right down)
  <c\RH 1 e\RH 2 g\RH 3 c\RH 4 >4

  \set strokeFingerOrientations = #'(left)
  <c\RH 1 e\RH 2 g\RH 3 c\RH 4 >2

  \set strokeFingerOrientations = #'(right)
  c\RH 1
}

```

Polyphony in tablature

Polyphony is created the same way in a TabStaff as in a regular staff.

```

upper = \relative c' {
  \time 12/8
  \key e \minor
  \voiceOne
  r4. r8 e, fis g16 b g e e' b c b a g fis e
}

lower = \relative c {
  \key e \minor
  \voiceTwo
  r16 e d c b a g4 fis8 e fis g a b c
}

\score {
  \new StaffGroup = "tab with traditional" <<
    \new Staff = "guitar traditional" <<
      \clef "treble_8"
      \new Voice = "upper" \upper
      \new Voice = "lower" \lower
    >>

  \new TabStaff = "guitar tab" <<
    \new TabVoice = "upper" \upper
    \new TabVoice = "lower" \lower
  >>
}

```

```
>>
}
```

Setting up predefined fretboards for other instruments

Predefined fret diagrams can be added for new instruments in addition to the standard diagrams used for guitar. This file shows how this is done by defining a new string tuning and a few predefined fretboards for the Venezuelan *cuatro*.

This file also shows how fingerings can be included in the chords used as reference points for the chord lookup, and displayed in the fret diagram and the TabStaff, but not the music.

These fretboards are not transposable because they contain string information. This is planned to be corrected in the future.

```
% Add fretboards for the cuatro.
%
% Note: This section could be put into a separate file
%       `predefined-cuatro-fretboards.ly`
%       and be \included into each of your compositions.
```

```
cuatroTuning = #`((ly:make-pitch 0 6 0)
                  ,(ly:make-pitch 1 3 SHARP)
                  ,(ly:make-pitch 1 1 0)
                  ,(ly:make-pitch 0 5 0))
```

```
dSix = { <a\4 b\1 d\3 fis\2> }
dMajor = { <a\4 d\1 d\3 fis \2> }
aMajSeven = { <a\4 cis\1 e\3 g\2> }
dMajSeven = { <a\4 c\1 d\3 fis\2> }
gMajor = { <b\4 b\1 d\3 g\2> }
```

```
\storePredefinedDiagram #default-fret-table \dSix

Slides in tablature

Slides can be typeset in both Staff and TabStaff contexts.

```

slides = {
  c'8\3(\glissando d'8\3)
  c'8\3\glissando d'8\3
  \hideNotes
  \grace { g16\glissando }
  \unHideNotes
  c'4\3
  \afterGrace d'4\3\glissando {
    \stemDown \hideNotes
    g16 }
  \unHideNotes
}

\score {
  <<
    \new Staff { \clef "treble_8" \slides }
    \new TabStaff { \slides }
  >>

  \layout {
    \context {
      \Score
      \override Glissando.minimum-length = 4
      \override Glissando.springs-and-rods =
        #ly:spanner::set-spacing-rods
      \override Glissando.thickness = 2
      \omit StringNumber
      % or:
      \%override StringNumber.stencil = ##f
    }
  }
}

```

Stem and beam behavior in tablature

The direction of stems is controlled the same way in tablature as in traditional notation. Beams can be made horizontal, as shown in this example.

```
\new TabStaff {
  \relative c {
    \tabFullNotation
    g16 b d g b d g b
    \stemDown
    \override Beam.concaveness = 10000
    g,,16 b d g b d g b
  }
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})

\relative c {
  \clef "treble_8"
  \textSpannerDown
  \stringNumberSpanner "5" a8\startTextSpan b c d
  e f\stopTextSpan \stringNumberSpanner "4" g\startTextSpan a |
  bes4 a g2\stopTextSpan
}
```

13 Percussion

See also Section “Percussion” in *Notation Reference*.

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```

drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
    \new DrumStaff \with {
      instrumentName = "timbales"
      drumStyleTable = #timbales-style
      \override StaffSymbol.line-count = #2
      \override BarLine.bar-extent = #'(-1 . 1)
    }
    <<
      \timb
    >>
    \new DrumStaff \with { instrumentName = "drums" }
    <<
      \new DrumVoice { \stemUp \drh }
      \new DrumVoice { \stemDown \drl }
    >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

The image shows two staves of musical notation. The top staff is labeled 'timbales' and has a C-clef and a common time signature. It contains notes for 'crash' (marked with a cross), 'h.h.' (marked with a plus), and other rhythmic patterns. The bottom staff is labeled 'drums' and has a C-clef and a common time signature. It contains notes for 'bd' (bass drum), 'sn' (snare), 'tom' (tom), and 'cb' (conga), with various rhythmic patterns and stems.

Cow and ride bell example

Two different bells, entered with ‘cb’ (cow bell) and ‘rb’ (ride bell).

```
#(define mydrums '((ridebell default #f 3)
                  (cowbell default #f -2)))

\new DrumStaff \with { instrumentName = #"Different Bells" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \set DrumStaff.clefPosition = 0.5
  \override DrumStaff.StaffSymbol.line-positions = #'(-2 3)
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)

  \time 2/4
  rb8 8 cb8 16 rb16-> ~ |
  16 8 16 cb8 8 |
}
```

Heavily customized polymetric time signatures

Though the polymetric time signature shown is not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song, by the way).

```
melody = \relative c'' {
  \key g \major
  \time #'((3 . 8) (2 . 8) (2 . 8) (3 . 8) (2 . 8) (2 . 8)
          (2 . 8) (2 . 8) (3 . 8) (2 . 8) (2 . 8))
  \set Timing.beamExceptions = #'()
  \set Timing.beatStructure = 3,2,2,3,2,2,2,2,3,2,2
  c8 c c d4 c8 c b c b a4 g fis8 e d c b' c d e4-^ fis8 g \break
  c,4. d4 c4 d4. c4 d c2 d4. e4-^ d4
  c4. d4 c4 d4. c4 d c2 d4. e4-^ d4 \break
}

drum = \new DrumStaff \drummode {
  \repeat volta 2 {
    bd4.^{\markup { Drums } sn4 bd \bar "}
    sn4. bd4 sn \bar "
    bd sn bd4. sn4 bd
  }
}

\new Staff {
  \melody
  \drum
}
```

High and low woodblock example

Two Woodblocks, entered with 'wbh' (high woodblock) and 'wbl' (low woodblock). The length of the bar line has been altered with an `\override` command, otherwise it would be too short. The positions of the two staff lines also have to be explicitly defined.

```
% These lines define the position of the woodblocks in the stave;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
```

```
#(define mydrums '((hiwoodblock default #f 3)
                    (lowwoodblock default #f -2)))
```

```
woodstaff = {
  % This defines a staff with only two lines.
  % It also defines the positions of the two lines.
  \override Staff.StaffSymbol.line-positions = #'(-2 3)

  % This is necessary; if not entered,
  % the barline would be too short!
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)
  % small correction for the clef:
  \set DrumStaff.clefPosition = 0.5
}
```

```
\new DrumStaff {
  % with this you load your new drum style table
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

  \woodstaff

  \drummode {
    \time 2/4
    wbh8 16 16 8-> 8 |
    wbl8 16 16-> ~ 16 16 r8 |
  }
}
```

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments use `\key c \major`. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a `\transpose` section.

```
\header {
  title = "Song"
  subtitle = "(tune)"
  composer = "Me"
  meter = "moderato"
  piece = "Swing"

Percussion beaters

Graphic symbols for percussion instruments are not natively supported; however it is possible to include such symbols, either as an external EPS file or as embedded PostScript code inside a markup, as demonstrated in this example.

```
stick = \markup \with-dimensions #'(0.80 . 5.2) #'(0.85 . 5.2) {
  \postscript "
    0 6 translate
    0.8 -0.8 scale
    0 0 0 setrgbcolor
    [] 0 setdash
    1 setlinewidth
```

```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
global = {
  \time 3/4 s2.*3 \break
  s2.*3
}

\layout {
  \context {
    \Score
    \remove "Timing_translator"

The image shows a musical score for two parts: Bass Clarinet and Percussion. The Bass Clarinet part is written on a single staff with a treble clef and a key signature of one flat (B-flat). The time signature is 3/4. The melody starts with a quarter note B-flat, followed by an eighth note G, a quarter note F, and a quarter note E. There is a triplet of eighth notes (D, C, B) followed by a quarter note A. The Percussion part consists of two staves, both with a percussion clef and a 3/4 time signature. The top staff has a quarter note G, a quarter note F, and a quarter note E. The bottom staff has a quarter note G, a quarter note F, and a quarter note E. There are various rests and ties throughout the piece.

14 Wind instruments

See also Section “Wind instruments” in *Notation Reference*.

Changing the size of woodwind diagrams

The size and thickness of woodwind diagrams can be changed.

```
\relative c' {
  \textLengthOn
  c1^\markup
    \woodwind-diagram #'piccolo #'()

  c^\markup \override #'(size . 1.5)
    \woodwind-diagram #'piccolo #'()
  c^\markup \override #'(thickness . 0.15)
    \woodwind-diagram #'piccolo #'()
}
```

Fingering symbols for wind instruments

Special symbols can be achieved by combining existing glyphs, which is useful for wind instruments.

```
lineup =
  \tweak outside-staff-padding #0
  \tweak staff-padding #0
  \tweak padding #0.2
  \tweak parent-alignment-X #CENTER
  \tweak self-alignment-X #CENTER
  \etc

\relative c' {
  g\open
  g\lineup ^\markup \combine
    \musicglyph "scripts.open"
    \musicglyph "scripts.tenuto"
  g\lineup ^\markup \combine
    \musicglyph "scripts.open"
```

```

\musicglyph "scripts.stopped"
g\stopped
}

```

Flute slap notation

It is possible to indicate special articulation techniques such as a flute “tongue slap” by replacing the note head with the appropriate glyph. For that we can draw the accent-like note head with `\markup`.

```

slap =
#(define-music-function (music) (ly:music?)
  #{
    \temporary \override NoteHead.stencil =
      #ly:text-interface::print
    \temporary \override NoteHead.text =
      \markup
        \translate #'(1 . 0)
        \override #'(thickness . 1.4)
        \overlay { \draw-line #'(-1.2 . 0.4)
                  \draw-line #'(-1.2 . -0.4) }
    \temporary \override NoteHead.stem-attachment =
      #(lambda (grob)
        (let* ((stem (ly:grob-object grob 'stem))
              (dir (ly:grob-property stem 'direction UP))
              (is-up (eqv? dir UP)))
          (cons dir (if is-up 0 -0.8)))))
    #music
    \revert NoteHead.stencil
    \revert NoteHead.text
    \revert NoteHead.stem-attachment
  })

\relative c' {
  c4 \slap c d r
  \slap { g4 a } b r
}

```

Graphical and text woodwind diagrams

In many cases, the keys other than the central column can be displayed by key name as well as by graphical means.

```

\relative c' {
  \textLengthOn
  c1^\markup
    \woodwind-diagram #'piccolo
      #'((cc . (one three))
        (lh . (gis))
        (rh . (ees)))

  c^\markup
    \override #'(graphical . #f)
    \woodwind-diagram #'piccolo
      #'((cc . (one three))
        (lh . (gis))
        (rh . (ees)))
}

```

Recorder fingering chart

The following example demonstrates how fingering charts for wind instruments can be realized.

% range chart for paetzold contrabass recorder

```

centermarkup = {
  \once \override TextScript.self-alignment-X = #CENTER
  \once \override TextScript.X-offset = #(\lambda (g)
    (+ (ly:self-alignment-interface::centered-on-x-parent g)
      (ly:self-alignment-interface::x-aligned-on-self g)))
}

\new Staff \with {

  system-system-spacing.padding = 5
}
```

15 Chord notation

See also Section “Chord notation” in *Notation Reference*.

Adding a figured bass above or below the notes

When writing figured bass, you can place the figures above or below the bass notes by using the commands `\bassFigureStaffAlignmentDown` and `\bassFigureStaffAlignmentUp`. Prepend `\once` to the command if you want to modify only the next figured bass.

The command `\bassFigureStaffAlignmentNeutral` resets the direction of figured bass to the default value.

```
bass = {
  \clef bass
  g4 b, c d |
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \bassFigureStaffAlignmentUp
  <_+>4 <6> |
  \set Staff.useBassFigureExtenders = ##t
  \bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}
```

Adding bar lines to ChordNames context

To add bar line indications in the ChordNames context, add the `Bar_engraver`.

```
\new ChordNames \with {
  \override BarLine.bar-extent = #'(-1 . 3)
  \consists "Bar_engraver"
}

\chordmode {
  f1:maj7 f:7 bes:7
}
```

F^Δ | F⁷ | B^{b7} |

Adjusting figured bass alteration glyphs

In figured bass, specially designed glyphs for 6\\, 7\\, and 9\\ are used by default. Similarly, specially designed glyphs for symbols 2\\+, 4\\+, and 5\\+ are used by default if plus signs appear after the number.

To change that, pass an alist to `figuredBassPlusStrokedAlist` and set the glyph in question to #f (or omit it).

```
#(set-global-staff-size 26)

\figures {
  \set figuredBassPlusDirection = #RIGHT
  <6\\> <7\\> <9\\> r
  <2\\+> <4\\+> <5\\+> r

  \set figuredBassPlusStrokedAlist =
    #'((2 . "figbass.twoplus")
      ;; (4 . "figbass.fourplus")
      ;; (5 . "figbass.fiveplus")
      (6 . "figbass.sixstroked")
      ;; (7 . "figbass.sevenstroked")
      ;; (9 . "figbass.ninestroked")
    )
  <6\\> <7\\> <9\\> r
  <2\\+> <4\\+> <5\\+> r
}
```

6 7 9 2 4 5⁺ 6 7 9 2 4⁺ 5⁺

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets < >), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e }_~\markup { A big c }
}
```

Changing chord separator

The separator between different parts of a chord name can be set to any markup.

```
\chords {
  c:7sus4
  \set chordNameSeparator = \markup { \typewriter | }
  c:7sus4
}
```

$C^7 \text{ sus4 } C^7 | \text{ sus4 }$

Changing the positions of figured bass alterations

Accidentals and plus signs can appear before or after the numbers, depending on the `figuredBassAlterationDirection` and `figuredBassPlusDirection` properties.

If plus signs appear after the number, specially designed glyphs are provided for some figures. `#(set-global-staff-size 26)`

```
\figures {
  <5\+> <5+ 4\+> <6 4- 2\+> r
  \set figuredBassAlterationDirection = #RIGHT
  <5\+> <5+ 4\+> <6 4- 2\+> r
  \set figuredBassPlusDirection = #RIGHT
  <5\+> <5+ 4\+> <6 4- 2\+> r
  \set figuredBassAlterationDirection = #LEFT
  <5\+> <5+ 4\+> <6 4- 2\+> r
}
```

$\begin{matrix} +5 & \sharp 5 & 6 \\ & +4 & \flat 4 \\ & & +2 \end{matrix}$ $\begin{matrix} +5 & 5\sharp & 6 \\ & +4 & 4\flat \\ & & +2 \end{matrix}$ $\begin{matrix} 5^+ & 5\sharp & 6 \\ & 4_+ & 4\flat \\ & & 2_+ \end{matrix}$ $\begin{matrix} 5^+ & \sharp 5 & 6 \\ & 4_+ & \flat 4 \\ & & 2_+ \end{matrix}$

Chord name exceptions

The property `chordNameExceptions` stores a list of chord name exceptions to handle cases either not covered or handled incorrectly.

The default chord names used by LilyPond follow the rules as given in Klaus Ignatzek's book "Die Jazzmethode für Klavier 1"; the algorithm to convert chords to chord names can be found in file `scm/chord-ignatzek-names.scm`. Additional rules are given as chord exceptions and stored in the variable `ignatzekExceptions`, as set up in file `ly/chord-modifiers-init.ly`.

This snippet modifies these exceptions in three steps.

1. Set up some music with chords and associated markup. By convention, the root (i.e., the lowest note) of each chord should have pitch `c`.
2. Call Scheme function `sequential-music-to-chord-exceptions` to create a new list of exceptions, then concatenate it with the existing ones. Since `ignatzekExceptions` is set up with this function's second parameter set to `#t` (to ignore the root of the chords), we have to do the same.
3. Register the new exception list.

% Step 1: Define music with chords and markup for maj9 and 6(add9).

```
chExceptionMusic = {
  <c e g b d'>-\markup { \super "maj9" }
  <c e g a d'>-\markup { \super "6(add9)" }
}
```

% Step 2: Create extended exception list.

```

chExceptions =
#(append (sequential-music-to-chord-exceptions chExceptionMusic #t)
         ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  % Step 3: Register extended exception list.
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}

<<
  \new ChordNames \theMusic
  \new Voice \theMusic
>>

\layout {
  line-width = 10\cm
  ragged-right = ##f
}

```

Chord name major7

The layout of the major 7 can be tuned with the `majorSevenSymbol` context property.

```

\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}

```

$C^{\Delta} C^{j7}$

Chord names alternative

Chord names are generated from a list of pitches. The functions which construct these names can be customised.

Here are shown chords following Ignatzek (pp. 17-18, 1995), used by default since LilyPond 1.7.20, compared with an alternative Jazz chord notation and Harald Banter's (1987) notation. A smaller font is used in the latter case, as these tend to be overly verbose.

This mirrors the mechanism originally used in early LilyPond versions (pre-1.7); not having been properly maintained, however, some features have been lost (mainly chord exception lists) and bugs have been introduced.

```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context property `maximumFretStretch` is set to value 4, though, resulting in a warning about “No string for pitch ...”, and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string numbers to all notes of a chord to fix that.

```
% The code below prints two warnings for the second chord,
% which may be omitted by uncommenting the following line.
%
% #(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))
```

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}
```

```
<<
  \new FretBoards \mus
  \new TabVoice \mus
```

>>

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}
```

<<

```
\new Staff \fragment
\new Staff \makeClusters \fragment
>>
```

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely by using the property `fingeringOrientation`. For fingering orientation to apply, the fingering command must be used within a chord construct (`<...>`), even for single notes. Orientation for string numbers and right-hand fingerings may be controlled in a similar way by using the properties `stringNumberOrientation` and `strokeFingerOrientation`, respectively.

These properties can be set to a list of one to three values. They control whether fingerings may be placed above (if `up` appears in the list), below (if `down` appears), to the left (if `left` appears), or to the right (if `right` appears). Conversely, if a location is not listed, no fingering is placed there. LilyPond takes these constraints and works out the best placement for the fingering of the notes of the following chords. Note that `left` and `right` are mutually exclusive – fingerings may be placed only on one side or the other, not both.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
}
```

```

\set fingeringOrientations = #'(left)
<c-1>2
\set fingeringOrientations = #'(down)
<e-3>2
\set stringNumberOrientations = #'(up left down)
<f\3 a\2 c\1>1
\set strokeFingeringOrientations = #'(down right up)
<c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}

```

Cross-staff chords – beaming problems workaround

Sometimes it is better to use stems from the ‘other’ staff for creating cross-staff chords to trick LilyPond’s beam collision detector. In the following snippet, if the stems from the lower staff were used instead, it would be necessary to explicitly use

```
\override Staff.Beam.collision-voice-only = ##t
```

so that LilyPond doesn’t move the beams.

```

\new PianoStaff <<
\new Staff = up \relative c' <<
{ r4
  \override Stem.cross-staff = ##t
  \override Stem.length = #19 % this is in half-spaces,
    % so it makes stems 9.5 staffspaces long
  \override Stem.Y-offset = #-6 % stems are normally lengthened
    % upwards, so here we must lower the stem by the amount
    % equal to the lengthening - in this case (19 - 7) / 2
    % (7 is default stem length)
  e e e }
{ s4
  \change Staff = "bottom"
  \override NoteColumn.ignore-collision = ##t
  c, c c
}
>>

\new Staff = bottom \relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}
>>

```

Customizing the chord grid style

Custom divisions of chord squares can be defined through the `measure-division-lines-alist` and `measure-division-chord-placement-alist` properties of `ChordSquare`. These are both alists. Their keys are measure divisions, namely lists which give the fraction of the measure that each chord (or rest, or skip) represents. More precisely, a measure division alist is made of positive, exact numbers adding up to 1, for example: `'(1/2 1/4 1/4)`. The exactness requirement means that, e.g., `1/2` is valid but not `0.5`.

The values in `measure-division-lines-alist` are lists of lines, which are represented as `(x1 y1 x2 y2)`. The line starts at the point `(x1 . y1)` and ends at `(x2 . y2)`. Coordinates are expressed in the `[-1, 1]` scale relative to the extent of the square.

The values in `measure-division-chord-placement-alist` are lists of `(x . y)` pairs giving the placement of the respective chords.

This example defines a peculiar chord grid style that has a rule for measures divided in three equal parts.

```
\paper {
  line-width = 10\cm
  ragged-right = ##f
}

\new ChordGrid \with {
  \override ChordSquare.measure-division-lines-alist =
    #'(((1) . (0))
      ((1/3 1/3 1/3) . ((-1 -0.4 0 1) (0 -1 1 0.4))))
  \override ChordSquare.measure-division-chord-placement-alist =
    #'(((1) . ((0 . 0)))
      ((1/3 1/3 1/3) . ((-0.7 . 0.5) (0 . 0) (0.7 . -0.5))))
}

\chordmode {
  \time 3/4
  c2.
  c4 c4 c4
}
```

Customizing the no-chord symbol

By default, rests in a `ChordNames` context cause the text “N.C.” to be printed. This markup can be customized by setting the `noChordSymbol` context property.

```
<<
\chords {
  R1
  \set noChordSymbol = "----"
  R1
  \set noChordSymbol = \markup \italic "Ssh!"
  R1
}
{
  R1*3
}
>>
```

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```
fixA = {
  \once \override Stem.length = #12
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ { \voiceThree \fixB dis } >> s
}
```

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. LilyPond tries to make extenders as long as possible, which is not always wanted. To break individual extenders, append the modifier `\!` to a number.

```

bassfigures = \figuremode {
  \set useBassFigureExtenders = ##t
  <6 4>4 <6 4\!> <6 4\!> <6 4\!> |

```

Print chord names with same root and different bass as slash and bass note

To print subsequent chord names only differing in their bass note as slash and bass note without a root symbol, use the Scheme engraver defined in this snippet. The behaviour is controlled by the `chordChanges` context property.

```

#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "Drop root for follow-up chord names that differ only in bass."

```

In other words, the chord name sequence 'D D/C D/B' gets actually printed as 'D /C /B'.

Set the ``chordChanges`` context property to ``#t`` to activate this feature."

```

  (let ((chord-pitches '())
        (last-chord-pitches '())
        (bass-pitch #f))

```

The image displays two staves of musical notation. The first staff contains six measures with the following chords: Dm, /C#, /C, Dm/B, E⁷, and E. The second staff begins at measure 5 and contains eight measures with the following chords: E/F, /G#, E, Em/F, Dm, /C#, /C, and Dm/B. The notation uses a treble clef, a common time signature 'C', and various chord symbols above the notes.

Showing chords at changes

By default, every chord entered is printed. This behavior can be modified so that chord names are printed only at the start of lines or when the chord changes.

16 Contemporary music

See also Section “Contemporary music” in *Notation Reference*.

Beam nibs

Beam nibs at the start and end of beams together with beams attached to solitary notes that look like flat flags are possible with a combination of `stemLeftBeamCount`, `stemRightBeamCount`, and paired `[]` beam indicators.

For imitating right-pointing flat flags on lone notes, use paired `[]` beam indicators and set `stemLeftBeamCount` to zero. For imitating left-pointing flat flags on lone notes, set `stemRightBeamCount` to zero instead (line one).

For right-pointing nibs at the end of a run of beamed notes, set `stemRightBeamCount` to a positive value. For left-pointing nibs at the start of a run of beamed notes, set `stemLeftBeamCount` instead (line two).

Sometimes it may make sense for a lone note surrounded by rests to carry both a left- and right-pointing nib. Do this with paired `[]` beam indicators alone (line three).

Note that `\set stemLeftBeamCount` is always equivalent to `\once \set`. In other words, the beam count settings are not “sticky”, so the pair of nibs attached to the lone 16th note in the last example has nothing to do with the `\set` command for the beam before.

```

Broken crescendo hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as a text markup.

The markup command `with-dimensions` tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property `staff-padding` prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```

Changing time signatures inside a polymetric section using `\scaleDurations`

Flexible polymeter with unaligned measures

To support explicit creation of independently measured contexts, remove the `Timing_translator` from `Score` context and define a `TimingStaffGroup` context that has `Timing_translator`. This makes `Timing` an alias for `TimingStaffGroup`, targeting `\time` commands to the enclosing `TimingStaffGroup`.

Unlike LilyPond's built-in `\enablePerStaffTiming` command, this approach requires the explicit creation of `TimingStaffGroup` contexts; in exchange, it allows creating multiple `Staff` contexts that jointly follow the measure defined in their enclosing `TimingStaffGroup`.

Locally scaled time signatures

Use the unscalable `\time` command to establish a measure of the desired length in `Timing`, a.k.a. `TimingStaffGroup`. In this snippet, all staves below `TimingStaffGroup` use a scaled time signature, so any time signature with the desired measure length is as good as any other. If there were an enclosed context that did not use a scaled time signature, the choice of time signature to set in `Timing` would matter in that context.

Use the `\polymetric \time` command to set scalable metric properties in contexts below `Timing`, and use the `\scaleDurations` command to scale both the local meter and the notes to fit the measure.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \accepts TimingStaffGroup
  }
  \context {
    \StaffGroup
    \name TimingStaffGroup
    \alias StaffGroup
    \consists "Timing_translator"
  }
}

<<
\new TimingStaffGroup <<
  \new Staff {
    \scaleDurations 8/5 {
      \time 6/5 % to set measure length in Timing
      \context Staff \polymetric \time 6/8
      b8 b b b b b
      \time 4/5 % to set measure length in Timing
      \context Staff \polymetric \time 2/4
      b4 b
    }
  }
}
>>
\new TimingStaffGroup <<
  \new Staff {
    \clef bass
    \time 2/4
    c2 d e f
  }
}
```

```
>>
>>
```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}
```

```
<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Contemporary glissando

A contemporary glissando without a final note can be typeset using a hidden note and cadenza timing.

```
\relative c'' {
  \time 3/4
  \override Glissando.style = #'zigzag
  c4 c
  \cadenzaOn
  c4\glissando
  \hideNotes
  c,,4
  \unHideNotes
  \cadenzaOff
  \bar "|"
}
```

Flat ties

This snippet provides a function `flared-tie` to draw a tie that consist of straight lines. It is intended as a replacement for the default tie-drawing function (i.e., a replacement argument for the `stencil` property of the `Tie` grob).

The argument of `flared-tie` is a list of coordinate pairs that specify additional points between the first and last point to span up the tie's lines. The first and last point are identical to the original tie's start and end point, respectively. The X and Y coordinate values are multiples of the bounding box length and height of the original tie (also taking care of the tie's direction); consequently, the first point has coordinates (0,0), and the last point (1,0).

The function `flare-tie` defines a shorthand for a flat tie. Further tweaking of the shape is possible by overriding `Tie.details.height-limit` or with `\shape`. It is also possible to change the custom definition on the fly.

```
#(define ((flared-tie coords) grob)
  (define (pair-to-list pair)
    (list (car pair) (cdr pair)))

  (define (normalize-coords goods x y dir)
    (map

Flute slap notation

It is possible to indicate special articulation techniques such as a flute “tongue slap” by replacing the note head with the appropriate glyph. For that we can draw the accent-like note head with `\markup`.

```
slap =
#(define-music-function (music) (ly:music?)
  #{
    \temporary \override NoteHead.stencil =
      #ly:text-interface::print
    \temporary \override NoteHead.text =
      \markup
        \translate #'(1 . 0)
        \override #'(thickness . 1.4)
        \overlay { \draw-line #'(-1.2 . 0.4)
                  \draw-line #'(-1.2 . -0.4) }
    \temporary \override NoteHead.stem-attachment =
      #(lambda (grob)
        (let* ((stem (ly:grob-object grob 'stem))
              (dir (ly:grob-property stem 'direction UP))
              (is-up (eqv? dir UP)))
          (cons dir (if is-up 0 -0.8)))))
    #music
    \revert NoteHead.stencil
    \revert NoteHead.text
    \revert NoteHead.stem-attachment
  #})
```

The first staff of music is in treble clef with a common time signature (C). It contains two measures. The first measure has a quarter rest, followed by a quarter note G4, an eighth note A4, and a quarter note B4. The second measure has a quarter note A4, an eighth note G4, a quarter note F#4, and a quarter note E4. The staff ends with a double bar line.

Though the polymetric time signature shown is not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song, by the way).

```
drum = \new DrumStaff \drummode {
  \repeat volta 2 {
    bd4.^{\markup { Drums } sn4 bd \bar " ;"
    sn4. bd4 sn \bar " ;"
    bd sn bd4. sn4 bd
  }
}
```

    g4 f r g8 a
    b4 r r8 d e4
    \speakOff
    c4 a g f
  }
}
```

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property, in the `Staff` context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

```
\set Staff.keyAlterations =
  #`(((octave . step) . alter) ((octave . step) . alter) ...)
```

where, for each element in the list, *octave* specifies the octave (0 being the octave from middle C to the B above), *step* specifies the note within the octave (0 means C and 6 means B), and *alter* is one of SHARP, FLAT, DOUBLE-SHARP, etc., preceded by a comma.

Alternatively, you can use the more concise format (*step . alter*) for each item in the list if the same alterations are used in all octaves.

For microtonal scales where a “sharp” is not 100 cents, *alter* refers to the alteration as a proportion of a 200-cent whole tone.

```

\include "arabic.ly"

\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))

  % \set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dodsd do do |
}

```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```

global = {
  \time 3/4 s2.*3 \break
  s2.*3
}

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Bar_number_engraver"

The image displays a musical score for a piece titled "Screech and Boink". The score is written for a piano, featuring a treble staff and two bass staves. The notation is highly complex and contemporary, characterized by frequent changes in time signature and key signature, as well as unusual rhythmic values and articulations.

The score is divided into three systems, each starting with a measure number in parentheses: (4), (8), and (12). The first system (measures 4-6) shows a treble staff with a 3/8 time signature, a bass staff with a 3/4 time signature, and a grand staff with a 3/4 time signature. The second system (measures 7-9) shows a treble staff with a 3/8 time signature, a bass staff with a 3/4 time signature, and a grand staff with a 3/4 time signature. The third system (measures 10-12) shows a treble staff with a 3/4 time signature, a bass staff with a 3/4 time signature, and a grand staff with a 3/4 time signature.

The notation includes various rhythmic values, including eighth notes, sixteenth notes, and dotted notes, as well as complex articulations such as slurs, ties, and dynamic markings. The key signature is C minor, and the time signature is 4/8.

Screech and Boink

Random complex notation.

```

Stemlets

In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop ‘stemlets’ to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the `stemlet-length` property of `Stem`, and rests are hidden by using `\hide`.

Some `\markup` elements are included in the source to highlight the different notations.

```
\paper {
  ragged-right = ##f
}

{
  c'16~\markup { traditional } d' r f'
  g'16[~\markup \column { "beams" "over rests" } f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[~\markup \column { "stemlets" "over rests" } d' r f']
  g'16[~\markup \column { "stemlets" "and no rests" } f'
  \once \hide Rest
  r16 d']
}
```

17 Ancient notation

See also Section “Ancient notation” in *Notation Reference*.

Adding a figured bass above or below the notes

When writing figured bass, you can place the figures above or below the bass notes by using the commands `\bassFigureStaffAlignmentDown` and `\bassFigureStaffAlignmentUp`. Prepend `\once` to the command if you want to modify only the next figured bass.

The command `\bassFigureStaffAlignmentNeutral` resets the direction of figured bass to the default value.

```
bass = {
  \clef bass
  g4 b, c d |
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \bassFigureStaffAlignmentUp
  <_+>4 <6> |
  \set Staff.useBassFigureExtenders = ##t
  \bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}
```

Vaticana clefs, custos and note heads

Medicaea clefs, custos and note heads

Hufnagel clefs, custos and note heads

Ancient notation template – modern transcription of Gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g f) a2 \finalis \break
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g a) g2( f) \finalis
}

verba = \lyricmode {
  Lo -- rem ip -- sum do -- lor sit a -- met,
  lo -- rem ip -- sum do -- lor sit a -- met.
}

\score {
  \new GregorianTranscriptionStaff <<
    \new GregorianTranscriptionVoice = "melody" \chant
    \new GregorianTranscriptionLyrics = "one" \lyricsto melody \verba
  >>
}
```

Ancient time signatures

Time signatures may also be engraved in an old style.

```
{
  \override Staff.TimeSignature.style = #'neomensural
  s1
}
```

Chant or psalm notation

This form of notation is used for psalm chant, where verses are not always of the same length.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }

}
}

```

Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. While today musicians are used to bar lines in order to faster recognize rhythmic patterns, bar lines were not yet invented during the period of mensural music; in fact, the meter often changed after every few notes. As a compromise, bar lines are often printed between the staves rather than on the staves.

Discantus

Altus

Tenor

Bassus

Ju - bi - la - te De - o, om -

Ju - bi - la - te De - o, om -

A musical score for four staves, each with a treble clef and a key signature of one sharp (F#). The score is divided into measures by vertical bar lines that span across all four staves. The lyrics are:
 Staff 1: - nis ter - ra, om- ... -us.
 Staff 2: nis ter - - ra, ... -us.
 Staff 3: Ju - bi - la - te ... -us.
 Staff 4: Ju - bi- ... -us.

Mensurstriche layout (bar lines between the staves)

Mensurstriche, bar lines between but not through staves, can be printed by setting `measureBarType` to `"-span|"` and using a grouping context that allows span bars, such as `StaffGroup`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}
```

```
music = \fixed c'' {
  c1
  d2 \section e2
  f1 \fine
}
```

```
\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>
```

A musical score for two staves, each with a treble clef and a key signature of one sharp (F#). The score shows rests of different durations (half note, quarter note, eighth note) and styles (solid, hollow, beamed).

Rest styles

Rests may be used in various styles.

```

restsA = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 s32
  s64 s128 s256 s512 s1024 s1024
}
restsB = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 r32
  r64 r128 r256 r512 r1024 s1024
}

\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  <>\markup \typewriter { mensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'neomensural
  <>\markup \typewriter { neomensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'classical
  <>\markup \typewriter { classical } \restsB \bar "" \break

  \override Staff.Rest.style = #'z
  <>\markup \typewriter { z-style } \restsB \bar "" \break

  \override Staff.Rest.style = #'default
  <>\markup \typewriter { default } \restsB \bar "" \break
}

```

Using tags to produce mensural and modern music from the same source

Using tags it is possible to produce both mensural and modern notation from the same music. In this snippet, a function `\menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position.

Tags can also be used where other differences are needed: for example using “whole measure rests” (`R1`, `R\breve`, etc.) in modern music, but normal rests (`r1`, `r\breve`, etc.) in the mensural version. Converting mensural music to its modern equivalent is usually referred to as *transcription*.

The call `c4.\Be c8 c\Am` is the same as `c4.[c8 c]`. However, it suppresses warnings if it starts on a note that can’t hold a beam but needs it anyway due to the use of `Completion_heads_engraver`.

[Note that the custos sticks out into the right margin and might be cut off if the LilyPond output gets cropped tightly. The use of `\with-true-dimensions` below avoids this.]

```
\layout {
  line-width = 150\mm
}

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```

upline =
\tweak stencil
#(lambda (grob)
  (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
\stopped

\relative c' {
  a'4~\upline a( c d')_~\upline
}

```

18 World music

See also Section “World music” in *Notation Reference*.

Arabic improvisation

For improvisations or *taqasim* which are temporarily free, the time signature can be omitted and `\cadenzaOn` can be used. Adjusting the accidental style might be required, since the absence of bar lines causes the accidental to be marked only once. Here is an example of what could be the start of a *hijaz* improvisation.

```
\include "arabic.ly"

\relative sol' {
  \key re \kurd
  \accidentalStyle forget
  \cadenzaOn
  sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol
}
```

Makam example

Makam is a type of melody from Turkey using 1/9-tone microtonal alterations.

Consult the initialization file `ly/makam.ly` for details of pitch names and alterations.

```
\include "makam.ly"

\relative c' {
  \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
  c4 cc db fk
  gbm4 gfc gfb efk
  fk4 db cc c
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1~\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'~\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

Turkish Makam example

This template uses the start of a well-known Turkish *Saz Semai* that is familiar in the repertoire in order to illustrate some of the elements of Turkish music notation.

```
#(set-default-paper-size "a6" 'landscape)
```

```
\include "turkish-makam.ly"
```

```
\header {
  title = "Hüseyini Saz Semaisi"
  composer = "Lavtacı Andon"

19 Automatic notation

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided whenever possible. The intervals and depth of subdivision can be limited with properties `beamMinimumSubdivision` and `beamMaximumSubdivision`, respectively.

```
\new Staff {
  \relative c'' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32["subdivide beams" a g f c' b a g
      b32 a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
    }
    >>
    \oneVoice
    \once \set beamMinimumSubdivision = #1/8
    b32^\markup \center-column { "beamMinimum-"
                                "Subdivision 1/8" } [ a g f c' b a g]
    \once \set beamMaximumSubdivision = #1/16
    b32^\markup \center-column { "beamMaximum-"
                                "Subdivision 1/16" } [ a g f c' b a g]
  }
}
```

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```
\relative c'' {
  \override Score.RehearsalMark.Y-offset = #3.5

  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1 \mark #14
  c1 \mark \default
}
```

```

c1 \mark \default
c1 \mark \default
c1
}

```

Generating whole scores (also book parts) in Scheme without using the parser

A LilyPond score internally is just a Scheme expression, generated by the LilyPond parser. Using Scheme, one can also automatically generate a score without an input file. If you have the music expression in Scheme, a score can be generated by simply calling

```
(scorify-music music)
```

on your music. This generates a score object, for which you can then set a custom layout block with

```

(let* ((layout (ly:output-def-clone $defaultlayout)))
  ; modify the layout here, then assign it:
  (ly:score-add-output-def! score layout))

```

Finally, all you have to do it to pass this score to LilyPond for typesetting. This snippet defines functions (add-score score), (add-text text), and (add-music music) to pass a complete score, some markup, or some music to LilyPond for typesetting.

This snippet also works for typesetting scores inside a `\book {...}` block as well as top-level scores. To achieve this, each score scheduled for typesetting is appended to the list of top-level scores, and the top-level book handler (which is a Scheme function called to process a book once a `\book{...}` block is closed) is modified to insert all collected scores so far to the book.

Note: For technical reasons, only the first `\book` is shown, as the other `\book` commands create additional output files.

```

#(define-public (add-score score)
  (ly:parser-define! 'toplevel-scores
    (cons score (ly:parser-lookup 'toplevel-scores))))

#(define-public (add-text text)
  (add-score (list text)))

#(define-public (add-music music)
  (collect-music-aux (lambda (score)
    (add-score score))
    music))

#(define-public (toplevel-book-handler book)
  (map (lambda (score)
    (ly:book-add-score! book score))
    (reverse! (ly:parser-lookup 'toplevel-scores)))
  (ly:parser-define! 'toplevel-scores (list))
  (print-book-with-defaults book))

#(define-public (book-score-handler book score)

```

```

    (add-score score))

#(define-public (book-text-handler book text)
  (add-text text))

#(define-public (book-music-handler book music)
  (add-music music))

% Some example code to show how to use these functions. Each call to
% ``oneNoteScore`` constructs a global markup followed by a single
% staff with a single quarter note. The pitch of this note is taken
% from the variable ``pitch``; the start value 0 corresponds to pitch C.
% After emitting the score, variable ``pitch`` gets increased by 1.
%
% ``oneNoteScore`` calls Scheme function ``add-one-note-score`` to do all
% the work.

#(define add-one-note-score #f)
#(let ((pitch 0))
  (set! add-one-note-score
    (lambda ()
      (let* ((music

Score with a do

Preventing extra naturals from being automatically added

In accordance with traditional typesetting rules, a natural sign is printed before a sharp or flat if a previous double sharp or flat on the same note is canceled. To change this behavior to contemporary practice, set the `extraNatural` property to `##f` in the `Staff` context.

```

\relative c' {
  aeses4 aes ais a
  \set Staff.extraNatural = ##f
  aeses4 aes ais a
}

```

Preventing natural signs from being printed when the key signature changes

When the key signature changes, natural signs are automatically printed to cancel any accidentals from previous key signatures. This may be prevented by setting the `printKeyCancellation` property to `##f` in the `Staff` context.

```

\relative c' {
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
  \set Staff.printKeyCancellation = ##f
  \key d \major
  a4 b cis d
}

```

```

\key g \minor
a4 bes c d
}

```

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in snippet “Vocal ensemble template”. It demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes also apply to the piano reduction.

```

\paper {
  top-system-spacing.basic-distance = 10

```

A musical score for a four-part vocal setting. The score is written in common time (C) and consists of four staves. The top two staves are for the vocal parts, and the bottom two are for the piano accompaniment. The vocal parts have the following lyrics: "hi hi hi hi" (top), "ha ha ha ha" (second), "hu hu hu hu" (third), and "ho ho ho ho" (bottom). The piano accompaniment consists of chords in the right hand and single notes in the left hand, following the vocal melody.

hi hi hi hi

ha ha ha ha

hu hu hu hu

ho ho ho ho

20 Breaks

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which is never printed anyway). The workaround is to set the `explicitKeySignatureVisibility` property of the `Staff` grob as is shown in the example.

```
\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility =
      #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
  >>
}
```

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
\relative c' {
  c4 c c c | c c c c |
  \repeat segno 2 {
    c4 c c c | c c c c |
    \alternative {
      \volta 1 {
        c4 c c c | c c c c |
        % If you don't use \break at Coda, use \noBreak here
        % and after \bar "" below.
        \noBreak
        \section % double bar line
        \cadenzaOn % pause bar count
        \stopStaff % remove staff lines
        % Increasing the unfold counter will expand the staff-free space
        \repeat unfold 4 {
          s1
          \bar ""
        }
        % Place JumpScript where the staff would normally be.
        \once \override Score.JumpScript.outside-staff-priority = ##f
        \once \override Score.JumpScript.Y-offset = 0
        \startStaff % resume bar count
        \cadenzaOff % show staff lines again
      }
    }
  }
}
\sectionLabel "Coda"
% Show Coda on a new line
\break
\*6 { c4 c c c }
\fine
}
```

The image shows two staves of musical notation. The first staff is a treble clef with a common time signature 'C'. It contains a sequence of eighth notes. At the end of the staff, there is a double bar line followed by a Coda symbol (a circle with a cross). To the right of the staff, the text "D.S. % al Coda" is written. Below the first staff, the word "Coda" is written, followed by a second staff. The second staff is also a treble clef with a common time signature 'C' and contains a sequence of eighth notes. To the left of the second staff, the number "(7)" is written in parentheses.

Removing the first empty line

To remove the first empty staff from a score, set the `remove-first` property of the `VerticalAxisGroup` grob to `#t`. This can be done globally inside the `\layout` block or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (Staff applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
}>>
```

```
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
}>>
```

21 Connecting notes

Adding beams, slurs, ties, etc., when using tuplet and non-tuplet rhythms

LilyPond primarily uses postfix syntax for inputting parentheses, brackets, etc., which might feel unintuitive for novices.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties, and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8] }
  g16( a \tuplet 3/2 { b d' e' ) }
  g8[( a \tuplet 3/2 { b d' ) e']\(\ ~ }
  \time 2/4
  \tuplet 5/4 { e'32 a b d' e' } a'4.\)
}
```

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided whenever possible. The intervals and depth of subdivision can be limited with properties `beamMinimumSubdivision` and `beamMaximumSubdivision`, respectively.

```
\new Staff {
  \relative c' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32["subdivide beams" a g f c' b a g
      b32 a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
    }
    >>
    \oneVoice
    \once \set beamMinimumSubdivision = #1/8
    b32~\markup \center-column { "beamMinimum-"
      "Subdivision 1/8" } [ a g f c' b a g]
    \once \set beamMaximumSubdivision = #1/16
```

```

b32^\markup \center-column { "beamMaximum-"
                                "Subdivision 1/16" } [ a g f c' b a g]
}

```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```

\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}

```

Controlling tuplet bracket visibility

The default behavior of tuplet-bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet.

To control the visibility of tuplet brackets, set the property `bracket-visibility` to either `#t` (always print a bracket), `if-no-beam` (only print a bracket if there is no beam) or `#f` (never print a bracket). The latter is in fact equivalent to omitting the `TupletBracket` object altogether from the printed output.

```

music = \relative c'' {
  \tuplet 3/2 { c16[ d e ] f8}
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

\new Voice {
  \relative c' {
    \override Score.TextMark.non-musical = ##f
    \textMark "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam

```

```

\textMark \markup \typewriter "'if-no-beam" \music
\override TupletBracket.bracket-visibility = ##t
\textMark \markup \typewriter "#t" \music
\override TupletBracket.bracket-visibility = ##f
\textMark \markup \typewriter "#f" \music
\omit TupletBracket
\textMark \markup \typewriter "omit" \music
}
}

```

Creating slurs across voices

In some situations it is necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's second partita for solo violin, BWV 1004.

```

\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}

```

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their positioning can be tuned using the `tie-configuration` property.

See also snippet “Longer laissez vibrer ties”.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #'((-7 . ,DOWN)
          (-5 . ,DOWN)
          (-3 . ,UP)
          (-1 . ,UP))
  <c d e f>4\laissezVibrer r
}
```

Manually controlling beam positions

Beam positions may be controlled manually by setting the `positions` property of the `Beam` grob.

```
\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}
```

22 Contexts and engravers

See also Section “Changing defaults” in *Notation Reference* and Section “Contexts and engravers” in *Learning Manual*.

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```
\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {
        c1 | c
      } <<
      { c1 | d }
      \new Staff {
        \once \omit Staff.TimeSignature
        c1 | b
      }
    }
  >>
  c1
}
}
```

```
>>
}
```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which is never printed anyway). The workaround is to set the `explicitKeySignatureVisibility` property of the `Staff` grob as is shown in the example.

```
\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility =
      #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
  >>
}
}
```

Adding bar lines to ChordNames context

To add bar line indications in the ChordNames context, add the Bar_engraver.

```
\new ChordNames \with {
  \override BarLine.bar-extent = #'(-1 . 3)
  \consists "Bar_engraver"
}
```

```
\chordmode {
  f1:maj7 f:7 bes:7
}
```

F^Δ | F⁷ | B^b7 |

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The `\ambitusAfter` function allows for changing this placement. Syntax is `\ambitusAfter grob-interface`; see Graphical Object Interfaces (<https://lilypond.org/doc/v2.24/Documentation/internals/graphical-object-interfaces>) for a list of possible values for *grob-interface*.

A common use case is printing the ambitus between key signature and time signature.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Analysis brackets with labels

Text markup may be added to analysis brackets using the `text` property of the `HorizontalBracketText` grob. Adding different texts to brackets beginning at the same time requires the `\tweak` command.

Bracket text gets parenthesized after a line break. The vertical order of nested brackets can be controlled with the `outside-staff-priority` property.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e''\startGroup d''\stopGroup |
  c''-\tweak outside-staff-priority #801
    \tweak HorizontalBracketText.text
      \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
    d''\stopGroup
    e''-\tweak HorizontalBracketText.text "a'" \startGroup
    d''\stopGroup\stopGroup |
  c''-\tweak HorizontalBracketText.text foo \startGroup
    d'' e'' f'' | \break
  g'' a'' b'' c'''\stopGroup
}
```

Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the `Melody_engraver` to the `Voice` context.

The context property `suspendMelodyDecisions` may be used to turn off this behavior locally.

```
\relative c'' {
  \time 3/4
  a8 b g f b g |
  \set suspendMelodyDecisions = ##t
  a b g f b g |
  \unset suspendMelodyDecisions
  c b d c b c |
}
```

```

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
  }
}

```

```

\tempo 2 = 72
}
}

```

Changing time signatures inside a polymetric section using `\scaleDurations`

Flexible polymeric with unaligned measures

To support explicit creation of independently measured contexts, remove the `Timing_translator` from `Score` context and define a `TimingStaffGroup` context that has `Timing_translator`. This makes `Timing` an alias for `TimingStaffGroup`, targeting `\time` commands to the enclosing `TimingStaffGroup`.

Unlike LilyPond's built-in `\enablePerStaffTiming` command, this approach requires the explicit creation of `TimingStaffGroup` contexts; in exchange, it allows creating multiple `Staff` contexts that jointly follow the measure defined in their enclosing `TimingStaffGroup`.

Locally scaled time signatures

Use the unscalable `\time` command to establish a measure of the desired length in `Timing`, a.k.a. `TimingStaffGroup`. In this snippet, all staves below `TimingStaffGroup` use a scaled time signature, so any time signature with the desired measure length is as good as any other. If there were an enclosed context that did not use a scaled time signature, the choice of time signature to set in `Timing` would matter in that context.

Use the `\polymetric \time` command to set scalable metric properties in contexts below `Timing`, and use the `\scaleDurations` command to scale both the local meter and the notes to fit the measure.

```

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \accepts TimingStaffGroup
  }
  \context {
    \StaffGroup
    \name TimingStaffGroup
    \alias StaffGroup
    \consists "Timing_translator"
  }
}

<<
\new TimingStaffGroup <<
  \new Staff {
    \scaleDurations 8/5 {
      \time 6/5 % to set measure length in Timing
      \context Staff \polymetric \time 6/8
    }
  }
}

```

```

      b8 b b b b b
      \time 4/5 % to set measure length in Timing
      \context Staff \polymetric \time 2/4
      b4 b
    }
  }
>>
\new TimingStaffGroup <<
  \new Staff {
    \clef bass
    \time 2/4
    c2 d e f
  }
>>
>>

```

Creating arpeggios across notes in different voices

An *arpeggio* can be drawn across notes in different voices on the same staff if the `Span_arpeggio_engraver` is added to the `Staff` context.

```

\new Staff \with {
  \consists "Span_arpeggio_engraver"
}
\relative c' {
  \set Staff.connectArpeggios = ##t
  <<
    { <e' g>4\arpeggio <d f> <d f>2 }
    \\
    { <d, f>2\arpeggio <g b>2 }
  >>
}

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 10) % for the documentation
% #(set-global-staff-size 20) % for letter and A4

```

```

\book {
  \score {
    { \*12 { s1 \break } }

    \layout {
      indent = 0
      \context {
        \Staff
        \remove "Time_signature_engraver"
        \remove "Clef_engraver"
        \remove "Bar_engraver"
      }
      \context {
        \Score
        \remove "Bar_number_engraver"
      }
    }
  }
}

```

```

% for the documentation

```

```

\paper {
  #(set-paper-size "a6")
  ragged-last-bottom = ##f
  line-width = 90\mm
  left-margin = 7.5\mm
  bottom-margin = 5\mm
  top-margin = 5\mm
  tagline = ##f
}

```

```

% uncomment these lines for "letter" size

```

```

%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f

  bottom-margin = 0.25\in
  top-margin = 0.25\in
  tagline = ##f
}
%}

```

```

% uncomment these lines for "A4" size

```

```

%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180\mm
}
%}

```

```

    left-margin = 15\mm
    bottom-margin = 10\mm
    top-margin = 10\mm
    tagline = ##f
  }
  %}
}

```

Creating cross-staff arpeggios in other contexts

Cross-staff *arpeggios* can be created in contexts other than `GrandStaff` and its derived siblings (`PianoStaff`, `ChoirStaff`, and `StaffGroup`) if the `Span_arpeggio_engraver` is included in the `Score` context.

```

<<
  \new PianoStaff <<
    \new Voice \relative c' {
      <c e>2\arpeggio <d f>2\arpeggio
      <c e>1\arpeggio
    }
    \new Voice \relative c {
      \clef bass
      <c g'>2\arpeggio <b g'>2\arpeggio
    }
  >>
>>

```

```

    <c g'>1\arpeggio
  }
>>

\new Staff \relative c {
  \set Score.connectArpeggios = ##t
  \clef bass
  c2\arpeggio g\arpeggio
  c1\arpeggio
}
>>

\layout {
  \context {
    \Score
    \consists "Span_arpeggio_engraver"
  }
}

```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor and D major with an extended range of shown flats.

```

\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil =
    #(lambda (grob)
      (grob-interpret-markup grob
        #{ \markup\combine
          \musicglyph "clefs.C"
          \translate #'(-3 . -2)
          \musicglyph "clefs.F"
        }
      ))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

```

```

}

{
  \key d\minor f bes, f bes, |
  \key d\major fis b, fis b, |
}

```

Cross-staff stems

This snippet shows how to use `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem lengths need not be specified, as the variable distance between noteheads and staves is calculated automatically. However, it is important that `\crossStaff` is applied to the correct voice or staff (i.e., on the opposite side of where a beam is or would be positioned) to get the desired effect.

```

\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

\new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16\> e'8. g8 r\! |
    e'8 f' g'4
    \voiceTwo
    % Down to lower staff
    \crossStaff { e'8 e'8 } e'4 |
  }

  \new Staff {
    \clef bass
    \voiceOne
    % Up to upper staff
    \crossStaff { <e g>4 e, g16 a8. c8 } d |
    g8 f g4 \voiceTwo g8 g g4 |
  }
>>

```

Defining an engraver in Scheme: ambitus engraver

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver. This is basically a rewrite in Scheme of the code from `lily/ambitus-engraver.cc`.

```
#(use-modules (oop goops))
```

```
%%%
```

```
%%% Grob utilities
```

```
%%%
```

```
%%% These are literal rewrites of some C++ methods used by the ambitus
```

```
%%% engraver.
```

```
#(define (ly:separation-item::add-conditional-item grob grob-item)
```

```
  "Add GROB-ITEM to the array of conditional elements of GROB.
```

This is a rewrite of function ``Separation_item::add_conditional_item`` from file ``lily/separation-item.cc``."

```
  (ly:pointer-group-interface::add-grob
   grob 'conditional-elements grob-item))
```

```
#(define (ly:accidental-placement::accidental-pitch accidental-grob)
```

```
  "Get the pitch from the grob cause of ACCIDENTAL-GROB.
```

This is a rewrite of function ``accidental_pitch`` from file ``lily/accidental-placement.cc``."

```
  (ly:event-property (ly:grob-property
                      (ly:grob-parent accidental-grob Y) 'cause)
   'pitch))
```

```
#(define (ly:accidental-placement::add-accidental grob accidental-grob)
```

```
  "Add ACCIDENTAL-GROB to the list of accidentals grobs of GROB.
```

ACCIDENTAL-GROB is an ``Accidental`` grob; GROB is an ``AccidentalPlacement`` grob.

This is a rewrite of function ``Accidental_placement::add_accidental`` from file ``lily/accidental-placement.cc``."

```
  (let ((pitch (ly:accidental-placement::accidental-pitch
                accidental-grob)))
    (set! (ly:grob-parent accidental-grob X) grob)
    (let* ((accidentals (ly:grob-object grob 'accidental-grobs))
            (handle (assq (ly:pitch-notename pitch) accidentals))
            (entry (if handle (cdr handle) '()))))
      (set! (ly:grob-object grob 'accidental-grobs)

Displaying a whole GrandStaff system if only one of its staves is alive

In many orchestral scores it is custom to not show staves for instruments that are silent for a while; this is called a ‘Frenched’ score. LilyPond provides this functionality via the `\RemoveEmptyStaves` command.

When they play again it is often preferred to show the staves of *all instruments of such a group*. This can be done by adding the `Keep_alive_together_engraver` to the grouping context (e.g., `GrandStaff` or `StaffGroup`).

In the example below the violins are silent in the second system. Only the first violin plays the last measure in the third system but the staff of the second violin is also displayed.

```
\score {
  <<
    \new Staff = "Staff_flute" \with {
      instrumentName = "Flute"
      shortInstrumentName = "Fl"
    } \relative c' {
      \*3 { c'4 c c c | c c c c | c c c c | \break }
    }

    \new StaffGroup = "StaffGroup_Strings" <<
      \new GrandStaff = "GrandStaff_violins" <<
        \new Staff = "StaffViolinI" \with {
          instrumentName = "Violin I"
          shortInstrumentName = "Vi I"
        } \relative c'' {
          a1 | R1*7 | \*12 a16 a4 |
        }
        \new Staff = "StaffViolinII" \with {
          instrumentName = "Violin II"
          shortInstrumentName = "Vi II"
        } \relative c' {
          e1 | R1*8 |
        }
      >>
    >>

    \new Staff = "Staff_cello" \with {
      instrumentName = "Cello"
      shortInstrumentName = "Ce"
    } \relative c {
      \clef bass \*9 c1 |
    }
  >>
}

}
}

```

The image displays three musical score excerpts, each showing the effect of switching engravers one by one. The first excerpt shows a Flute staff and a Violin I/II/Cello system. The second excerpt shows a Flute staff and a Cello staff. The third excerpt shows a Flute staff, Violin I/II, and Cello staff. The third excerpt shows a Flute staff, Violin I/II, and Cello staff. The third excerpt shows a Flute staff, Violin I/II, and Cello staff.

Engravers one by one

LilyPond handles the various elements necessary to typeset a score with plugins. Each plugin is called an *engraver*. In this example, (some) engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,

- beams, slurs, accents,
- accidentals, bar lines, time signature, and key signature.

Engravers are grouped. For example, note heads, slurs, beams, etc., form a Voice context. Engravers for key signature, accidentals, bar line, etc., form a Staff context.

```

    % this moves them to the right half a staff space
    \override NoteColumn.X-offset = -0.5
  }
}

```

Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second staff invisible, and make the lines shorter like in this snippet.

```

\new ChoirStaff {
  \relative c'' <<
  \new Staff {
    \time 12/8
    \stemUp
    c4. d8 e8 f g4 f8 e8. d16 c8
  }
  \new Staff {
    % hides staff and notes so that only the grid lines are visible
    \hideNotes
    \hide Staff.BarLine
    \override Staff.StaffSymbol.line-count = #0
    \hide Staff.TimeSignature
    \hide Staff.Clef

    % dummy notes to force regular note spacing
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
  }
}

```

```

        \once \override Score.GridLine.thickness = #3.0
        c8 c c
    }
    >>
}

\layout {
  \context {
    \Score
    \consists "Grid_line_span_engraver"
    % center grid lines horizontally below note heads
    \override NoteColumn.X-offset = #-0.5
  }
  \context {
    \Staff
    \consists "Grid_point_engraver"
    gridInterval = #1/8
    % set line length and positioning:
    % two staff spaces above center line on hidden staff
    % to four spaces below center line on visible staff
    \override GridPoint.Y-extent = #'(2 . -4)
  }
}

```

Measure counters

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {

```

```

\startMeasureCount
\*7 { c'4 d' e' f' }
\stopMeasureCount
\bar "||"
g'4 f' e' d'
\override Staff.MeasureCounter.count-from = #2
\startMeasureCount
\*5 { g'4 f' e' d' }
g'4 f'
\bar ""
\break
e'4 d'
\*7 { g'4 f' e' d' }
\stopMeasureCount
}

```

Measure spanner

Measure spanners are an alternate way to print annotated brackets. As opposed to horizontal brackets, they extend between two bar lines rather than two notes. The text is displayed in the center of the bracket.

```

\layout {
  \context {
    \Staff
    \consists Measure_spanner_engraver
  }
}

<<
\new Staff \relative c'' {
  \key d \minor
  R1*2
  \tweak text "Answer"
  \startMeasureSpanner
  \tuplet 3/2 8 {
    a16[ b c] d[ c b] c[ d e] f[ e d]
  }
  e8 a gis g
  fis f e d~ d c b e
  \stopMeasureSpanner
}

```

```

\new Staff \relative c' {
  \key d \minor
  \tweak text "Subject"
    \tweak direction #DOWN
    \startMeasureSpanner
  \tuplet 3/2 8 {
    d16[ e f] g[ f e] f[ g a] bes[ a g]
  }
  a8 d cis c
  b bes a g~ g f e a
  \stopMeasureSpanner
  \tweak text "Counter-subject"
    \tweak direction #DOWN
    \startMeasureSpanner
  f8 e a r r16 b, c d e fis g e
  a gis a b c fis, b a gis e a4 g8
  \stopMeasureSpanner
}
>>

```

The image displays a musical score with three staves. The first staff is empty. The second staff, labeled "Subject", contains a melodic line with triplets. The third staff, labeled "Answer", contains a melodic line with triplets. The fourth staff, labeled "Counter-subject", contains a melodic line with triplets. The staves are connected by horizontal bar lines.

Mensurstriche layout (bar lines between the staves)

Mensurstriche, bar lines between but not through staves, can be printed by setting `measureBarType` to `"-span|"` and using a grouping context that allows span bars, such as `StaffGroup`.

```

\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}

```

```

music = \fixed c'' {
  c1
  d2 \section e2
}

```

```

    f1 \fine
}

\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>

```

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The `systemStartDelimiterHierarchy` property of the `StaffGroup` context takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```

\new StaffGroup
\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = 4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare
          (SystemStartBrace
            (SystemStartBracket a
              (SystemStartSquare b))
            c)
          d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>

```

Permitting line breaks within beamed tuplets

These artificial examples show how both manual and automatic line breaks may be permitted within beamed tuplets that can't be rhythmically split in an exact way.

This feature only works with manually beamed tuplets.

```
\layout {
  \context {
    \Voice
    % Permit automatic line breaks within tuplets.
    \remove "Forbid_line_break_engraver"
    % Allow beams to be broken at line breaks.
    \override Beam.breakable = ##t
  }
}

  \tuplet 11/8 { a16[ b c d e f e d c b a] }
  \*28 a16 \bar "||"
}
```

Print chord names with same root and different bass as slash and bass note

To print subsequent chord names only differing in their bass note as slash and bass note without a root symbol, use the Scheme engraver defined in this snippet. The behaviour is controlled by the `chordChanges` context property.

```
#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "Drop root for follow-up chord names that differ only in bass."
```

In other words, the chord name sequence 'D D/C D/B' gets actually printed as 'D /C /B'.

Set the ``chordChanges`` context property to ``#t`` to activate this feature."

```
(let ((chord-pitches '())
      (last-chord-pitches '())
      (bass-pitch #f))

      \consists Staff_collecting_engraver
    }
  }
}

```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```

global = {
  \time 3/4 s2.*3 \break
  s2.*3
}

\score {
  <<
    \Bassklarinette
    \Perkussion
  >>
}

```

The musical score is written for two staves: Bassklarinette (Bass Clarinet) and Perkussion (Percussion). The score is divided into three systems. The first system shows a treble clef staff with a 3/8 time signature, followed by a 2/4 time signature, and then a 3/8 time signature. The bass clef staff has a 3/4 time signature. The second system is marked with a (4) and shows a treble clef staff with a 3/8 time signature, followed by a 2/4 time signature, and then a 3/8 time signature. The bass clef staff has a 3/4 time signature. The third system is marked with an 8 and shows a treble clef staff with a 3/4 time signature, followed by a 3/8 time signature, and then a 3/4 time signature. The bass clef staff has a 3/4 time signature.

Removing bar numbers from a score

Bar numbers can be removed entirely by removing the `Bar_number_engraver` from the `Score` context.

```

\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    % \remove "Bar_number_engraver"
  }
}

\relative c' {
  c4 c c c \break
  c4 c c c
}

```

Use square bracket at the start of a staff group

The system start delimiter `SystemStartSquare` can be used by setting it explicitly in a `StaffGroup` or `ChoirStaff` context.

```

\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}

```

Using mark lines in a Frenched score

Using `MarkLine` contexts (such as in “Placing rehearsal marks other than above the top staff”) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```

bars = {
  \tempo Allegro 4=120

```

This musical score is divided into six systems, each containing staves for Winds, Trumpet, Trombone, and Strings. The score is marked with tempo changes and section letters (A through N).

System 1: Winds, Trumpet, Trombone, and Strings. Tempo: **Allegro** (♩ = 120). Sections **A** and **B** are indicated.

System 2: Winds (W.) and Strings (Str.). Sections **C** and **D** are indicated.

System 3: Winds (W.), Trombone (Tb.), and Strings (Str.). Tempo: **Adagio** (♩ = 40). Sections **E** and **F** are indicated.

System 4: Winds (W.) and Strings (Str.). Sections **G** and **H** are indicated.

System 5: Winds (W.), Trumpet (Tp.), and Strings (Str.). Sections **J**, **K**, and **L** are indicated.

System 6: Winds (W.) and Strings (Str.). Sections **M** and **N** are indicated.

Using tags to produce mensural and modern music from the same source

Using tags it is possible to produce both mensural and modern notation from the same music. In this snippet, a function `\menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position.

Tags can also be used where other differences are needed: for example using “whole measure rests” (`R1`, `R\breve`, etc.) in modern music, but normal rests (`r1`, `r\breve`, etc.) in the mensural version. Converting mensural music to its modern equivalent is usually referred to as *transcription*.

The call `c4.\Be c8 c\Am` is the same as `c4.[c8 c]`. However, it suppresses warnings if it starts on a note that can’t hold a beam but needs it anyway due to the use of `Completion_heads_engraver`.

[Note that the custos sticks out into the right margin and might be cut off if the LilyPond output gets cropped tightly. The use of `\with-true-dimensions` below avoids this.]

```
\layout {
  line-width = 150\mm
}

menrest = #(define-music-function (note) (ly:music?)

    }
  }
}

```

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volte can be put below chords.

```
\score {
  <<
    \chords { c1 c1 }
    \new Staff \with { \consists "Volta_engraver" }
    {
      \repeat volta 2 { c'1 \alternative { c' } }
    }
  >>
  \layout {
    \context {
      \Score
      \remove "Volta_engraver"
    }
  }
}
```

Volta brackets in multiple staves

By adding the `Volta_engraver` to the relevant staff, volte can be put over staves other than the topmost one in a score.

`\repeat` and related commands should be present in all staves.

```
voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
    \alternative {
      \volta 1 { d1 }
      \volta 2 { e1 }
    }
  }
}
```

```
<<

```

23 Education

Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second staff invisible, and make the lines shorter like in this snippet.

```
\new ChoirStaff {
  \relative c'' <<
  \new Staff {
    \time 12/8
    \stemUp
    c4. d8 e8 f g4 f8 e8. d16 c8
  }
  \new Staff {
    % hides staff and notes so that only the grid lines are visible
    \hideNotes
    \hide Staff.BarLine
    \override Staff.StaffSymbol.line-count = #0
    \hide Staff.TimeSignature
    \hide Staff.Clef

    % dummy notes to force regular note spacing
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
  }
}
>>
}

\layout {
  \context {
    \Score
    \consists "Grid_line_span_engraver"
    % center grid lines horizontally below note heads
    \override NoteColumn.X-offset = #-0.5
  }
  \context {
    \Staff
    \consists "Grid_point_engraver"
    gridInterval = #1/8
    % set line length and positioning:
    % two staff spaces above center line on hidden staff
    % to four spaces below center line on visible staff
    \override GridPoint.Y-extent = #'(2 . -4)
  }
}
```

}

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Un peu retenu
très expressif

The first system of music is in 2/4 time, key of D major (F# C# G# D#). The right hand plays a melody of eighth notes with slurs, starting with a *ppp* dynamic. The left hand plays a bass line of eighth notes. The second system continues the melody and bass line. The third system shows a *rall.* (rallentando) marking, with a *long* note in the right hand. The fourth system shows a *a tempo* marking, with a *pp* (pianissimo) dynamic in the right hand. The fifth system continues the melody and bass line.

```

The musical score is for measures 108-118 of the second movement of Beethoven's Piano Sonata 32. It is in 2/4 time and C major. The right hand (treble clef) begins at measure 108 with a trill on G4, followed by a series of eighth notes. The left hand (bass clef) plays a steady eighth-note accompaniment. The tempo is marked 'a tempo'. The dynamics include 'cantabile' (cantabile), 'cresc.' (crescendo), and 'p' (piano). The score is written for a grand piano.

The image shows a musical score for a piano piece. The first system consists of five measures. The right hand has a complex melodic line with many trills, while the left hand has a more rhythmic accompaniment. Dynamics include *f*, *p*, *dim.*, and *pp*. The second system starts at measure 113 and continues for five more measures. The right hand continues the melodic line with trills, and the left hand has a similar rhythmic pattern. Dynamics include *p cresc.* and a final measure with a key signature change to E major.

25 MIDI

See also Section “Creating MIDI output” in *Notation Reference*.

Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.

However, by moving the `Staff_performer` to the `Voice` context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different `midiInstrument`.

```
\score {
  \new Staff <<
    \new Voice \relative c''' {
      \set midiInstrument = "flute"
      \voiceOne
      \key g \major
      \time 2/2
      r2 g-"Flute" ~
      g fis ~
      fis4 g8 fis e2 ~
      e4 d8 cis d2
    }
    \new Voice \relative c'' {
      \set midiInstrument = "clarinet"
      \voiceTwo
      b1-"Clarinet"
      a2. b8 a
      g2. fis8 e
      fis2 r
    }
  >>
  \layout { }
  \midi {
    \context {
      \Staff
      \remove "Staff_performer"
    }
    \context {
      \Voice
      \consists "Staff_performer"
    }
  }
  \tempo 2 = 72
}
```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}
```

Creating custom dynamics in MIDI output

The following example shows how to create a dynamic marking, not included in the default list, and assign a specific value to it so that it affects MIDI output.

The dynamic mark `\rfz` gets value 0.9.

```
#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
      0.9
      (default-dynamic-absolute-volume dynamic)))

\score {
  \new Staff {
    \set Staff.midiInstrument = "cello"
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics
    \new Voice {
      \relative {
        a'4\pp b c-\rfz
      }
    }
  }
  \layout {}
  \midi {}
}
```

Demo of MIDI instruments

Problem: How to know which `midiInstrument` values would be best for your composition?

Solution: A LilyPond demo file. You have to compile this snippet by yourself and listen to the created MIDI output file.

```
melody = \relative c' {
  \tempo 4 = 150
  c4.\mf g c16 b' c d
  e16 d e f g4 g'4 r
  R1
}

\score {
  \new Voice \melody
  \layout { }
}

\score {

Replacing default MIDI instrument equalization

The default MIDI instrument equalizer can be replaced by setting the `instrumentEqualizer` property in the Score context to a user-defined Scheme procedure that uses a MIDI instrument name as its argument along with a pair of fractions indicating the minimum and maximum volumes, respectively, to be applied to that specific instrument.

The following example sets the minimum and maximum volumes for flute and clarinet.

```

#(define my-instrument-equalizer-alist '())

#(set! my-instrument-equalizer-alist
  (append
    '(("flute" . (0.7 . 0.9))
      ("clarinet" . (0.3 . 0.6)))
    my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
      (cdr entry))))

```

```

\score {
  <<
    \new Staff {
      \key g \major
      \time 2/2
      \set Score.instrumentEqualizer = #my-instrument-equalizer
      \set Staff.midiInstrument = "flute"
      \new Voice \relative {
        r2 g''\mp g fis~
        4 g8 fis e2~
        4 d8 cis d2
      }
    }
    \new Staff {
      \key g \major
      \set Staff.midiInstrument = "clarinet"
      \new Voice \relative {
        b'1\p a2. b8 a
        g2. fis8 e
        fis2 r
      }
    }
  >>
  \layout { }
  \midi { }
}

```

26 Non-music

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `self-alignment-X` property of the `InstrumentName` grob (usually in the `Staff` context). The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper {
  left-margin = 3\cm
}

\new StaffGroup <<
  \new Staff \with {
    \override InstrumentName.self-alignment-X = #LEFT
    instrumentName = \markup \left-column { "Left aligned"
                                             "instrument name" }

    shortInstrumentName = "Left"
  } {
    c''1 \break c''1
  }

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #CENTER
    instrumentName = \markup \center-column { Centered
                                             "instrument name" }

    shortInstrumentName = "Centered"
  } {
    g'1 g'1
  }

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #RIGHT
    instrumentName = \markup \right-column { "Right aligned"
                                             "instrument name" }

    shortInstrumentName = "Right"
  } {
    e'1 e'1
  }
}
>>

\layout {
  indent = 4\cm
  short-indent = 2\cm
  line-width = 6.5\cm
}
```

Demonstrating all \header fields

A demonstration of all header fields that LilyPond defines by default. Thanks to setting `print-all-headers` to `#t`, much more fields as usual are displayed, indicating the hierarchy of `\header` blocks.

```
\paper {
  #(set-paper-size "a6" 'landscape)
  print-all-headers = ##t
}

\book {
  \header {

Woodwind diagrams key lists

The snippet below produces a list of all possible keys and key settings for woodwind diagrams as defined in `scm/define-woodwind-diagrams.scm`. The list gets written to `stderr` but is not shown in the music. If output to `stdout` is wanted instead, omit the code `(current-error-port)` from the commands.

```

#(print-keys-verbose 'piccolo (current-error-port))
#(print-keys-verbose 'flute (current-error-port))
#(print-keys-verbose 'flute-b-extension (current-error-port))
#(print-keys-verbose 'tin-whistle (current-error-port))
#(print-keys-verbose 'oboe (current-error-port))
#(print-keys-verbose 'clarinet (current-error-port))
#(print-keys-verbose 'bass-clarinet (current-error-port))
#(print-keys-verbose 'low-bass-clarinet (current-error-port))
#(print-keys-verbose 'saxophone (current-error-port))
#(print-keys-verbose 'soprano-saxophone (current-error-port))
#(print-keys-verbose 'alto-saxophone (current-error-port))

```

```
#(print-keys-verbose 'tenor-saxophone (current-error-port))  
#(print-keys-verbose 'baritone-saxophone (current-error-port))  
#(print-keys-verbose 'bassoon (current-error-port))  
#(print-keys-verbose 'contrabassoon (current-error-port))
```

```
\score {c''1}
```

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `self-alignment-X` property of the `InstrumentName` grob (usually in the `Staff` context). The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper {
  left-margin = 3\cm
}

\new StaffGroup <<
  \new Staff \with {
    \override InstrumentName.self-alignment-X = #LEFT
    instrumentName = \markup \left-column { "Left aligned"
                                             "instrument name" }

    shortInstrumentName = "Left"
  } {
    c''1 \break c''1
  }

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #CENTER
    instrumentName = \markup \center-column { Centered
                                             "instrument name" }

    shortInstrumentName = "Centered"
  } {
    g'1 g'1
  }

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #RIGHT
    instrumentName = \markup \right-column { "Right aligned"
                                             "instrument name" }

    shortInstrumentName = "Right"
  } {
    e'1 e'1
  }
}
>>

\layout {
  indent = 4\cm
  short-indent = 2\cm
  line-width = 6.5\cm
}
```

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how it can be done with adjusting the `nonstaff-nonstaff-spacing` property of the `VerticalAxisGroup` grob.

```
\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup
      .nonstaff-nonstaff-spacing
      .minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break
    % ...

    \voiceOne
    s2 a'8^\aliceSings a' b'4 |
    \oneVoice
    g'1
  }
}
```

```

\new Voice = "eve" {
  s1 |
  a'2^\eveSings g' |
  s1 |
  a'2^\eveSings g'
  % ...

  \voiceTwo
  f'4^\eveSings a'8 g' f'4 e' |
  \oneVoice
  s1
}
>>

\new Lyrics \lyricsto "alice" {
  may -- be
  sec -- ond
  % ...
  Shut up, you fool!
}

\new Lyrics \lyricsto "eve" {
  that the
  words are
  % ...
  ...and then I was like--
}
>>

```

The musical score is written on four staves. The first staff contains the lyrics 'may - be' (Alice) and 'that the' (Eve). The second staff contains 'sec - ond' (Alice) and 'words are' (Eve). The third staff contains '...and then I' (Eve) and 'Shut up, you like--' (Alice). The fourth staff contains 'was' (Alice) and 'fool!' (Eve). The lyrics are written below the notes, and the names 'ALICE' and 'EVE' are written above the notes to indicate which character is singing.

Book parts

`\bookpart` can be used to split a book into several parts. Each part last page can be affected by `ragged-last-bottom`. Header and footer markups can detect a part's last page to differentiate with the book's last page.

```
#(set-default-paper-size "a6")
```

```

\book {
  %% book paper, which is inherited by all children bookparts
  \paper {
    ragged-last-bottom = ##t
    %% Page footer: add a different part-tagline at part last page

```

```

oddFooterMarkup = \markup {
  \column {
    \fill-line {
      %% Copyright header field only on book first page.
      \if \on-first-page \fromproperty #'header:copyright
    }
    \fill-line {
      %% Part tagline header field only on each part last page.
      \if \on-last-page-of-part \fromproperty #'header:parttagline
    }
    \fill-line {
      %% Tagline header field only on book last page.
      \if \on-last-page \fromproperty #'header:tagline
    }
  }
}

%% book header, which is inherited by the first bookpart
\header {
  title = "Book title"
  copyright = "Copyright line on book first page"
  parttagline = "Part tagline"
  tagline = "Book tagline"
}

\bookpart {
  %% a different page breaking function may be used on each part
  \paper { page-breaking = #ly:minimal-breaking }
  \header { subtitle = "First part" }
  \markup { The first book part }
  \markup { a page break }
  \pageBreak
  \markup { first part last page }
  \markup \wordwrap {
    with ragged-last-bottom (see the space below this text) }
}

Changing the staff size

The simplest way to resize staves is to use

```
 #(set-global-staff-size size)
```

To resize an individual staff's size, you can use the properties `staff-space` and `fontSize`.

```
<<
\new Staff \relative c'' {
  \dynamicDown c8\ff c c c c c c c
}
\new Staff \with {
  \fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} \relative c {
  \clef bass c8 c c c c\ff c c c
}
>>
```

Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with `-dclip-systems`; the snippets page may not adequately show the results. The result will be files named `'base-from-start-to-end[-count].eps'`.

If system starts and ends are included, they include extents of the System grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

```
#(set-default-paper-size "a6" 'landscape)
\layout {
  \indent = 2.4\cm
}

#(ly:set-option 'clip-systems)
#(ly:set-option 'separate-page-formats "ps")
#(define output-suffix "1")

origScore = \new Staff \with { \instrumentName = "Instrument" }
\relative c' {
  c1
  d1
  \grace c16 e1
  \key d \major

  \clef bass
  g,1
  fis1
}

\book {
```

LilyPond v2.27.0

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 10)  % for the documentation
% #(set-global-staff-size 20) % for letter and A4

```

```

\book {
  \score {
    { \*12 { s1 \break } }

    \layout {
      indent = 0
      \context {
        \Staff
        \remove "Time_signature_engraver"
        \remove "Clef_engraver"
        \remove "Bar_engraver"
      }
      \context {
        \Score
        \remove "Bar_number_engraver"
      }
    }
  }
}

```

```

% for the documentation
\paper {
  #(set-paper-size "a6")
  ragged-last-bottom = ##f
}

```

```
    line-width = 90\mm
    left-margin = 7.5\mm
    bottom-margin = 5\mm
    top-margin = 5\mm
    tagline = ##f
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
  tagline = ##f
}
}%

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180\mm
  left-margin = 15\mm
  bottom-margin = 10\mm
  top-margin = 10\mm
  tagline = ##f
}
}%
}
```

Demonstrating all \header fields

A demonstration of all header fields that LilyPond defines by default. Thanks to setting `print-all-headers` to `#t`, much more fields as usual are displayed, indicating the hierarchy of `\header` blocks.

```
\paper {
  #(set-paper-size "a6" 'landscape)
  print-all-headers = #t
}
```

```
\book {

Displaying a whole GrandStaff system if only one of its staves is alive

In many orchestral scores it is custom to not show staves for instruments that are silent for a while; this is called a ‘Frenched’ score. LilyPond provides this functionality via the `\RemoveEmptyStaves` command.

When they play again it is often preferred to show the staves of *all instruments of such a group*. This can be done by adding the `Keep_alive_together_engraver` to the grouping context (e.g., `GrandStaff` or `StaffGroup`).

In the example below the violins are silent in the second system. Only the first violin plays the last measure in the third system but the staff of the second violin is also displayed.

```
\score {
  <<
    \new Staff = "Staff_flute" \with {
      instrumentName = "Flute"
      shortInstrumentName = "Fl"
    } \relative c' {
      \*3 { c'4 c c c | c c c c | c c c c | \break }
    }

    \new StaffGroup = "StaffGroup_Strings" <<
      \new GrandStaff = "GrandStaff_violins" <<
        \new Staff = "StaffViolinI" \with {
          instrumentName = "Violin I"
          shortInstrumentName = "Vi I"
        } \relative c'' {
          a1 | R1*7 | \*12 a16 a4 |
        }
        \new Staff = "StaffViolinII" \with {

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```

#(set-default-paper-size "a5")

```

```

\paper {
  system-separator-markup = \slashSeparator
  tagline = ##f
}

```

```

notes = \relative c' {
  c1 | c \break
  c1 | c \break
}

```

```

    c1 | c
  }

\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}

```

Table of contents

A table of contents is included using `\markuplist \table-of-contents`; its items are added with the `\tocItem` command.

```

#(set-default-paper-size "a7" 'landscape)
#(set-global-staff-size 11)

```

```

\paper {
  print-all-headers = ##t
}

\book {
  \markuplist \table-of-contents
  \pageBreak

  \tocItem \markup { The first score }
  \score {

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

Wer nur den lie - ben Gott läßt wal - ten und hof-fet auf ihn al - le Zeit

Pupil: Here's my version!

Wer nur den lie - ben Gott läßt wal - ten und hof-fet auf ihn al - le Zeit

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

Wer nur den lie - ben Gott läßt wal - ten und hof-fet auf ihn al - le Zeit

28 Preparing parts

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```
\relative c' ' {
  \override Score.RehearsalMark.Y-offset = #3.5

  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1 \mark #14
  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1
}
```

Numbering single measure rests

Multi-measure rests show their length by a number except for single measures. This can be changed by setting `restNumberThreshold`.

```
{
  \compressEmptyMeasures
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 0
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 10
  R1 R1*10 R1*11
}
```

String quartet template with separate parts

The “String quartet template (simple)” snippet produces a nice string quartet, but what if you need to print parts? This new template demonstrates how to use the `\tag` feature to easily split a piece into individual parts.

For technical reasons, multiple output files cannot be shown here for a single snippet, which means that the template below unifies the code for separate files. The file names are contained in comments at the beginning of each file.

piece.ly contains all the music definitions. The other files – score.ly, vn1.ly, vn2.ly, vla.ly, and vlc.ly – produce the full score and the four parts.

Do not forget to remove specified comments when using separate files!

```
% piece.ly

Violin 1

Violin 2

Viola

Cello

The image shows a musical score for four instruments: Violin 1, Violin 2, Viola, and Cello. The score is in common time (C) and consists of two measures. Violin 1 plays a half note G4, a half note A4, and a whole note B4. Violin 2 plays a half note E4, a half note F4, and a whole note G4. Viola plays a half note C3, a half note D3, and a whole note E3. Cello plays a half note C2, a half note D2, and a whole note E2. The score is enclosed in a brace on the left.

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used.

This example creates the rhythm used throughout *Mars*, from Gustav Holst's *The Planets*.

```
rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}
```

Creating slurs across voices

In some situations it is necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's second partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}
```

Cross-staff tremolos

Since `\repeat tremolo` expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its `\change Staff` command.

```
\new PianoStaff <<
  \new Staff = "up" \relative c'' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c'' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
}
>>
```

Demo of MIDI instruments

Problem: How to know which `midiInstrument` values would be best for your composition?

Solution: A LilyPond demo file. You have to compile this snippet by yourself and listen to the created MIDI output file.

```
melody = \relative c' {
  \tempo 4 = 150
  c4.\mf g c16 b' c d
  e16 d e f g4 g'4 r

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```

\relative c'' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}

```

Heavily customized polymetric time signatures

Though the polymetric time signature shown is not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song, by the way).

```

melody = \relative c'' {
  \key g \major
  \time #'((3 . 8) (2 . 8) (2 . 8) (3 . 8) (2 . 8) (2 . 8)
           (2 . 8) (2 . 8) (3 . 8) (2 . 8) (2 . 8))
  \set Timing.beamExceptions = #'()
  \set Timing.beatStructure = 3,2,2,3,2,2,2,2,3,2,2
  c8 c c d4 c8 c b c b a4 g fis8 e d c b' c d e4-~ fis8 g \break
  c,4. d4 c4 d4. c4 d c2 d4. e4-~ d4
  c4. d4 c4 d4. c4 d c2 d4. e4-~ d4 \break
}

```

```

}

drum = \new DrumStaff \drummode {
  \repeat volta 2 {
    bd4.^{\markup { Drums } sn4 bd \bar "}
    sn4. bd4 sn \bar "
    bd sn bd4. sn4 bd
  }
}

```

```

\new Staff {
  \melody
  \drum
}

```

Indicating cross-staff chords with a bracket

A non-arpeggiato bracket can indicate that notes on two different staves are to be played with the same hand. In order to do this, the PianoStaff must be set to accept cross-staff brackets.

The following example typesets measure 65 of Debussy's prelude *Les collines d'Anacapri*.

```

\new PianoStaff <<
  \once \set PianoStaff.connectChordBrackets = ##t

  \new Staff \relative c' {
    \key b \major
    \time 6/8
    b8-.(\nonArpeggiato fis'-.\> cis-.
      e-. gis-. b-.)\!\fermata^\laissezVibrer
    \section
  }

  \new Staff \relative c' {
    \clef bass
    \key b \major
    << { <a e cis>2.\nonArpeggiato } \
      { <a, e a,>2. } >>
    \section
  }
}

```

>>

Inserting score fragments above a staff, as markups

The `\markup` command is quite versatile. In this snippet, it contains a `\score` block instead of texts or marks.

```
tuning = \markup \score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \clef bass
    <c, g, d g>1
  }
  \layout {
    indent = 0\cm
  }
}

\header {
  title = "Solo Cello Suites"
  subtitle = "Suite IV"
  subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning }
  tagline = ##f
}

\layout {
  ragged-right = ##f
}

\relative c'' {
  \time 4/8
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  g8 a g a
  g8 a g a
}
```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```

global = {
    \time 3/4 s2.*3 \break
    s2.*3
}

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Bar_number_engraver"
    \override SpacingSpanner.uniform-stretching = ##t
    \override SpacingSpanner.strict-note-spacing = ##t
    \proportionalNotationDuration = #1/64
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
  \context {
    \Voice
    \remove "Forbid_line_break_engraver"
    \tupletFullLength = ##t
  }
}

```

```

Bassklarinette = \new Staff \with {

```

The musical score is written for a single melodic line on a treble staff and a piano accompaniment on a grand staff (bass and tenor staves). The key signature has one flat (B-flat), and the time signature is 3/4. The score is divided into three systems, with measures numbered 2, 4, and 8.

System 1 (Measures 2-4):

- Measure 2:** Treble staff has a dotted quarter note (B-flat). Bass staff has a whole rest.
- Measure 3:** Treble staff has a quarter rest followed by a dotted half note (B-flat). Bass staff has a whole rest.
- Measure 4:** Treble staff has a quarter note (B-flat) followed by a quarter rest. Bass staff has a dotted half note (B-flat).

System 2 (Measures 5-7):

- Measure 5:** Treble staff has a dotted quarter note (B-flat) followed by a quarter rest. Bass staff has a whole rest.
- Measure 6:** Treble staff has a quarter note (B-flat) followed by a quarter rest. Bass staff has a dotted half note (B-flat).
- Measure 7:** Treble staff has a dotted half note (B-flat). Bass staff has a whole rest.

System 3 (Measures 8-10):

- Measure 8:** Treble staff has a dotted quarter note (B-flat) followed by a quarter rest. Bass staff has a whole rest.
- Measure 9:** Treble staff has a quarter note (B-flat) followed by a quarter rest. Bass staff has a dotted half note (B-flat).
- Measure 10:** Treble staff has a dotted half note (B-flat). Bass staff has a whole rest.

Measure Numbers and Fingerings:

- Measure 2:** Treble staff has a '2' above the note.
- Measure 4:** Treble staff has a '4' above the first note and a '3' above the second note.
- Measure 5:** Treble staff has a '3' above the first note.
- Measure 6:** Treble staff has a '4' above the first note and a '6' above the second note.

30 Really cool

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
\paper { tagline = ##f }

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

\score {
  \relative c' {
    c4 c c c
  }
}

% and use it in a \markup block:
\markup {
  \date
}
```

Including the date!

25-04-2026

25-04-2026

Blanking staff lines using the \whiteout command

The \whiteout command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to a DynamicText grob.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))
              (par-y (ly:grob-parent grob Y))
              (dir (ly:grob-property par-y 'direction))
              (staff-line-thickness
                (ly:output-def-lookup (ly:grob-layout grob)
                                      'line-thickness)))
          (new-stencil
            (ly:stencil-aligned-to
              (ly:stencil-combine-at-edge
                (ly:stencil-aligned-to stencil X CENTER)
                Y dir
                (ly:stencil-aligned-to
                  (grob-interpret-markup
                    grob
                    (make-fontsize-markup
                      (magnification->font-size
                        (+ (ly:staff-symbol-staff-space grob)
                          (/ staff-line-thickness 2))))
                    text))
                  X CENTER))
                X LEFT))
            (staff-space (ly:output-def-lookup

  \break
  \hairpinMolto c2^\< c\f
  \hairpinMore c2\ppppp\< c\f
}

```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

In the example below, function `mc-squared` is executed for all `NoteHead` grobs (within the current `Voice` context) at the current time step; the function modifies the grob's stencil, using the `staff-position` property to replace some pitches with markup.

See the ‘Extending’ manual (<https://lilypond.org/doc/v2.24/Documentation/extending/running-a-function-on-all-layout-objects>) for more information.

```

#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
     grob 'stencil
     (grob-interpret-markup grob
      #{ \markup \lower #0.5
        #(case sp
            ((-5) "m")
            ((-3) "c ")
            ((-2) #{ \markup \teeny \bold 2 #})
            (else "bla")) #}))))

```

```

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}

```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

```
% Association list of pitches to colors.
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))

% Compare pitch and alteration (not octave).
#(define (pitch-equals? p1 p2)
  (and
```

```

randomNotes =
#(define-music-function (n from to dur)
  (integer? ly:pitch? ly:pitch? ly:duration?)

```

Generating whole scores (also book parts) in Scheme without using the parser

A LilyPond score internally is just a Scheme expression, generated by the LilyPond parser. Using Scheme, one can also automatically generate a score without an input file. If you have the music expression in Scheme, a score can be generated by simply calling

```
(scorify-music music)
```

on your music. This generates a score object, for which you can then set a custom layout block with

```

(let* ((layout (ly:output-def-clone $defaultlayout)))
  ; modify the layout here, then assign it:
  (ly:score-add-output-def! score layout))

```

Finally, all you have to do it to pass this score to LilyPond for typesetting. This snippet defines functions (add-score score), (add-text text), and (add-music music) to pass a complete score, some markup, or some music to LilyPond for typesetting.

This snippet also works for typesetting scores inside a `\book {...}` block as well as top-level scores. To achieve this, each score scheduled for typesetting is appended to the list of top-level scores, and the top-level book handler (which is a Scheme function called to process a book once a `\book{...}` block is closed) is modified to insert all collected scores so far to the book.

Note: For technical reasons, only the first `\book` is shown, as the other `\book` commands create additional output files.

```

#(define-public (add-score score)
  (ly:parser-define! 'toplevel-scores
    (cons score (ly:parser-lookup 'toplevel-scores))))

#(define-public (add-text text)
  (add-score (list text)))

#(define-public (add-music music)
  (collect-music-aux (lambda (score)
    (add-score score))

```

```

        (ly:score-add-output-def! score layout)
        (add-text title)
        (add-score score))
    (set! pitch (modulo (1+ pitch) 7))))

oneNoteScore =
#(define-void-function () ()
  (add-one-note-score))

}

% Top-level scores are also handled correctly.
\oneNoteScore
\oneNoteScore

\paper { tagline = ##f }

```

Score with a do

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```

{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}

```

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property, in the `Staff` context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

```
\set Staff.keyAlterations =
  #`((octave . step) . alter) ((octave . step) . alter) ...)
```

where, for each element in the list, *octave* specifies the octave (0 being the octave from middle C to the B above), *step* specifies the note within the octave (0 means C and 6 means B), and *alter* is one of SHARP, FLAT, DOUBLE-SHARP, etc., preceded by a comma.

Alternatively, you can use the more concise format (*step . alter*) for each item in the list if the same alterations are used in all octaves.

For microtonal scales where a “sharp” is not 100 cents, *alter* refers to the alteration as a proportion of a 200-cent whole tone.

```
\include "arabic.ly"
```

```
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))

  % \set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dods do do |
}
```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
global = {
  \time 3/4 s2.*3 \break
  s2.*3
}

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Bar_number_engraver"
    \override SpacingSpanner.uniform-stretching = ##t
  }
}
```

```

\override SpacingSpanner.strict-note-spacing = ##t
proportionalNotationDuration = #1/64
}
\context {
  \Staff
  \consists "Timing_translator"
}
\context {
  \Voice
  \remove "Forbid_line_break_engraver"
  tupletFullLength = ##t
}
}

Bassklarinette = \new Staff \with {

The musical score consists of three systems, each with a Bass Clarinet staff (treble clef) and a Percussion staff (two staves with 'H' for tom-toms). Measure numbers 1, 4, and 8 are indicated at the start of their respective systems.

- System 1 (Measures 1-3):**
 - Measure 1:** Bass Clarinet has a dotted quarter note (G5). Percussion has a quarter rest.
 - Measure 2:** Bass Clarinet has a quarter note (Bb4) with a '2' above it. Percussion has a half note (G4).
 - Measure 3:** Bass Clarinet has a quarter note (A4) with a '4' above it, followed by a quarter note (G4) with a '3' above it. Percussion has a half note (F4).
- System 2 (Measures 4-6):**
 - Measure 4:** Bass Clarinet has a quarter note (F4) with a '3' above it, followed by a quarter note (E4) with a '4' above it, and a quarter note (D4) with a '6' above it. Percussion has a half note (D4).
 - Measure 5:** Bass Clarinet has a quarter note (C4). Percussion has a half note (C4).
 - Measure 6:** Bass Clarinet has a quarter note (B3). Percussion has a half note (B3).
- System 3 (Measures 7-8):**
 - Measure 7:** Bass Clarinet has a quarter note (A3). Percussion has a half note (A3).
 - Measure 8:** Bass Clarinet has a quarter note (G3). Percussion has a half note (G3).

31 Really simple

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```
\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {
        c1 | c
      }
      <<
        { c1 | d }
        \new Staff {
          \once \omit Staff.TimeSignature
          c1 | b
        }
      >>
    }
  >>
}
```

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```
drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
dr1 = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
```

```

        timh4 ssh timl8 ssh r timh r4
        ssh8 timl r4 cb8 cb
    }

\score {
  <<
    \new DrumStaff \with {
      instrumentName = "timbales"
      drumStyleTable = #timbales-style
      \override StaffSymbol.line-count = #2
      \override BarLine.bar-extent = #'(-1 . 1)
    }
    <<
      \timb
    >>
    \new DrumStaff \with { instrumentName = "drums" }
    <<
      \new DrumVoice { \stemUp \drh }
      \new DrumVoice { \stemDown \drl }
    >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

The image shows a musical score for two percussion instruments: timbales and drums. The timbales staff is on top, and the drums staff is on the bottom. Both staves are in common time (C). The timbales staff has a 'crash' marking on the first measure and 'h.h.' (hi-hat) markings on the second and third measures. The drums staff has '+' (snare) and '0' (bass drum) markings on the first and second measures. The notation includes various note values and rests, with some notes beamed together.

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```

\relative c' {
  c4-1 d-2 f-4 e-3
}

```

The image shows a musical score for a single melodic line in C major. The staff is in common time (C). The notes are C4, D4, F4, and E4. The fingerings are indicated by numbers 1, 2, 4, and 3 above the notes respectively.

Aligning text marks to notes

By default, TextMark objects are aligned to so-called NonMusicalPaperColumn grobs, like the left edge of the staff or a bar line. They can be aligned to a note instead by setting the non-musical property to #f.

```

\layout {
  line-length = 80\mm
}

{
  \textMark "mark a" c'1 |
  \textMark "mark b" c'1 |
  \break
  \override Score.TextMark.non-musical = ##f
  \textMark "mark c" c'1 |
  \textMark "mark d" c'1 |
}

```

Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c'' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}

```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the font-size property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by font-size and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e }_\markup { A big c }
}
```

Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

```
%{
  You may have to install additional fonts.

  Red Hat Fedora: dejavu-fonts-all

  Debian GNU/Linux, Ubuntu: fonts-dejavu-core
                             fonts-dejavu-extra
}%
```

```
\relative c' ' {
  \time 3/4
  g2 e4
  a2 f4
  g2.
}
\addlyrics {
  \stanza "1. "
  Hi, my name is Bert.
}
\addlyrics {
  \override StanzaNumber.fonts.serif = "DejaVu Sans"
  \stanza "2. "
  \override LyricText.font-family = #'typewriter
  Oh, ché -- ri, je t'aime
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}
```

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “*più f*” or “*p subito*”). These can be produced using a `\markup` block; the resulting object behaves like a `TextScript` grob.

See also “Combining dynamics with markup texts (2)”.

```
piuF = \markup { \italic più \dynamic f }
```

```
\score {
  \relative c'' {
    c2\f c-\piuF
  }
}
```

Combining dynamics with markup texts (2)

Some dynamics may involve text indications (such as “*più f*” or “*p subito*”). These can be produced using the `make-dynamic-script` Scheme function; the resulting object behaves like a `DynamicText` grob.

See also “Combining dynamics with markup texts”.

```
piuF = #(make-dynamic-script
  #{ \markup { \normal-text \italic più \dynamic f } #})
```

```
\score {
  \relative c'' {
    c2\f c\piuF
  }
}
```

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```
\relative c'' {
  \override Score.RehearsalMark.Y-offset = #3.5

  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1 \mark #14
  c1 \mark \default
  c1 \mark \default
  c1 \mark \default
  c1
}
```

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the `self-alignment-X` property of the `LyricText` object. Value `-1` means left-aligned, `0` centered, and `1` right-aligned. Alternatively, you can use the Scheme values `LEFT`, `CENTER`, and `RIGHT` instead of numbers. Other numeric values are possible, too – don't forget to add the `#` Scheme prefix for negative numbers!

```
\layout {
  ragged-right = ##f
}

\relative c'' {
  c1 c c c
}

\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "left-aligned"
  \once \override LyricText.self-alignment-X = #CENTER
  "centered"
  \once \override LyricText.self-alignment-X = 1
  "right-aligned"
  \once \override LyricText.self-alignment-X = #-1.5
  "overly left-aligned"
}
```

Merging multi-measure rests in a polyphonic part

Multi-measure rests in a polyphonic staff are placed differently depending on the voice they belong to. They can be printed on the same staff line using the setting below. If you omit the `\once` keyword, the change affects all rests in that follow in the given voice.

```
normalPos = \once \revert MultiMeasureRest.direction
```

```
<<
  { c''1 R c'' \normalPos R c'' R } \\  
  { c'1 R c' \normalPos R c' R }
>>
```

Modifying tuplet bracket length

Tuplet brackets can be made to extend horizontally to prefatory matter or the next note. By default, tuplet brackets end at the right edge of the final note of the triplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

```
\new RhythmicStaff {  
  % Defaults.  
  \time 2/4 \tuplet 3/2 { c4 4 4 }  
  \time 4/4 \tuplet 5/4 { 4 1 }  
  \time 3/4 2.  
}  
  
\new RhythmicStaff {  
  % Set triplets to be extendable...  
  \set tupletFullLength = ##t  
  % ...to cover all items up to the next note  
  \set tupletFullLengthNote = ##t  
  \time 2/4 \tuplet 3/2 { c4 4 4 }  
  % ...or to cover just whitespace.  
  \set tupletFullLengthNote = ##f  
  \time 4/4 \tuplet 5/4 { 4 1 }  
  \time 3/4 2.  
}
```

Outputting the version number

It is possible to print the version number of LilyPond in markup.

```
\markup { Processed with LilyPond version #(lilypond-version) }
```

Processed with LilyPond version 2.27.0

Piano template (simple)

Here is a simple piano staff with some notes.

```
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  \new PianoStaff \with { instrumentName = "Piano" }
  <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}
```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
```

```

}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
  \layout { }
  \midi { }
}

```

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```

melody = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4
}

```

```

a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  <<
    \new Voice = "mel" { \autoBeamOff \melody }
    \new Lyrics \lyricsto mel \text
    \new PianoStaff <<
      \new Staff = "upper" \upper
      \new Staff = "lower" \lower
    >>
  >>
  \layout {
    \context { \Staff \RemoveEmptyStaves }
  }
  \midi { }
}

```

Single-staff template with notes, lyrics, and chords

This template allows the preparation of a song with melody, words, and chords.

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

harmonies = \chordmode {

```

```

a2 c
}

\score {
  <<
    \new ChordNames {
      \set chordChanges = ##t
      \harmonies
    }
    \new Voice = "one" { \autoBeamOff \melody }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}

```

Single-staff template with notes and chords

Want to prepare a lead sheet with a melody and chords? Look no further!

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  f4 e8[ c] d4 g |
  a2 ~ a
}

harmonies = \chordmode {
  c4:m f:min7 g:maj c:aug |
  d2:dim b4:5 e:sus
}

\score {
  <<
    \new ChordNames {
      \set chordChanges = ##t
      \harmonies
    }
    \new Staff \melody
  >>
  \layout{ }
  \midi { }
}

```

Single-staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
    \new Voice = "one" {
      \autoBeamOff
      \melody
    }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

Single-staff template with only notes

This very simple template gives you a staff with notes, suitable for a solo instrument or a melodic fragment. Cut and paste this into a file, add notes, and you're finished!

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

\score {
  \new Staff \melody
}
```

```

\layout { }
\midi { }
}

```

Skips in lyric mode

The ‘s’ syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```

<<
\relative c'' { a1 | a }
\new Lyrics \lyricmode { \skip1 bla1 }
>>

```

Skips in lyric mode (2)

Although ‘s’ skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (“”) or underscores (_) are available.

```

<<
\relative c'' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>

```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a `\global` section for time and key signatures.

See also snippet “String quartet template with separate parts”.

```

global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c'' {
  c2 d
  e1
  \bar "|."
}

violinTwo = \new Voice \relative c'' {

```

```

g2 f
e1
\bar "|"
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|"
}

cello = \new Voice \relative c' {
  \clef bass
  c2 b
  a1
  \bar "|"
}

\score {
  \new StaffGroup <<
    \new Staff \with { instrumentName = "Violin 1" }
    << \global \violinOne >>
    \new Staff \with { instrumentName = "Violin 2" }
    << \global \violinTwo >>
    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}

```

The image shows a musical score for four instruments: Violin 1, Violin 2, Viola, and Cello. The staves are arranged vertically. Violin 1 and Violin 2 are in treble clef, Viola is in alto clef, and Cello is in bass clef. The time signature is common time (C). The music consists of a few notes in the first measure and rests in the second measure.

Using the `\tweak` command to tweak individual grobs

With the `\tweak` command, every grob can be tuned directly. Here are some examples of available tweaks.

```

\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  <
    \tweak font-size #3 c
    \tweak color #red d-\tweak font-size #8 -4
    \tweak style #'cross g
    \tweak duration-log #2 a
  >2
}

```

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn template”, the four voices are regrouped on only two staves.

```

\paper {
  top-system-spacing.basic-distance = 10
  score-system-spacing.basic-distance = 20
  system-system-spacing.basic-distance = 20
  last-bottom-spacing.basic-distance = 10
}

```

```

global = {
  \key c \major
  \time 4/4
}

```

```

sopMusic = \relative {
  c'4 c c8[( b)] c4
}

```

```

sopWords = \lyricmode {
  hi hi hi hi
}

```

```

altoMusic = \relative {
  e'4 f d e
}

```

```

altoWords = \lyricmode {
  ha ha ha ha
}

```

```

tenorMusic = \relative {
  g4 a f g
}

```

```

tenorWords = \lyricmode {
  hu hu hu hu
}

```

```

}

bassMusic = \relative {
  c4 c g c
}
bassWords = \lyricmode {
  ho ho ho ho
}

\score {
  \new ChoirStaff <<
    \new Lyrics = "sopranos" \with {
      % this is needed for lyrics above a staff
      \override VerticalAxisGroup.staff-affinity = #DOWN
    }
    \new Staff = "women" <<
      \new Voice = "sopranos" {
        \voiceOne
        << \global \sopMusic >>
      }
      \new Voice = "altos" {
        \voiceTwo
        << \global \altoMusic >>
      }
    >>
    \new Lyrics = "altos"
    \new Lyrics = "tenors" \with {

  >>
}

```

Volta brackets in multiple staves

By adding the `Volta_engraver` to the relevant staff, volte can be put over staves other than the topmost one in a score.

`\repeat` and related commands should be present in all staves.

```
voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
    \alternative {
      \volta 1 { d1 }
      \volta 2 { e1 }
    }
  }
}

<<
\new StaffGroup <<
  \new Staff \voltaMusic
  \new Staff \voltaMusic
>>
\new StaffGroup <<
  \new Staff \with { \consists "Volta_engraver" }
    \voltaMusic
  \new Staff \voltaMusic
>>
>>
```

The second system of the musical score consists of two staves. The first staff is a treble clef with a common time signature 'C'. It contains a half note 'C' on the first line, a half note 'D' on the second line, and a half note 'E' on the third line. The second staff is a bass clef with a common time signature 'C'. It contains a half note 'G' on the second line, a half note 'F' on the first line, and a half note 'E' on the first line. The system is divided into two measures by a double bar line. The first measure is labeled '1.' and the second measure is labeled '2.'. The notes in the first measure are 'C' and 'D' on the first staff, and 'G' and 'F' on the second staff. The notes in the second measure are 'E' on the first staff, and 'E' on the second staff.

32 Scheme

See also Section “Scheme tutorial” in *Extending* and Section “Interfaces for programmers” in *Extending*.

Adding extra fingering with Scheme

You can add additional elements to notes using `map-some-music`. In this example, an extra script is attached to a note (or a chord).

In general, you should first apply `\displayMusic` to music similar to what you want to create so that you can see its structure. This can be then used as template for your Scheme code.

```
addScript =
#(define-music-function (script music) (ly:event? ly:music?)
  (map-some-music
    (lambda (mus)
      (define (append-script-at! prop)
        (set! (ly:music-property mus prop)
          (append (ly:music-property mus prop)
            (list (ly:music-deep-copy script)))))
      mus)

    (case (ly:music-property mus 'name)
      ((EventChord)
        (append-script-at! 'elements))
      ((NoteEvent)
        (append-script-at! 'articulations))
      (else #f)))
    music))

{
  \addScript _6 { c'4-3 <c' e' g'> }
}
```

Adding indicators to staves which get split after a break

This snippet defines the commands `\splitStaffBarLine`, `\convUpStaffBarLine`, and `\convDownStaffBarLine`. These add arrows at a bar line to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

Note that the implementation in this snippet draws dimensionless arrows into the right margin. For normal printing, this doesn’t cause problems. However, it is necessary to increase the bounding box horizontally if you render the code as an image to avoid cropping, as demonstrated below.

```

#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* ((PI-OVER-180 (/ (atan 1 1) 34))
        (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))

    \Staff \RemoveEmptyStaves
    \override VerticalAxisGroup.remove-first = ##t
  }
}

```

The image displays three musical staves, each with two parts: S A (Soprano Alto) and T B (Tenor Bass). The first staff shows notes 'a', 'b', 'c', 'd' on the S A staff and corresponding notes on the T B staff. The second staff shows notes 'e', 'f', 'g', 'h' on the SI SII (Soprano II) and AI AII (Alto II) staves, with the T B staff below. The third staff shows notes 'i', 'j', 'k', 'l' on the S A staff and corresponding notes on the T B staff. The command \RemoveEmptyStaves is used to remove empty staves, leaving only the staves with notes.

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: `point-and-click` is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```

#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (let* ((x-ext (ly:stencil-extent stil X))
                 (y-ext (ly:stencil-extent stil Y))
                 (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
                 (new-stil
                  (ly:stencil-add
                   (ly:make-stencil url-expr x-ext y-ext)
                   stil)))
            (ly:grob-set-property! grob 'stencil new-stil))))))

Adding orchestral cues to a vocal score

This snippet shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `\cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `\addQuote`, the name to be inserted before the cue notes, then either UP or DOWN to specify either `\voiceOne` with the name above the staff or `\voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

```

cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {

```

```

\once \override TextScript.self-alignment-X = #RIGHT
\once \override TextScript.direction = $dir
<>-\markup { \tiny #name }
$music
}
#})

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
\paper { tagline = ##f }

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

\score {
  \relative c' {
    c4 c c c
  }
}

% and use it in a \markup block:
\markup {
  \date
}
```

Including the date!

Adjusting slur positions vertically

Using `\override Slur.positions` it is possible to set the vertical position of the start and end points of a slur to absolute values (or rather, forcing LilyPond's slur algorithm to consider these values as desired). In many cases, this means a lot of trial and error until good values are found. You probably have tried the `\offset` command next just to find out that it doesn't work for slurs, emitting a warning instead.

The code in this snippet allows you to tweak the vertical start and end positions by specifying *relative* changes, similar to `\offset`.

Syntax: `\offsetPositions #'(dy1 . dy2)`

```
offsetPositions =
#(define-music-function (offsets) (number-pair?)
  #{
    \once \override Slur.control-points =
      #(lambda (grob)
        (match-let (((_ . y1) _ _ (_ . y2))
                    (ly:slur::calc-control-points grob))
          ((off1 . off2) offsets))
        (set! (ly:grob-property grob 'positions)
              (cons (+ y1 off1) (+ y2 off2)))
          (ly:slur::calc-control-points grob)))
      #})

  \bar "||"
  g4(^"default" a d'2)
  \offsetPositions #'(1 . 0)
  g,,4(^"(1 . 0)" a d'2)
  \offsetPositions #'(2 . 0)
  g,,4(^"(2 . 0)" a d'2)
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to a DynamicText grob.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))
              (par-y (ly:grob-parent grob Y))
              (dir (ly:grob-property par-y 'direction))
              (staff-line-thickness

```

```

        (ly:output-def-lookup (ly:grob-layout grob)

```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

In the example below, function `mc-squared` is executed for all `NoteHead` grobs (within the current `Voice` context) at the current time step; the function modifies the grob's `stencil`, using the `staff-position` property to replace some pitches with markup.

See the ‘Extending’ manual (<https://lilypond.org/doc/v2.24/Documentation/extending/running-a-function-on-all-layout-objects>) for more information.

```
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
      grob 'stencil
      (grob-interpret-markup grob
        #{ \markup \lower #0.5
          #(case sp
              ((-5) "m")
              ((-3) "c ")
              ((-2) #{ \markup \teeny \bold 2 #})
              (else "bla")) #}))))

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Chord name exceptions

The property `chordNameExceptions` stores a list of chord name exceptions to handle cases either not covered or handled incorrectly.

The default chord names used by LilyPond follow the rules as given in Klaus Ignatzek's book “Die Jazzmethode für Klavier 1”; the algorithm to convert chords to chord names can be found in file `scm/chord-ignatzek-names.scm`. Additional rules are given as chord exceptions and stored in the variable `ignatzekExceptions`, as set up in file `ly/chord-modifiers-init.ly`.

This snippet modifies these exceptions in three steps.

1. Set up some music with chords and associated markup. By convention, the root (i.e., the lowest note) of each chord should have pitch c.
2. Call Scheme function `sequential-music-to-chord-exceptions` to create a new list of exceptions, then concatenate it with the existing ones. Since `ignatzekExceptions` is set up with this function's second parameter set to `#t` (to ignore the root of the chords), we have to do the same.
3. Register the new exception list.

% Step 1: Define music with chords and markup for maj9 and 6(add9).

```
chExceptionMusic = {
  <c e g b d'>-\markup { \super "maj9" }
  <c e g a d'>-\markup { \super "6(add9)" }
}
```

% Step 2: Create extended exception list.

```
chExceptions =
#(append (sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)
```

```
theMusic = \chordmode {
  g1:maj9 g1:6.9
  % Step 3: Register extended exception list.
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}
```

```
<<
  \new ChordNames \theMusic
  \new Voice \theMusic
>>
```

```
\layout {
  line-width = 10\cm
  ragged-right = ##f
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

% Association list of pitches to colors.

```
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
```

```

(cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
(cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
(cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
(cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
(cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
(cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
(cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
(cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
(cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
(cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
(cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue)))

% Compare pitch and alteration (not octave).
#(define (pitch-equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
        (cdr color))))

#(define (color-notehead grob)
  (pitch-to-color
   (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}

```

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used.

This example creates the rhythm used throughout *Mars*, from Gustav Holst's *The Planets*.

```

rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4

```

```

\rhythm c'
\rhythm c''
\rhythm g
}

```

Creating custom dynamics in MIDI output

The following example shows how to create a dynamic marking, not included in the default list, and assign a specific value to it so that it affects MIDI output.

The dynamic mark `\rfz` gets value 0.9.

```

#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
      0.9
      (default-dynamic-absolute-volume dynamic)))

\score {
  \new Staff {
    \set Staff.midiInstrument = "cello"
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics
    \new Voice {
      \relative {
        a'4\pp b c-\rfz
      }
    }
  }
  \layout {}
  \midi {}
}

```

Customizing the position and number of dots in repeat sign bar lines

If you want to customize the position and/or number of dots in repeat sign bar lines, you can define new custom bar lines or redefine the way default repeat signs are drawn. This may be particularly helpful when using a staff with custom line positions, as shown in this snippet.

```

#(define ((make-custom-dot-bar-line dot-positions) is-span grob extent)
  "Draw dots (repeat sign dots) at DOT-POSITIONS.

```

The coordinates of DOT-POSITIONS are equivalent to the coordinates of ``StaffSymbol.line-positions``; a dot position of X and a line position of X indicate the same vertical position.

IS-SPAN is not used in this custom function."

```

(let* ((staff-space (ly:staff-symbol-staff-space grob))
      (dot (ly:font-get-glyph (ly:grob-default-font grob)
                              "dots.dot"))
      (stencil empty-stencil))
  (for-each
   (lambda (dp)
     (set! stencil (ly:stencil-add stencil
                                   (ly:stencil-translate-axis
                                    dot (* dp (/ staff-space 2)) Y))))
   dot-positions)
  stencil))

% With the procedure above we can define custom bar lines, for example,
% that resemble standard repeat sign bar lines except that there are
% three dots at staff positions -3, 0, and 3.

#(add-bar-glyph-print-procedure "*" (make-custom-dot-bar-line '(-3 0 3)))
\defineBarLine ".|*" #'(" " " " " ")
\defineBarLine "*|. " #'(" " " " " ")

% We can also customize the dot positions used in all default repeat
% signs by redefining the print procedure of the colon bar glyph (":").
% On a staff with line positions of `(-4 -2 2 4)`, the default repeat

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob's ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob's ancestry that can lead to confusion:

- The types of parents a grob has may depend on context.
- For some grobs, the X- and Y-parents are the same.
- A particular *ancestor* may be related to a grob in multiple ways.
- The concept of *generations* is misleading.

For example, the System grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a VerticalAlignment grob.

The macro defined in this snippet prints (to the console) a textual representation of a grob's ancestry. For example, the call

```
{
  \once \override NoteHead.before-line-breaking = #display-ancestry
  c
}
```

generates the following output.

```
-----
NoteHead
X,Y: NoteColumn
  X: PaperColumn
    X,Y: System
  Y: VerticalAxisGroup
    X: NonMusicalPaperColumn
      X,Y: System
```

```

Y: VerticalAlignment
X: NonMusicalPaperColumn
  X,Y: System
Y: System

```

As a consequence, you have to execute the code in this snippet by yourself, since the generated output file doesn't show the data we are interested in.

```

Drawing circles around note heads

A circle can be drawn around a note head by providing a custom Scheme function to temporarily override the stencil property.

```
circle = \tweak NoteHead.stencil
  #(\lambda (grob)
    (let* ((note (ly:note-head::print grob))
      (combo-stencil (ly:stencil-add
        note
        (circle-stencil note 0.1 0.8))))
      (ly:make-stencil (ly:stencil-expr combo-stencil)
        (ly:stencil-extent note X)
        (ly:stencil-extent note Y))))
  \etc

{ a' b' \circle c'' d'' }
```

Drawing circles around various objects

The `\circle` command draws circles around `\markup` objects. For other objects, specific tweaks may be required, as demonstrated for rehearsal marks and measure numbers.

```
\relative c' {
  c1
  \set Score.rehearsalMarkFormatter =
    #(\lambda (mark context)
      (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d^\markup {
    \override #'(thickness . 3) {
      \circle foo
    }
  }
  \override Score.BarNumber.break-visibility = #all-visible
  \override Score.BarNumber.stencil =
    #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Extending glissandi across repeats

A glissando that extends into several `\alternative` blocks can be simulated by adding a hidden grace note with a glissando at the start of each `\alternative` block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function that takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = 3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {
  \new StaffGroup <<
    \new Staff <<
      \new Voice { \clef "G_8" \music }
    >>
    \new TabStaff <<
      \new TabVoice { \clef "moderntab" \music }
    >>
  >>
}
```

Flat ties

This snippet provides a function `flared-tie` to draw a tie that consist of straight lines. It is intended as a replacement for the default tie-drawing function (i.e., a replacement argument for the `stencil` property of the `Tie` grob).

The argument of `flared-tie` is a list of coordinate pairs that specify additional points between the first and last point to span up the tie's lines. The first and last point are identical to the original tie's start and end point, respectively. The X and Y coordinate values are multiples of the bounding box length and height of the original tie (also taking care of the tie's direction); consequently, the first point has coordinates (0,0), and the last point (1,0).

The function `flare-tie` defines a shorthand for a flat tie. Further tweaking of the shape is possible by overriding `Tie.details.height-limit` or with `\shape`. It is also possible to change the custom definition on the fly.

```
#(define ((flared-tie coords) grob)
  (define (pair-to-list pair)
    (list (car pair) (cdr pair)))

  (define (normalize-coords goods x y dir)
    (map

The image displays six staves of musical notation, numbered 1 through 6, illustrating different tie and slur effects:

- Staff 1:** A single staff with a treble clef and a common time signature. It shows a series of four eighth notes connected by a long horizontal slur.
- Staff 2:** A single staff with a treble clef. It shows a series of four eighth notes connected by a long horizontal slur, with a second slur below it.
- Staff 3:** A single staff with a treble clef. It shows a series of four eighth notes connected by a long horizontal slur. The text "height-limit = 14" is written above the staff.
- Staff 4:** A single staff with a treble clef. It shows a series of four eighth notes connected by a long horizontal slur. The text "height-limit = 0.5" is written above the staff.
- Staff 5:** A single staff with a treble clef. It shows a series of four eighth notes connected by a long horizontal slur. The text "\shape #'((0 . 0) (0 . -1) (0 . -1) (0 . 0))" is written above the staff.
- Staff 6:** A single staff with a treble clef. It shows a series of four eighth notes connected by a long horizontal slur. The text "#(flared-tie '((0.2 . 2) (0.5 . -3) (0.8 . 1)))" is written above the staff. Below the staff, the text "#(flared-tie '((0.5 . 2)))" is written.

Flute slap notation

It is possible to indicate special articulation techniques such as a flute “tongue slap” by replacing the note head with the appropriate glyph. For that we can draw the accent-like note head with `\markup`.

```

slap =
#(define-music-function (music) (ly:music?)
  #{
    \temporary \override NoteHead.stencil =
      #ly:text-interface::print
    \temporary \override NoteHead.text =
      \markup
        \translate #'(1 . 0)

```

```

\override #'(thickness . 1.4)
\overlay { \draw-line #'(-1.2 . 0.4)
           \draw-line #'(-1.2 . -0.4) }
\temporary \override NoteHead.stem-attachment =
#(lambda (grob)
  (let* ((stem (ly:grob-object grob 'stem))
        (dir (ly:grob-property stem 'direction UP))
        (is-up (eqv? dir UP)))
    (cons dir (if is-up 0 -0.8)))))
#music
\revert NoteHead.stencil
\revert NoteHead.text
\revert NoteHead.stem-attachment
#})

\relative c' {
  c4 \slap c d r
  \slap { g4 a } b r
}

```

Fretboards alternate tables

Alternate fretboard tables can be created. These would be used in order to have alternate fretboards for a given chord. In order to use an alternate fretboard table, the table must first be created. Fretboards are then added to the table.

The created fretboard table can be blank, or it can be copied from an existing table. The table to be used in displaying predefined fretboards is selected by the property `\predefinedDiagramTable`.

```

\include "predefined-guitar-fretboards.ly"

% Make a blank new fretboard table.
#(define custom-fretboard-table-one
  (make-fretboard-table))

% Make a new fretboard table as a copy of `default-fret-table`.
#(define custom-fretboard-table-two
  (make-fretboard-table default-fret-table))

% Add a chord to `custom-fretboard-table-one`.
\storePredefinedDiagram #custom-fretboard-table-one
  \chordmode {c}
  #guitar-tuning
  "3-(;3;5;5;5;3-);"

% Add a chord to `custom-fretboard-table-two`.
\storePredefinedDiagram #custom-fretboard-table-two
  \chordmode {c}
  #guitar-tuning

```

```

"x;3;5;5;5;o;"

<<
\chords {
  c1 | d1 |
  c1 | d1 |
  c1 | d1 |
}
\new FretBoards {
  \chordmode {
    \set predefinedDiagramTable = #default-fret-table
    c1 | d1 |
    \set predefinedDiagramTable = #custom-fretboard-table-one
    c1 | d1 |
    \set predefinedDiagramTable = #custom-fretboard-table-two
    c1 | d1 |
  }
}
\new Staff {
  \clef "treble_8"
  <<
    \chordmode {
      c1 | d1 |
      c1 | d1 |
      c1 | d1 |
    }

    }
  >>
}
>>

```

Diagram illustrating fretboard positions for C and D chords, showing different table configurations (Default table, New table from empty, New table from default) and their corresponding musical notation on a staff.

Generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, a drawing specification for `ly:make-stencil` can be used to generate the shape. This snippet gives an example for a parallelogram-shaped note head.

Unfortunately, the available commands in a drawing specification are currently not documented (this is tracked in Issue #6874 (<https://gitlab.com/lilypond/lilypond/-/issues/>)).

6874)); in any case, the used path sub-command has the following signature, quite similar to the `make-path-stencil` Scheme function.

```
(path thickness command-list line-cap-style line-join-style fill)
```

The commands in *command-list* resemble PostScript drawing commands but with arguments after the command name.

```
parallelogram =
  #(ly:make-stencil
    '(path 0.1
      (rmoveto 0 0.25
        lineto 1.2 0.75
        lineto 1.2 -0.25
        lineto 0 -0.75
        lineto 0 0.25)
      round
      round
      #t)
    (cons -0.05 1.25)
    (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}
```

Generating custom flags

The stencil property of the Flag grob can be set to a custom Scheme function to generate the glyph for the flag.

```
#(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
        (log (- (ly:grob-property stem-grob 'duration-log) 2))
        (is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
        (yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8))))
        (flag-stencil (make-filled-box-stencil '(-0.4 . 0.4) yext))
        (stroke-style (ly:grob-property grob 'stroke-style))
        (stroke-stencil (if (equal? stroke-style "grace")
                              (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
                              empty-stencil)))
    (ly:stencil-add flag-stencil stroke-stencil)))
```

```
% Create a flag stencil by looking up the glyph from the font
```

```

#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
        (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
        (flag (retrieve-glyph-flag "" dir "" grob))
        (line-thickness (ly:staff-symbol-line-thickness grob))
        (stem-thickness (ly:grob-property stem-grob 'thickness))
        (stem-width (* line-thickness stem-thickness))
        (stroke-style (ly:grob-property grob 'stroke-style))
        (stencil (if (null? stroke-style)
                     flag
                     (add-stroke-glyph flag stem-grob dir stroke-style "")))
        (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0)))
    (ly:stencil-translate rotated-flag (cons (- (/ stem-width 2)) 0))))

Generating random notes

This Scheme-based snippet generates random notes. Use as

```
\randomNotes n from to dur
```

to generate *n* random notes between pitches *from* and *to*, with duration *dur*.

```

randomNotes =
#(define-music-function (n from to dur)
  (integer? ly:pitch? ly:pitch? ly:duration?)
  (let ((from-step (ly:pitch-steps from))
        (to-step (ly:pitch-steps to)))
    (make-sequential-music
     (map (lambda (_)
            (let* ((step (+ from-step
                             (random (- to-step from-step))))
                  (pitch (ly:make-pitch 0 step 0)))
              #{ $pitch $dur #}))
          (iota n))))))

```

```
\randomNotes 24 c' g'' 8
```

Generating whole scores (also book parts) in Scheme without using the parser

A LilyPond score internally is just a Scheme expression, generated by the LilyPond parser. Using Scheme, one can also automatically generate a score without an input file. If you have the music expression in Scheme, a score can be generated by simply calling

```
(scorify-music music)
```

on your music. This generates a score object, for which you can then set a custom layout block with

```

(let* ((layout (ly:output-def-clone $defaultlayout)))
  ; modify the layout here, then assign it:
  (ly:score-add-output-def! score layout))

```

Finally, all you have to do it to pass this score to LilyPond for typesetting. This snippet defines functions (add-score score), (add-text text), and (add-music music) to pass a complete score, some markup, or some music to LilyPond for typesetting.

This snippet also works for typesetting scores inside a `\book {...}` block as well as top-level scores. To achieve this, each score scheduled for typesetting is appended to the list of top-level scores, and the top-level book handler (which is a Scheme function called to process a book once a `\book{...}` block is closed) is modified to insert all collected scores so far to the book.

Note: For technical reasons, only the first `\book` is shown, as the other `\book` commands create additional output files.

```

#(define-public (add-score score)
  (ly:parser-define! 'toplevel-scores
    (cons score (ly:parser-lookup 'toplevel-scores))))

#(define-public (add-text text)
  (add-score (list text)))

#(define-public (add-music music)
  (collect-music-aux (lambda (score)
    (add-score score))

```

```

        (ly:score-add-output-def! score layout)
        (add-text title)
        (add-score score))
    (set! pitch (modulo (1+ pitch) 7))))

oneNoteScore =
#(define-void-function () ()
  (add-one-note-score))

\book {
  \oneNoteScore

  \paper { tagline = ##f }
}

```

Score with a do

Isolated percent repeats

Isolated percents can also be printed.

```

makePercent =
#(define-music-function (note) (ly:music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
    'length (ly:music-length note)))

\relative c' {
  \makePercent s1
}

```

Numbers as easy note heads

Easy notation note heads use the `note-names` property of the `NoteHead` object to determine what appears inside the note head. By overriding this property, it is possible to print numbers representing the scale-degree.

A simple engraver can be created to do this for every note head object it sees.

```
#(define Ez_numbers_engraver
  (make-engraver
    (acknowledgers
      ((note-head-interface engraver grob source-engraver)
        (let* ((context (ly:translator-context engraver))

Overriding articulations by type

Sometimes you may want to affect a single articulation type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom settings. One use-case might be to create a style sheet.

```
#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:event-property (ly:grob-property grob 'cause)
                                     'articulation-type))
           (tweaks (assoc-ref ls type)))
      (when tweaks
        (for-each
         (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
         tweaks))))))
```

```
customScripts =
#(define-music-function (settings) (list?)
  #{
    \override Script.before-line-breaking =
      #(custom-script-tweaks settings)
  })
revertCustomScripts = \revert Script.before-line-breaking
```

% Example

% Predefine two sets of desired tweaks.

```
#(define my-settings-1

Positioning grace notes with floating space

Setting the property `strict-grace-spacing` makes the musical columns for grace notes ‘floating’, i.e., decoupled from the non-grace notes: first the normal notes are spaced, then the (musical columns of the) graces are put left of the musical columns for the main notes.

Due to Issue #6876 (<https://gitlab.com/lilypond/lilypond/-/issues/6876>), however, accidentals are ignored if this property is set. This snippet gives a workaround to circumvent the problem.

Another unfortunate side effect of this property is that LilyPond does not check whether there is enough horizontal space for grace notes (this is tracked as Issue #2630 (<https://>

gitlab.com/lilypond/lilypond/-/issues/2630)). You have to make sure that enough space is available, for example, by using `\newSpacingSection` together with a proper value for the `base-shortest-duration` of the `SpacingSpanner` grob.

```
shiftedGrace =
#(define-music-function (offset music) (number? ly:music?)
  #{
    \override NoteHead.X-offset = #(- offset 0.85)
    \override Stem.X-offset = #offset
    \grace { $music }
    \revert NoteHead.X-offset
    \revert Stem.X-offset
  })

\relative c' ' <<

  \context {
    \Score
    \override SpacingSpanner.strict-grace-spacing = ##t
  }
}
```

Print chord names with same root and different bass as slash and bass note

To print subsequent chord names only differing in their bass note as slash and bass note without a root symbol, use the Scheme engraver defined in this snippet. The behaviour is controlled by the `chordChanges` context property.

```
#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "Drop root for follow-up chord names that differ only in bass."
```

In other words, the chord name sequence 'D D/C D/B' gets actually printed as 'D /C /B'.

Set the ``chordChanges`` context property to ``#t`` to activate this feature."

```
(let ((chord-pitches '())
      (last-chord-pitches '())
      (bass-pitch #f))
  (make-engraver
```

```

((initialize this-engraver)
 (let ((chord-note-namer (ly:context-property ctx
                                         'chordNoteNamer)))
   ;; Set `chordNoteNamer`, respecting user setting if already
   ;; done.
   (ly:context-set-property! ctx 'chordNoteNamer
                             (if (procedure? chord-note-namer)
                                 chord-note-namer
                                 (chord-name:markup #f)))))

(listeners

Replacing default MIDI instrument equalization

The default MIDI instrument equalizer can be replaced by setting the `instrumentEqualizer` property in the Score context to a user-defined Scheme procedure that uses a MIDI instrument name as its argument along with a pair of fractions indicating the minimum and maximum volumes, respectively, to be applied to that specific instrument.

The following example sets the minimum and maximum volumes for flute and clarinet.

```
#(define my-instrument-equalizer-alist '())

#(set! my-instrument-equalizer-alist
  (append
    '(("flute" . (0.7 . 0.9))
      ("clarinet" . (0.3 . 0.6)))
    my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
      (cdr entry))))

\score {
  <<
    \new Staff {
      \key g \major
      \time 2/2
      \set Score.instrumentEqualizer = #my-instrument-equalizer
      \set Staff.midiInstrument = "flute"
      \new Voice \relative {
        r2 g''\mp g fis~
        4 g8 fis e2~
        4 d8 cis d2
      }
    }
  }
  \new Staff {
    \key g \major
    \set Staff.midiInstrument = "clarinet"
    \new Voice \relative {
      b'1\p a2. b8 a
      g2. fis8 e
      fis2 r
    }
  }
}
```

```

    }
  >>
  \layout { }
  \midi { }
}

```

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `break-align-orders` property of the `BreakAlignment` grob.

If you look up the definition of the `break-alignment-interface` in LilyPond's Internals Reference (https://lilypond.org/doc/v2.24/Documentation/internals/break_002dalignment_002dinterface), you get the following list of available break-align symbols:

```

ambitus
breathing-sign
clef
cue-clef
cue-end-clef
custos
key-cancellation
key-signature
left-edge
signum-repetitionis
staff-bar
staff-ellipsis
time-signature

```

From this list, we find that we want to move `key-cancellation` so that it comes before `staff-bar`. This is accomplished with the `\breakAlignInsert` function.

```

music = { \key es \major d'1 \bar "||"
          \key a \major d'1 }

```

```

{ <>^\markup "default"
  \music }

```

```

{ <>^\markup "cancellation first"
  \breakAlignInsert key-cancellation before staff-bar
  \music }

```

Slanted parentheses around dynamics

The easiest way to parenthesize dynamics is to use the normal `\parenthesize` command and adjust the font size, e.g., `{ c'4\tweak Parentheses.font-size 2 \parenthesize \f }`. However, this results in upright parentheses, while dynamic marks are normally slanted. This snippet gives a method to make the parentheses slanted as well.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
    }
    #})))
```

```
\relative c'' {
  c4\paren\f c c \dynamicUp c\paren

}

```

Three-sided box

This example shows how to add a markup command to get a three-sided box around some text (or other markup).

```
% New command to add a three-sided box, with sides north, west, and south.
% Based on the `box-stencil` command defined in `scm/stencil.scm`.
% Note that ";" is used to comment a line in Scheme.
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
        (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
        (x-rule (make-filled-box-stencil
                  (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the `\\box` command defined
% in `scm/define-markup-commands.scm`.
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round ARG.
```

Look at THICKNESS, BOX-PADDING, and FONT-SIZE properties to determine line thickness and padding around the markup."

```
(let ((pad (* (magstep font-size) box-padding))
      (m (interpret-markup layout props arg)))
  (NWS-box-stencil m thickness pad)))
```

```
\\relative c' {
  c1^\\markup { \\NWS-box ABCD }
  c1^\\markup { \\NWS-box \\note {4} #1.0 }
}
```

Transposing pitches with minimum accidentals (“smart” transpose)

This example uses some Scheme code to enforce enharmonic modifications for notes in order to have the minimum number of accidentals. In this case, the following rules apply:

- double accidentals should be removed
- b sharp \rightarrow c
- e sharp \rightarrow f
- c flat \rightarrow b
- f flat \rightarrow e

In this manner, the most natural enharmonic notes are chosen.

```
#(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))
        ;; `ly:pitch-alteration` returns quarter tone steps.
        (a (* 4 (ly:pitch-alteration p)))
        (n (ly:pitch-notename p)))
    (cond
      ((and (> a 1)
            (or (eqv? n 6) (eqv? n 2))))
      (set! a (- a 2))
      (set! n (+ n 1)))
      ((and (< a -1)
            (or (eqv? n 0) (eqv? n 3))))
      (set! a (+ a 2))
      (set! n (- n 1))))
    (cond
      ((> a 2)
       (set! a (- a 4))
       (set! n (+ n 1)))
      ((< a -2)
       (set! a (+ a 4))
       (set! n (- n 1))))
    (when (< n 0)
      (set! o (- o 1))
      (set! n (+ n 7)))
    (when (> n 6)
      (set! o (+ o 1))
      (set! n (- n 7)))
    (ly:make-pitch o n (/ a 4))))

#(define (naturalize music)
  (let ((es (ly:music-property music 'elements))

  \naturalizeMusic \transpose c deses { \music }
}

```

Two \partCombine pairs on one staff

The `\partCombine` function takes two music expressions, each containing a part, and distributes them among four Voice contexts named “one”, “two”, “solo”, and “shared”, depending on when and how the parts are merged into a common voice.

Variants of `\partCombine` are `\partCombineUp` and `\partCombineDown` to produce up-stem and down-stem merging of two voices, respectively. Combining them to squeeze four parts into a single staff, however, need some special setup, which this snippet defines accordingly.

```

customPartCombineUp =
#(define-music-function (part1 part2) (ly:music? ly:music?)
  "Make an up-stem `VoiceBox` context that combines PART1 and PART2.

```

The context is called 'Up'; internally, the function calls `\partCombineUp`.`

```

#{
  \new VoiceBox = "Up" <<
    \context Voice = "one" { \voiceOne }
    \context Voice = "two" { \voiceThree }
    \context Voice = "shared" { \voiceOne }
    \context Voice = "solo" { \voiceOne }
    \context NullVoice = "null" {}
    \partCombine #part1 #part2
  >>
#})

```

```

customPartCombineDown =
#(define-music-function (part3 part4) (ly:music? ly:music?)
  "Make a down-stem `VoiceBox` context that combines PART3 and PART4.

```

The context is called 'Down'; internally, the function calls `\partCombineDown`.`

```

#{

```

```

\new VoiceBox = "Down" <<
  \set VoiceBox.soloText = #"Solo III"
  \set VoiceBox.soloIIIText = #"Solo IV"
  \context Voice = "one" { \voiceFour }
  \context Voice = "two" { \voiceTwo }
  \context Voice = "shared" { \voiceFour }
  \context Voice = "solo" { \voiceFour }
  \context NullVoice = "null" {}
  \partCombine #part3 #part4
>>
#})

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }

    \accepts "Voice"
    \accepts "NullVoice"
  }
}

```

User-defined time signatures

New time signature styles can be defined. The time signature in the second measure is printed upside down in both staves.

```

#(add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction))))

<<
  \new Staff {
    \time 3/4 f'2.
    \override Score.TimeSignature.style = #'topsy-turvy
    \time 3/4 R2. \bar "|"
  }
  \new Staff {
    R2. e''
  }
>>

```

Using ly:grob-object to access grobs with \tweak

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a `NoteHead` callback, but the technique is not limited to `NoteHeads`. However, the `NoteHead` callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The console output of the example function below (`display-grobs`) is as follows.

```

-----
#<Grob Accidental >
()
#<Grob Stem >

```

It is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

```

#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)
  ;; notehead is grob
  (ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob

```

```

(let ((notecolumn (notehead-get-notecolumn notehead)))
  (ly:grob-object notecolumn 'stem)))

#(define (display-grobs notehead)
  ;; notehead is grob
  (let ((accidental (notehead-get-accidental notehead))
        (arpeggio (notehead-get-arpeggio notehead))
        (stem (notehead-get-stem notehead)))
    (format (current-error-port) "~2&~a\n" (make-string 20 #\ -))
    (for-each
     (lambda (x) (format (current-error-port) "~a\n" x))
     (list accidental arpeggio stem))))

\relative c' {
  %% display grobs for each note head:
  \%override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}

```

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```

upline =
\tweak stencil
#(lambda (grob)
  (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
\stopped

\relative c' {
  a'4^\upline a( c d')_\upline
}

```

33 Spacing

See also Section “Spacing issues” in *Notation Reference*.

Adjusting vertical spacing of lyrics

This snippet shows how to bring the lyrics line closer to the staff.

```
music = \relative c' { c4 d e f | g4 f e d | c1 }
text = \lyricmode { aa aa aa aa aa aa aa aa }

<<
\new Staff \new Voice = melody \music
% Default layout:
\new Lyrics \lyricsto melody \text

\new Staff \new Voice = melody \music
% Reducing the minimum space below the staff and above the lyrics.
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
} \lyricsto melody \text
>>
```

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##t
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = #only-if-beamed
  a[-1 b]-2 g-0 r
}
```

Breaking horizontal alignment of dynamics and textscripts

LilyPond uses `DynamicLineSpanner` grobs to horizontally align successive dynamic objects like hairpins and dynamic text, even if they are positioned on different sides of a staff. This connection cannot be broken, contrary to the vertical alignment (see snippet “Breaking vertical alignment of dynamics and textscripts”).

There are two solutions to circumvent the problem.

- Modify the `shorten-pair` property of the `Hairpin` grob to compensate the offset by which the hairpin was moved.
- Put the two dynamic objects into different voices.

Both solutions are demonstrated in this snippet.

```
{
  <>^"default"
  f' _\pp ^\> f' f' f'\!
}

{
  <>^\markup { setting \typewriter shorten-pair }
  f' _\pp \tweak shorten-pair #'(-3 . 0) ^\> f' f' f'\!
}

{
  <>^\markup { using another \typewriter Voice context }
  << { f' ^\> f' f' f'\! }
  \new Voice { s4 _\pp } >>
}

\layout {
  line-width = 8\cm
  ragged-right = ##f

  \context {
    \Voice
    \override TextScript.staff-padding = #3.5
  }
}
```

Breaking vertical alignment of dynamics and textscripts

By default, LilyPond uses `DynamicLineSpanner` grobs to vertically align successive dynamic objects like hairpins and dynamic text. However, this is not always wanted. By inserting `\breakDynamicSpan`, which ends the alignment spanner prematurely, this vertical alignment can be avoided.

See also snippet “Breaking horizontal alignment of dynamics and textscripts”.

```
{ g1\< |
  e''\f\> |
  c'\p }
```

```
{ g1\< |
  e''\breakDynamicSpan\f\> |
  c'\p }
```

Harmonizing bar line thickness for staves with different sizes

When using `\magnifyStaff` only for some staves in a `StaffGroup`, `BarLine` grobs do not align any more due to its changed properties `thick-thickness`, `hair-thickness`, and `kern`.

To fix this, multiple workarounds are available, as demonstrated below.

```
\markuplist {
% First row.
\fill-line {
  \score {
    \new StaffGroup <<
      \new Staff \with { \magnifyStaff #1/2 } {
        \textMark \markup \tiny "default"
        b1 b \bar "|."
      }
      \new Staff { b b }
    >>
  }
  \score {
    \new StaffGroup <<
      \new Staff \with { \magnifyStaff #1/2 } {
        \textMark \markup \tiny \column { "reverting only the"
```

[illegible]

```

\textMark \markup \tiny \column { "applying an"
                                   "intermediate"
                                   "value to all staves" }

b1 b \bar "|." }
\new Staff \with { #(scale-props 'magnifyStaff 3/4 #t
                             '((BarLine thick-thickness)
                               (BarLine hair-thickness)
                               (BarLine kern)))) } {

    b b }

>>
}
""
}
}

```

Page label

Page labels may be placed inside music or at top-level, and referred to in markups.

```

See page ? for licensing information.

Proportional strict notespacing

If the `strict-note-spacing` property of the `SpacingSpanner` grob is set to `#t`, spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```

\relative c' ' <<
\override Score.SpacingSpanner.strict-note-spacing = ##t
\set Score.proportionalNotationDuration = #1/16

\new Staff {
  c8[ c \clef alto c c \grace { d16 } c8 c] c4
  c2 \grace { c16[ c16] } c2
}
\new Staff {
  c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
  c1
}
>>

```

Vertically aligned dynamics and textscripts

For all `DynamicLineSpanner` objects (i.e., hairpins and dynamic texts), the vertical minimum distance between their reference line and the staff is given by the value in the `staff-padding` property, unless other notation elements forces them to be farther away. Setting this property to a sufficiently large value aligns the dynamics.

The same idea, together with `\textLengthOn`, is used to align text scripts along their baseline.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = 3
  \textLengthOn
  \override TextScript.staff-padding = 1
  \music
}
```

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties `alignBelowContext` and `alignAboveContext` to control the positioning of lyrics and ossias.

```
\relative c' <<
  \new Staff = "1" { c4 c c c }
  \new Staff = "2" { d4 d d d }
  \new Staff = "3" { e4 e e e }

  { \skip 2
    <<
      \lyrics {
```

```

\set alignBelowContext = "1"
lyrics4 below
}
\new Staff \with {
  alignAboveContext = "3"
  fontSize = -2
  \override StaffSymbol.staff-space = #(magstep -2)
  \remove "Time_signature_engraver"
  \override VerticalAxisGroup.staff-staff-spacing =
    #'((minimum-distance . 0)
      (basic-distance . 0)
      (padding . 1))
} {
  \tuplet 6/4 {
    \override TextScript.padding = 2
    c8[~"ossia above" d e d e f]
  }
}
>>
}
>>

```

34 Specific notation

Accordion register symbols

Accordion register symbols are available as `\markup` as well as as standalone music events (as register changes tend to occur between actual music events). Bass registers are not overly standardized. The available commands can be found in ‘Discant symbols’ in the Notation Reference (<https://lilypond.org/doc/v2.24/Documentation/notation/accordion#discant-symbols>).

```
#(use-modules (lily accreg))
```

```

```

The image shows a musical score for piano and accordion. The piano part is written on two staves (treble and bass clef) in 2/4 time. The accordion part is written on a single staff in bass clef, also in 2/4 time. The score is divided into four measures. The first measure has a piano melody starting with a quarter rest, followed by eighth and sixteenth notes. The second measure continues the piano melody. The third measure has a piano melody with a quarter rest, followed by eighth and sixteenth notes. The fourth measure has a piano melody with a quarter rest, followed by eighth and sixteenth notes. The accordion part consists of four chords: D, C, B, and A. Above each chord is a discant symbol: 'b' for D, 'am' for C, 'gm' for B, and 'a' for A. The chords are marked with a circled 'x' symbol.

Adding bar lines to ChordNames context

To add bar line indications in the ChordNames context, add the `Bar_engraver`.

```

\new ChordNames \with {
  \override BarLine.bar-extent = #'(-1 . 3)
  \consists "Bar_engraver"
}

\chordmode {
  f1:maj7 f:7 bes:7
}

```

$F^{\Delta} \quad | \quad F^7 \quad | \quad Bb^7 \quad |$

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```

drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
    \new DrumStaff \with {
      instrumentName = "timbales"
      drumStyleTable = #timbales-style
      \override StaffSymbol.line-count = #2
      \override BarLine.bar-extent = #'(-1 . 1)
    }
    <<
      \timb
    >>
    \new DrumStaff \with { instrumentName = "drums" }
    <<
      \new DrumVoice { \stemUp \drh }
      \new DrumVoice { \stemDown \drl }
    >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of `\markup` and `\finger`.

```
one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 2
  }
}

\score {
  \new TabStaff {
    \tabFullNotation
    \stemUp
    e8\4^one b\2 <g\3 e'\1>~>[ b\2 e\4]
    <a\3 fis'\1>~>^threeTwo[ b\2 e\4]
  }
}
```

Aiken head thin variant noteheads

Aiken head white notes get harder to read at smaller staff sizes, especially with ledger lines. Losing interior white space makes them appear as quarter notes.

```
\score {
  {
    \aikenHeads
    c''2 a' c' a

    % Switch to thin-variant noteheads
    \set shapeNoteStyles = ##(doThin reThin miThin
                             faThin sol laThin tiThin)
    c'' a' c' a
  }
}
```

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##t
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = #only-if-beamed
  a[-1 b]-2 g-0 r
}
```

Changing the number of lines in a staff

The number of lines in a staff may be changed by overriding the `StaffSymbol` property `line-count`.

```
upper = \relative c'' {
  c4 d e f
}

lower = \relative c {
  \clef bass
  c4 b a g
}

\score {
  \context PianoStaff <<
    \new Staff {
      \upper
    }
    \new Staff {
      \override Staff.StaffSymbol.line-count = #4
      \lower
    }
  >>
}
```

Chant or psalm notation

This form of notation is used for psalm chant, where verses are not always of the same length.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \section
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \section
    \stemOff a'\breve~\markup { \italic flexe }
    \stemOn g'2 \fine
  }
}
```

Chord name exceptions

The property `chordNameExceptions` stores a list of chord name exceptions to handle cases either not covered or handled incorrectly.

The default chord names used by LilyPond follow the rules as given in Klaus Ignatzek's book "Die Jazzmethode für Klavier 1"; the algorithm to convert chords to chord names can be found in file `scm/chord-ignatzek-names.scm`. Additional rules are given as chord exceptions and stored in the variable `ignatzekExceptions`, as set up in file `ly/chord-modifiers-init.ly`.

This snippet modifies these exceptions in three steps.

1. Set up some music with chords and associated markup. By convention, the root (i.e., the lowest note) of each chord should have pitch `c`.
2. Call Scheme function `sequential-music-to-chord-exceptions` to create a new list of exceptions, then concatenate it with the existing ones. Since `ignatzekExceptions` is set up with this function's second parameter set to `#t` (to ignore the root of the chords), we have to do the same.
3. Register the new exception list.

```

% Step 1: Define music with chords and markup for maj9 and 6(add9).
chExceptionMusic = {
  <c e g b d'>-\markup { \super "maj9" }
  <c e g a d'>-\markup { \super "6(add9)" }
}

% Step 2: Create extended exception list.
chExceptions =
#(append (sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  % Step 3: Register extended exception list.
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}

<<
  \new ChordNames \theMusic
  \new Voice \theMusic
>>

\layout {
  line-width = 10\cm
  ragged-right = ##f
}

```

Chord name major7

The layout of the major 7 can be tuned with the `majorSevenSymbol` context property.

```

\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}

```

C^Δ C^{j7}

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context property `maximumFretStretch` is set to value 4, though, resulting in a warning about “No string for pitch ...”, and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string numbers to all notes of a chord to fix that.

```
% The code below prints two warnings for the second chord,
% which may be omitted by uncommenting the following line.
%
% #(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))

mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}

<<
  \new FretBoards \mus
  \new TabVoice \mus
>>
```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Contemporary glissando

A contemporary glissando without a final note can be typeset using a hidden note and cadenza timing.

```

\relative c' ' {
  \time 3/4
  \override Glissando.style = #'zigzag
  c4 c
  \cadenzaOn
  c4\glissando
  \hideNotes
  c,,4
  \unHideNotes
  \cadenzaOff
  \bar "|"
}

```

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely by using the property `fingeringOrientation`. For fingering orientation to apply, the fingering command must be used within a chord construct (`<...>`), even for single notes. Orientation for string numbers and right-hand fingerings may be controlled in a similar way by using the properties `stringNumberOrientation` and `strokeFingerOrientation`, respectively.

These properties can be set to a list of one to three values. They control whether fingerings may be placed above (if `up` appears in the list), below (if `down` appears), to the left (if `left` appears), or to the right (if `right` appears). Conversely, if a location is not listed, no fingering is placed there. LilyPond takes these constraints and works out the best placement for the fingering of the notes of the following chords. Note that `left` and `right` are mutually exclusive – fingerings may be placed only on one side or the other, not both.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}

```

```

        \remove "Bar_number_engraver"
    }
}

% for the documentation

Direction of merged ‘fa’ shape note heads

Using property `NoteCollision.fa-merge-direction`, the direction of “fa” shape note heads (“fa”, “faThin”, etc.) can be controlled independently of the stem direction if two voices with the same pitch and different stem directions are merged. If this property is not set, the “down” glyph variant is used.

```
{
  \clef bass

  << { \aikenHeads
    f2
    \override Staff.NoteCollision.fa-merge-direction = #UP
    f2 }
  \\ { \aikenHeads
    f2
    f2 }
  >>
}
```

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a `\markup` block.

In general it is recommended to use LilyPond’s native graphical markup commands like `\polygon` instead, which can be used with all LilyPond backends.

```
\relative c' {
  a2-\markup \postscript "0 3 moveto
                        5 2 rlineto
                        stroke"
  -\markup \postscript "[1 1] 0 setdash
                        0 0 moveto
                        5 2 rlineto
                        stroke"
  b2-\markup \postscript "1 1 moveto
                        0 0 1 2 8 4 10 2 rcurveto
                        stroke"
  a'1
}
```

Engravers one by one

LilyPond handles the various elements necessary to typeset a score with plugins. Each plugin is called an *engraver*. In this example, (some) engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature, and key signature.

Engravers are grouped. For example, note heads, slurs, beams, etc., form a Voice context. Engravers for key signature, accidentals, bar line, etc., form a Staff context.

```

topVoice = \relative c' {
  \key d \major
  es8([ g] a[ fis])
  b4
  b16[-. b-. b-. cis-.]
  d4->
}

% empty staff and voice contexts
MyStaff = \context {
  \type Engraver_group
  \name Staff
  \accepts Voice
  \defaultchild Voice
}

MyVoice = \context {
  \type Engraver_group
  \name Voice
}

% add note heads

Flamenco notation

For flamenco guitar, some special notation is used.

- A *golpe* symbol indicates a slap on the guitar body with the nail of the ring finger.
- An arrow indicates (the direction of) strokes.
- Different letters for fingering are used (“p”: thumb, “i”: index finger, “m”: middle finger, “a”: ring finger and “x”: little finger).
- Marking 3- and 4-finger *rasgueados*: stroke upwards with all fingers, ending with an up- and down using the index finger.
- *Abanicos* are strokes (in tuples) with thumb (down), little and index finger (both up). There’s also an *abanico 2* where middle and ring finger are used instead of the little finger.
- *Alza pua* indicates fast playing with the thumb.

Most figures use arrows in combination with fingering; with *abanicos* and *rasgueados*, note heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as `flamenco.ly` and included in source files.

```

The image shows a musical score for two pieces, 'Abanico' and 'Alzapua'. The score is written on a grand staff with five staves. The first staff is a treble clef with a key signature of two sharps (F# and C#). The second staff is a bass clef. The third staff is a tenor clef. The fourth staff is an alto clef. The fifth staff is a bass clef. The score is divided into two sections: 'Abanico' and 'Alzapua'. Above the first staff, there are notes for 'Abanico' and 'Alzapua'. The notes are written in a shorthand notation: 'p' for piano, 'x' for a specific note, 'i' for a specific note, and 'm' for a specific note. The notes are written in a shorthand notation: 'p' for piano, 'x' for a specific note, 'i' for a specific note, and 'm' for a specific note. The notes are written in a shorthand notation: 'p' for piano, 'x' for a specific note, 'i' for a specific note, and 'm' for a specific note.

High and low woodblock example

Two Woodblocks, entered with 'wbh' (high woodblock) and 'wbl' (low woodblock). The length of the bar line has been altered with an `\override` command, otherwise it would be too short. The positions of the two staff lines also have to be explicitly defined.

```
% These lines define the position of the woodblocks in the stave;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
```

```
#(define mydrums '((hiwoodblock default #f 3)
                  (lowwoodblock default #f -2)))
```

```
woodstaff = {
  % This defines a staff with only two lines.
  % It also defines the positions of the two lines.
  \override Staff.StaffSymbol.line-positions = #'(-2 3)

  % This is necessary; if not entered,
  % the barline would be too short!
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)
  % small correction for the clef:
  \set DrumStaff.clefPosition = 0.5
}
```

```
\new DrumStaff {
  % with this you load your new drum style table
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

  \woodstaff

  \drummode {
    \time 2/4
    wbh8 16 16 8-> 8 |
    wbl8 16 16-> ~ 16 16 r8 |
  }
}
```

The image shows a musical notation for a drum staff. It is a single staff with a 2/4 time signature. The notation includes eighth notes, sixteenth notes, and a rest. There are also some special characters like a tilde (~) and a greater-than sign (>).

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities.

- 1) Modify the value of the padding or extra-offset property (as shown in the first line).
- 2) You can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second line).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```

harmonies = \chordmode
{
  a8:13
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s4. |
  s2 b2:13
}

\score {
  <<
    \new ChordNames \harmonies
    \new Staff {
      % Method 1.
      a8~\markup \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;"
      \once \override TextScript.extra-offset = #'(10 . 0)
      b4.~\markup \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;"
      b4. a8 | \break

      % Method 2.
      <<
        { a8 b4.~ b4. a8 }
        { s2 s2~\markup \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" }
      >> |
    }
  >>
}

```

The image displays two musical staves. The first staff, in common time (C), features a treble clef and a melodic line starting with a quarter note on G4, followed by a dotted half note on A4. Above the staff, two fret diagrams are shown: one for A9 add13 (fret 6 on the 6th string) and one for B9 add13 (fret 5 on the 5th string). The second staff, in 2/4 time, also has a treble clef and a similar melodic line. It features a fret diagram for B9 add13 (fret 5 on the 5th string) positioned above the second measure. Both staves have a slur over the first two notes of the melodic line.

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
  wa~o~a
}

waoa
```

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their positioning can be tuned using the `tie-configuration` property.

See also snippet “Longer laissez vibrer ties”.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Using an extra voice for breaks

Often it is easier to manage line and page-breaking information by keeping it separate from the music by introducing an extra voice containing only skips along with the `\break`, `\pageBreak`, and other layout information.

This pattern becomes especially helpful when overriding `line-break-system-details` and the other useful but long properties of the `NonMusicalPaperColumn` grob.

```
music = \relative c'' { c4 c c c }
```

```
\score {
  \new Staff <<
    \new Voice {
      s1*2 \break
      s1*3 \break
      s1*4 \break
      s1*5 \break
    }
    \new Voice {
      \*2 \music
      \*3 \music
      \*4 \music
      \*5 \music
    }
  >>
}
```

```
\paper {
  indent = 0
  line-width = 140\mm
  ragged-right = ##t

}

\paper {
  \system-system-spacing.padding = 5
}
```

The image displays musical notation for nine woodwind instruments, arranged in two rows. Each instrument is represented by a specific set of notes and rests on a five-line staff. The notation is written in a simplified, schematic style, focusing on the pitch and rhythm of the notes rather than traditional musical notation. The instruments are labeled as follows:

- tin whistle**: Located in the top row, first column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- piccolo**: Located in the top row, second column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- flute**: Located in the top row, third column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- oboe**: Located in the top row, fourth column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- clarinet**: Located in the top row, fifth column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- bass clarinet**: Located in the bottom row, first column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- saxophone**: Located in the bottom row, second column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- bassoon**: Located in the bottom row, third column. It features a series of notes on the first line of the staff, with a single rest on the second line.
- contrabassoon**: Located in the bottom row, fourth column. It features a series of notes on the first line of the staff, with a single rest on the second line.

The notation is presented on two staves, each with a treble clef and a common time signature (C). The notes are represented by circles, and the rests are represented by horizontal lines. The instruments are arranged in a grid-like fashion, with each instrument occupying a specific position in the grid.

35 Symbols and glyphs

Accordion register symbols

Accordion register symbols are available as `\markup` as well as as standalone music events (as register changes tend to occur between actual music events). Bass registers are not overly standardized. The available commands can be found in ‘Discant symbols’ in the Notation Reference (<https://lilypond.org/doc/v2.24/Documentation/notation/accordion#discant-symbols>).

```
#(use-modules (lily accreg))
```

```
\new PianoStaff <<

      \\\
      { d8_"D" c_"C" bes_"B" | a1_"A" }
    >>
  }
>>
```

The image shows a musical score for piano and accordion. The piano part is written on two staves (treble and bass). The accordion part is written on a single staff with a treble clef. The score includes various musical notations such as notes, rests, and chords. The accordion part uses discant symbols (b, am, gm, a) to indicate register changes. The piano part includes a bass line with notes D, C, B, and A.

Adding indicators to staves which get split after a break

This snippet defines the commands `\splitStaffBarLine`, `\convUpStaffBarLine`, and `\convDownStaffBarLine`. These add arrows at a bar line to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

Note that the implementation in this snippet draws dimensionless arrows into the right margin. For normal printing, this doesn't cause problems. However, it is necessary to increase the bounding box horizontally if you render the code as an image to avoid cropping, as demonstrated below.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* ((PI-OVER-180 (/ (atan 1 1) 34))
        (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
        (angle-rad (degrees->radians angle-deg))
        (target-x (* length (cos angle-rad)))
        (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0)
        #:concat (#:draw-line (cons length 0)

```

The image displays three musical staves, each with two parts: S A (Soprano Alto) and T B (Tenor Bass). The notation is in a medieval style, using letters a, b, c, d, e, f, g, h, i, j, k, l to represent notes. The first staff shows a sequence of notes a, b, c, d. The second staff shows a sequence of notes e, f, g, h. The third staff shows a sequence of notes i, j, k, l. The notation includes various clefs and note heads, including a 'Vaticana' style with a rounded box and a 'Vaticana' style with a pointed box.

Ancient fonts

This snippets shows many of the symbols contained in the Emmentaler font that are used by LilyPond for typesetting ancient notation.

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

```
\new Staff \relative c'' {
  \key es \major
  \time 3/4
  % this bar contains no \breathe
  << { g4 as g } \ { es4 bes es } >> |
  % Modern notation:
  % by default, \breathe uses the rcomma, just as if saying:
  % \override BreathingSign.text =
  %   #(make-musicglyph-markup "scripts.rcomma")
  << { g4 as g } \ { es4 \breathe bes es } >> |

  % rvarcomma and lvarcomma are variations of the default rcomma
  % and lcomma
  % N.B.: must use Staff context here, since we start a Voice below
  \override Staff.BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  << { g4 as g } \ { es4 \breathe bes es } >> |

  % raltcomma and laltcomma are alternative variations of the
  % default rcomma and lcomma
  \override Staff.BreathingSign.text =
    \markup { \musicglyph "scripts.raltcomma" }
  << { g4 as g } \ { es4 \breathe bes es } >> |

  % vee
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.uupbow" }
  es8[ d es f g] \breathe f |

  % caesura
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.caesura.curved" }
  es8[ d] \breathe es[ f g f] |
```

```
es2 r4 \bar "||"
}
```

Broken crescendo hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as a text markup.

The markup command `with-dimensions` tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property `staff-padding` prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```
\relative c' {
  <<
  {
    \dynamicUp
    r2 r16 c'8.\pp r4
  }
  \\\
  {
    \override DynamicLineSpanner.layer = #0

    \once\override TextScript.vertical-skylines = #'()
    des16_\markup \with-dimensions #'(2 . 7) #'(0 . 0)
      \with-color #white
      \filled-box #'(2 . 7) #'(0 . 2) #0
    r8. des4 ~ des16->\sff r8.
  }
  >>
}
```

Caesura (“railtracks”) with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```

\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breath mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}

```

Custodes

Custodes may be engraved in various styles.

```

\layout {
  ragged-right = ##t
}

\score {

    <d a' f'>1

    \override Staff.Custos.style = #'mensural
    c1~"mensural" \break
    <d a' f'>1
  }
}

```

Customizing the position and number of dots in repeat sign bar lines

If you want to customize the position and/or number of dots in repeat sign bar lines, you can define new custom bar lines or redefine the way default repeat signs are drawn. This may be particularly helpful when using a staff with custom line positions, as shown in this snippet.

```
#(define ((make-custom-dot-bar-line dot-positions) is-span grob extent)
  "Draw dots (repeat sign dots) at DOT-POSITIONS.
```

The coordinates of DOT-POSITIONS are equivalent to the coordinates of ``StaffSymbol.line-positions``; a dot position of X and a line position of X indicate the same vertical position.

IS-SPAN is not used in this custom function."

```
(let* ((staff-space (ly:staff-symbol-staff-space grob))
      (dot (ly:font-get-glyph (ly:grob-default-font grob)
                              "dots.dot"))
      (stencil empty-stencil))
  (for-each
   (lambda (dp)
     (set! stencil (ly:stencil-add stencil
                                   (ly:stencil-translate-axis
                                    dot (* dp (/ staff-space 2)) Y))))
   dot-positions)
  stencil))
```

*% With the procedure above we can define custom bar lines, for example,
 % that resemble standard repeat sign bar lines except that there are
 % three dots at staff positions -3, 0, and 3.*

```
#(add-bar-glyph-print-procedure "*" (make-custom-dot-bar-line '(-3 0 3)))
\defineBarLine ".|*" #'(" " " " " ")
\defineBarLine "*|. " #'(" " " " " ")
```

```
% We can also customize the dot positions used in all default repeat
% signs by redefining the print procedure of the colon bar glyph (":").
% On a staff with line positions of `(-4 -2 2 4)`, the default repeat
% sign dots appear at `(-3 3)`, but we can put them at `(-1 1)` instead.
#(add-bar-glyph-print-procedure ":" (make-custom-dot-bar-line '(-1 1)))
```

```
\new Staff \with {
  \override StaffSymbol.line-positions = #'(-4 -2 2 4)
  \override StaffSymbol.staff-space = #1.3
} \relative f' {
  g1 \bar ".|*"
  g \bar "*|."
  g \bar ".|:-|"
  g \bar ":|."
  g |
  \repeat volta 2 { g }
}
```

Fingering symbols for wind instruments

Special symbols can be achieved by combining existing glyphs, which is useful for wind instruments.

```
lineup =
  \tweak outside-staff-padding #0
  \tweak staff-padding #0
  \tweak padding #0.2
  \tweak parent-alignment-X #CENTER
  \tweak self-alignment-X #CENTER
  \etc

\relative c' {
  g\open
  g\lineup ^\markup \combine
    \musicglyph "scripts.open"
    \musicglyph "scripts.tenuto"
  g\lineup ^\markup \combine
    \musicglyph "scripts.open"
    \musicglyph "scripts.stopped"
  g\stopped
}
```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
  wa~o~a
}
```

wa o a

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
\relative c' ' {
  c4 c c c | c c c c |
  \repeat segno 2 {
    c4 c c c | c c c c |
    \alternative {
      \volta 1 {
        c4 c c c | c c c c |
        % If you don't use \break at Coda, use \noBreak here
        % and after \bar "" below.
        \noBreak
        \section % double bar line
        \cadenzaOn % pause bar count
        \stopStaff % remove staff lines
        % Increasing the unfold counter will expand the staff-free space
        \repeat unfold 4 {
          s1
          \bar ""
        }
        % Place JumpScript where the staff would normally be.
        \once \override Score.JumpScript.outside-staff-priority = ##f
        \once \override Score.JumpScript.Y-offset = 0
        \startStaff % resume bar count
        \cadenzaOff % show staff lines again
      }
    }
  }
}
\sectionLabel "Coda"
% Show Coda on a new line
\break
\*6 { c4 c c c }
\fine
}
```

Rest styles

Rests may be used in various styles.

```
restsA = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 s32
  s64 s128 s256 s512 s1024 s1024
}
restsB = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 r32
  r64 r128 r256 r512 r1024 s1024
}

\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  <>^\markup \typewriter { mensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'neomensural
  <>^\markup \typewriter { neomensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'classical
  <>^\markup \typewriter { classical } \restsB \bar "" \break

  \override Staff.Rest.style = #'z
  <>^\markup \typewriter { z-style } \restsB \bar "" \break

  \override Staff.Rest.style = #'default
  <>^\markup \typewriter { default } \restsB \bar "" \break
}
```

Volta text markup using repeatCommands

Though voltes are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#'((volta ,textIdentifier) ...)` (note the use of the backtick after `#` and the comma before `textIdentifier`). Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { \volta-number { 1. 2. 3... } \italic { ad lib. } }
```

```
\relative c' ' {
  c1
  \set Score.repeatCommands = #'((volta ,voltaAdLib) start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

36 Templates

Ancient notation template – modern transcription of Gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g f) a2 \finalis \break

Orchestra, choir and piano template

This template demonstrates the use of nested `StaffGroup` and `GrandStaff` contexts to subgroup instruments of the same type together, and a way to use `\transpose` so that variables hold music for transposing instruments at concert pitch.

```
#(set-global-staff-size 17)
```

```
\paper {
  indent = 3.0\cm % add space for instrumentName
  short-indent = 1.5\cm % add less space for shortInstrumentName
}
```

```

fluteMusic = \relative c' { \key g \major g'1 b }

% Pitches as written on a manuscript for Clarinet in A
% are transposed to concert pitch.
clarinetMusic = \transpose c' a
  \relative c'' { \key bes \major bes1 d }

trumpetMusic = \relative c { \key g \major g''1 b }

% Key signature is often omitted for horns
hornMusic = \transpose c' f
  \relative c { d'1 fis }

percussionMusic = \relative c { \key g \major g1 b }

sopranoMusic = \relative c'' { \key g \major g'1 b }
sopranoLyrics = \lyricmode { Lyr -- ics }

altoIMusic = \relative c' { \key g \major g'1 b }
altoILyrics = \sopranoLyrics
altoIIMusic = \relative c' { \key g \major g'1 b }
altoIILyrics = \lyricmode { Ah -- ah }

tenorMusic = \relative c' { \clef "treble_8" \key g \major g1 b }

Piano template (simple)

Here is a simple piano staff with some notes.

```
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  \new PianoStaff \with { instrumentName = "Piano" }
  <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}
```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4
```

```

    a2 c
}

text = \lyricmode {
    Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
  \layout { }
  \midi { }
}

```

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```

melody = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4
}

```

```

a2 c
}

\score {

      \harmonies
    }
    \new Voice = "one" { \autoBeamOff \melody }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

Single-staff template with notes, lyrics, chords, and frets

Here is a simple lead sheet template with melody, lyrics, chords, and fret diagrams.

```

verseI = \lyricmode {
  \stanza "1."
  This is the first verse
}

verseII = \lyricmode {
  \stanza "2."
  This is the second verse.
}

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
  c4 d8 e f4 g
  \bar "|"
}

\score {
  <<
    \context ChordNames { \theChords }
    \context FretBoards { \theChords }
    \new Staff {
      \context Voice = "voiceMelody" { \staffMelody }
    }
    \new Lyrics = "lyricsI" {
      \lyricsto "voiceMelody" \verseI
    }
    \new Lyrics = "lyricsII" {
      \lyricsto "voiceMelody" \verseII
    }
  >>
  \layout { }
  \midi { }
}

```

1. This is the first verse
2. This is the second verse.

Single-staff template with notes and chords

Want to prepare a lead sheet with a melody and chords? Look no further!

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  f4 e8[ c] d4 g |
  a2 ~ a
}

harmonies = \chordmode {
  c4:m f:min7 g:maj c:aug |
  d2:dim b4:5 e:sus
}

\score {
  <<
    \new ChordNames {
      \set chordChanges = ##t
      \harmonies
    }
    \new Staff \melody
  >>
  \layout{ }
  \midi { }
}
```

Cm Fm⁷ G^Δ C⁺ D[°] B⁵ E^{sus4}

Single-staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
    \new Voice = "one" {
      \autoBeamOff
      \melody
    }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}

```

Single-staff template with only notes

This very simple template gives you a staff with notes, suitable for a solo instrument or a melodic fragment. Cut and paste this into a file, add notes, and you're finished!

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

\score {
  \new Staff \melody
  \layout { }
  \midi { }
}

```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a `\global` section for time and key signatures.

See also snippet “String quartet template with separate parts”.

```

global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c' {
  c2 d
  e1
  \bar "|."
}

violinTwo = \new Voice \relative c' {
  g2 f
  e1
  \bar "|."
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|."
}

cello = \new Voice \relative c' {
  \clef bass
  c2 b
  a1
  \bar "|."
}

\score {
  \new StaffGroup <<
    \new Staff \with { instrumentName = "Violin 1" }
    << \global \violinOne >>
    \new Staff \with { instrumentName = "Violin 2" }
    << \global \violinTwo >>
    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}

```

String quartet template with separate parts

The “String quartet template (simple)” snippet produces a nice string quartet, but what if you need to print parts? This new template demonstrates how to use the `\tag` feature to easily split a piece into individual parts.

For technical reasons, multiple output files cannot be shown here for a single snippet, which means that the template below unifies the code for separate files. The file names are contained in comments at the beginning of each file.

`piece.ly` contains all the music definitions. The other files – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly`, and `vlc.ly` – produce the full score and the four parts.

Do not forget to remove specified comments when using separate files!

```
% piece.ly
% (This is the global definitions file.)
```

```
global= {
  \time 4/4
  \key c \major
}
```

```
Violinone = \new Voice \relative c' {

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn template”, the four voices are regrouped on only two staves.

```
\paper {
  top-system-spacing.basic-distance = 10
  score-system-spacing.basic-distance = 20
  system-system-spacing.basic-distance = 20
  last-bottom-spacing.basic-distance = 10
}
```

```
global = {
```

```

```

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in snippet “Vocal ensemble template”. It demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes also apply to the piano reduction.

```

Vocal ensemble template with verse and refrain

This template creates a score that starts with a solo verse and continues into a refrain for two voices. It also demonstrates the use of spacer rests within the `\global` variable to define meter changes (and other elements common to all parts) throughout the entire score.

```

global = {
  \key g \major

  % verse
  \time 3/4
  s2.*2
  \break

  % refrain
  \time 2/4
  s2*2
  \bar "|"
}

SoloNotes = \relative g' {
  \clef "treble"

  % verse
  g4 g g |
  b4 b b |

  % refrain
  R2*2 |
}

SoloLyrics = \lyricmode {
  One two three |
  four five six |
}

SopranoNotes = \relative c'' {
  \clef "treble"

  % verse
  R2.*2 |

```

```

    % refrain
    c4 c |
    g4 g |
}

SopranoLyrics = \lyricmode {
    la la |
    la la |
}

BassNotes = \relative c {
    \clef "bass"

    % verse
    R2.*2 |

    % refrain
    c4 e |
    d4 d |
}

BassLyrics = \lyricmode {
    dum dum |
    dum dum |
}

\score {

    >>
  >>

  \layout {
    ragged-right = ##t
    \context { \Staff
      % these lines prevent empty staves from being printed
      \RemoveEmptyStaves
      \override VerticalAxisGroup.remove-first = ##t
    }
  }
}

```

One two three four five six

la la la la

dum dum dum dum

The image shows two musical staves. The top staff is a single treble clef in 3/4 time, with a key signature of one sharp (F#). It contains six quarter notes: G4, A4, B4, C5, B4, and A4. Below the staff are the lyrics 'One two three four five six'. The bottom staff is a grand staff (treble and bass clefs) in 3/4 time, with a key signature of one sharp. The treble staff contains four quarter notes: G4, A4, B4, and C5, with lyrics 'la la la la' below. The bass staff contains four quarter notes: G3, A3, B3, and C4, with lyrics 'dum dum dum dum' below. A brace on the left side of the grand staff indicates it is a single musical unit.

37 Titles

See also Section “Titles and headers” in *Notation Reference*.

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
\paper { tagline = ##f }

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

\score {
  \relative c' {
    c4 c c c
  }
}

% and use it in a \markup block:
\markup {
  \date
}
```

Including the date!

25-04-2026

25-04-2026

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `self-alignment-X` property of the `InstrumentName` grob (usually in the `Staff` context). The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper {
  left-margin = 3\cm
}

\new StaffGroup <<
  \new Staff \with {
    \override InstrumentName.self-alignment-X = #LEFT
    instrumentName = \markup \left-column { "Left aligned"
                                              "instrument name" }
    shortInstrumentName = "Left"
```

```

} {
  c''1 \break c''1
}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column { Centered
                                         "instrument name" }

  shortInstrumentName = "Centered"
} {
  g'1 g'1
}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column { "Right aligned"
                                         "instrument name" }

  shortInstrumentName = "Right"
} {
  e'1 e'1
}
>>

\layout {
  indent = 4\cm
  short-indent = 2\cm
  line-width = 6.5\cm
}

```

Demonstrating all \header fields

A demonstration of all header fields that LilyPond defines by default. Thanks to setting `print-all-headers` to `#t`, much more fields as usual are displayed, indicating the hierarchy of `\header` blocks.

```
\paper {
  #(set-paper-size "a6" 'landscape)
  print-all-headers = ##t
}

\book {
  \header {
    title = "title"
    subtitle = "subtitle"
    composer = "composer"
    arranger = "arranger"
    instrument = "instrument"
    meter = "meter"
    opus = "opus"
    piece = "piece"
    poet = "poet"
    copyright = "copyright"
    tagline = "tagline"
  }

  \bookpart {
    \score {
      \relative c'' { c1 | c | c | c }

      \header {
        title = "localtitle"
        subtitle = "localsubtitle"
        composer = "localcomposer"
        arranger = "localarranger"
        instrument = "localinstrument"
        meter = "localmeter"
        opus = "localopus"
        piece = "localpiece"
        poet = "localpoet"
        copyright = "localcopyright"
        tagline = "localtagline"
      }
    }
  }
}
```

Outputting the version number

It is possible to print the version number of LilyPond in markup.

```
\markup { Processed with LilyPond version #(lilypond-version) }
```

Processed with LilyPond version 2.27.0

38 Tweaks and overrides

See also Section “Changing defaults” in *Notation Reference* and Section “Tweaking output” in *Learning Manual*.

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice transposes the position of notes in all voices for the duration of the ottava bracket. If the octavation is only intended to apply to one voice, the `Ottava_spanner_engraver` should be moved to `Voice` context.

```
\layout {
  \context {
    \Staff
    \remove Ottava_spanner_engraver
  }
  \context {
    \Voice
    \consists Ottava_spanner_engraver
  }
}

{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \ottava -1
    <b,,, b,,,>4 ~ |
    q2
    \ottava 0
    <c e>2
  }
  >>
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: point-and-click is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```

#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (let* ((x-ext (ly:stencil-extent stil X))
                  (y-ext (ly:stencil-extent stil Y))
                  (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
                  (new-stil
                     (ly:stencil-add
                      (ly:make-stencil url-expr x-ext y-ext)
                      stil)))
            (ly:grob-set-property! grob 'stencil new-stil))))))

%%% test

Adding markups in a tablature

By default, markups are not displayed in a tablature.

To make them appear, revert the stencil property of the TextScript grob in the TabStaff context.

```

high = { r4 r8 <g c'> q r8 r4 }
low = { c4 r4 c8 r8 g,8 b, }
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \*2 << \high \ \ \low \ \ \pulse >>
  }
  \layout {
    \context {

```

```

\TabStaff
\clef moderntab
\revert TextScript.stencil
\override TextScript.font-series = #'bold
\override TextScript.font-size = #-2
\override TextScript.color = #red
}
\context {
  \Score
  proportionalNotationDuration = #1/8
}
}

```

	1	&	2	&	3	&	4	&	1	&	2	&	3	&	4	&
T					1-1								1-1			
A					0-0								0-0			
B	3				3			2	3				3			2
						3								3		

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```

glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

\relative c' {
  r8 f8\glissando \glissandoSkipOn f4 g a |
  a8\noBeam \glissandoSkipOff a8
  r8 f8\glissando \glissandoSkipOn g4 a8 \glissandoSkipOff a8 |
  r4 f\glissando\< \glissandoSkipOn a4\f\> \glissandoSkipOff b8\! r |
}

```

Adjusting grace note spacing

The space given to grace notes can be adjusted using the spacing-increment property of `Score.GraceSpacing`.

```

graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}

```

Adjusting slur positions vertically

Using `\override Slur.positions` it is possible to set the vertical position of the start and end points of a slur to absolute values (or rather, forcing LilyPond's slur algorithm to consider these values as desired). In many cases, this means a lot of trial and error until good values are found. You probably have tried the `\offset` command next just to find out that it doesn't work for slurs, emitting a warning instead.

The code in this snippet allows you to tweak the vertical start and end positions by specifying *relative* changes, similar to `\offset`.

Syntax: `\offsetPositions #'(dy1 . dy2)`

```

offsetPositions =
#(define-music-function (offsets) (number-pair?)
  #{
    \once \override Slur.control-points =
      #(lambda (grob)
        (match-let (((_ . y1) _ _ (_ . y2))
                    (ly:slur::calc-control-points grob))
          ((off1 . off2) offsets))
        (set! (ly:grob-property grob 'positions)
              (cons (+ y1 off1) (+ y2 off2)))
        (ly:slur::calc-control-points grob)))
    #})

\relative c' {
  c4(^"default" c, d2)
  \offsetPositions #'(0 . 1)
  c'4(^"(0 . 1)" c, d2)
  \offsetPositions #'(0 . 2)
  c'4(^"(0 . 2)" c, d2)
  \bar "||"
  g4(^"default" a d'2)
  \offsetPositions #'(1 . 0)
  g,,4(^"(1 . 0)" a d'2)
  \offsetPositions #'(2 . 0)
}

```

```
g,,4(^"(2 . 0)" a d'2)
}
```

Adjusting vertical spacing of lyrics

This snippet shows how to bring the lyrics line closer to the staff.

```
music = \relative c' { c4 d e f | g4 f e d | c1 }
text = \lyricmode { aa aa aa aa aa aa aa aa }
```

```
<<
\new Staff \new Voice = melody \music
% Default layout:
\new Lyrics \lyricsto melody \text

\new Staff \new Voice = melody \music
% Reducing the minimum space below the staff and above the lyrics.
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
} \lyricsto melody \text
>>
```

Aligning text marks to notes

By default, TextMark objects are aligned to so-called NonMusicalPaperColumn grobs, like the left edge of the staff or a bar line. They can be aligned to a note instead by setting the non-musical property to #f.

```
\layout {
  line-length = 80\mm
}

{
  \textMark "mark a" c'1 |
  \textMark "mark b" c'1 |
  \break
  \override Score.TextMark.non-musical = ##f
  \textMark "mark c" c'1 |
  \textMark "mark d" c'1 |
}
```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the details of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```
\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8 |
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
  \override Stem.details.beamed-lengths = #'(8.5)
  a8[ a]
  \revert Stem.details.beamed-lengths
  a8[ a] a16[ a] a32[ a] r16 |
}
```

Alternative bar numbering

Setting the `alternativeNumberingStyle` context property, two additional methods are available for enumerating bar numbers in repeats.

```
music = \relative c' {
  \repeat volta 3 {
    c4 d e f |
    \alternative {
      \volta 1 { c4 d e f | c2 d \break }
      \volta 2 { f4 g a b | f4 g a b | f2 a | \break }
      \volta 3 { c4 d e f | c2 d } } }
  c1 \bar " | ."
}

{
  \textMark \markup \large "default"
  \music
}
```

```

{
  \textMark \markup \large \typewriter "numbers"
  \set Score.alternativeNumberingStyle = #'numbers
  \music
}

{
  \textMark \markup \large \typewriter "numbers-with-letters"
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \music
}

\layout {
  \context {
    \Score
    \override TextMark.Y-offset = #5
  }
}

```

default

1.

4

2.

7

3.

numbers

1.

2

2.

2

3.

numbers-with-letters

1.

2b

2.

Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

Analysis brackets with labels

Text markup may be added to analysis brackets using the `text` property of the `HorizontalBracketText` grob. Adding different texts to brackets beginning at the same time requires the `\tweak` command.

Bracket text gets parenthesized after a line break. The vertical order of nested brackets can be controlled with the `outside-staff-priority` property.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e''\startGroup d''\stopGroup |
  c''-\tweak outside-staff-priority #801
    \tweak HorizontalBracketText.text
      \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
  d''\stopGroup
  e''-\tweak HorizontalBracketText.text "a'" \startGroup
  d''\stopGroup\stopGroup |
}
```

```

c''-\tweak HorizontalBracketText.text foo \startGroup
d'' e'' f'' | \break
g'' a'' b'' c'''\stopGroup
}

```

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```

\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}

```

Breaking horizontal alignment of dynamics and textscripts

LilyPond uses `DynamicLineSpanner` grobs to horizontally align successive dynamic objects like hairpins and dynamic text, even if they are positioned on different sides of a staff. This connection cannot be broken, contrary to the vertical alignment (see snippet “Breaking vertical alignment of dynamics and textscripts”).

There are two solutions to circumvent the problem.

- Modify the `shorten-pair` property of the `Hairpin` grob to compensate the offset by which the hairpin was moved.
- Put the two dynamic objects into different voices.

Both solutions are demonstrated in this snippet.

```

{
  <>^"default"
  f' _\pp ^\> f' f' f'\!
}

{
  <>^\markup { setting \typewriter shorten-pair }
  f' _\pp \tweak shorten-pair #'(-3 . 0) ^\> f' f' f'\!
}

{
  <>^\markup { using another \typewriter Voice context }
  << { f' ^\> f' f' f'\! }
    \new Voice { s4 _\pp } >>
}

\layout {
  line-width = 8\cm
  ragged-right = ##f

  \context {
    \Voice
    \override TextScript.staff-padding = #3.5
  }
}

```

default

setting shorten-pair

using another Voice context

Breaking vertical alignment of dynamics and textscripts

By default, LilyPond uses `DynamicLineSpanner` grobs to vertically align successive dynamic objects like hairpins and dynamic text. However, this is not always wanted. By inserting `\breakDynamicSpan`, which ends the alignment spanner prematurely, this vertical alignment can be avoided.

See also snippet “Breaking horizontal alignment of dynamics and textscripts”.

```
{ g1\< |
  e''\f\> |
  c'\p }

{ g1\< |
  e''\breakDynamicSpan\f\> |
  c'\p }
```

Caesura (“railtracks”) with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' ' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breath mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}
```

Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
    \tweak font-size #-2 e>1
  ~\markup { A tiny e }_ \markup { A big c }
}
```

Changing beam thickness and spacing

To make beams thicker or thinner, alter the `beam-thickness` property of the `Beam` grob. To adjust the spacing between beams, alter `length-fraction`.

```
\relative f' {
  \time 1/8
  \override Beam.beam-thickness = #0.4
  \override Beam.length-fraction = #0.8
  c32 c c c
  \revert Beam.beam-thickness % 0.48 is default thickness
  \revert Beam.length-fraction % 1.0 is default spacing
  c32 c c c
  \override Beam.beam-thickness = #0.6
  \override Beam.length-fraction = #1.3
  c32 c c c
}
```

Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” – church rests) is printed within the staff; otherwise a long, thick horizontal line is shown. This default value of ten may be changed by overriding the `expand-limit` property.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = 3
    R1*2 | R1*5 | R1*9
  }
}
```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

In the example below, function `mc-squared` is executed for all `NoteHead` grobs (within the current `Voice` context) at the current time step; the function modifies the grob's `stencil`, using the `staff-position` property to replace some pitches with markup.

See the ‘Extending’ manual (<https://lilypond.org/doc/v2.24/Documentation/extending/running-a-function-on-all-layout-objects>) for more information.

```
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
     grob 'stencil
     (grob-interpret-markup grob
      #{ \markup \lower #0.5
        #(case sp
            ((-5) "m")
            ((-3) "c ")
            ((-2) #{ \markup \teeny \bold 2 #})
            (else "bla")) #}))))

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Changing text and spanner styles for text dynamics

The text used for *crescendos* and *decrescendos* can be changed by modifying the context properties `crescendoText` and `decrescendoText`.

The style of the spanner line can be changed by modifying the `style` property of `DynamicTextSpanner`. The default value is `dashed-line`, and other possible values include `line`, `dotted-line`, and `none`.

```
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2< a
  a2 a
  a2 a
  a2 a\mf
}
```

Changing the default text font family

The default font families for text can be overridden.

```
%{
You may have to install additional fonts.

    }
  }
}
```

Changing the staff size

The simplest way to resize staves is to use

```

#(set-global-staff-size size)

```

To resize an individual staff's size, you can use the properties `staff-space` and `fontSize`.

```

<<
\new Staff \relative c' {
  \dynamicDown c8\ff c c c c c c c
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} \relative c {
  \clef bass c8 c c c c\ff c c c
}
>>

```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```

\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}

```

Changing the text for sustain markings

With the `pedalSustainStrings` context property it is possible to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs – the values shown in this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }

\relative c' {
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("P" "P-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("d" "de" "e")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("M" "M-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
  \sustainNotes
}

\layout {
  ragged-right = ##f
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper {
  line-width = 50\mm
}

\relative c' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
  % show glissando
  \override Glissando.after-line-breaking = ##t
  f2\glissando
  \break
  f,1\!\stopTextSpan
}
```

Controlling the appearance of tremolo slashes

Using various properties of the `StemTremolo` grob it is possible to control the appearance of tremolo slashes.

- Property `slope` sets the slope for tremolo slashes.
- Property `shape` determines whether tremolo slashes look like rectangles (value `rectangle`) or like very small beams (value `beam-like`).
- Property `style` sets both the slope and the shape depending on whether the note has flags, beams, or only a plain stem. This is in contrast to the previous two properties, which change the slope and shape unconditionally. There are two styles defined.
 - `default`: slashes for down-stem flags are longer and more sloped than slashes for up-stem flags; slashes on beamed notes have a rectangular shape and are parallel to the beam.
 - `constant`: all slashes are beam-like and have the same slope except for down-stem flags.

```
music = {
  a''4:32 a':
  e''8: \noBeam e':
  a'':[ a':]
  f':[ g':]
  d':[ d':]
}

\new Staff {
  <>^\markup "default"
  \music
}

\new Staff {
  <>^\markup \typewriter "style = #'constant"
  \override StemTremolo.style = #'constant
  \music
}

\new Staff {
  <>^\markup \typewriter "shape = #'rectangle"
  \override StemTremolo.shape = #'rectangle
  \music
}

\new Staff {
  <>^\markup \typewriter "shape = #'beam-like"
  \override StemTremolo.shape = #'beam-like
```

```

\music
}

\new Staff {
  <>^\markup \typewriter "slope = -0.2"
  \override StemTremolo.slope = -0.2
  \music
}

```

Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the `script-priority` property. The lower this number, the closer it will be put to the note. In this example, the `TextScript` (the *sharp* symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the *prall trill* (the `Script`) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

Note that for `Fingering`, `StringNumber`, and `StrokeFinger` grobs, if used within a chord, the vertical order is also determined by the vertical position of the associated note head, which is added to (or, depending on the direction, subtracted from) the grob's `script-priority` value. This ensures that for fingerings above a chord the lower note is associated with the lower fingering (and vice versa for the other direction); it doesn't matter whether you input the notes in the chord from top to bottom or from bottom to top.

By default, the least technical scripts are positioned closest to the note head; the rough order is articulation, flageolet, fingering, right-hand fingering, string number, fermata, bowing, and text script.

```

\relative c''' {
  \once \override TextScript.script-priority = -100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = -100
  a2^\prall^\markup { \sharp }

  \set fingeringOrientations = #'(up)
  <c-2 a-1>2
  <a-1 c\tweak script-priority -100 -2>2
}

```

Controlling tuplet bracket visibility

The default behavior of tuplet-bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet.

To control the visibility of tuplet brackets, set the property `bracket-visibility` to either `#t` (always print a bracket), `if-no-beam` (only print a bracket if there is no beam) or `#f` (never print a bracket). The latter is in fact equivalent to omitting the `TupletBracket` object altogether from the printed output.

```

music = \relative c'' {
  \tuplet 3/2 { c16[ d e ] f8 }
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

\new Voice {
  \relative c' {
    \override Score.TextMark.non-musical = ##f
    \textMark "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam
    \textMark \markup \typewriter "'if-no-beam" \music
    \override TupletBracket.bracket-visibility = ##t
    \textMark \markup \typewriter "#t" \music
    \override TupletBracket.bracket-visibility = ##f
    \textMark \markup \typewriter "#f" \music
    \omit TupletBracket
    \textMark \markup \typewriter "omit" \music
  }
}

```

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The `outside-staff-priority` property must be set to `#f`, as otherwise this would take precedence over the `avoid-slur` property. Changing the first argument of `\after` (which is a duration) adjusts the horizontal position.

```
\relative c' ' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
    cis8\turn \noBeam
  }
  d4.( e8)
}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor and D major with an extended range of shown flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil =
    #(\lambda (grob)
      (grob-interpret-markup grob
        #{\markup\combine
          \musicglyph "clefs.C"
          \translate #'(-3 . -2)
          \musicglyph "clefs.F"
        })
      #)))
  clefPosition = #3
  middleCPosition = #3
}
```

```

    middleCClefPosition = #3
}

{
  \key d\minor f bes, f bes, |
  \key d\major fis b, fis b, |
}

```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```

\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . -2) }
  \once \override TextSpanner.bound-details.right.padding = #-2
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.dash-period = #10
  \override TextSpanner.dash-fraction = #0.5
  \override TextSpanner.thickness = #10
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}

```

Cross-staff chords – beaming problems workaround

Sometimes it is better to use stems from the ‘other’ staff for creating cross-staff chords to trick LilyPond’s beam collision detector. In the following snippet, if the stems from the lower staff were used instead, it would be necessary to explicitly use

```
\override Staff.Beam.collision-voice-only = ##t
```

so that LilyPond doesn’t move the beams.

```
\new PianoStaff <<
  \new Staff = up \relative c' <<
    { r4
      \override Stem.cross-staff = ##t
      \override Stem.length = #19 % this is in half-spaces,
        % so it makes stems 9.5 staffspaces long
      \override Stem.Y-offset = #-6 % stems are normally lengthened
        % upwards, so here we must lower the stem by the amount
        % equal to the lengthening - in this case (19 - 7) / 2
        % (7 is default stem length)
      e e e }
    { s4
      \change Staff = "bottom"
      \override NoteColumn.ignore-collision = ##t
      c, c c
    }
  >>

  \new Staff = bottom \relative c' {
    \clef bass
    \voiceOne
    g8 a g a g a g a
  }
  >>
```

Cross-staff stems

This snippet shows how to use `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem lengths need not be specified, as the variable distance between noteheads and staves is calculated automatically. However, it is important that `\crossStaff` is applied to the correct voice or staff (i.e., on the opposite side of where a beam is or would be positioned) to get the desired effect.

```

\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

\new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16\> e'8. g8 r\! |
    e'8 f' g'4
    \voiceTwo
    % Down to lower staff
    \crossStaff { e'8 e'8 } e'4 |
  }

  \new Staff {
    \clef bass
    \voiceOne
    % Up to upper staff
    \crossStaff { <e g>4 e, g16 a8. c8 } d |
    g8 f g4 \voiceTwo g8 g g4 |
  }
}
>>

```

Custodes

Custodes may be engraved in various styles.

```

\layout {
  ragged-right = ##t
}

\score {
  \new Staff \with { \consists "Custos_engraver" } \relative c' {
    \override Staff.Custos.neutral-position = #4

    \override Staff.Custos.style = #'hufnagel
    c1~"hufnagel" \break
    <d a' f'>1

    \override Staff.Custos.style = #'medicaea
    c1~"medicaea" \break
    <d a' f'>1

    \override Staff.Custos.style = #'vaticana

```

```

c1^"vaticana" \break
<d a' f'>1

\override Staff.Custos.style = #'mensural
c1^"mensural" \break
<d a' f'>1
}
}

```

Customizing fretboard fret diagrams

Fret diagram properties can be modified by setting the `fret-diagram-details` property. For `FretBoard` fret diagrams, overrides are applied to the `FretBoards.FretBoard` object. Like `Voice`, `FretBoards` is a bottom-level context, and therefore can be omitted in property overrides.

```

\include "predefined-guitar-fretboards.ly"

\storePredefinedDiagram #default-fret-table \chordmode { c' }
                        #guitar-tuning
                        "x;1-1-(;3-2;3-3;3-4;1-1-);"

% shorthand
oo = #(define-music-function
      (grob-path value)
      (list? scheme?)
      #{ \once \override $grob-path = #value #})

<<
\new ChordNames {
  \chordmode { c1 | c | c | d | bes }
}
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = 1.2

```

```

\override FretBoard.fret-diagram-details.finger-code = #'in-dot
\override FretBoard.fret-diagram-details.dot-color = #'white
\chordmode {
  c
  \oo FretBoard.size #1.0
  \oo FretBoard.fret-diagram-details.barre-type #'straight
  \oo FretBoard.fret-diagram-details.dot-color #'black
  \oo FretBoard.fret-diagram-details.finger-code #'below-string
  c'
  \oo FretBoard.fret-diagram-details.barre-type #'none

  \oo FretBoard.fret-diagram-details.finger-code #'below-string
  \oo FretBoard.fret-diagram-details.dot-radius #0.35
  \oo FretBoard.fret-diagram-details.dot-position #0.5
  \oo FretBoard.fret-diagram-details.fret-count #3
  d
  \oo FretBoard.fret-diagram-details.barre-type #'straight
  \oo FretBoard.fret-diagram-details.finger-code #'none
  \oo FretBoard.fret-diagram-details.dot-radius #0.25
  \oo FretBoard.fret-diagram-details.dot-color #'black
  \oo FretBoard.fret-diagram-details.string-overhang #0.
  \oo FretBoard.fret-diagram-details.barre-thickness #2.
  bes
}
}
\new Voice {
  c'1 | c' | c' | d' | bes
}
>>

```

Customizing markup fret diagrams

Fret diagram properties can be modified by setting the `fret-diagram-details` property. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

```

<<
\chords { c1 | c | c | d }

\new Voice = "mel" {
  \textLengthOn
  % Set global properties of fret diagram
  \override TextScript.size = 1.2
  \override TextScript.fret-diagram-details.finger-code = #'in-dot
  \override TextScript.fret-diagram-details.dot-color = #'white

  %% C major for guitar, no barre, using defaults
  % terse style
  c'1~\markup { \fret-diagram-terse "x;3-3;2-2;o;1-1;o;" }

Display bracket with only one staff in a system

If there is only one staff in a `ChoirStaff` or `StaffGroup` context, the bracket and the starting bar line will not be displayed by default. This can be changed by setting the `collapse-height` property to a value less than the number of staff lines in the staff.

Note that in contexts such as `PianoStaff` and `GrandStaff` where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

```

\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  }
}
>>

\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = 4

```

```

\override Score.SystemStartBar.collapse-height = 4
\new Staff {
  c'1
}
>>
}

```

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob's ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob's ancestry that can lead to confusion:

- The types of parents a grob has may depend on context.
- For some grobs, the X- and Y-parents are the same.
- A particular *ancestor* may be related to a grob in multiple ways.
- The concept of *generations* is misleading.

For example, the System grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a VerticalAlignment grob.

The macro defined in this snippet prints (to the console) a textual representation of a grob's ancestry. For example, the call

```

{
  \once \override NoteHead.before-line-breaking = #display-ancestry
  c
}

```

generates the following output.

```

-----
NoteHead
X,Y: NoteColumn
  X: PaperColumn
    X,Y: System
  Y: VerticalAxisGroup
    X: NonMusicalPaperColumn
      X,Y: System
    Y: VerticalAlignment
      X: NonMusicalPaperColumn
        X,Y: System
      Y: System

```

As a consequence, you have to execute the code in this snippet by yourself, since the generated output file doesn't show the data we are interested in.

```

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```
\relative c' {} {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}
```

Drawing boxes around grobs

The `stencil` property can be overridden to draw a box around arbitrary grobs, either using `\override` or `\tweak`.

```
\relative c' {} {
  \once \override TextScript.stencil =
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
  c'4^"foo"

  \tweak Stem.stencil
    #(make-stencil-boxer 0.05 0.25 ly:stem::print)
  b8

  c4.^"bar" c4

  \override Score.RehearsalMark.stencil =
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
  \mark \default
  c1
}
```

Drawing circles around various objects

The `\circle` command draws circles around `\markup` objects. For other objects, specific tweaks may be required, as demonstrated for rehearsal marks and measure numbers.

```

\relative c' {
  c1
  \set Score.rehearsalMarkFormatter =
    #(lambda (mark context)
      (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d^\markup {
    \override #'(thickness . 3) {
      \circle foo
    }
  }
  \override Score.BarNumber.break-visibility = #all-visible
  \override Score.BarNumber.stencil =
    #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}

```

Dynamics spanner with custom text

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use `-\mycresc`, otherwise the spanner start will rather be assigned to the next note.

```

% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.

```

```

mycresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent

  c4 c4\! c4 c4
}

```

Extending a trill spanner

For `TrillSpanner` grobs, the minimum-length property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```
\relative c' {
  \key c\minor
  \time 2/4
  c16( as') c,-. des-.
  \once\override TrillSpanner.minimum-length = #15
  \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4\startTrillSpan { d16[(\stopTrillSpan es)] }
  c( c' g es c g' es d
  c8)
}
```

Extending glissandi across repeats

A glissando that extends into several `\alternative` blocks can be simulated by adding a hidden grace note with a glissando at the start of each `\alternative` block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function that takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = 3.5
    \once \hideNotes
    \grace $grace \glissando
  })

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
    }
  }
}
```

```

        { \repeatGliss f g2 e }
        { \repeatGliss f e2 d }
    }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }

c2\tweak edge-height #'(0 . 3) \sostenutoOn c
c2\sostenutoOff c
}

```

Flat ties

This snippet provides a function `flared-tie` to draw a tie that consist of straight lines. It is intended as a replacement for the default tie-drawing function (i.e., a replacement argument for the `stencil` property of the `Tie` grob).

The argument of `flared-tie` is a list of coordinate pairs that specify additional points between the first and last point to span up the tie's lines. The first and last point are identical to the original tie's start and end point, respectively. The X and Y coordinate values are multiples of the bounding box length and height of the original tie (also taking care of the tie's direction); consequently, the first point has coordinates (0,0), and the last point (1,0).

The function `flare-tie` defines a shorthand for a flat tie. Further tweaking of the shape is possible by overriding `Tie.details.height-limit` or with `\shape`. It is also possible to change the custom definition on the fly.

```

#(define ((flared-tie coords) grob)
  (define (pair-to-list pair)
    (list (car pair) (cdr pair)))

  (define (normalize-coords goods x y dir)
    (map

\paper {
ragged-right = ##t
system-system-spacing.basic-distance = 20
}

\layout {
\context {

```

```

\Score
\override SpacingSpanner.spacing-increment = 3
}
}

```

The image displays a musical score with three systems of guitar chords. Each system consists of a treble clef staff with a single note and a corresponding fretboard diagram above it. The first system shows two A chords. The second system shows three C chords followed by two D chords. The third system shows three C chords followed by two D chords. Each fretboard diagram includes fingerings (numbers 1-4) and string muting (x) for strings not played. The score is generated using the `\override SpacingSpanner.spacing-increment = 3` command.

Generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, a drawing specification for `ly:make-stencil` can be used to generate the shape. This snippet gives an example for a parallelogram-shaped note head.

Unfortunately, the available commands in a drawing specification are currently not documented (this is tracked in Issue #6874 (<https://gitlab.com/lilypond/lilypond/-/issues/6874>)); in any case, the used path sub-command has the following signature, quite similar to the `make-path-stencil` Scheme function.

```
(path thickness command-list line-cap-style line-join-style fill)
```

The commands in *command-list* resemble PostScript drawing commands but with arguments after the command name.

```

parallelogram =
#(ly:make-stencil
' (path 0.1
  (rmoveto 0 0.25
    lineto 1.2 0.75
    lineto 1.2 -0.25
    lineto 0 -0.75

```

```

        lineto 0 0.25)
      round
      round
      #t)
    (cons -0.05 1.25)
    (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram

```

Generating custom flags

The stencil property of the Flag grob can be set to a custom Scheme function to generate the glyph for the flag.

```

#(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
        (log (- (ly:grob-property stem-grob 'duration-log) 2))
        (is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
        (yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8))))
        (flag-stencil (make-filled-box-stencil '(-0.4 . 0.4) yext))
        (stroke-style (ly:grob-property grob 'stroke-style))
        (stroke-stencil (if (equal? stroke-style "grace")
                             (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
                             empty-stencil)))
    (ly:stencil-add flag-stencil stroke-stencil)))

% Create a flag stencil by looking up the glyph from the font
#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
        (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
        (flag (retrieve-glyph-flag "" dir "" grob))
        (line-thickness (ly:staff-symbol-line-thickness grob))
        (stem-thickness (ly:grob-property stem-grob 'thickness))
        (stem-width (* line-thickness stem-thickness))
        (stroke-style (ly:grob-property grob 'stroke-style))
        (stencil (if (null? stroke-style)
                     flag
                     (add-stroke-glyph flag stem-grob dir stroke-style "")))
        (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0)))

Horizontally aligning custom dynamics like “più f”

Some dynamic expressions involve additional text, like “sempre **pp**”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre **pp**” horizontally so that it is aligned as if it were only the `\pp`, there are several approaches:

- Simply use `\once \override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- Add some padding (`\hspace{7.1}`) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script `\once \overrideX-offset =` Drawback: `\once \override` is needed for every invocation!
- Set the dimensions of the additional text to 0 (using `\with-dimensions '(0 . 0) '(0 . 0)`). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.
- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets `X-offset`! Drawback: One needs to set `DynamicText.X-offset`, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of `\pp`.

```

\paper {
  ragged-right = ##f
  indent = 5\cm
}

```

```

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }

```

```

% Solution 2: Using a dynamic script & shifting with

```

```

%           \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

% Solution 3: Padding the dynamic script so the center-alignment
%           puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
semppM =
#(make-dynamic-script
  (markup #:line
    (#:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

% Solution 5: Dynamic with explicit shifting inside the scheme function
semppG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
semppMII =
#(make-dynamic-script
  (markup #:line (#:right-align

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities.

- 1) Modify the value of the padding or extra-offset property (as shown in the first line).
- 2) You can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second line).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```

harmonies = \chordmode
{
  a8:13
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s4. |
  s2 b2:13
}

\score {
  <<
    \new ChordNames \harmonies
    \new Staff {
      % Method 1.
      a8~\markup \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;"
      \once \override TextScript.extra-offset = #'(10 . 0)
      b4.~\markup \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;"
    }
  }

```

```

b4. a8 | \break

% Method 2.
<<
  { a8 b4.~ b4. a8 }
  { s2 s2~\markup \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" }
>> |
}
>>
}

```

Inserting a caesura

Caesura marks can be created by overriding the text property of the BreathingSign object.

A curved caesura mark is also available.

```

\relative c' ' {
  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.straight"
  }
  c8 e4. \breathe g8. e16 c4

  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.curved"
  }
  g8 e'4. \breathe g8. e16 c4
}

```

Keep change clefs full-sized

When a clef changes, the clef sign displayed is smaller than the initial clef. This can be overridden by setting the context property full-size-change to #t.

```

\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
  c1
  \clef "treble"
  c1
}

```

Line arrows

Arrows can be applied to text spanners and line spanners (such as glissandi).

```

\relative c' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6

  \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

  \override Glissando.bound-details.right.arrow = ##t
  \override Glissando.arrow-length = #0.5
  \override Glissando.arrow-width = #0.25

  a8\startTextSpan gis a4 b\glissando b,
  g'4 c\stopTextSpan c2
}

```

Making an object invisible using \hide

Applying `\hide` to a grob causes objects of this type to be printed with “invisible ink”. They are not printed, but all of their other behavior is retained:

- the objects still take up space,
- they take part in collision resolution, and
- slurs, ties, and beams can be attached to them as usual.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\\
  {
    b8 g g e
  }
  >>
}
```

```
\paper {
  line-width = 40\mm
  ragged-right = ##f
}
```

Making glissandi breakable

Normally, LilyPond refuses to automatically break a line at places where a glissando crosses a bar line. This behavior can be changed by setting the `Glissando.breakable` property to `#t`. Also setting the after-line-breaking property to `#t` makes the glissando line continue after the break.

The breakable property does not affect manual breaks inserted with commands like `\break`.

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

music = {
  \*16 f8 |
  f1\glissando |
  a4 r2. |
}
```

```

\*16 f8 |
f1\glissando \once\glissandoSkipOn |
a2 a4 r4 |
\*16 f8
}

\relative c'' {
  <>^\markup { \typewriter Glissando.breakable
               set to \typewriter "#t" }
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  \music
}

\relative c'' {
  <>^\markup { \typewriter Glissando.breakable not set }
  \music
}

\paper {
  line-width = 100\mm
}

```

The image displays six staves of musical notation in treble clef, organized into two groups of three staves each. The first group, labeled 'Glissando.breakable set to #t', shows a glissando effect where a whole note is followed by a series of beamed eighth notes. The second group, labeled 'Glissando.breakable not set', shows a similar glissando effect, but the beam positions are different, reflecting the default behavior without the override.

Manually controlling beam positions

Beam positions may be controlled manually by setting the `positions` property of the `Beam` grob.

```

\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}

```

Measure-centered bar numbers

For film scores, a common convention is to center bar numbers within their measure. This is achieved through setting the `centerBarNumbers` context property to `#t`. When this is used, the type of the bar number grobs is `CenteredBarNumber` rather than `BarNumber`.

This example demonstrates a number of settings: the centered bar numbers are boxed and placed below the staves.

```

\layout {
  \context {
    \Score
    centerBarNumbers = ##t
    barNumberVisibility = #all-bar-numbers-visible
    \override CenteredBarNumber.stencil
      = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \override CenteredBarNumberLineSpanner.direction = #DOWN
  }
}

\new StaffGroup <<

  }
  \new Staff \relative c {
    \clef bass
    d4 f8 e d2~ |
    4 f8 e d2~ |
    4 4 2 |
    a1 |
  }
>>

```

Mensurstriche layout (bar lines between the staves)

Mensurstriche, bar lines between but not through staves, can be printed by setting `measureBarType` to `"-span|"` and using a grouping context that allows span bars, such as `StaffGroup`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}
```

```
music = \fixed c'' {
  c1
  d2 \section e2
  f1 \fine
}
```

```
\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>
```

Modifying the ottava spanner slope

It is possible to change the slope of the ottava spanner.

```
\relative c'' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
    (right . ((Y . 5.0) ; Change the number here
      (padding . 0)
      (attach-dir . ,RIGHT)
      (text . ,(make-draw-dashed-line-markup
```

```

                                (cons 0 -1.2))))))
\override Staff.OttavaBracket.left-bound-info =
  #ly:horizontal-line-spanner::calc-left-bound-info-and-text
\override Staff.OttavaBracket.right-bound-info =
  #ly:horizontal-line-spanner::calc-right-bound-info
\ottava 1
c1
c'''1
}

```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be changed setting the `prefer-dotted-right` property of the `NoteCollision` grob.

```

\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>

```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur – instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

See also snippet “Adjusting slur positions vertically”.

```

\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
  \override Slur.positions = #'(2 . 2)
}

```

```

e4( a)
\override Slur.positions = #'(3 . 3)
e4( a)
\override Slur.positions = #'(4 . 4)
e4( a)
\override Slur.positions = #'(5 . 5)
e4( a)
\override Slur.positions = #'(0 . 5)
e4( a)
\override Slur.positions = #'(5 . 0)
e4( a)
\stemUp
\override Slur.positions = #'(-5 . -5)
e4( a)
\stemDown
\revert Slur.positions
e4( a)
}

```

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The `systemStartDelimiterHierarchy` property of the `StaffGroup` context takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```

\new StaffGroup
\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = 4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare
      (SystemStartBrace
        (SystemStartBracket a
          (SystemStartSquare b))
        c)
      d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>

```

Overriding articulations by type

Sometimes you may want to affect a single articulation type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom settings. One use-case might be to create a style sheet.

```
#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:event-property (ly:grob-property grob 'cause)
                                     'articulation-type))
           (tweaks (assoc-ref ls type)))
      (when tweaks
        (for-each
         (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
         tweaks))))))
```

```
customScripts =
#(define-music-function (settings) (list?)
  #{
    \override Script.before-line-breaking =
      #(custom-script-tweaks settings)
  })
revertCustomScripts = \revert Script.before-line-breaking
```

% Example

% Predefine two sets of desired tweaks.

```
#(define my-settings-1
  '((accent . ((font-size . 0)
                 (color . (1 0 0))))
    (segno . ((font-size . 0)
              (color . (1 0 0))))
    (staccato . ((color . (1 0 0)))))
```

```

        (padding . 0.5)))
    (staccatissimo . ((padding . 1)
                      (color . (1 0 0))))
    (tenuto . ((color . (1 0 0))
              (rotation . (45 0 0))
              (padding . 2)
              (font-size . 10)))
  ))

#(define my-settings-2
  '((accent . ((font-size . 4)
                (color . (0 1 0))
                (padding . 1.5)))
    (coda . ((color . (0 1 0))
             (padding . 1)))
    (staccato . ((color . (0 1 0))))
    (staccatissimo . ((padding . 2)
                      (color . (0 1 0))))
    (tenuto . ((color . (0 1 0))
              (font-size . 10)))
  ))

music = { f1-> | f\segno | f-. | f-! | f-- | f--\coda | f-!\fermata | }

block = {
  \music
  \break
  \revertCustomScripts \music
}

\new Staff <<
  \new Voice \with { \customScripts #my-settings-1 }
  \relative c'' { \voiceOne \block }
  \new Voice \with { \customScripts #my-settings-2 }
  \relative c' { \voiceTwo \block }
>>

```

Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```
\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \%10 c1 \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \%6 { c1 d1 }
}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Positioning fingering indications precisely

The semi-automatic positioning of fingering within a chords works fine in most situations. If one of the indications needs to be positioned more precisely the following, tweaks as shown in this snippet may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```
\score {
  \relative c' {
    \set fingeringOrientations = #'(left)
    <c-1 d-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>

    \set fingeringOrientations = #'(down)
    <c-1 d-2 a'-5>
    <c-\tweak extra-offset #'(0 . -1.1)-1
      d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5> |

    \set fingeringOrientations = #'(down right up)
```

```

<c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
<c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>

\set fingeringOrientations = #'(up)
<c-1 d-\tweak extra-offset #'(0 . 1.1)-2
  a'-\tweak extra-offset #'(0 . 1)-5>
<c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
  a'-\tweak extra-offset #'(0 . 1.4)-5> |
}
}

```

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, multi-measure rests in odd-numbered and even-numbered voices are vertically separated in polyphonic music.

This snippet shows how positioning of multi-measure rests can be controlled.

```

\relative c'' {
  % Multi-measure rests by default are set under the fourth line.
  R1
  % They can be moved using an override or tweak.
  \tweak staff-position -2 R1
  \tweak staff-position 0 R1
  \tweak staff-position 2 R1
  \override MultiMeasureRest.staff-position = 3 R1
  \override MultiMeasureRest.staff-position = 6 R1
  \revert MultiMeasureRest.staff-position
  \break

  % Odd-numbered voices are under the top line.
  << { R1 } \ { a1 } >>
  % Even-numbered voices are under the bottom line.
  << { a1 } \ { R1 } >>
  % Multi-measure rests in both voices remain separate.
  << { R1 } \ { R1 } >>

  % Separating multi-measure rests in more than two voices
  % requires an override or tweak.
  << { R1 } \ { R1 } \ { \tweak staff-position -2 R1 } >>

  % Using compressed bars in multiple voices requires another override
  % in all voices to avoid multiple instances being printed.
  \compressMMRests
  <<
    \revert MultiMeasureRest.direction

```

```

{ R1*3 } \\  

\revert MultiMeasureRest.direction  

{ R1*3 }  

>>  

}

```

Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to `#f` in order to be printed inside slurs.

```

\relative c' {  

  \override TextScript.avoid-slur = #'inside  

  \override TextScript.outside-staff-priority = ##f  

  c2(~\markup { \halign #-10 \natural } d4.) c8  

}

```

Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

```

\relative c' {  

  % Center bar numbers except at the beginning of a staff.  

  \override Score.BarNumber.self-alignment-X =  

    #(break-alignment-list CENTER CENTER 0.3)  
  

  % Prevent bar numbers at the end of a line and permit them elsewhere.  

  \override Score.BarNumber.break-visibility = #end-of-line-invisible  
  

  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)  
  

  % Increase the size of the bar number by 2.  

  \override Score.BarNumber.font-size = 2  
  

  % Draw a circle round the following bar number(s).  

  \override Score.BarNumber.stencil  

    = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)  

  \*7 c1 \break  
  

  % Draw a box round the following bar number(s).  

  \override Score.BarNumber.stencil  

    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)

```

```
\*7 c1 \bar " | . "
}
```

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of `MetronomeMark` or `RehearsalMark` appropriately.

```
\layout {
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}
```

Printing note names with and without an octave marker

The `NoteNames` context can be used to print the text value of notes. The `printOctaveNames` property turns on or off the representation of the octave of the note.

```
scale = \relative c' {
  a4 b c d
  e4 f g a
}

\new Staff {
  <<
  \scale
  \context NoteNames {
    \set printOctaveNames = ##f
    \scale
  }
}
```

```

>>
R1
<<
  \scale
  \context NoteNames {
    \set printOctaveNames = ##t
    \scale
  }
>>
}

\layout {
  \context {
    \NoteNames
    % Allow vertical overlapping of different `NoteNames` contexts
    % to make them appear as if they were a single line.
    \override VerticalAxisGroup
      .nonstaff-nonstaff-spacing
      .minimum-distance = ##f
  }
}

```

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```

music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e ] f8}
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \override TextScript.staff-padding = #2.5

    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    <>~\markup "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam
    <>~\markup \typewriter "if-no-beam" \music
  }
}

```

Proportional strict notespacing

If the `strict-note-spacing` property of the `SpacingSpanner` grob is set to `#t`, spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c' ' <<
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #1/16

  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
    c2 \grace { c16[ c16] } c2
  }
  \new Staff {
    c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
    c1
  }
  >>
```

Removing brace on first line of piano score

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`, together with the clefs. It may be useful when cutting and pasting the engraved image into existing music.

The code uses `\alterBroken` to hide the brace delimiter at the beginning.

```
someMusic = {
  \once \omit Staff.Clef
  \once \omit Staff.TimeSignature
  \*3 c1 \break
  \*5 c1 \break
  \*5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' ' \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
```

```

    indent=75\mm
    \context {
      \PianoStaff
      \alterBroken transparent #'(#t) SystemStartBrace
    }
  }
}

```

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff contexts are connected between the staves, i.e., a span bar is printed. This behaviour can be overridden on a staff-by-staff basis.

```

\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
    \new Staff {
      a1 | a | a | a | a
    }
  >>
}

```

Removing the first empty line

To remove the first empty staff from a score, set the `remove-first` property of the `VerticalAxisGroup` grob to `#t`. This can be done globally inside the `\layout` block or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (`Staff` applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}

\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
```

```
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>
```

Rest styles

Rests may be used in various styles.

```
restsA = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 s32
  s64 s128 s256 s512 s1024 s1024
}

restsB = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 r32
  r64 r128 r256 r512 r1024 s1024
}

\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  <>^\markup \typewriter { mensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'neomensural
  <>^\markup \typewriter { neomensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'classical
  <>^\markup \typewriter { classical } \restsB \bar "" \break

  \override Staff.Rest.style = #'z
  <>^\markup \typewriter { z-style } \restsB \bar "" \break

  \override Staff.Rest.style = #'default
  <>^\markup \typewriter { default } \restsB \bar "" \break
}
```

The image shows four musical staves, each with a different rhythmic notation style. The first staff, labeled 'neomensural', uses vertical bar lines of varying heights to represent rhythmic values. The second staff, labeled 'classical', uses standard musical notation with notes and rests. The third staff, labeled 'z-style', uses a notation style where notes are represented by vertical lines with flags. The fourth staff, labeled 'default', uses a notation style where notes are represented by vertical lines with flags, and rests are represented by vertical lines with flags.

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written. Instead, only “rhythmic patterns” and chords above the measures are notated to represent the structure of a song. Such a feature can be useful while creating or transcribing the structure of a song, or when sharing lead sheets with guitarists or jazz musicians.

```
startPat = {
  \improvisationOn
  \omit Stem
}
stopPat = {
  \improvisationOff
  \undo \omit Stem
}

\new Voice \with {
  \consists Pitch_squash_engraver
} {
  c'4 d' e' f' |
  \startPat
  4 4 4 4 |
  \stopPat
  f'4 e' d' c'
}
```

The image shows a musical staff in treble clef with a common time signature 'C'. It contains a sequence of notes: C4, D4, E4, F4, followed by a measure with four rhythmic slashes, and then another sequence of notes: F4, E4, D4, C4.

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `break-align-orders` property of the `BreakAlignment` grob.

If you look up the definition of the `break-alignment-interface` in LilyPond’s Internals Reference (<https://lilypond.org/doc/v2.24/Documentation/internals/>)

`break_002dalignment_002dinterface`), you get the following list of available break-align symbols:

```
ambitus
breathing-sign
clef
cue-clef
cue-end-clef
custos
key-cancellation
key-signature
left-edge
signum-repetitionis
staff-bar
staff-ellipsis
time-signature
```

From this list, we find that we want to move `key-cancellation` so that it comes before `staff-bar`. This is accomplished with the `\breakAlignInsert` function.

```
music = { \key es \major d'1 \bar "||"
          \key a \major d'1 }

{ <>^\markup "default"
  \music }

{ <>^\markup "cancellation first"
  \breakAlignInsert key-cancellation before staff-bar
  \music }
```

Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the `to-barline` property.

```
\relative c' {
  e4\< e2.
  e1\!
  \override Hairpin.to-barline = ##f
  e4\< e2.
  e1\!
}
```

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
#(set-default-paper-size "a5")
```

```
\paper {
  system-separator-markup = \slashSeparator
  tagline = ###
}
```

```
notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}
```

```
\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

Shape individual ties in chords

To shape individual ties in chords use the method demonstrated below.

```

{
  \textMark "Chords can be tied note by note."
  <c'~ e'~ g'~ c''~>2 q
}

{
  \textMark \markup \override #'(baseline-skip . 3) \wordwrap {
    Modifying those ties with \typewriter "\\shape" does not succeed,
    because \typewriter TieColumn positions them on its own behalf,
    ignoring \typewriter "\\shape" input more or less. You may
    circumvent this by setting \typewriter positioning-done to
    \typewriter "#t" -- alas, \typewriter positioning-done is an
    internal property, and setting it to \typewriter "#t" means: all
    positioning is done, don't do anything further. The next example
    demonstrates a case where the positioning is not finished: all tie
    directions are down, and the thickness is not accurate.
  }
  <c'~ e'~ g'~ c''~>2
  \once \override TieColumn.positioning-done = ##t
  q
}

{
  \textMark "To fix that, enter ties with explicit direction modifiers."
  <c'_~ e'_~ g'_~ c''^~>2
  \once \override TieColumn.positioning-done = ##t
  q
}

{
  \textMark \markup {
    Now you can use \typewriter "\\shape" for each tie as usual. }
  <c'-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
    e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~
    g'-\shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
    c''-\shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
  >2
  \once \override TieColumn.positioning-done = ##t
  q
}

{
  \textMark "This also works at line breaks."
  <c'-\shape #'(((0 . 0) (0 . -10) (0 . -10) (0 . 0))
                ((0 . 0) (0 . -10) (0 . -10) (0 . 0))) _~
    e'-\shape #'(((0 . 0) (0 . -5) (0 . -5) (0 . 0))
                ((0 . 0) (0 . -5) (0 . -5) (0 . 0))) _~
    g'-\shape #'(((0 . 0) (0 . -2) (0 . -2) (0 . 0))

```

Chords can be tied note by note.

Modifying those ties with `\shape` does not succeed, because `TieColumn` positions them on its own behalf, ignoring `\shape` input more or less. You may circumvent this by setting `positioning-done` to `#t` – alas, `positioning-done` is an internal property, and setting it to `#t` means: all positioning is done, don't do anything further. The next example demonstrates a case where the positioning is not finished: all tie directions are down, and the thickness is not accurate.

To fix that, enter ties with explicit direction modifiers.

Now you can use `\shape` for each tie as usual.

This also works at line breaks.

It also works with the `tieWaitForNote` property.

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, `add-stem-support` would be required.

The solution is thus to write the note as a chord and add the articulations inside of `<...>`, using the direction modifiers `^` and `_` as appropriate.

```
\relative c' {
  <>^\fermata^\fermata % The second fermata is ignored!
  <e d'>2^\flageolet_\flageolet

  \stopStaff s1 \startStaff
```

```

<>^"Works if written inside a chord"
<e_\flageolet d'^\flageolet>2
<e_\flageolet d'^\flageolet>2
<e_\flageolet^\flageolet>2
<e_\fermata^\fermata>2
}

```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```

stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})

\relative c {
  \clef "treble_8"
  \textSpannerDown
  \stringNumberSpanner "5" a8\startTextSpan b c d
  e f\stopTextSpan \stringNumberSpanner "4" g\startTextSpan a |
  bes4 a g2\stopTextSpan
}

```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message “warning: ignoring too many clashing note columns” appears when compiling the LilyPond file. This message can be suppressed by setting the `ignore-collision` property of the `NoteColumn` object to `#t`. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t

\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}
```

Time signature in brackets

The time signature can be enclosed within brackets.

```
\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature printing only the numerator as a number (instead of the fraction)

Sometimes, a time signature should not print the whole fraction (for example, 7/4), but only the numerator (digit 7 in this case). This can be easily done by using `\override Staff.TimeSignature.style = #'single-number` to change the style permanently. By using `\revert Staff.TimeSignature.style`, this setting can be reversed. To apply the single-number style to only one time signature, use `\tweak`.

```

\relative c' {
  \time 3/4
  c4 c c
  % Change the style permanently
  \override Staff.TimeSignature.style = #'single-number
  \time 2/4
  c4 c
  \time 3/4
  c4 c c
  % Revert to default style:
  \revert Staff.TimeSignature.style
  \time 2/4
  c4 c
  % single-number style only for the next time signature
  \tweak style #'single-number \time 5/4
  c4 c c c c
  \time 2/4
  c4 c
}

```

Tuplet bracket and change staff

This snippet shows how to set a tuplet starting in a lower staff and finishing in the upper one.

```

aigues = \relative c' {
  \time 6/8
  s4. \stemDown c16[ bes' e] \stemUp g c e \stemDown |
  g8
}

basses = \relative c {
  \time 3/4
  \clef F
  \tweak positions #'(4.5 . 8.5)
  \tweak edge-height #'(1 . -1)
  \tuplet 7/6 { c16[ bes' e] \change Staff = md \stemUp g[ c e g] } s4. |
  s8
}

\new PianoStaff \with { \omit TimeSignature }
<<
  \new Staff = md \aigues
  \new Staff = mg \basses
>>

```

Tweaking clef properties

Changing the clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines, `middleCClefPosition` must also be specified, with positive or negative values moving “middle C” up or down respectively, relative to the staff’s center line.

For example, `\clef "treble_8"` is equivalent to setting the context properties `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition`, and `clefTransposition`. Note that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```
{
  % The default treble clef.
  \key f \major
  c'1
  % The standard bass clef
  \set Staff.clefGlyph = "clefs.F"
  \set Staff.clefPosition = 2
  \set Staff.middleCPosition = 6
  \set Staff.middleCClefPosition = 6
  \key g \major
  c'1
  % The baritone clef.
  \set Staff.clefGlyph = "clefs.C"
  \set Staff.clefPosition = 4
  \set Staff.middleCPosition = 4
  \set Staff.middleCClefPosition = 4
  \key f \major
  c'1
  % The standard choral tenor clef.
  \set Staff.clefGlyph = "clefs.G"
  \set Staff.clefPosition = -2
  \set Staff.clefTransposition = -7
  \set Staff.middleCPosition = 1
  \set Staff.middleCClefPosition = 1
  \key f \major
  c'1
  % A non-standard clef.
  \set Staff.clefPosition = 0
  \set Staff.clefTransposition = 0
  \set Staff.middleCPosition = -4
```

```

\set Staff.middleCClefPosition = -4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs.
\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
c'1
\set Staff.clefTransposition = 7
c'1
\set Staff.clefTransposition = 0
\set Staff.clefPosition = 0
c'1

% Return to the normal clef.
\set Staff.middleCPosition = 0
c'1
}

```

Tweaking grace layout within music

The appearance of grace expressions can be changed by using the functions `add-grace-property` and `remove-grace-property`.

The following example undefines the `direction` property of Stem grobs for this grace so that stems do not always point up, and changes the default note heads to crosses.

```

\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}

```

Using alternative flag styles

Alternative shapes for flags on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. LilyPond provides the following functions: `modern-straight-flag`, `old-straight-flag`, and `flat-flag`. Use `\revert` to restore the default shape.

To get stacked (i.e., vertically more compact) flags, call the command `\flagStyleStacked`, which can be reset with `\flagStyleDefault`.

Overriding the `Flag` stencil does not change how flag elements are positioned vertically. This is especially noticeable for flat flags: LilyPond doesn't dynamically adjust the vertical gaps between flag elements in the same way as it does for beams. A possible solution to harmonize the appearance is to replace flat flags with half beams, as shown in the second staff; however, this can't be done automatically. In the code of this snippet, such half beams are entered with `@` as a prefix, for example `@c8`.

Be aware that half beams are *not* `Flag` grobs. This means in particular that modifying `Flag` properties won't have any effect on them (you have to use `Beam` properties instead), and properties for their associated `Stem` grob will also behave beam-like.

```
"@" =
#(define-music-function (music) (ly:music?)
  #{ \set stemLeftBeamCount = 0 $music [] #})

testnotes = {
  \autoBeamOff
  c8 d16 e''32 f64 \acciaccatura { g,,,8 } a128 b
}

\relative c' {
  \override TextScript.staff-padding = 6
  \time 1/4
  <>^"default" \testnotes
  \override Flag.stencil = #modern-straight-flag
  <>_"modern straight" \testnotes
  \override Flag.stencil = #old-straight-flag
  <>^"old straight" \testnotes
  \override Flag.stencil = #flat-flag
  <>_"flat" \testnotes
  \revert Flag.stencil

  \flagStyleStacked
  <>^"stacked" \testnotes
  \flagStyleDefault
  <>_"default" \testnotes
}

\relative c' {
  \time 3/4
  \override Flag.stencil = #flat-flag
```

```

<>~"flat" c8 c[ c] d16 d[ d] e' '32 e[ e] f64 f[ f]
  \acciaccatura { g,,8 } a128 a[ a a a a]
<>~"beam-like" @c8 c[ c] @d16 d[ d] @e' '32 e[ e] @f64 f[ f]
  \acciaccatura { g,,8 } @a128 a[ a a a a]
}

\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}

```

Using ly:grob-object to access grobs with \tweak

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a `NoteHead` callback, but the technique is not limited to `NoteHeads`. However, the `NoteHead` callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The console output of the example function below (`display-grobs`) is as follows.

```

-----
#<Grob Accidental >
()
#<Grob Stem >

```

It is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

```

#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)

```

```

;; notehead is grob
(ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'stem)))

#(define (display-grobs notehead)
  ;; notehead is grob
  (let ((accidental (notehead-get-accidental notehead))
        (arpeggio (notehead-get-arpeggio notehead))
        (stem (notehead-get-stem notehead)))
    (format (current-error-port) "~2&~a\n" (make-string 20 #\ -))
    (for-each
     (lambda (x) (format (current-error-port) "~a\n" x))
     (list accidental arpeggio stem))))

\relative c' {
  %% display grobs for each note head:
  \%override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}

```

Using the \tweak command to tweak individual grobs

With the \tweak command, every grob can be tuned directly. Here are some examples of available tweaks.

```

\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  <
  \tweak font-size #3 c
  \tweak color #red d-\tweak font-size #8 -4
  \tweak style #'cross g
  \tweak duration-log #2 a
  >2
}

```

Vertically aligned dynamics and textscripts

For all `DynamicLineSpanner` objects (i.e., hairpins and dynamic texts), the vertical minimum distance between their reference line and the staff is given by the value in the `staff-padding` property, unless other notation elements forces them to be farther away. Setting this property to a sufficiently large value aligns the dynamics.

The same idea, together with `\textLengthOn`, is used to align text scripts along their baseline.

```
music = \relative c' {
  a'2\p b\p
  e4\p f\p\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = 3
  \textLengthOn
  \override TextScript.staff-padding = 1
  \music
}
```

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties `alignBelowContext` and `alignAboveContext` to control the positioning of lyrics and ossias.

```
\relative c' <<
  \new Staff = "1" { c4 c c c }
  \new Staff = "2" { d4 d d d }
  \new Staff = "3" { e4 e e e }

  { \skip 2
    <<
      \lyrics {
        \set alignBelowContext = "1"
        lyrics4 below
      }
      \new Staff \with {
        alignAboveContext = "3"
        fontSize = -2
        \override StaffSymbol.staff-space = #(magstep -2)
        \remove "Time_signature_engraver"
      }
```

```

\override VerticalAxisGroup.staff-staff-spacing =
  #'((minimum-distance . 0)
      (basic-distance . 0)
      (padding . 1))
} {
  \tuplet 6/4 {
    \override TextScript.padding = 2
    c8[~"ossia above" d e d e f]
  }
}
>>
}
>>

```

Vertically aligning stanza numbers of different staves

It can happen that stanza numbers don't align vertically if the verses are attached to different staves. To fix that, override the self-alignment-X property of the LyricText grob.

```
\markup { default behavior }
```

```

<<
  \new Staff { b b b b }
  \lyrics {
    \stanza "3."
    a a a a
  }

  \new Staff { b b b b }
  \lyrics {
    \stanza "1."
    aaaaaaaaaa a a a
  }
  \lyrics {
    \stanza "2."
    a a a a
  }
>>

```

```
\markup \vspace #1
```

```

\markup {
  using \typewriter "self-alignment-X = #LEFT" }

<<
  \new Staff { b b b b }
  \new Lyrics \lyricmode {
    \stanza "3."
    a a a a
  }

  \new Staff { b b b b }
  \new Lyrics \lyricmode {
    \stanza "1."
    \once \override LyricText.self-alignment-X = #LEFT
    aaaaaaaaaa a a a
  }
  \new Lyrics \lyricmode {
    \stanza "2."
    a a a a
  }
>>

```

default behavior

using self-alignment-X = #LEFT

Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to `#t`, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to `#t`.

```

<<
\relative c' {
  \repeat unfold 3 {
    c8 c b b a a c16 c b b
  }
}
\figures {
  \set useBassFigureExtenders = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##f
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
}
>>

```

39 Workaround

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which is never printed anyway). The workaround is to set the `explicitKeySignatureVisibility` property of the `Staff` grob as is shown in the example.

```
\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility =
      #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
  >>
}
```

Appoggiatura or grace note before a bar line

By default, appoggiaturas and grace notes that occur on the first beat of a measure are printed after the bar line. A possible solution for single staves to print it before the bar line is to add an invisible bar line and then the visible one.

In multi-staff systems, however, adding an invisible bar line distorts the positioning of full-bar rests in other staves; they are no longer centered but slightly shifted to the left. A better solution for such situations is to use the `\afterGrace` command with setting `afterGraceFraction` appropriately.

```
<<
{
  \appoggiatura d''8 c''4 r2. |
  \appoggiatura { \bar "" d''8 \bar "" } |
  c''4 r2.
}
{ R1 | R1 }
>>

afterGraceFraction = 15/16

<<
{
  \appoggiatura d''8 c''4 \afterGrace r2. d''8( |
  c''4) r2.
}
{ R1 | R1 }
>>
```

Breaking horizontal alignment of dynamics and textscripts

LilyPond uses `DynamicLineSpanner` grobs to horizontally align successive dynamic objects like hairpins and dynamic text, even if they are positioned on different sides of a staff. This connection cannot be broken, contrary to the vertical alignment (see snippet “Breaking vertical alignment of dynamics and textscripts”).

There are two solutions to circumvent the problem.

- Modify the `shorten-pair` property of the `Hairpin` grob to compensate the offset by which the hairpin was moved.
- Put the two dynamic objects into different voices.

Both solutions are demonstrated in this snippet.

```
{
  <>^"default"
  f' _\pp ^\> f' f' f'\!
}

{
  <>^\markup { setting \typewriter shorten-pair }
  f' _\pp \tweak shorten-pair #'(-3 . 0) ^\> f' f' f'\!
}

{
  <>^\markup { using another \typewriter Voice context }
  << { f' ^\> f' f' f'\! }
    \new Voice { s4 _\pp } >>
}

\layout {
  line-width = 8\cm
  ragged-right = ##f

  \context {
    \Voice
    \override TextScript.staff-padding = #3.5
  }
}
```

default

setting shorten-pair

using another Voice context

Breaking vertical alignment of dynamics and textscripts

By default, LilyPond uses `DynamicLineSpanner` grobs to vertically align successive dynamic objects like hairpins and dynamic text. However, this is not always wanted. By inserting `\breakDynamicSpan`, which ends the alignment spanner prematurely, this vertical alignment can be avoided.

See also snippet “Breaking horizontal alignment of dynamics and textscripts”.

```
{ g1\< |
  e''\f\> |
  c'\p }

{ g1\< |
  e''\breakDynamicSpan\f\> |
  c'\p }
```

Changing time signatures inside a polymeric section using `\scaleDurations`

Flexible polymeric with unaligned measures

To support explicit creation of independently measured contexts, remove the `Timing_translator` from `Score` context and define a `TimingStaffGroup` context that has `Timing_translator`. This makes `Timing` an alias for `TimingStaffGroup`, targeting `\time` commands to the enclosing `TimingStaffGroup`.

Unlike LilyPond's built-in `\enablePerStaffTiming` command, this approach requires the explicit creation of `TimingStaffGroup` contexts; in exchange, it allows creating multiple `Staff` contexts that jointly follow the measure defined in their enclosing `TimingStaffGroup`.

Locally scaled time signatures

Use the unscalable `\time` command to establish a measure of the desired length in `Timing`, a.k.a. `TimingStaffGroup`. In this snippet, all staves below `TimingStaffGroup` use a scaled time signature, so any time signature with the desired measure length is as good as any other. If there were an enclosed context that did not use a scaled time signature, the choice of time signature to set in `Timing` would matter in that context.

Use the `\polymetric \time` command to set scalable metric properties in contexts below `Timing`, and use the `\scaleDurations` command to scale both the local meter and the notes to fit the measure.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \accepts TimingStaffGroup
  }
  \context {
    \StaffGroup
    \name TimingStaffGroup
    \alias StaffGroup
    \consists "Timing_translator"
```

```

    }
  }

  <<
  \new TimingStaffGroup <<
    \new Staff {
      \scaleDurations 8/5 {
        \time 6/5 % to set measure length in Timing
        \context Staff \polymetric \time 6/8
        b8 b b b b b
        \time 4/5 % to set measure length in Timing
        \context Staff \polymetric \time 2/4
        b4 b
      }
    }
  >>
  \new TimingStaffGroup <<
    \new Staff {
      \clef bass
      \time 2/4
      c2 d e f
    }
  >>
>>

```

Cross-staff chords – beaming problems workaround

Sometimes it is better to use stems from the ‘other’ staff for creating cross-staff chords to trick LilyPond’s beam collision detector. In the following snippet, if the stems from the lower staff were used instead, it would be necessary to explicitly use

```
\override Staff.Beam.collision-voice-only = ##t
```

so that LilyPond doesn’t move the beams.

```

\new PianoStaff <<
  \new Staff = up \relative c' <<
    { r4
      \override Stem.cross-staff = ##t
      \override Stem.length = #19 % this is in half-spaces,
        % so it makes stems 9.5 staffspaces long
      \override Stem.Y-offset = #-6 % stems are normally lengthened
        % upwards, so here we must lower the stem by the amount
        % equal to the lengthening - in this case (19 - 7) / 2
        % (7 is default stem length)
      e e e }
    { s4

```

```

\change Staff = "bottom"
\override NoteColumn.ignore-collision = ##t
c, c c
}
>>

\new Staff = bottom \relative c' {

}
>>

```

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```

fixA = {
  \once \override Stem.length = #12
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ { \voiceThree \fixB dis } >> s
}

```

Extending glissandi across repeats

A glissando that extends into several `\alternative` blocks can be simulated by adding a hidden grace note with a glissando at the start of each `\alternative` block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function that takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```

repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = 3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {
  \new StaffGroup <<
    \new Staff <<
      \new Voice { \clef "G_8" \music }
    >>
    \new TabStaff <<
      \new TabVoice { \clef "moderntab" \music }
    >>
  >>
}

```

Forcing measure width to adapt to a metronome mark's width

By default, metronome marks do not influence horizontal spacing. This can be solved through a simple override, as shown in the second half of the example.

```
example = {
  R1
  \tempo "Allegro molto" R1*6
  \tempo "poco rit." R1*2
  \tempo "a tempo" R1*8 \break
}

{
  \compressMMRests {
    \example
    \override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)
    \example
  }
}

\layout {
  ragged-right = ##t
}
```

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the command `\speakOn` and end it with `\speakOff`.

```
speakOn = \override Stem.stencil =
  #(lambda (grob)
    (let* ((x-parent (ly:grob-parent grob X))
          (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
      (if is-rest?
          empty-stencil
          (ly:stencil-combine-at-edge
            (ly:stem::print grob)
            Y
            (- (ly:grob-property grob 'direction))
            (grob-interpret-markup
              grob
              (markup #:center-align #:fontsize -4
                #:musicglyph "noteheads.s2cross"))
            -1.7))))
```

```
speakOff = \revert Stem.stencil
```

```
\new Staff {
  \relative c'' {
    a4 b a c
    \speakOn
    g4 f r g8 a
    b4 r r8 d e4
    \speakOff
    c4 a g f
  }
}
```

Positioning grace notes with floating space

Setting the property `strict-grace-spacing` makes the musical columns for grace notes ‘floating’, i.e., decoupled from the non-grace notes: first the normal notes are spaced, then the (musical columns of the) graces are put left of the musical columns for the main notes.

Due to Issue #6876 (<https://gitlab.com/lilypond/lilypond/-/issues/6876>), however, accidentals are ignored if this property is set. This snippet gives a workaround to circumvent the problem.

Another unfortunate side effect of this property is that LilyPond does not check whether there is enough horizontal space for grace notes (this is tracked as Issue #2630 (<https://gitlab.com/lilypond/lilypond/-/issues/2630>)). You have to make sure that enough space is available, for example, by using `\newSpacingSection` together with a proper value for the `base-shortest-duration` of the `SpacingSpanner` grob.

```
shiftedGrace =
#(define-music-function (offset music) (number? ly:music?)
  #{
    \override NoteHead.X-offset = #(- offset 0.85)
    \override Stem.X-offset = #offset
    \grace { $music }
    \revert NoteHead.X-offset
    \revert Stem.X-offset
  #})

\relative c' ' <<
  { g4 \shiftedGrace #-1.3 a32 \shiftedGrace #-0.5 { bes c d } es4 }
  { f,32 e d c f e d c f4 }
>>

\layout {
  \context {
    \Score
    \override SpacingSpanner.strict-grace-spacing = ##t
  }
}
```

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
\relative c' ' {
  c4 c c c | c c c c |
  \repeat segno 2 {
    c4 c c c | c c c c |
    \alternative {
      \volta 1 {
        c4 c c c | c c c c |
        % If you don't use \break at Coda, use \noBreak here
        % and after \bar "" below.
      }
    }
  }
}
```

```

\noBreak
\section % double bar line
\cadenzaOn % pause bar count
\stopStaff % remove staff lines
% Increasing the unfold counter will expand the staff-free space
\repeat unfold 4 {
  s1
  \bar ""
}
% Place JumpScript where the staff would normally be.
\once \override Score.JumpScript.outside-staff-priority = ##f
\once \override Score.JumpScript.Y-offset = 0
\startStaff % resume bar count
\cadenzaOff % show staff lines again
}
}
\sectionLabel "Coda"
% Show Coda on a new line
\break
\*6 { c4 c c c }
\fine
}

```

Preventing final mark from removing final tuplet

Due to Issue #2362 (<https://gitlab.com/lilypond/lilypond/-/issues/2362>) the addition of a final mark can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket.full-length-to-extent` to `##f`.

```

\new Staff {
  \set tupletFullLength = ##t
  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}

\new Staff {
  \set tupletFullLength = ##t
  \override TupletBracket.full-length-to-extent = ##f

  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}

```

}

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

Slanted parentheses around dynamics

The easiest way to parenthesize dynamics is to use the normal `\parenthesize` command and adjust the font size, e.g., `{ c'4\tweak Parentheses.font-size 2 \parenthesize \f }`. However, this results in upright parentheses, while dynamic marks are normally slanted. This snippet gives a method to make the parentheses slanted as well.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
      }
    #}))

\relative c' ' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

A tambourine example, entered with ‘tamb’.

```
\new DrumStaff \with { instrumentName = #"Tambourine" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \override Staff.StaffSymbol.line-positions = #'( 0 )
  \override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)

  \time 6/8
  tamb8. 16 8 8 8 8 |
  tamb4. 8 8 8 |
  % The trick with the scaled duration and the shorter rest
  % is necessary for the correct ending of the trill-span!
  tamb2.*5/6 \startTrillSpan s8 \stopTrillSpan |
}
```

This example uses some Scheme code to enforce enharmonic modifications for notes in order to have the minimum number of accidentals. In this case, the following rules apply:

- double accidentals should be removed
- b sharp \rightarrow c
- e sharp \rightarrow f
- c flat \rightarrow b
- f flat \rightarrow e

```
#(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))
        ;; `ly:pitch-alteration` returns quarter tone steps.
        (a (* 4 (ly:pitch-alteration p)))
        (n (ly:pitch-notename p)))
    (cond
      ((and (> a 1)
            (or (eqv? n 6) (eqv? n 2))))
      (set! a (- a 2))
      (set! n (+ n 1)))
      ((and (< a -1)
            (or (eqv? n 0) (eqv? n 3))))
      (set! a (+ a 2))
      (set! n (- n 1))))
    (cond
      ((> a 2)
```

```

      (set! a (- a 4))
      (set! n (+ n 1)))
    ((< a -2)
      (set! a (+ a 4))
      (set! n (- n 1))))
    (when (< n 0)
      (set! o (- o 1))
      (set! n (+ n 7)))
    (when (> n 6)
      (set! o (+ o 1))
      (set! n (- n 7)))
    (ly:make-pitch o n (/ a 4)))

#(define (naturalize music)
  (let ((es (ly:music-property music 'elements))
        (e (ly:music-property music 'element))
        (p (ly:music-property music 'pitch)))
    (when (pair? es)
      (ly:music-set-property! music 'elements
                              (map naturalize es)))

    (when (ly:music? e)
      (ly:music-set-property! music 'element
                              (naturalize e)))

    (when (ly:pitch? p)
      (set! p (naturalize-pitch p))
      (ly:music-set-property! music 'pitch p))

#(define-music-function (m) (ly:music?)
  (naturalize m))

music = \relative c' { c4 d e g }

\new Staff {
  \transpose c ais { \music }
  \naturalizeMusic \transpose c ais { \music }
  \transpose c deses { \music }
  \naturalizeMusic \transpose c deses { \music }
}

```

Unfolding tremolo repeats

Currently, *note:duration*, which is more or less a shortcut for `\repeat tremolo`, is not unfolded by `\unfoldRepeats` (this is tracked in Issue #6145 (<https://gitlab.com/lilypond/lilypond/-/issues/6145>)). The function given in this snippet provides a workaround.

```

fixTremolos =
#(define-music-function (music) (ly:music?)
  (music-map
    (lambda (m)
      (let ((event (any (lambda (a)
                          (and (music-is-of-type? a 'tremolo-event)
                              a))
                        (ly:music-property m 'articulations)))))
        (if event
          (let* ((total-tremolo-duration (ly:music-property m
                                                            'duration))
                 (tremolo-type (ly:music-property event
                                                    'tremolo-type))
                 (one-tremolo-note-duration
                  (ly:make-duration (ly:intlog2 tremolo-type)))
                 (tremolo-note-count
                  (/ tremolo-type (expt 2 (ly:duration-log
                                           total-tremolo-duration)))))
            (set! (ly:music-property m 'duration)
                  one-tremolo-note-duration)
            (set! (ly:music-property m 'articulations)
                  (delete! event (ly:music-property m 'articulations)))
            (make-music 'TremoloRepeatedMusic
                        'repeat-count tremolo-note-count
                        'element m))
          m)))
    music))

unfoldRepeats = \unfoldRepeats #'() \fixTremolos \etc

music = { \repeat tremolo 8 c'16 c'2:16 }

{
  \music
  \unfoldRepeats \music
}

```

Using an extra voice for breaks

Often it is easier to manage line and page-breaking information by keeping it separate from the music by introducing an extra voice containing only skips along with the `\break`, `\pageBreak`, and other layout information.

This pattern becomes especially helpful when overriding `line-break-system-details` and the other useful but long properties of the `NonMusicalPaperColumn` grob.

```
music = \relative c'' { c4 c c c }
```

```
\score {
  \new Staff <<
    \new Voice {
      s1*2 \break
      s1*3 \break
      s1*4 \break
      s1*5 \break
    }
    \new Voice {
      \*2 \music
      \*3 \music
      \*4 \music
      \*5 \music
    }
  >>
}
```

```
\paper {
  indent = 0
  line-width = 140\mm
  ragged-right = ##t
}
```

Vertically aligned dynamics and textscripts

For all `DynamicLineSpanner` objects (i.e., hairpins and dynamic texts), the vertical minimum distance between their reference line and the staff is given by the value in the `staff-padding` property, unless other notation elements forces them to be farther away. Setting this property to a sufficiently large value aligns the dynamics.

The same idea, together with `\textLengthOn`, is used to align text scripts along their baseline.

```

music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = 3
  \textLengthOn
  \override TextScript.staff-padding = 1
  \music
}

```

The image displays two musical staves, each with a treble clef and a common time signature (C). The top staff contains a melody with five measures. The notes and their dynamics are: a half note (p), a half note (f), a half note (p), a half note (f), and a half note (p). The lyrics 'gorgeous fantastic' are placed above the final two measures. The bottom staff is identical to the top one but includes a measure number '4' at the beginning. Both staves show a crescendo from f to p in the fourth measure, indicated by a wedge-shaped line.
